

# NEW EVEREST

# Ford Everest begins where the road ends.

Beyond the road is where you find some of Australia's most extraordinary destinations. Everest is built to help you discover them all.

## A truly capable SUV is powerfully efficient

Ford Everest's advanced 3.2L Duratorq Diesel delivers 470Nm of pulling power, and up to 1,100km from one tank\*.

### Rise above the challenge

Unexpected obstacles inevitably feature in any exciting off-road adventure. That's why Everest is built to wade deeper than any SUV in its class, up to 800mm<sup>†</sup>. Combine this with an impressive 225mm ground clearance and you'll stay on top of things.

### Electronically Adapt To Any Terrain

Everest's innovative Terrain Management System (TMS) helps you tackle any surface, on-road or off, at the turn of a dial. Simply engage your preferred setting to optimise traction and stability for maximum grip and control. Sand, snow/mud/grass or rock – whatever is in front of you, Everest will take it on.

### Descend with Confidence

When descending a difficult gradient, activate Everest's Hill Descent Control system that automatically brakes the vehicle to take you downhill at a controlled and steady pace. This lets you concentrate on placing your Everest exactly where you want it.

### Spontaneous off-roading encouraged

When you get that urge for off-roading just select the low-range setting and you're ready to go. With technologies like Electronic Locking Rear Differential and Active Transfer Case you can enjoy ultimate grip and traction as well as full engine torque on both rear wheels, even if one wheel is off the ground.

### Go on, take it with you

With a commanding 3,000kg<sup>‡</sup> capacity, you can tow your boat or even your accommodation, anywhere the road leads you.

### It's athletic on the road too

Everest may be a serious off-road SUV, but its handling and stability on the open road is pure driving pleasure. Unlike rigid systems, the Everest's superior Watt's Linkage Suspension delivers superior stability and handling, along with maximum comfort.

### Exceptional control in the curves

Curve Control technology is designed to maximise security on winding roads, by monitoring and reducing your speed should you enter a corner too quickly. Partnered with Advanced Traction Control, Dynamic Stability Control, and Roll Stability Control systems, Everest inspires confidence on the open road.

The Everest consumer brochure contains images of the overseas Everest model. Some differences between the Australian and overseas model may exist. <sup>†</sup>Maintaining a steady speed of not more than 7km/hr.

\*7.0L/100km, ADR 81/02 (extra urban cycle). Actual fuel consumption may vary.

<sup>‡</sup>Maximum towing capacity when using a Genuine Ford tow pack. Subject to State and Territory regulations.

# Make Everest perfect for you.

Stamp your personality on your new Everest. From increased utility to extra protection from the elements, the choice is yours.

# Technology that's Innovative, Integrated and Intuitive.

Technology is at its best when it enhances an experience. And when it just, works. Everest is packed with clever technology just like this. Prepare to be surprised.

## Keep your eyes on the adventure ahead

SYNC™ voice activation system is all ears. Call family and friends just by saying their name. Ask it to read out incoming texts\*. Play your music the way you like. You can even stay on track with voice-controlled GPS™ navigation through an 8" colour touch screen. All while your hands stay safely on the wheel, and your eyes on whatever lies ahead.

## Who said an SUV can't be city friendly?

Even when parking is tight, Active Park Assist\* technology can help you find one. Then watch in amazement as the wheel turns automatically to guide you easily into it. All you have to do is control the accelerator and brake. This is innovation at its best.

## Genuine towing ability

This genuine Ford tow pack has been purpose designed for Everest, and rigorously tested to meet stringent Ford engineering standards. When fitted, Everest has a maximum braked towing capacity of 3,000Kg\*.

## When form meets function

Designed to stylishly integrate with Everest's front bumper, the nudge bar enhances protection against minor impacts to the bumper and radiator.

## For when you bring the outdoors in

These plush carpet mats add a stylish touch to the Everest interior, and are a perfect fit for when you bring the outdoors in.

## BLIS can see what you can't

Blind Spot Information System\*<sup>o</sup> (BLIS) is your second set of eyes. When changing lanes, indicator lights in your side mirrors let you know if there's a vehicle in your blind spot. So you can see what you can't see. Cross-traffic Alert also notifies you of traffic coming from either direction when reversing out of a parking spot or driveway.

## It can monitor the road ahead

If you're distracted, you could unintentionally drift into the next lane without indicating. Lane Departure Warning<sup>-1</sup> system uses a forward-facing camera to read road markings, so it can sense if you've drifted off course. At first it will alert you by vibrating the steering wheel, but if you continue to drift, Lane Keeping Aid technology can apply steering assistance to help guide you back to where you should be.

## Set your speed, keep your distance

Adaptive Cruise Control with Collision Warning<sup>~∞</sup> can help you keep your distance from the traffic in front. If it senses slow moving traffic, it slows down. When the traffic clears it goes back to your pre-set speed, or maintains a pre-set distance from the car in front. It can even detect the potential for an accident to occur and alert you with a brake light warning on your windscreen and precharges your brakes.

\*Subject to State and Territory regulations. <sup>o</sup>Standard on Titanium, optional on Trend model. <sup>1</sup>Standard on Titanium model. <sup>~∞</sup>Standard on Trend and Titanium models.

<sup>o</sup> Local laws may prohibit some or all of the text messaging functions while driving. Check your local road rules before using these functions.

<sup>1</sup> Driver-assistance features are supplemental and do not replace the driver's judgement. Uses sensors. Designed to operate at speeds over 65 km/h on multi-lane roads with clearly visible lane markings.

<sup>~∞</sup> May help avoid or minimise impact of a collision. It is not a substitute for driver alertness. Function may not operate in some driving and road conditions or adverse weather.

<sup>o</sup> Driver-assistance features are supplemental and do not replace the driver's judgement. Designed to operate at speeds above 10km/hr.

**Convenience and flexibility at your fingertips**

Everest can quickly and effortlessly adapt to your needs. Whether it's people or luggage, Everest makes it easy to find some extra space with seven seats as standard, plus split-fold 2nd and 3rd rows. Titanium models go even further. With the touch of a button you can electrically fold the 3rd row into the floor, or open and close the Power Tailgate.

Overseas model shown. Beige interior will not be available in Australia.

**Expand your view of the world**

It's nice when you can appreciate the great outdoors even when indoors. The electronic panoramic roof\*, taking almost 50% of the space, means you can experience nature's best at the touch of a button.

**Travel first class, even in the harshest conditions**

As this Everest effortlessly deals with the harsh terrain below, you're surrounded by luxurious finishes in a cabin flooded with natural light from above.
