

VOLVO
Built for life.

VOLVO-BUILT FOR LIFE

For over sixty years Volvo have been building cars that stand out from the crowd.

An unrivalled reputation for safety and reliability coupled with unique styling and performance qualities has made Volvo the choice of discerning motorists throughout the world.

The same uncompromising commitment invested in the design and manufacture of our cars is found in our after-sales service and in a range of special benefits which only Volvo owners enjoy.

This booklet is a brief introduction to these benefits and the current Volvo range. Detailed information covering specific models and services are available from your specialist Volvo dealer.

VOLVO 760 GLE

Offering unique standards of prestige, luxury and performance, this is the most sophisticated model in the entire Volvo range, a car to suit the most fastidious motorist.

Standard features include cruise control, car telephone, a superb sound system and electronic climate control.

Knowing you have an ultra efficient Anti-locking Brake System at your disposal, life on the road is all the more enjoyable.

The 760 GLE is the ultimate expression of the Volvo virtues; lasting quality, technical innovation, driving excellence and dynamic safety. Truly, a delight to drive and a joy to own.

VOLVO 740 TURBO

What other car offers such power and responsiveness yet is so luxurious and dignified?

The 740 Turbo has been acclaimed as the most exciting car Volvo has ever produced.

Sleek, aerodynamic lines and a 162 bhp turbocharged, intercooled engine puts the 740 Turbo way ahead of other saloons in its class.

This high performance sedan features all the comfort and luxury typical of Volvo's 700 series. Now, with an Anti-locking Brake System, you also have that special reassurance to make life on the road that much more enjoyable.

VOLVO 240 GL

This is a classic in motoring history.

For reliability, longevity and safety few other cars even come close.

Apart from these traditional Volvo virtues, the new 240 GL now features sleeker styling and roadholding, fuel efficiency and comfort like never before. Little wonder it was voted Car of the Year by the American Family Circle magazine.

Apart from enjoying an extremely comfortable ride, you also have the reassurance of a fail-safe triangle-split braking system and the protection of Volvo's legendary steel passenger cage.

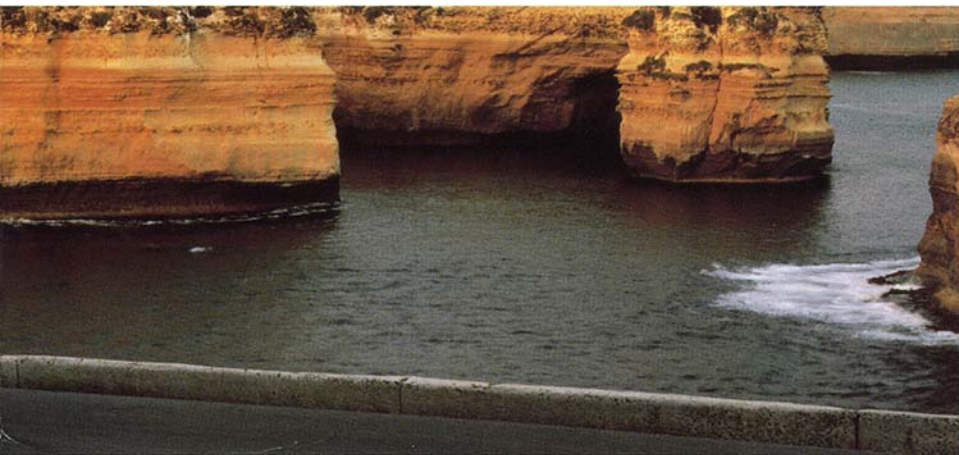

The 240 GL is still modestly priced and is an extremely fine investment in every sense.

Brief Technical Specifications	240 GL WAGON
Engine Configuration	In-line, 4-cyl, 2.3 litre, Intermittent injection
Max. output, kW DIN at r/s (hp DIN r/min)	85/90 (116/5200)

Transmission – automatic – manual	4-speed incl. overdrive 5-speed
Manual	5-speed
Automatic	4-speed incl. overdrive
Brakes (Power assisted)	Front discs/Rear discs

VOLVO 240 GL WAGON

What other station wagon enjoys the track record of the Volvo 240?

Superior standards of safety and reliability coupled with power, comfort and excellent performance capabilities have earned this wagon an enviable reputation.

Offering comfortable seating for 5 adults plus a huge 1.19 cubic metres of luggage space, the new 240 GL brings luxury and driveability to a wagon that is both practical and affordable. And, of course, very safe. Features include a strong steel passenger cage, front and rear impact absorbing crumple zones, collapsible steering column and a fail-safe triangle-split braking system.

VOLVO ANTI-LOCKING BRAKE SYSTEM

All cars in the 700 series now include the Anti-locking Brake System (A.B.S.) as a standard feature.

Emergency braking often results in one or more of the wheels locking. A locked wheel cannot brake the car efficiently and steering is impossible.

Optimum braking and car control is achieved when the wheel almost locks. Naturally in emergency braking it is hard for the driver to gauge the pedal pressure needed to achieve this. A.B.S. does the job automatically.

If a wheel locks during braking, sensors activate an electronic control unit to relieve the brake pressure. Then pressure is re-applied. Of course this happens very rapidly and many times over until the car is brought under control. A.B.S. ensures the wheels can be steered and that maximum braking effort is obtained.

The system controls each wheel independently and only comes into operation when needed.

This is the first time ever that A.B.S. has been a feature of family cars and Estates, and is an important step in our on-going commitment to build the safest cars on the road.

VOLVO INSURANCE PROGRAMME

As a Volvo owner you can now enjoy motor vehicle insurance at competitive rates and with the certainty that repairs will be carried out promptly and professionally.

The programme is underwritten by one of Australia's leading insurance companies, MMI General Insurance Limited. MMI appreciate that as a Volvo owner you are unlikely to come crashing straight back with a claim – hence the low rates. The saving

for Turbo owners may be substantial.

With the Volvo Insurance Programme you will never have to compromise with the quality of any

repairs. You can insist on all work being done at a Volvo approved workshop with genuine Volvo parts.

And you may not lose your No Claim Bonus when involved in an accident for which you are not responsible. If the 'third party' is

identified and you can prove beyond doubt that you were blameless, your No Claim Bonus is as good as ever.

The Volvo Insurance Programme is written in Plain English with no hidden clauses or exclusions. There is naturally no obligation to participate in the programme, but being designed specifically for Volvo owners it is usually found to have considerable advantages over other policies.
