

CALIBRA.

The new, fully imported Holden Calibra range has inherited everything desirable in a classic European coupe, while adding individual style with an enviable level of luxury and safety features. These include the life-saving technology of a driver's airbag, and the excellent control of Anti-lock Braking (ABS) with Independent Rear Suspension (IRS).

All standard.

NEW HOLDEN

CALIBRA.

On the inside beats a very healthy 2.0 litre fuel injected 16 valve engine developing 110kW of high performance power.

There's also an electronically controlled 4-speed automatic, matched to a single overhead cam engine producing an impressive 85kW.

CALIBRA

TURBO 4X4

Everything you could desire in a genuine sports coupe is standard.

Power windows, central locking, CFC-free air conditioning with a pollen filter, eight speaker-element stereo sound system with CD input facility, electric sunroof, right down to sporty alloy wheels and a sophisticated anti-theft alarm.

NEW HOLDEN CALIBRA TURBO 4X4.

A THOROUGHbred AT HEART.

Unless you've been privileged enough to drive some of Europe's exotic sports cars, nothing will have prepared you for the experience of driving this ultimate Calibra.

With a 0-100km/h time of 6.8 seconds, the Calibra Turbo 4x4 is in rare company indeed.

At the heart of this high performance thoroughbred is an innovative 2 litre 16 valve engine with integral water cooled turbocharger and compressor intercooler.

A close ratio 6-speed gearbox ensures you enjoy a constant band of power with instant engine response and no hint of turbo lag.

While the permanent 4-wheel drive acts intelligently to get the incredible amounts of engine torque to the road.

For superb control in an emergency there's a four channel four wheel disc Anti-lock Braking System (ABS) and Independent Rear Suspension (IRS).
