

The LX 570

 LEXUS
The Pursuit of Perfection

The pursuit of perfection.

Our painstakingly diligent, highly-dedicated technicians, engineers and designers devote their working lives to delivering you a seamless balance between our subtle Japanese design philosophy and exhilarating driving performance. The result is automotive excellence that's ahead of our competition, ahead of its time, and ahead of anything else you've ever driven.

We never stop thinking. Or questioning. The next step, the next innovation, the next revolution in luxury vehicles is what drives us forward. Along the way, we consistently improve and refine our techniques and advance our bespoke technologies.

We are never content with mere achievement - we are continually pursuing perfection, ensuring that every Lexus we craft embodies this same pioneering spirit.

A fusion of fresh ideas.

An all-encompassing devotion to innovation is what sets Japanese technology apart. An intricate, scrupulous, painstaking attention to what could be perceived as insignificant details.

only truly be enjoyed by those who understand its worth, and appreciate its depth. A luxury you don't see, hear or touch, but feel.

It's what allows Lexus to create a new kind of luxury - one that isn't bought or owned, but earned and experienced. A luxury that can

A luxury that fuses the best human driving experience, with some of the world's most perfect driving technology.

Automotive equilibrium.

Every Lexus consists of two clearly distinct but inextricably intertwined elements - 'leading edge' and 'finesse'. We call it, 'L finesse'. It's a uniquely Japanese design philosophy, and it's inherent in everything we do.

We can only compare it to the unflinching devotion and eternal patience that's been applied to the creation of Zen gardens across Japan since ancient times. Every line, every curve is drawn with utmost care, in a continuing search for harmonious beauty. Generations

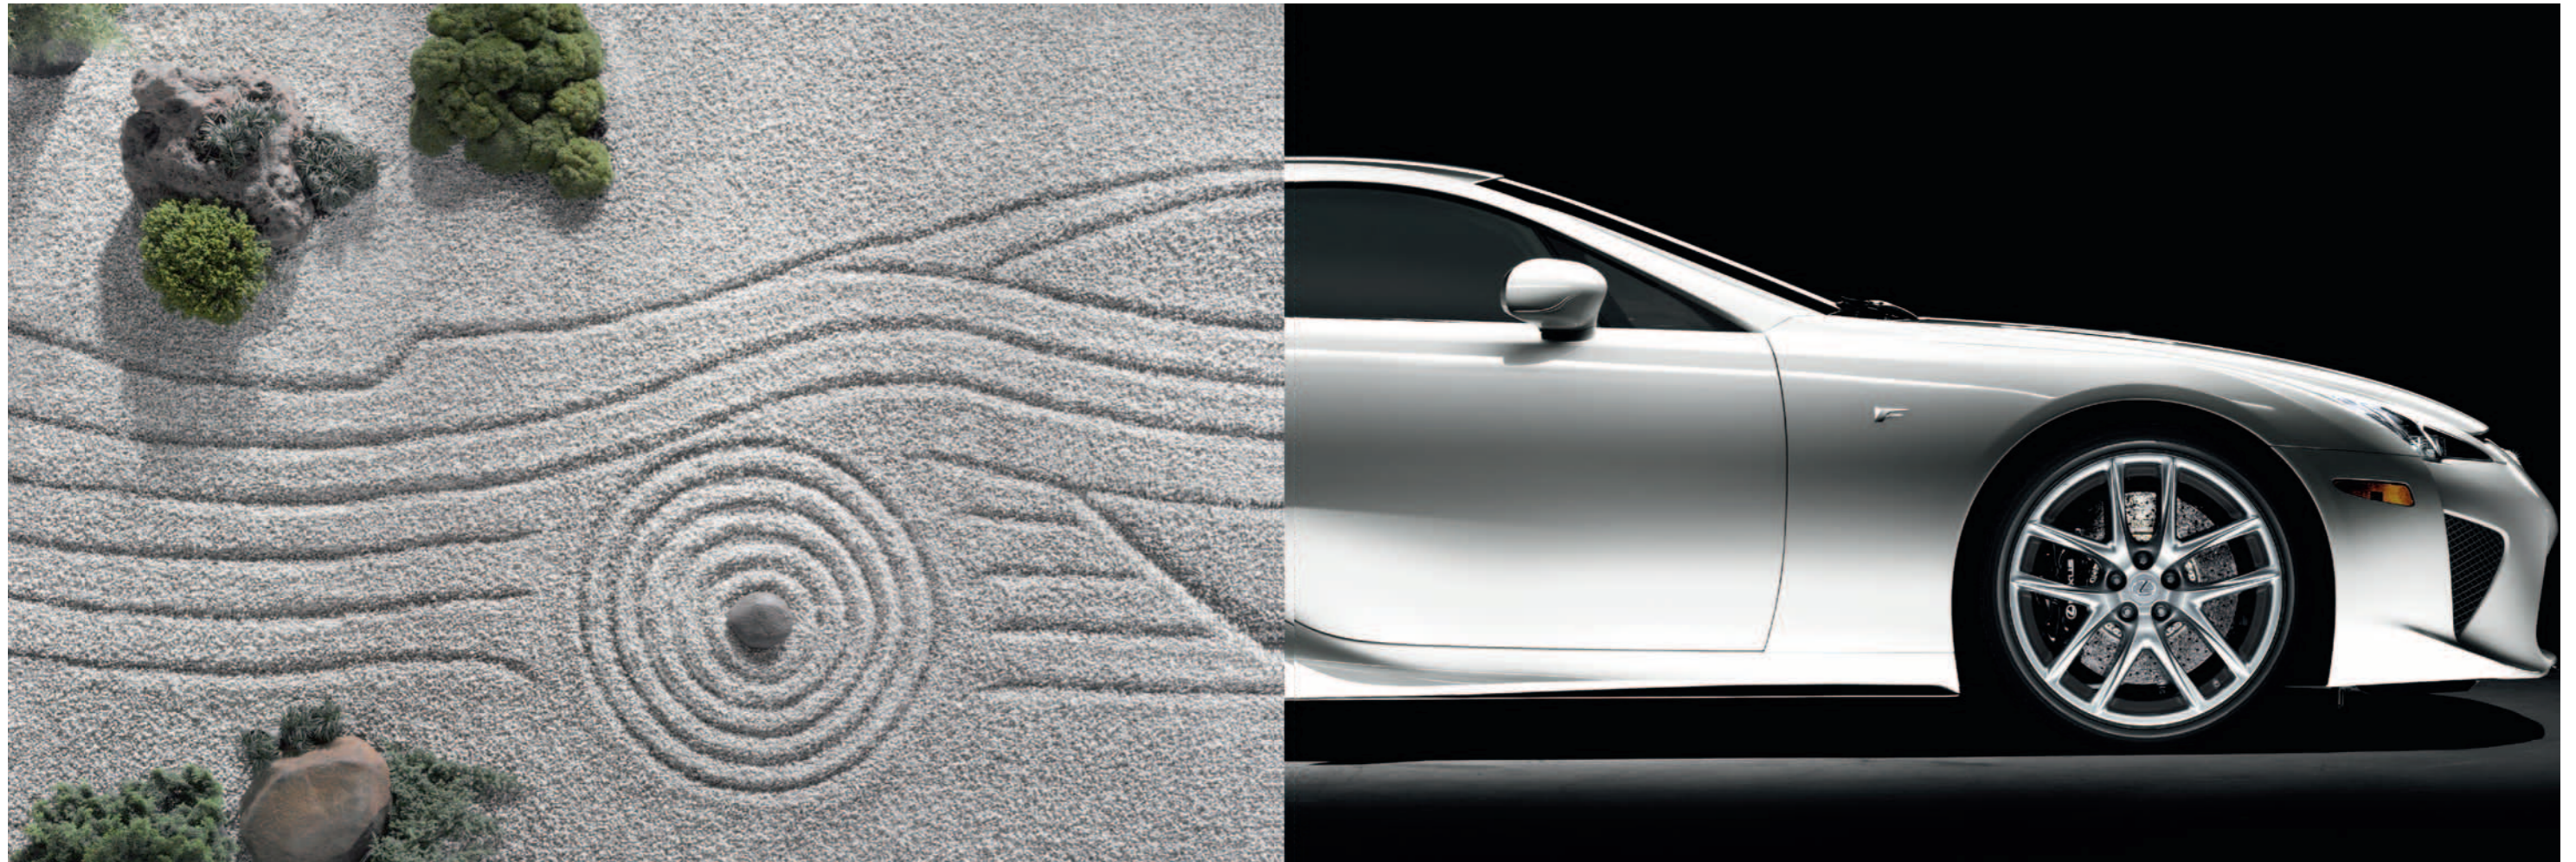

of research, years of innovative thinking, and an ever-present dissatisfaction with mere improvement is what forms these living works of art. And it's these same qualities that led Lexus to our first super car, the LFA.

It combines technology and humanity, and contrasts the man-made with the natural - while fiercely protecting the purity of each. It's perfect balance and impeccable poise. And it's allowing us to create the most magnificent cars in the world.

完全性の追求

"L finesse is everything that can't be measured by numbers or specifications . . . it's everything that's intangible within the Lexus experience."

Simon Humphries - Global Head of Design

Driving luxury to new places.

Choosing a 4WD used to be just that - a choice. Drivers had to weigh up the pros against the cons. And knew that they had to be willing to sacrifice a little style, comfort, handling and agility in order to have a vehicle that could tackle the road less travelled. Thankfully, such compromise has been left firmly in the past.

Lexus launched the LX 450 in 1996. After just two months in the market, it became America's best selling Luxury Utility Vehicle. Adorned with leather accented interior, woodgrain look interior, automatic climate control and a refined ride, it quite literally took luxury to places it had never been before.

Suddenly, drivers realised that they could have it all. In fact, they learned that they shouldn't settle for anything less than a vehicle that can take them almost anywhere without sacrificing any of the technological advancement, high performance drive experience and outright opulence they very quickly became accustomed to.

The evolution of all-terrain luxury.

In Australia the LX 470 took off-road performance into a new dimension. It harmonised all the virtues of the LX 450 with a powerful V8 engine, and featuring specially adapted suspension to suit Australia's unique landscape.

A portfolio of groundbreaking technologies ensures that it's equipped to traverse even the most inhospitable of terrain. And our quest to constantly pursue perfection means that every journey delivers the uncompromising comfort and unmistakable luxury that can only be achieved by the unwavering commitment to our own unique design language, 'L finesse'.

Morphing from the inspiring LX 470, emerged the LX 570. Focusing on the power and performance for both on-road and off-road driving as well as functionality and technology such as Crawl Control and Hill-start Assist Control, the LX 570 has yet again outperformed its predecessor. Painstakingly researched, ruthlessly tested and meticulously crafted, the LX 570 is a clear signal that we are heading in exactly the right direction. And so are you.

Athletic performance.

Sitting on 18" alloy wheels, the LX 570 Sports' muscular curves appear sporty, and give the first hint of the explosive power that lies beneath the bonnet. Our dedicated engineers have developed an unadulterated 5.7 Litre V8 engine. Delivering 530Nm of torque at 3,200rpm, the engine has the flexibility you need off-road. While such output is impressive enough, it's where that torque is delivered that is of greatest significance to a 4WD. Such innovations also contribute to meeting Euro IV emissions standards. So all the while you're enjoying the great outdoors, you're caring for it too.

- Powerful quadcam V8 engine
- Vehicle Stability Control (VSC)
- 10 SRS airbags
- ABS with Crawl Control (off-road low speed control)
- Rear View Camera with Rear Guide Assist⁽¹⁾
- 18-inch alloy wheels
- Cool box
- Rear seat entertainment with DVD player
- Multi Information Display
- 19 Speaker Mark Levinson Audio with USB connection

LX 570 Sports.

LX 570 Sports Luxury.

Commanding luxury.

Sharing the same sleek grille, elegantly moulded side steps, and the neatly integrated roof racks and rails as the Sports grade, the Sports Luxury has overwhelming presence. But the aerodynamic body kit, lower front bumper and rear bumper skirt make it even more imposing and commanding. The 20-inch alloy wheels ensure the LX 570 Sports Luxury retains a dignified stance, on- or off-road. While inside, this vehicle embodies refinement. Loaded with intelligent touches that solve all your inconveniences before they even exist, you might find you never want the journey to end.

- Powerful quadcam V8 engine
- Vehicle Stability Control (VSC)
- 10 SRS airbags
- ABS with Crawl Control (off-road low speed control)
- Rear View Camera with Rear Guide Assist⁽¹⁾
- Front grille and passenger side exterior mirror camera
- Cool box
- Rear seat entertainment with DVD player
- Multi Information Display
- Smart Entry/Push Button Start
- Smart Key Card
- Pre-Collision safety System⁽²⁾
- Active Cruise Control

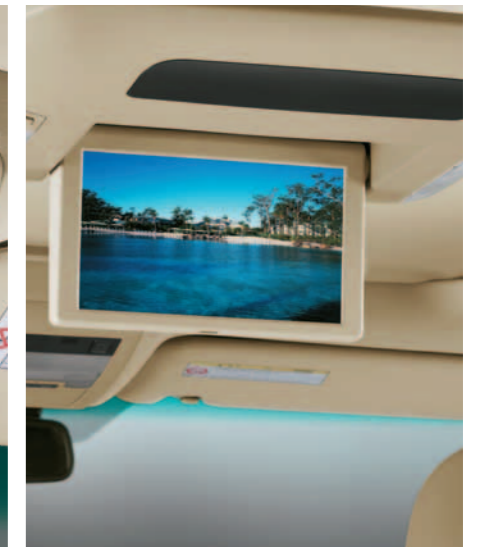

Make yourself at home.

In striving for an all-new level of interior luxury for the LX 570, Lexus designers didn't take their cues from other prestige vehicles, they looked instead to opulent homes. And it was in these fine houses that they found their inspiration - creating a harmonious blend of technological advancement and effortless flexibility that simply feels like comfort the moment you step inside. We call this natural fusion of form and function, 'L finesse'.

The 'L finesse' experience begins as you approach your vehicle, you are greeted with 'welcome lighting', illuminating the foot area near the doors when you approach with the Smart Key (Sports) or Smart Key Card (Sports Luxury).

The LX 570 reveals itself in the way you and all your passengers feel cocooned in comfort as soon as you sit down - in the intricately shaped, leather accented seats of the first row which can be warmed in winter and cooled in summer, whilst the second row outer seats can be warmed only (Sports Luxury model). And for the driver and front passenger, L finesse makes getting perfectly comfortable perfectly simple. As power-operated seat adjustment with memory function (driver seat) instantly recall your seat, side view mirror and steering column positions after someone else has been driving.

LX 570 Sports Luxury model shown

Images shown above are LX 570 Sports Luxury models

Hands-on control...

From the moment you take the wheel, you take control of a host of clever appointments. At your fingertips are controls for the audio system volume, Multi Information Display and cruise control. You can even answer your phone via Bluetooth™(4) at the touch of a button. To maximize the driving experience, not only are your seats heated (Sports Luxury), they are equipped with an adjustable length seat base allowing you to be at your most comfortable. Your driver seat is also programmed to instantly remember 3 driver positional settings, for pure comfort every time one gets behind the wheel. And of course, there's the clean and elegant Optitron display - featuring classic analogue instrumentation highlighted by a graduated blue display that creates a serene ambience in the cabin.

...and even more in store.

Ultimate comfort often comes down to the little things. And that's why in designing the LX 570, we gave storage careful consideration. You'll find room for every little thing, with compartments thoughtfully placed throughout the cabin, and cupholders with clever push-button lids. The second row of seating in the LX 570 is fitted with the ease of 'power slide', enabling you to adjust the seating forward or backwards for extra leg room, or extra boot space. Larger items are also easily accommodated, thanks to third row seats that fully fold away at just the touch of a button.

To further add to the convenience of the LX 570, a power back door was adopted to make loading and unloading more user friendly. The back door (upper tailgate) can be automatically opened and closed using either the remote key or the switch on the inside of the vehicle. If an obstruction occurs, the automatic power door reverses its direction to prevent any damage or injuries.

The back seat is now the box seat.

In the LX 570, every journey can be an adventure. Or a comedy. Or a sci-fi. But never a drama. With a 9" LCD screen that neatly unfolds from the ceiling, back seat passengers can instantly be treated to a cinema-like movie experience showcasing your favourite DVDs. The Mark Levinson audio system is a virtual home theatre, any time you're away from home. In order to manage entertainment preferences, 3+ headphones for the second row passengers are standard.

Elegance, transformed. Every inch, an inspiration.

It's almost impossible to believe there was a time when 4WDs were shaped like square boxes – built almost exclusively for function, and with little consideration given to styling and design. Lexus designers have set new benchmarks in 4WD design by following a design language known as 'L finesse', which encapsulates two thoughts; "leading edge" and "finesse". Flowing curves and muscular elegance take the place of the rigid lines of tradition. Offering on-road presence and a commandingly robust appearance, this sleek body is certainly appealing. But as with all Lexus models, aesthetics are only a part of the equation. These precise lines also contribute to fuel efficiency and reduce wind noise. And the sleek grille, while adding to the LX 570's presence, features a wide opening to allow high cooling efficiency under any conditions.

The carefully considered tyre position and a reassuringly thick shape give the LX 570 an air of distinction, while chrome-treated door handles add to the feeling of luxury. The Sports Luxury grade features an aero skirt on the lower portion of the front and rear bumper. And the body-coloured rear spoiler not only adds aesthetic appeal, it also improves fuel economy.

The level of intelligent thinking devoted to this vehicle is even reflected in the mirrors. Fitted with a heater to improve defogging, they're interlocked with the reverse gear, so they automatically tilt downwards when you're going backwards. Then there are the windows, which have been created with such laser-focus that they help reduce noise.

LX 570 Sports Luxury model shown.

Prototype image shown

Safety firsts.

There's one single aspect of automotive excellence that concerns each of our designers, engineers and technicians more than any other - your safety. Lexus has made a far reaching commitment to safety through its Global Outstanding Assessment (GOA), a worldwide initiative pursuing standards that in all cases surpass current safety protocol. Lexus reviews the world's current and anticipated safety standards and ensure all new vehicles are designed to exceed them.

Pre-Collision safety.

When you are driving the Sports Luxury model, the intelligent radar Pre-Collision safety System (PCS)⁽²⁾ can actually predict an impending emergency and take pre-emptive action to help minimise collision impact and reduce the risk of injury.

Should the radar sensor in the front grille detect an object in your path, a message is instantly relayed to the radar PCS. If it perceives that there is a high risk of collision, first an alarm sounds and a visual warning appears on the Multi - Information Display alerting you of the situation. Brake assist is then placed into stand-by mode in anticipation of the brakes being applied for maximum force. If the brakes are not applied and the Pre Collision System (PCS)⁽²⁾ detects the incident is unavoidable, the Pre-Collision Seat Belts retract the front seatbelts and Pre-Collision Braking (PCB)⁽⁹⁾ applies the

brakes for you, to reduce speed and minimise collision impact and the risk of injury. All within a matter of milliseconds.

Active Cruise Control.

Featured on the Sports Luxury model, radar Active Cruise Control (ACC)⁽³⁾ consistently monitors and controls the throttle and braking of your vehicle (using the technology of the Pre-Collision safety System) which reduces your speed to that of the vehicle pulling in front of you during Active Cruise Control⁽³⁾ and restores your original speed setting when the obstructing vehicle moves out of PCS radar range.

SRS Airbags.

You and your passengers are shielded in a protective cabin by no fewer than 10 SRS airbags - including driver and passenger front dual-stage airbags that deploy according to the severity of an impact. There are also knee airbags for the front seat passenger and driver, seat-mounted side airbags in the front and outside middle row seats, and side-curtain shield airbags that stretch the length of the vehicle in all three rows. As well as a revolutionary active front seat head restraint that lessens whiplash injuries.

Rigid Body Structure & Impact Absorbing Frame.

The Energy Absorbing (EA) collision frame and front crumple zones absorb impact energy in a front-on collision. While high tensile steel reinforcements around the cabin ensure the body of your LX 570 assists to minimise body deformation, helping to protect everyone inside.

Engine Performance.

The objective of the LX 570 was to achieve overwhelming performance that supports the driving performance of a premium vehicle as well as the off road capabilities of a genuine 4WD vehicle. This required a powerful and smooth power train. For the new LX 570, a 5.7L V8 engine was adopted exclusively along with a newly developed 6-speed automatic transmission. An AI (Artificial Intelligence) shift was also adopted to provide a comfortable drive on a higher level including road handling control and an AI shift that is suited for driving with superior response to acceleration and deceleration through control that corresponds to the driver's intentions.

All conditions, without condition.

As the LX 570 has the capability to go almost anywhere, Lexus drivers can find themselves in a huge variety of driving conditions. That's why we've dedicated the very latest in automotive innovation ensuring that whether you're tackling mountainous terrain or the school run, you have the technological advancements you need to do it in comfort, safety and, of course, Lexus luxury.

Crawl Control.

When you're driving slowly on rocky trails or meandering through wet and slippery off road conditions, Crawl Control takes off some of the pressure. At the flick of a switch, you select your preferred speed, and then Crawl Control maintains that pace. Crawl Control allows you to focus your attention on your direction, instead of worrying about losing traction.

Anti-Skid Brakes (ABS).

Multi-terrain ABS with Electronic Break-force Distribution (EBD) works to optimize ABS control on a variety of road surfaces such as gravel, mud and sand, in order to deliver strong braking force both on paved roads and off-road.

Rear View Camera (RVC)⁽¹⁾

As you place your vehicle in reverse, a clear and precise picture of your reverse path is displayed upon the Electro Multi Vision (EMV) display. Along with Rear Guide Assist (RGA) providing reference lines representing the direction of your vehicle based upon steering input (which highlights an area 50cm from the rear bumper) it allows you to determine your clearances with higher precision.

Overseas LHD model shown

LX 570 Sports model shown

Active Traction Control (A-TRC).

Giving you more traction in slippery conditions and helping to suppress wheel spin, A-TRC makes rugged off-road and on-road driving easier and, more importantly, safer.

Parking Assist Sensors.

Clearance and reversing sonars⁽¹⁾ on each corner of the vehicle and the rear bumper tell you when you're close to contact with obstacles, helping you manoeuvre into parking spaces. An audible alarm as well as a visual image on the EMV screen notifies you when the vehicle comes close to obstacles and other vehicles.

Hill-start Assist Control (HAC)⁽⁸⁾

This helps keep the vehicle from rolling backwards as your foot switches from the brake to the accelerator - so you only have to worry about what's in front of you.

Cameras.

Available in the Sports Luxury models, front grille and a passenger side exterior mirror camera⁽¹⁾ gives a clearer view of what's around you, and helps eliminate blind spots. The integrated side-view camera⁽¹⁰⁾ gives you a view of what's alongside your vehicle, eliminating blind spots when you're travelling slower than 10-12km/hr.

Adaptive Front-lighting System (AFS).

The LX 570 virtually allows you to see round corners, with its low beam projectors that utilise Lexus' Adaptive Front-lighting System to shed light on what lies beyond the tightest of corners. The LX 570 also features Hi beam (HID) headlamps that emit light near that of daylight, and they will be crystal clear due to the headlamp washers found neatly in your front bumpers.

LX 570 Sports Luxury model shown.

Cool Box image shown

Smart Key Card image shown

Practically perfect.

When you dedicate your life to meticulous detail, it might be easy for others to assume you'd lose sight of the big picture. Not so at Lexus. Our designers, engineers, and technicians take their inspiration from every day life. So we can create vehicles that seamlessly balance technological advancement with the natural environment. It's the reason we can create the kind of practical luxury that makes every aspect of our vehicles that little bit more enjoyable.

4-Zone Independent Climate Control.

To achieve automotive luxury, individual comfort is paramount. That's why we've developed a heating system that allows the two front seat and two outer second row seat occupants to set their heating temperature independently of one another. And strategically placed air vents ensure that air is circulated evenly around the cabin.

DVD-Based Satellite Navigation.⁽⁵⁾

Because luxury is also about having choices, our 8-inch LCD Display will present you with colour maps offering you the three most efficient routes to your destination, so you can keep your eyes on the road.

Cool Box.

When you're driving on long hot summer days, refreshment is always close at hand, with a cool box positioned in the centre console between the front seats.

Smart Entry.

With the Smart Key (Sports) or Smart Key Card (Sports Luxury) in your possession, you can open the front doors by simply grabbing the handle. No more searching for keys or keyholes.

Smart Start.

When you have the Smart Key (Sports) or Smart Key Card (Sports Luxury) with you, you can start the LX 570 with your foot on the brake and with the touch of a single button. Then, after your journey, put the shift lever into 'Park' and turn the engine off with a press of the same button.

The Mark Levinson experience.

Boasting a 6-disc in-dash DVD/CD changer, 3.5mm audio jack and USB input along with 19 speakers, the Mark Levinson Surround Sound System delivers cinema-like sound. Which means that extraordinary reserves of power aren't simply confined to the engine bay.

A life of privilege.

Owner Benefits.

The benefits of being a Lexus owner go far beyond the intrinsic pleasure of driving the vehicle. From the moment you're handed the keys, you'll also be welcomed to the Lexus Encore Privileges programme[^] - a range of exclusive initiatives that reaffirm our ongoing Pursuit of Perfection.

It all means you'll enter a world of benefits that extends to every corner of life. A world where everything's just that much easier, and works that much more seamlessly. And a world where should trouble ever find you, you can always find a helping hand.

Take our After Sales Service as an example. Both our technology and our technicians are at the forefront of automotive innovation. And our profound understanding of every single component of your Lexus means we can do more to ensure it's a pleasure to drive today, and in the long run.

It's a world you've always belonged in. A privilege unique to Lexus drivers.

Silver service

Every aspect of your Lexus is built around your comfort and convenience, so it's fitting that when it's ready for a service, we'll come and pick it up from you, and provide you with a complimentary loan car while servicing. Plus, when we return your Lexus, it will have received a complimentary wash and interior vacuum.

Best in show

Lexus Premium Ticketing gives you premium access to tickets for the best entertainment and biggest events - not just here in Australia, but all round the world. Pre-book priority seats before tickets go on sale to the public. Or join our waitlist, and be first in line when high-demand tickets are released.

Peace of mind

Wherever you are and whatever you're doing, you can relax. Because with our Encore Privileges programme, you have the 24-hour support of Lexus DriveCare. We'll look after your car and, just as importantly, we'll look after you and your passengers.

Well read

You can stay abreast of all things Lexus from the comfort of your own home, with our Lexus Magazine delivered right to your door. It'll keep you updated on all aspects of luxury living. And covers everything you need to know about the cars that are leading the world.

Under your Lexus 4 year/100,000km (whichever occurs first) Warranty, you can enjoy benefits you will only receive from a Lexus Dealer Service Centre.

The Lexus commitment is to provide the ultimate in warranty, service and customer satisfaction to ensure your driving experience with Lexus is far beyond your expectations of driving pleasure, safety and trouble free motoring. The Lexus ownership experience continues long after you've switched off the key. Every dealer is an indispensable expression of the Lexus philosophy. Each displays impeccable standards of customer care, employs only factory trained service technicians and insists on exclusive fitting of Lexus approved genuine parts.

THIS BOOK IS PRINTED ON GREEN PAPER.

The Lexus book you are reading has been produced using Novatech A2+ Gloss Art which is produced from fibre, sourced from certified well managed forests and controlled sources. The pulp is Elemental Chlorine Free (ECF) virtually eliminating dioxins in mill waste water, so it's kinder to our waterways as well. Novatech is archival, so like our vehicles it's manufactured to stand the test of time. Being manufactured by an ISO14001 and EMAS certified mill have led to it being awarded the EU 'Flower' eco-label certification. Novatech has also recently been certified by the Carbon Neutral Institute (CRI) as being made carbon neutral.

As a company that strives to lessen its impact on the environment in every way possible, Lexus believes that choosing our paper wisely is one more step we can take in preserving our planet.

- (1) Rear View Camera and Rear Guide Assist is designed as a driver assist device only and should not be used as a substitute for skilled driving and safe parking practices. The area into which the vehicle is to be reversed must be visually monitored by the driver while parking.
- (2) PCS is a driver assist technology and should not be used in place of safe driving practices. Driver should continue to monitor the road ahead. Available in the Sports Luxury grade only.
- (3) ACC is a driver assist technology and should not be used in place of safe driving practices. Driver should continue to monitor road ahead.
- (4) The Bluetooth™ word mark is owned by The Bluetooth SIG, Inc. Not all devices will be compatible and functionality will vary depending on the device.
- (5) Current mapping database encompasses major capital and primary national road networks as well as offering some coverage in regional areas.
- (6) Fuel consumption will vary depending on driving conditions / style, vehicle conditions and options / accessories. Source of fuel consumption data: ADR81/02 combined/urban/extra urban (L/100km) for manual / auto models].
- (7) Kerb, tare and payload weights are nominal and will vary depending on options and accessories.
- (8) HAC is designed to help minimise backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details.
- (9) Pre-Collision Braking (PCB) will not stop the vehicle, but will attempt to slow the vehicle to reduce the severity of the impact. Not available on all grades. See specifications sheet for grade availability.
- (10) The front, left hand side and rear cameras do not provide a comprehensive view of the area surrounding the vehicle, and should only be used as an aid for viewing when parking/driving.

* With the Sports Luxury grade, you'll get one Smart Key Card and two Smart Keys.

Not all devices will be compatible and functionality will vary depending on the device.

† Extra headphones available at further cost
