

Innovation  
that excites

NISSAN  
370Z

A red Nissan 370Z Coupe is shown in profile, parked on a sandy beach. The sun is low on the horizon to the left, creating a bright glow and casting a long shadow of the car onto the sand. The sky is filled with large, dramatic clouds, some illuminated by the setting sun. The car's sleek design, including its alloy wheels and side mirror, is clearly visible.

# INTRODUCING THE 370Z COUPE

The latest 370Z Coupe has been passionately designed and engineered to provide an extraordinary driving experience for the sports car enthusiast. Every element of the vehicle is calculated to raise the hair on the back of your neck, make your pulse race, and reawaken your joy of driving. The most recent iteration of the 370Z features a redesigned front bumper and grille, enhanced stylishness through the addition of LED day-time running lights and a new 19" forged RAYS alloy wheel design framing the bold red brake calipers. As you will discover the 370Z just keeps getting better, and delivers the ultimate expression of the Nissan philosophy: Innovation that excites.

Diamond Black Roadster shown.

# INTRODUCING THE 370Z ROADSTER

It may be roofless but it is just as ruthless. Featuring all the power, handling and style of the 370Z Coupe, the Roadster goes one step further with the opportunity to enjoy the exhilaration of open air driving – with the touch of a button, the roof stores itself in less than 20 seconds. And lest you be concerned about the elements, the seats have the ability to both heat and cool. To ensure that you will be driving like the wind, and not against it, the car also features a tempered glass wind deflector to minimise cabin noise and turbulence.

# HISTORY

In the late 1960s, Yutaka Katayama, President of Nissan recognised the need for an affordable sports car and encouraged the creation of the Datsun 240Z. With its launch in 1969, a true automotive dynasty had begun. The Z continued to develop through the 1970s with the 260Z and 280Z both being met with adulation for their engineering and contemporary design. In 1984 the Z was redesigned from the ground up, this produced the 300ZX which was the first Z to be known as a Nissan. 2002 marked the next major milestone for the Z series, with the launch of the multiple award winning Nissan 350Z. The latest 370Z draws upon this rich heritage, while unashamedly being a car of today. An opportunity for everyone to experience the true joy of sports car driving. The iconic Nissan Z currently holds the record for the best selling sports car of all time with over 2 million sold globally.

# EXTERIOR STYLING

While you enjoy the thrill of taking the Nissan 370Z through its paces, others will have to be satisfied with merely watching. But don't feel too sorry for them; this car offers many pleasures for spectators too. A variety of graceful curves combine to provide the Nissan 370Z with its striking profile. The front and rear lights have distinctive styling, which gives them a subtle aggressiveness. The new 19" forged RAYS Alloy wheels and bold red brake calipers add an athletic elegance to the car's contours, while the front underbody spoiler and rear spoiler on the Nissan 370Z Coupe work seamlessly with the rest of the design. The 370Z Coupe also has a cargo blind to keep items in the rear cargo hidden from view. At the front, powerful Xenon headlights stay sharp and clear thanks to headlight washers. Even the Z badge side indicator lights and day-time running lights are an understated reminder that this is no ordinary car.

Diamond Black Coupe shown.

## PERFORMANCE

Beneath this body, carefully crafted to cut through the air, is a raging heart. It is the VQ37VHR 3.7 litre V6 – an engine with power and torque to spare. This is the latest generation of Nissan's celebrated VQ series – the most awarded V6 engine series in history. The Nissan 370Z engine is well prepared for any driver willing to take it on, with a formidable 245kW of power and 363Nm of torque.

# TRANSMISSION

When it comes to controlling all this power, the Nissan 370Z gives you a choice of either a 6-speed close-ratio manual transmission or a 7-speed automatic with Manual Mode (M-Mode). The 370Z includes a world first on a production vehicle – SynchroRev. This technology automatically controls and adjusts engine speed when changing gears, essentially altering the throttle as the shift occurs to match the exact engine speed of the next gear position. Not only does this allow you to focus more on braking and steering, but it improves the vehicle's balance and smoothness by reducing the shock that can be experienced when the clutch is engaged. Naturally, for manual drivers who prefer less vehicle intervention, the system can be deactivated at the press of a button.

The 7-speed automatic also offers the benefit of SynchroRev Match to smooth out gear changes. By selecting M-Mode, you can take full control and drive the car like a manual using convenient paddle shifters located behind the steering wheel. No matter which transmission style you choose, you will enjoy razor-sharp responsiveness.

Brilliant Silver Coupe shown.

# HANDLING

The Nissan 370Z is built on a platform that enhances handling, ride comfort and overall safety while reducing vibration and harshness. All elements of design, construction and technology work in harmony to deliver an extraordinary driving experience. The double wishbone multi-link front suspension and independent multi-link aluminium-alloy rear suspension will have you gliding effortlessly around curves. As you apply pressure to the accelerator coming out of a corner, the Viscous Limited Slip Differential will ensure the rear wheels use the power wisely. You'll also find that it improves off-the-mark acceleration.

Naturally, with 245kW of power to harness, we have created the Nissan Premium Braking System to help keep you in total control. The front and rear power assisted ventilated disc brakes are massive – 355mm rotors at the front and 350mm at the rear. Meanwhile, the speed-sensitive hydraulic power steering alters the feel of the steering dependent upon your speed; a more direct, confident experience when driving at high speed, and a lighter, undemanding touch for easy manoeuvrability when parking.

The image shows the interior of a Nissan 370Z Coupe. The view is from the driver's perspective, looking towards the center console and the passenger side. The dashboard features a large touchscreen display showing a navigation map with a red route. Below the screen are various controls, including a radio and climate controls. The steering wheel is black with a silver 'Z' logo in the center. A hand is visible on the steering wheel, and another hand is on the gear shift. The interior is dark, with leather accents on the seats and door panels. The background shows a cloudy sky through the windshield.

# INTERIOR & TECHNOLOGY

You'll recognise the Nissan 370Z as a new breed of sportscar even before you climb in. Leave the Intelligent Key in your pocket and just push the button on the door handle to open it. Settle into the stylish leather accented sports seats, with non-slip cloth inserts, designed to hold you snugly as you take the curves. Now, press the engine start button to hear the vigorous burble of the 3.7 litre engine coming to life. The automatic headlights will come on if necessary. Adjust the 4-way power driver and passenger seats to get yourself comfortable and if necessary, turn on the heated seats.

**NOT SURE WHERE YOU'RE HEADED?** Simply use the touchscreen to call up the HDD Satellite Navigation, making getting to your destination even easier.

**NEED TO MAKE A CALL?** You'll find the controls for the Bluetooth® handsfree phone system on the steering wheel near the cruise and audio controls. To make things easy, you can upload your phone contacts via Bluetooth.®

**NOW FILL YOUR WORLD WITH MUSIC.** The Bose® audio system will surround you with rich, clean sound through eight speakers including two subwoofers. Or connect your iPod® via USB and control your music library with one finger through the touchscreen.

**LIKE MORE OPTIONS?** Connect it via Bluetooth® or load your own tracks onto the dedicated 9.3GB music HDD.

# SAFETY

Nissan's safety technologies assist in the prevention of collisions and protect you and your passengers should one occur. Vehicle Dynamic Control (VDC) compares the actions of the driver with the current vehicle behaviour and selectively brakes individual wheels and controls engine power to help keep the car on its intended path. Traction Control System (TCS) limits tyre slip for safer driving. When the system senses one wheel is spinning faster than the others, it automatically reduces engine power and or cycles the wheel's brake to reduce speed and lessen slip. Anti-lock Braking System (ABS), Brake Assist (BA) and Electronic Brakeforce Distribution (EBD) work together to help you retain control when braking, apply additional braking in an emergency situation and optimise control by sensing the load condition of both passengers and luggage. With dual front, dual side and dual curtain SRS airbags, the Nissan 370Z is well prepared to protect the occupants in the case of a front or side impact.

**REAR REVERSING CAMERA.** Rear visibility is made easy with wide-angle mirrors and a Rear Reversing Camera with Predictive Path technology.

**SEATBELT PRETENSIONERS** with load limiters use sensors to determine the severity of a potential crash and instantly tighten accordingly. Should additional force be exerted on the seatbelt, the load limiters ensure appropriate give to reduce damaging pressure on the torso.

**POP UP HOOD.** Safety technology automatically raises the bonnet in the event of a collision with a pedestrian to minimise the impact.
