

VW VARIANT

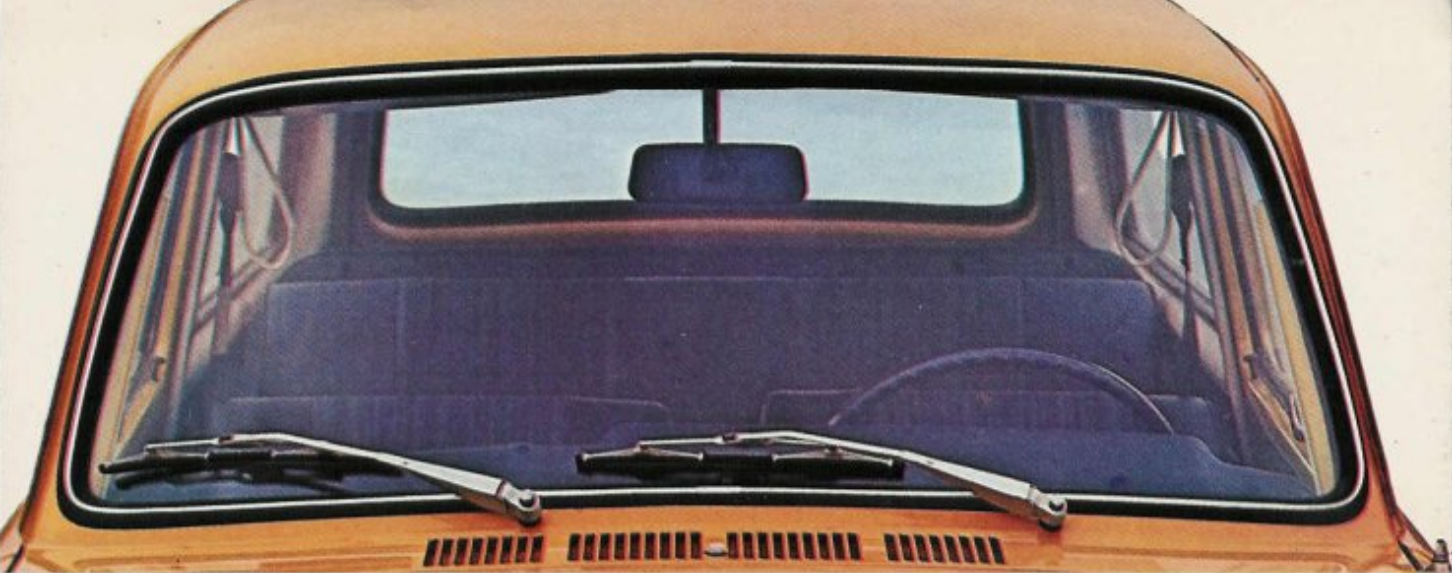

The tough durable family car.

Windshield with safety tempered glass

It's difficult to imagine a Variant without the whole family inside it.

Yes, this car was constructed to make your family comfortable and go just about anywhere. It will take your children to school in the morning, take you to the office, carry any amount of baggage, get knocked around the whole day long and still come out on top.

The Variant will take rough country roads. It will climb awkward hills.

It will take rain, mud or sand in its stride. In short, it will open up all roads to you and your family.

And of course its more than ample luggage space doesn't

limit you. The internal comfort will allow you to drive or travel rested and arrive relaxed. Its powerful engine gives you that extra push when needed. A strong car. But then, it's a Volkswagen product, of course. The 1975 model has a wonderful new series of colours, is more comfortable and has extra safety measures. In the constant march towards progress of all Volkswagen cars, the Variant has been perfected. Take a look at it now in your nearest VW Dealer.

You'll certainly like it.

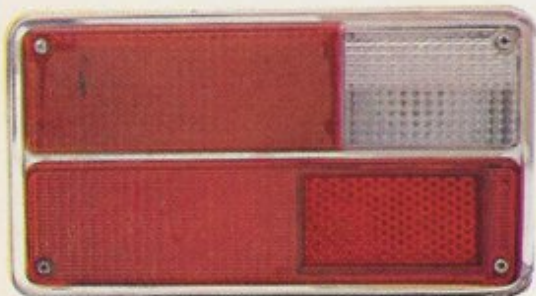

New panel with place for radio and fan

Air filter - Dry

Larger sun visors

Intermittent warning lights

## Technical data-VW Variant

| ENGINE                                                                        | MEASUREMENTS AND WEIGHTS                    | PERFORMANCE AND CAPACITIES       |
