

# CITROËN XSARA

Saloons, Coupés & Estates

August 1998

The Citroën Xsara. Designed to exceed every expectation.

The Citroën Xsara Coupé & Estate. A new dimension to your journey.

Achieve your ideal driving position. Xsara's steering wheel adjusts for height and reach. All four seat belts are also height-adjustable.

A maintenance indicator tells you when your Xsara's next service is due.

Power assisted steering is fitted as standard. Remote controls for the stereo/cassette are mounted on the steering wheel.

For added security, the transponder immobiliser key contains a code which uniquely matches a code in your ignition.

Child safety locks are fitted to all 5-door and Estate models. A warning device indicates when the locks are not activated.

## For long journeys in deep comfort.

The Citroën Xsara is a luxury car with one of the largest and most practical interiors in its class. Xsara combines space, comfort, safety and innovation with all the superb driving dynamics you expect of a Citroën.

The Xsara cockpit is designed to give you complete control. The superb dashboard sweeps around you. Controls fall logically to hand and instruments are crystal clear.

A wide-angled driver's door mirror on all models greatly reduces the driver's blind spot.

Xsara's rear view mirror features both height and tilt adjustments. It ensures optimum rear view vision for every driver, no matter what their height.

## Dedicated to perfection

The Citroën Xsara has been

discreetly packed with the luxuries

of a much larger car. The numerous

stowage compartments, the steering

wheel adjustable in height and

reach and the double adjustment

of the rearview mirror add to the

excellence of comfort. Every aspect

of the Xsara has been built to the

highest standards of strength,

durability and safety.

The automatic wash/wipe on Exclusive models is triggered by rain sensors positioned on the windscreen.

Ring of steel  
Acoustically engineered floor pan

A ring of steel around the cabin, plus Citroën's energy absorbing side-impact protection system make Xsara a safer car. An acoustically engineered floor makes it a quieter car.

The Xsara hatchback has one of the largest boots in its class offering a huge 408 litres of luggage space.

A storage bin between the front seats can accommodate CDs. This is covered by a lid on the Exclusive model.

Electric front windows are standard on SX models and above, and with Electric Pack on X models. Driver's side electric sequential-opening window available on Exclusive models and above.

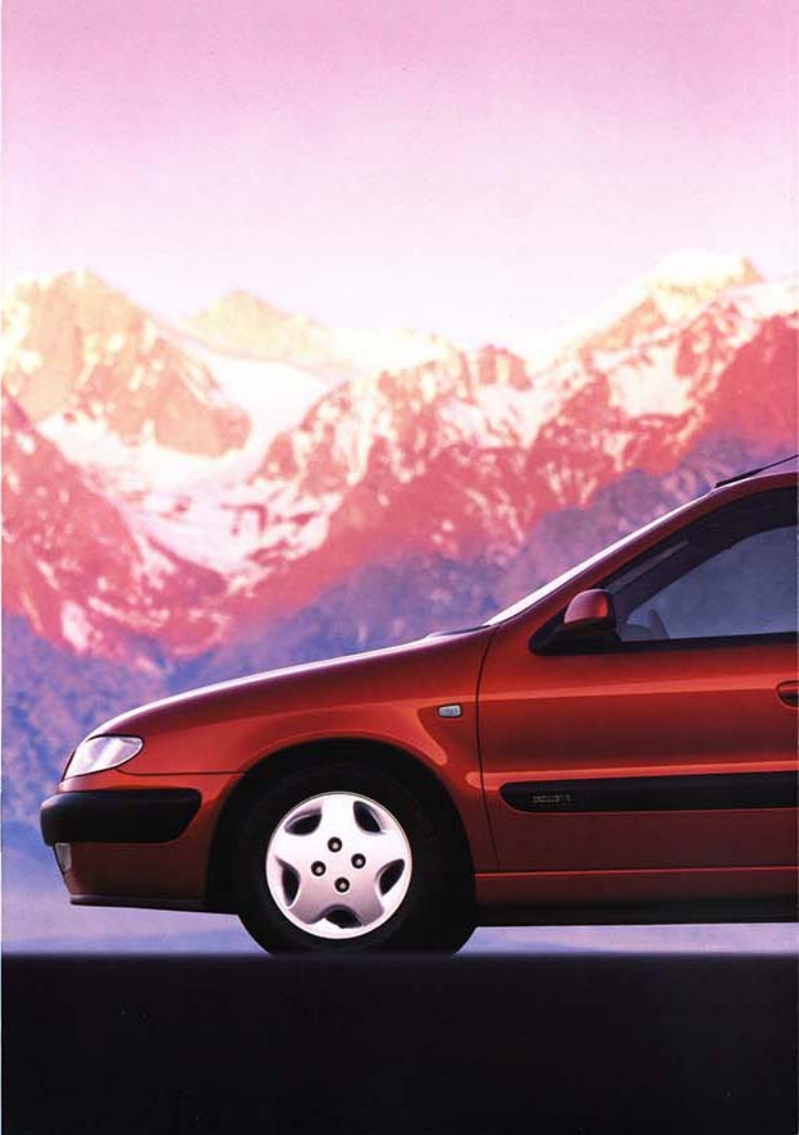

Entrance to the boot from the interior of the car can be prevented by locking the rear seat backrest (coupé and saloon).

Xsara's many ingenious storage areas include compartments with lids which also double as front door armrests.

The Xsara Estate offers a generous 517 litres of boot space and a huge 1.5cu.m. of flat, unobstructed load space when the rear seats are folded down. Split folding rear seats are available on most models and give added flexibility for awkwardly shaped loads while still leaving plenty of space for rear seat passengers.

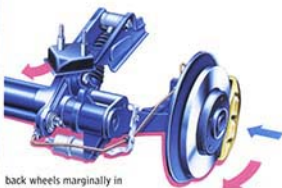

Front seat belts are equipped with pyrotechnic pre-tensioners. In the event of a frontal impact they rewind up to 10cms of slack in the belt, pulling the front seat occupants back into their seats, away from the dashboard. Once the car has stopped, the belt tension is immediately released.

Every Xsara model is equipped with front and rear height-adjustable seat belts for maximum safety and comfort.

A driver's airbag is fitted as standard on VTS and Exclusive. A passenger airbag and lateral airbags are available as cost options throughout the range.

Citroën's renowned programmed rear wheel steering system turns the

back wheels marginally in line with the front when cornering to give you unrivalled comfort and roadholding.

## Imagine what Citroën can do for you

CITROËN is represented in more than 80 countries. In terms of the different road regulations and ratifications particular to each country, the vehicles and their equipment may differ from those detailed in the brochure. These vehicles do not conform to the regulations of certain countries, notably those of the

United States of America, and by consequence they cannot be commercialised or used. CITROËN reserve the right to modify, without prior warning, the technical specifications and the equipment of these vehicles. In order to avoid any misunderstanding, it is recommended that all persons

interested should address all queries to CITROËN, their importers or distributors, concerning any intervening modifications which have occurred since this brochure went to print.
