# THE FREEDOM TO VENTURE FURTHER

Believing that nothing is out of reach elicits an empowering sense of liberation. The moment you step into the Lexus LX 570, such a feeling is brought quickly into focus. The LX 570's abundance of power devours the kilometres, while sophisticated AWD systems take you beyond the thresholds of conventional luxury vehicles. Venture to places where mirror lakes sparkle, up icy trails to catch the powder snow, or journey to that cabin in the mountains that affords you respite from this high speed world.

# ACCEPT NO LIMITS

There are those who refuse to accept obstacles, in business and in life. Achieving one's goals means overcoming every challenge and never saying "No". Once ensconced within the Lexus LX 570, such ideals become reality, as you are free to go wherever you please without reservation. Lexus has taken luxury to extremes, with levels of comfort and interior appointments befitting a true luxury car, allowing you to escape civilisation, in a most civilised manner.

# CLIMB EVERY MOUNTAIN

Sitting in the driver's seat of the LX 570 is an empowering position. Wherever you venture, advanced technologies willingly adapt the ride to suit undulating terrain. Should you prefer to take matters into your own hands, you can tailor the ride height, enhance traction when conditions turn slippery and optimise hill climbing or descending capabilities. Equally stimulating are the 19-speaker audio system and the rear seat entertainment system, which are simply a part of the comprehensive portfolio of technologies intent on inspiring your mind.

# PURSuing A NEW DEFINITION OF LUXURY

In the mid 1980s a team of passionate designers embarked on a remarkable journey. They travelled to America and integrated themselves into an exclusive neighbourhood to better understand the intricacies of privileged lifestyles.

Designers visited upscale boutiques and exclusive country clubs to discover the true essence of western style and to learn what luxury vehicle buyers really wanted. They observed how a new definition of luxury was permeating American society. Wealth had filtered down into younger hands, and with it came a more simplistic sense of style and sophistication. Fashion, design and architecture were being reshaped by these younger, more affluent professionals who were also turning their backs on conventional luxury vehicles, seeking a more rewarding driving experience.

At the same time, Lexus sent design teams to the French Riviera to gain a sense of European elegance, class and culture. Such a fact finding mission was followed by one of the most extensive development programs ever undertaken by a motor vehicle company. The end result was the Lexus LS 400, a vehicle so extraordinary, it ultimately redirected the course of luxury vehicle design, elegance and performance.

During the early 80s, another cultural shift was occurring. More adventurous individuals no longer wanted to be confined to urban streets, yet craved more comfort and sophistication than the military-derived monsters of the times could offer. Lexus set about creating a very different AWD vehicle. What emerged in 1995 was the LX 450, an SUV which felt equally at home in the high street and on the high trails. With its supple ride and premium audio system, it offered comforts more akin to a limousine, while its off road capabilities unlocked spectacular landscapes previously off limits for luxury vehicles.

Today, the Lexus commitment to ground breaking design and forward thinking has forged ahead into bold new territory. One of the more recent reminders has been the unveiling of the LF-CC coupe concept at the Paris Motor Show. The LF-CC serves as a glimpse into the Lexus vehicle of tomorrow, exposing the vibrant new personality of Lexus through its breathtaking, aerodynamic design. Its new generation hybrid power plant unleashes performance worthy of a true sports coupe, while setting new benchmarks for higher efficiency and lower emissions.

# EXTREME ADVENTURE IN EXTREME COMFORT

INTRODUCING THE LX 570

You have your passions. We have ours, namely, to exceed the known limits of engineering and push conventional boundaries, to create luxury beyond what was thought possible. Now Lexus seeks to share this passion with you.

Our vision was to create a vehicle capable of satisfying the wishes of the driver, while providing the ultimate in comfort for all its occupants. The LX 570 has always been capable of taking on challenging terrain, yet being unequivocally a Lexus, it must also cushion its occupants from the harsh realities of such environments.

Before looking into the LX 570, it is worth looking into the mind of Hideki Watanabe, the Chief Engineer responsible for creating this extraordinary vehicle.

"I wanted it to be the most capable vehicle we have ever produced, while maintaining the ride comfort expected of our flagship Lexus luxury sedans."

Even before you step inside, the passion of Lexus designers becomes abundantly clear. The latest expression of L-finesse, the uniquely-Lexus design language, has imparted a dynamic elegance and refinement to the LX 570. Yet it's not only the visual persona on the outside which has moved ahead. As you look out from within, advanced technologies afford an expansive view of what is happening ahead, behind and alongside the vehicle.

Those who crave the stimulation of the wide open spaces can now get there in the comfort of an equally spacious and

well-appointed vehicle. The LX 570 has been built to take on the rocky trails of the Australian outback, the steep sandhills of the Middle East and the snow covered slopes of the European Alps in utmost comfort.

The Lexus LX 570 will excite, invigorate and inspire you to take your adventures to new levels. Come on a journey to explore the inner reaches of the Lexus LX 570.

# A DESIGN THAT TRIGGERS THE EMOTIONS

---

## STYLE AND DESIGN

---

As much as the LX 570 resets benchmarks in all-terrain performance, so too Lexus designers are intent on keeping the vehicle's styling at the forefront of the luxury SUV category. L-finesse design has evolved to become bolder, more dynamic and, we're sure you'll agree, simply stunning.

The geometric structure of the spindle-shaped grille immediately captures the eye. Powerful headlights not only look distinctive, they incorporate Bi-HID+ Halogen High Beam Headlamps which are redirected around corners by an intelligent Adaptive Front-lighting System (AFS). LED Daytime Running Lights (DRL) shaped into an arrowhead design provide the finishing touch.

Elegant contours sculpted into the power-operated upper tailgate add sophistication, enhanced by a rear bumper design incorporating a stainless moulding. Tail lamps with clear turn signal lenses feature striking L-shaped LED character lines which sweep across the lens.

A sophisticated 20" alloy wheel design complements this dynamic look. You have the option of further personalising your LX with distinctive 18" alloy wheels included in the Enhancement Pack.

Then as you take a step back to admire its lines, the prevailing feeling is how this latest refinement of L-finesse design reaffirms the LX 570's status as the pre-eminent luxury 4WD.

---

# WELCOME TO THE GREAT INDOORS

## STYLE AND DESIGN

Traversing rugged terrain is best enjoyed within a refined interior. It is here you'll discover a more tactile side to L-finesse design, as its ergonomic layout and sumptuous comforts pamper you throughout every journey.

As you step into the cabin, touch the memory button and your bespoke settings for the 10-way power driver's seat, steering wheel angle and mirror settings are instantly recalled. Similarly, at journey's end the driver's seat automatically slides away the moment you switch off the ignition or unbuckle your seat belt, for easier entry and exit.

Second row seating has power slide functionality, while power operation of the third row lets you fold down or stow the seats at the touch of a button, extending the cabin to a full eight-seat capacity. When you raise the third row seating up again, you open up an abundance of cargo space.

The interior design treatment is very much a synthesis of function and fashion. The use of silver metallic finishes and chrome plated mouldings on the centre cluster and instrument panel adds structure and style. Such crisp finishes form a contrast with the tactile softness of materials you'll feel closer to your skin. Lexus designers have also considered the manner in which you drive, so ergonomic placement of critical controls ensures they are within easy reach for when conditions become challenging. Even the materials selected for the premium steering wheel give an added sense of confidence as your hands grip the wheel in readiness for the journey ahead.

Beneath the surface lie hidden comforts. During those winter escapes to the snowfields, you'll appreciate the heated front seats. The Enhancement Pack gives you heated and ventilated front seats for all seasons comfort, while the outer seats in the second row are also heated. When conditions turn hot and steamy, simply reach into the refrigerated cool box in the centre console for a cool drink.

The Enhancement Pack takes luxury and performance even further, with a rich mahogany woodgrain steering wheel and shift lever, and the reassurance of Active Cruise Control (ACC). In addition, Paddle shifters behind the wheel allow you to make sequential shifts with the precise control of a manual transmission.

# FEEL COMFORTED AND CONNECTED

## TECHNOLOGY

The LX 570 offers a reassuring sense of space and serenity reflecting the uniquely Japanese concept of 'Ometenashi'; the spirit of selfless hospitality. It begins the moment you approach the vehicle carrying your Smart Key Card as LED lighting lays a welcoming path of light to your door.

Your Smart Key Card also allows you to open doors and the power upper tailgate, and start the engine. Lexus engineers have thoughtfully placed a 3.5" Multi Information Display (MID) within the instrument panel. MID keeps you informed of vital trip data, off-road settings and your road surface selection, there's even a turn-by-turn display.

Take hold of the premium steering wheel, touch the controls to adjust audio levels or make a phone call, then view information on the Multi Information Display (MID). For greater ease, a switch activates voice recognition letting you make a phone call or plot your route via spoken commands. The Enhancement Pack includes Radar Active Cruise Control (ACC)<sup>(4)</sup> to help you maintain a safe following distance from traffic ahead.

A power-operated Moonroof lets the exhilaration of the great outdoors inside. There is also a 4-zone independent climate control system which offers personalised comfort whatever the conditions.

Satellite Navigation<sup>(5)</sup> maps appear on the 8" Electro Multi Vision (EMV) screen, while spoken directions help guide you to your destination. The EMV also displays audio settings,

clearance and reverse parking sonars,<sup>(2)</sup> Bluetooth<sup>®(6)</sup> hands-free calling information, images from the Rear View Camera (RVC)<sup>(2)</sup> and much more in crisp, vivid colour.

The stunning Mark Levinson<sup>®</sup> 19-speaker audio system immerses you in 450W of crystal clear surround sound. It incorporates an MP3/WMA compatible DVD player,<sup>(7)</sup> Bluetooth<sup>®(6)</sup> compatibility, USB<sup>(7)</sup> and iPod<sup>®(8)</sup> connectivity. Your passengers are indulged by a Rear Seat Entertainment System with seatback mounted screens and cordless headphones, for a home cinema-style experience away from home.

Come nightfall, Automatic High Beam (AHB)<sup>(9)</sup> technology can detect oncoming vehicles and dip the high beams automatically, while electrochromatic interior and exterior mirrors reduce the annoyance of following headlights behind you.

# POWER WITH PANACHE

## ENGINE

Power isn't simply about function, it's about passion. It's the adrenalin that energises your thirst for adventure. It gives you the confidence to tackle terrain which may have been previously out of mind, and for the average four wheel drive vehicle, out of reach. Rest assured, beneath the luxury and comfort beats the heart of a seriously equipped 4WD vehicle.

The 5.7 litre alloy, quad cam V8 engine is equipped with sophisticated technologies, including dual Variable Valve Timing with Intelligence (VVT-i) which continually retunes valve timing to suit changes in engine speed. So it quenches your penchant for exploring steep alpine trails

while ensuring enhanced fuel economy on the highway. Maximum power is unleashed at modest engine speeds ensuring relaxed, refined motoring and the ability to tackle rocky trails with ease.

All this response is rendered more manageable by an intelligent 6-speed sequential transmission. It is equipped with Artificial Intelligence (AI) shift technology which anticipates the correct gear in advance preventing unnecessary upshifts, for increased climbing capabilities. On steep descents, AI shift selects the correct ratio sooner to provide increased engine braking for added control.

In extreme off-road conditions, the centre differential lets you lock up and equalise the power delivered to the front and rear wheels, while ensuring agile steering and optimum traction of all four wheels. Should you require greater pulling power in sand, mud or snow, simply touch the transfer switch on the console for greater response.

Such reserves of power also provide you with the ability to tow 3500kg.<sup>(12)</sup> Off-road technologies enhance traction on slippery boat ramps, while automatic vehicle height adjustment maintains the vehicle's posture when towing heavy trailers.

# THE EXHILARATION OF ADVENTURE

---

## 4WD

---

Behind the wheel of the LX 570, you're ready to go beyond the limits of a conventional SUV. Which is why Lexus engineers have equipped the LX with sophisticated driving assist technologies that deal with unforeseen challenges, often leaving you blissfully unaware of what's happening.

Suppose you're on a forest trail that changes from loose gravel to deep mud. Flick the Multi Terrain Select (MTS) switch, select the road surface, then MTS tailors the vehicle's driving wheels to suit five different types of terrain.

Extra control often demands expansive vision. Touch the Multi-Terrain Monitor<sup>(10)</sup> switch on the console to activate four Cameras<sup>(2)</sup> displaying the front and side views independently on the Electro Multi Vision (EMV) screen, helping you avoid obstacles outside your normal field of vision.

When negotiating deep ruts, knowing the position of your steering wheel is vital. Simply select 'steering wheel angle' on the Multi Information Display (MID) to keep watch over the direction of the front wheels. Variable Gear Ratio Steering (VGRS) tailors steering effort to vehicle speed for maximum assistance on challenging terrain, then precise turning on highways.

On undulating surfaces, touch the Active Height Control (AHC) switch for added clearance, then view the ride height relative to the terrain on the MID. When driving off road, concentrating on your driving and staying in control can be a chore. Crawl Control<sup>(11)</sup> lets you select your preferred speed, then the vehicle maintains that speed automatically. The technology even incorporates a turn assist function which enhances driveability on tight corners.

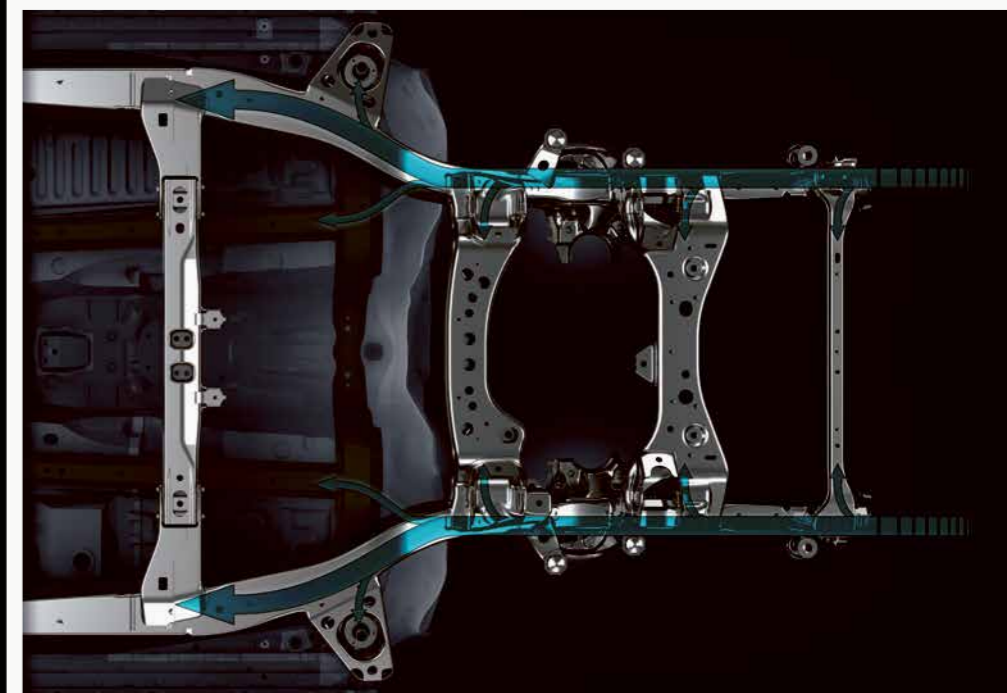

Adaptive Variable Suspension (AVS) responds intuitively to changing road conditions, reducing body roll by applying increased damping force to selected shock absorbers while cornering. This helps keep all four wheels firmly on unpredictable road surfaces.

In slippery conditions, Active Traction Control (TRC) improves grip. Hill-start Assist Control (HAC) prevents the vehicle rolling backwards during hill starts. Adaptive Variable Suspension (AVS) senses the driving conditions and tailors the ride accordingly, ensuring added comfort on rough roads and greater stability on highways by varying the damping force applied to each shock absorber independently.

Damping Force Control intelligently tailors ride quality to suit changes in the road surface, making it softer during city driving, then during braking or cornering, anti-dive control firms up the ride for better composure and grip. At higher speeds, Vehicle Speed Sensing Control firms up the ride for greater stability, while under hard acceleration, Anti-Squat Control maintains the vehicle's posture.

When you need to stop, large 340mm diameter front disks with 4-piston calipers supplemented by 345mm rear discs ensure effective stopping performance even after repeated use.

---

Overseas LX 570 model with Enhancement Pack shown

# STRENGTH OF CHARACTER

## SAFETY

As you venture along roads and off roads less travelled, you'll feel a reassuring sense of contentment knowing how far Lexus engineers have gone in implementing a comprehensive portfolio of safety initiatives.

They began with a total of 10 SRS airbags offering protection for occupants in all three rows. Dual front airbags and knee airbags offer front impact protection, whilst seat-mounted side airbags reduce the risk of injuries from side impact. There are also second row outer seat-mounted side airbags and curtain shield airbags offering side impact protection.

Whiplash Injury Lessening front seats (WIL) incorporate active headrests, which can detect movement of the occupants' hips and push upward to help alleviate impact on the neck area in the event of a collision.

High tensile steel has been strategically placed in areas including the centre pillar, floor, roof and rocker panel areas to provide increased lateral rigidity for superior handling and collision protection, while the whole cabin structure has been engineered for greater protection from side impacts.

Since your penchant for adventure may lead you into some challenging situations, Lexus engineers have included a wealth of precautionary technologies for greater safety.

Imagine you've suddenly applied the brakes on loose gravel while steering around an obstacle. The Multi-Terrain Anti-lock Braking System (ABS) tailors the braking applied to each wheel for safer, more directional stopping by using road surface detection logic, engine output information and readings from the acceleration sensor.

Multi-Terrain ABS works together with Brake Assist (BA) which can sense emergency stopping situations, then supplement your braking effort. During emergency braking above 55km/h, LED brake lights flash repeatedly to alert following drivers of your sudden action, helping avoid rear-end collisions.

Vehicle Stability Control (VSC) works together with the ABS, Active Traction Control (A-TRC) and throttle output to help correct a slide on slippery surfaces. VSC can be de-activated at the flick of a switch.

Since added visibility means enhanced safety, the LX 570 is equipped with four cameras to help you avoid objects obscured

from your normal line of vision. Cameras<sup>(1)</sup> fitted to both exterior mirrors show you what's around the left and right tyres simultaneously, supplemented by vehicle width indicator lines. When reversing, the Electro Multi Vision (EMV) screen displays whatever lies behind the tailgate, supplemented by Rear Guide Assist (RGA)<sup>(2)</sup> distance indicators. Clearance and reversing sonars<sup>(2)</sup> front and rear provide added assistance when reversing and parking. To help drivers see you, a one-touch indicator function illuminates the turn indicators when changing lanes.

The Enhancement Pack takes safety even further. A Pre-Collision Safety System (PCS)<sup>(3)</sup> watches the road ahead using a millimetre wave radar sensor in the front grille. If the PCS<sup>(3)</sup> detects an unavoidable collision, Pre-Collision Seatbelts are activated whilst Pre-Collision Brake Assist supplements your braking effort to help reduce the force of the impact. PCS<sup>(3)</sup> also integrates with the Adaptive Variable System (AVS) to maintain vehicle posture.

Lexus has even incorporated some advanced theft deterrents. An anti-theft intrusion sensor, glass shatter sensor, a self-powered siren and an electric steering lock incorporated into the push button start mechanism all work together to help keep your vehicle secure.

# INDULGENCE COMES AS STANDARD

## LX 570

Lexus designers are obsessed about getting the most out of life and believe most LX 570 drivers prefer to be fully prepared for whatever may come their way. Which is why they have equipped the LX 570 with an abundance of luxury appointments, safety inclusions and off-road technologies, all included as standard.

### LX 570

- 5.7 litre quad cam V8 engine
- Vehicle Stability Control (VSC) with Active Traction Control (A-TRC)
- Adaptive Variable Suspension (AVS)
- Active Height Control (AHC)
- Variable Gear Ratio Steering (VGRS)
- Multi Terrain Select (MTS)
- 10 SRS Airbags
- Smart Key Card Entry with smart push button start
- Bi-HID+ Halogen High Beam Headlamps with LED Daytime Running Lights
- Adaptive Front Lighting System (AFS)
- Automatic High Beam (AHB)<sup>(9)</sup>
- Electrochromatic exterior and interior mirrors
- Cameras<sup>(1)</sup> in both exterior mirrors and front grille
- Rear View Camera (RVC)<sup>(2)</sup> with Rear Guide Assist (RGA)<sup>(2)</sup>
- Hill-start Assist Control (HAC)
- Multi-Terrain Anti-lock Braking System (ABS)
- 20" alloy wheels
- 4-zone Independent Climate Control
- Cool Box
- Heated front seats
- Moonroof
- 19-Speaker 450W Mark Levinson Audio<sup>®</sup> with USB connection<sup>(7)</sup> and DVD player
- Satellite Navigation System<sup>(5)</sup>
- Bluetooth<sup>®(6)</sup> compatibility and iPod<sup>®</sup> connectivity<sup>(8)</sup>
- Dual rear seat entertainment screens with three infrared headphones
- Emergency Brake Signal
- Clearance and reverse parking sonars<sup>(2)</sup>

### ENHANCEMENT PACK

- Pre-Collision Safety System (PCS)<sup>(3)</sup>
- Radar Active Cruise Control (ACC)<sup>(4)</sup>
- Paddle shift
- Mahogany woodgrain-look steering wheel
- Heated and ventilated front seats
- Heated second row outer seats

# A SENSE OF STYLE THROUGH COLOUR

## EXTERIOR FINISHES

Colour is a highly emotive force. To capture its power, Lexus designers have assembled a colour palette that enhances the strength and elegance of the Lexus LX 570's L-finesse body design. Some colours soothe, others excite, for deep within the complex finishes, some remarkable effects are at work.

There's the dynamic lustre of pearlescent mica flakes embedded within colours like Mercury Grey, which displays a complex pewter-like tone, adding strength and structure. White Pearl emits a shimmering white glow as luminescent particles immersed deep below the clear coat refract light in a myriad of directions.

Metallic Silk evokes a soothing sheen as metallic particles emit a silky lustre when headlights sweep across the LX 570's flowing curves. Other paint finishes have been formulated to elevate the prestige status of LX. Premium Silver is a metallic that displays a more elegant presence befitting a true prestige vehicle.

Classic Black exudes presence and power, asserting the status of the flagship Lexus SUV. Then there's the haunting effect of Starlight Black. On the surface it appears simply a highly lustrous jet black. Yet deep within the paint coat, tiny glass flakes capture the sun's rays to create highlights and transform the body design's convex curves into muscular contours.

Such finishes reflect the passions of the Lexus painting masters, a clique of talented artisans each uniquely skilled at a range of crafts and disciplines. Craftsmen like Kimihiro Sakakibara, with 28 years dedicated to paint technology, can spot even miniscule blemishes undetectable to the untrained eye. The Lexus design team is also acutely mindful of how colour integrates with design in unlocking the emotive power of the LX 570, to elicit a full spectrum of emotions.

<sup>^</sup>Premium paint featured is an optional extra at additional cost.

# A PASSION FOR SUBSTANCE WITH STYLE

## INTERIOR TRIMS

Your journey begins not on the road, but inside the LX 570's lavishly-equipped interior. Here in an environment which has the ability to inspire your mind and pamper your body whatever your destination.

You are offered a choice of a rich Black, Topaz Brown or a soothing Ivory interior design treatment, whilst the optional Enhancement Pack features the added style of a Mahogany woodgrain steering wheel and shift lever.

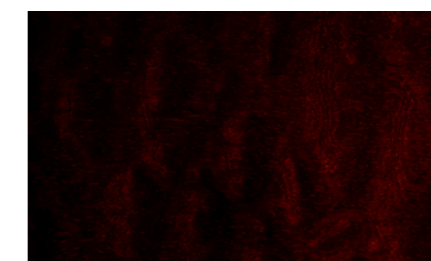

It begins with the very layout of the controls and displays. Lexus designers with a passion for extreme adventure have assigned visual displays to the upper portion of the dash, ensuring easy viewing with little distraction while you drive. Switches and controls are strategically located within easy reach in the lower portion.

With such comfort levels, you'll no doubt want to take extra passengers along for the ride. Seating for eight passengers is made possible by power operated third row seats that descend at the touch of a button, then retract and stow away just as easily for greater cargo space.

Yet beyond rudimentary functions, the emotions have been diligently addressed. The placement of softer trims in regions close to your body, including areas around the side of the console and door trims, instils sensations of comfort and security.

After all, no matter what challenging environments you may seek to explore, it's reassuring to know the environment within the LX 570 affords a sense of peace and tranquillity along the way.

A feeling of opulence with elegance is imparted by Mahogany woodgrain trims on the console and passenger side dash panel.

Mahogany woodgrain

## LX 570 GENERAL SPECIFICATIONS

12V Accessory Socket	•
Premium Steering Wheel with Audio Controls	•
Anti-theft Siren and Intrusion Sensor	•
Emergency Flashing Brake Lights	•
Active Cruise Control (ACC), Pre-Collision safety System (PCS), Paddle Shift, Smart Key Card, Heated and Ventilated Front Seats, Heated Second Row Outer Seats	

# OWNERSHIP SOLUTIONS

OWNERSHIP SOLUTIONS ALLOWS YOU TO DETERMINE YOUR FINANCE COSTS AND KNOW THE GUARANTEED FUTURE VALUE (GFV)\* OF YOUR VEHICLE FROM THE OUTSET. IT OFFERS YOU CHOICE, CONTROL AND CERTAINTY. IN SHORT, EVERYTHING YOU'D EXPECT FROM LEXUS.

## How does Ownership Solutions work?

- You choose the deposit that best fits your needs.
- You choose your term.\*\*
- We agree on the estimated kilometres you think the vehicle will have travelled at the end of the term (the End Odometer). The End Odometer will also include any kilometres already on the vehicle.
- Lexus Financial Services (LFS) then determines the GFV of your vehicle. The GFV is the minimum value of your Lexus at the end of your finance contract. Your monthly repayments are then calculated based on the above information, with a final payment equal to your GFV. Then, if you return your Lexus at the end of the term and satisfy the agreed terms and conditions, LFS will pay you the GFV which will be put against the final payment.

## The end of the term? Simply replace, retain or return.

At the end of your term you can choose to:

- Replace or sell your Lexus using the trade-in value or sale price to pay the remaining balance of your account.
- Retain your Lexus and simply pay the remaining balance of your account (including final payment).
- Alternatively, return your Lexus and, subject to fair wear and tear conditions and the agreed kilometres being met, we'll put the GFV towards the final payment on your account.

## Choosing your deposit – what is best for you?

With the flexibility of Ownership Solutions, you can choose the deposit that best fits your current needs.

- If, for example, you have funds tied up in other investments, you can choose to finance your new Lexus with a zero deposit.\*\*
- Alternatively, by using a larger deposit you can lower your monthly repayments.
- Better still, compared to other finance options over a similar term, Ownership Solutions can provide more affordable monthly repayments.\*\*\*

## Want more certainty?

With Ownership Solutions you've got the reassurance that at the end of the term (subject to fair wear and tear and agreed kilometres being met) you'll never owe more than your vehicle's worth to LFS. In other words, you don't have to worry about what your vehicle will be worth in the future because you know its minimum value from the outset.

## What happens in the case of the unexpected?

If your vehicle incurs damage and does not meet the Fair Wear and Tear guidelines, LFS will give you the opportunity to have your vehicle repaired. Otherwise, LFS can organise the repairs and deduct the cost from your GFV. This adjusted GFV will then be the price that LFS will offer you if you return the vehicle at the end of your term. Of course, if you retain the vehicle, the condition doesn't matter, however, if you replace it or sell it privately the condition will obviously impact your sale price.

## So what does your accountant think?

Naturally, we think Ownership Solutions is an excellent, innovative way to put you in control of buying a new Lexus. That said, we suggest you seek independent advice to ensure Ownership Solutions is right for you.

## Wouldn't it be great if Ownership Solutions was just the beginning?

Lexus' innovations and commitment to customer service extend well beyond Ownership Solutions. Once you purchase a new Lexus, you'll become a member of the Lexus Encore Privileges programme and enjoy a host of exclusive benefits.†

For further details, simply visit your nearest Lexus dealer or see [lexus.com.au/services/benefits](https://lexus.com.au/services/benefits) for details.

\* Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Lexus at the end of your finance contract, as determined by Lexus Financial Services (LFS). If you decide to return your car to Lexus at the end of your term, LFS will pay you the agreed GFV amount which will be put against your final payment, subject to fair wear and tear conditions and agreed kilometres being met. The information provided is general in nature. You should seek your own financial advice to determine whether Lexus Ownership Solutions is appropriate for your individual circumstances. Terms and conditions, fees and charges apply. Lexus Ownership Solutions GFV products are available to approved customers of Lexus Financial Services, a division of Toyota Finance Australia Limited ABN 48 002 435 181, Australian Credit Licence 392536.

\*\* Up to four years.

\*\*\* Lower monthly repayments compared to similar term with no Guaranteed Future Value (GFV) or equivalent balloon final payment. Total interest charges will be higher if a GFV or balloon final payment is selected.

† Terms and Conditions apply.

# THE BENEFITS OF ENCORE

THE BENEFITS OF BEING A LEXUS OWNER GO FAR BEYOND THE INTRINSIC PLEASURE OF DRIVING THE VEHICLE. FROM THE MOMENT YOU'RE HANDED THE KEYS, YOU'LL ALSO BE WELCOMED TO THE LEXUS ENCORE PRIVILEGES PROGRAMME<sup>†</sup> - A RANGE OF EXCLUSIVE INITIATIVES THAT REAFFIRM OUR ONGOING PURSUIT OF PERFECTION.

It all means you'll enter a world of benefits that extends to every corner of life. A world where everything's just that much easier and works that much more seamlessly. And a world where, should trouble ever find you, you can always find a helping hand.

Take our After Sales Service as an example. Both our technology and our technicians are at the forefront of automotive innovation. And our profound understanding of every single component of your Lexus means we can do more to ensure it's a pleasure to drive today, and in the long run.

It's a world you've always belonged in. A privilege unique to Lexus drivers.

## Silver service

Every aspect of your Lexus is built around your comfort and convenience, so it's fitting that when it's ready for a service, we'll come and pick it up from you and provide you with a complimentary loan car while we're inspecting. Plus, when we return your Lexus, it will have received a complimentary wash and interior vacuum.

## Experience Lexus outside your vehicle

We're constantly striving to enhance the Lexus ownership experience. It's what we're known for. Our luxury events will be the perfect way to experience the Lexus lifestyle and network with other owners. Tickets may be limited, so be quick to secure your place.

## Peace of mind

Wherever you are and whatever you're doing, you can relax because with our Encore Privileges programme, you have the 24-hour support of Lexus Drive Care. We'll look after your car and, just as importantly, we'll look after you and your passengers.

## Well read

You can stay abreast of all things Lexus from the comfort of your own home, with our Lexus Magazine delivered right to your door. It'll keep you updated on all aspects of luxury living and covers everything you need to know about the cars that are leading the world.

See [lexus.com.au/services/benefits](https://lexus.com.au/services/benefits) for details.

<sup>†</sup> Terms and Conditions apply.

**IMPORTANT NOTICE – please read:** Lexus Australia uses its best endeavours to ensure this material is correct when published. You must check with your authorised Lexus dealer when ordering to ensure the vehicle with your chosen specifications, equipment and colour is available and that the vehicle can be delivered within the time frame suitable to you. When ordering accessories, you must check with your authorised Lexus dealer to ensure the accessory's design, features and colours are available and will fit your vehicle. Please also consider the mass of your load to ensure you will not exceed the maximum allowable individual axle capacity, Gross Vehicle Mass and/or Gross Combined Mass of the vehicle. Refer to [lexus.com.au](http://lexus.com.au) for further details. Colours displayed here are a guide only and may vary from actual colours due to printing/display processes. Certain accessories when fitted will require the removal of standard equipment. Standard equipment may be retained by Lexus Australia. Lexus Australia reserves the right to change, without notice, at any time, prices, colours, materials, equipment, specifications and discontinue colours/models. To the extent permitted by law, Lexus Australia will not be liable for any damage, loss or expense incurred as a result of reliance on this material in any way. Distributed nationally by Lexus Australia ABN 64 009 686 097, 155 Bertie St, Port Melbourne, Vic 3207. VALID: L3063-3. PRINTED: SEPTEMBER 2014. LX0016.

**THIS BOOK IS PRINTED ON GREEN PAPER**

The Lexus book you are reading has been produced using HannoArt Satin. A premium coated paper representing a level of craftsmanship that is without peer. This environmentally responsible paper is manufactured using low environmental impact FSC® certified pulp and is certified carbon neutral by The Carbon Reduction Institute. ^ Sappi, the manufacturers of HannoArt, place high importance on delivering an environmental and sustainable operation. They operate under world's best practice ISO 14001 EMS and EMAS certification and eliminate harmful by-products by using Totally Chlorine Free (TCF) pulp. HannoArt is archival, so like our vehicles it's made to stand the test of time.

As a company that strives to lessen its impact on the environment in every way possible, Lexus believes that choosing our paper wisely is one more step we can take in preserving our planet.

^Calculations encompass carbon emissions from seedling to printer. For full details please visit [www.kwdoggett.com.au](http://www.kwdoggett.com.au)
