Overseas model shown, local specification may vary

CUPRA LEON

Seize the moment with a vehicle that exceeds all performance expectations. With a choice of 3 petrol engines at either 140kW, 180kW, or 221kW, there is no doubting the CUPRA Leon's performance.

The CUPRA Leon VZe plug-in hybrid with 180kW combines an electric and a petrol engine so you can enjoy all the benefits of electrification while delivering a exhilarating performance. Switching to the hybrid engine allows you to maximise the vehicle's full range for longer journeys, whilst charging the electric battery for use later as you drive. Style is never out of business, a purposeful stance and distinctive design features confirm the CUPRA Leon's sporty intent.

For enhanced stopping power, renowned front Brembo calipers are also available as an option.

TECHNICAL SPECIFICATIONS

Discover all the technical specifications by engine type, from emissions and consumption data; to performance statistics and transmission types.

Here you'll find all the technical aspects covered so you can make an informed selection when it comes to your CUPRA Leon.

* The Start/Stop system is designed to reduce fuel consumption and CO₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.

Please note figures are sourced from overseas data where equipment levels by model variant may vary.

* Please note, Volkswagen Group Australia does not endorse or will not be held liable for any claim, loss or damage arising from the use or fitment of electronic trailer brakes.

** Fuel consumption figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.
