THE SUV BUILT TO CARRY A LEGACY

Quadrifoglio 100th Anniversary shown in Verde Montreal.

The Alfa Romeo Stelvio infuses motoring's most legendary DNA into a unique and highly adept SUV. The result? A spirited, confident performance worthy of being named after the fabled Stelvio Pass. This is an SUV designed to impress engineers, accelerating beyond all expectations with honed aerodynamics. Stelvio is equipped with horsepower that produces formidable top speeds in its respective classes — its Quadrifoglio model churns out an incredible 0 – 100-km/h time in 3.8 seconds. In short, Stelvio really moves ... and moves its onlookers as well. It's no wonder that an SUV from Alfa Romeo instills finesse, performance and prowess into a category built on practicality and capability. Stelvio was built to be the SUV of the car connoisseur's dreams.

A woman with long dark hair, wearing a long brown coat over a dark turtleneck and tan trousers, is walking on a cobblestone street. She is touching the front grille of a red Alfa Romeo SUV. The car's front features a prominent black grille with the Alfa Romeo logo, a large headlight, and a black bumper. The background is a blurred, rocky landscape.

THE FACE
OF A SUPER
MODEL

Veloce shown in Alfa Rosso.

The ability to turn heads can only belong to an elite few. Stelvio's exclusive and sporty look is evident at first glance with a dedicated Dark Carbon Fibre V-Scudetto grille surround, just one of the Alfa Romeo design cues that makes a nod to its storied racetrack victories. Stelvio has very good genes indeed.

The Stelvio Ti knows that some people demand an equal amount of luxury and performance. This is why Ti offers the sportiness of 19-inch or available 20-inch 5-hole aluminum wheels together with the convenience of a hands-free liftgate and the reassurance of headlamp washers. Get a victory-lane look with aluminum Sport pedals coupled with a look skyward, thanks to the dual-pane sunroof. For Ti and its drivers, going all out applies as much to their surroundings as it does to their speedometer.

Ti: ITS TALENTS ARE QUICKLY DISCOVERED

Ti shown in Alfa Rosso.

Stelvio Ti embodies the Italian approach to life: taking great care and passion with every detail. The Ti cabin demonstrates this with a distinctive interior that features aluminum trim, pedals and footrest. Heated front seats and steering wheel are wrapped in leather, while 14-way power front seats include 4-way lumbar support with power bolsters and manual thigh support. A standard dual-pane sunroof puts everything in an even better, natural light.

Ti interior shown with Black leather-trimmed seats and dual-pane sunroof.

VELOCE:
A VERY FAST TAKE ON THE SUV

280
HORSEPOWER

+
306
LB-FT OF TORQUE

Veloce shown in Alfa Rosso.

Some names have a way of reflecting a family's strengths and purpose. Case in point? The Stelvio Veloce. Named for the Brand's 1962 sport coupe, *veloce* is Italian for "fast" and inspires every aspect of its SUV incarnation. This modern Veloce brings a striking level of performance and design to its class. Beyond 280 horsepower, it features a Volcano Gloss Black Appearance Kit, Sport rear diffuser, mechanical limited-slip differential, available 20-inch Sport 5-hole aluminum wheels, Red-painted brake calipers with White Alfa Romeo script and Black window surrounds.

Veloce shown in Alfa Rosso.

The Stelvio that knows how to step it up also knows how to stand out; Veloce sports an Alfa Rosso paint that makes a retro-racing statement. This gorgeous Red hue is accented with Gloss Black window surrounds, roof rails, mirror caps and rear Sport diffuser.

Veloce interior shown with Black Performance Sport leather-trimmed seats.

Alfa Romeo Stelvio Veloce combines the most cutting-edge technology and a strong instinct to inspire emotions — always putting the driver at the centre of the design. As shown here inside Stelvio Veloce, Black Performance Sport leather-trimmed seats set a luxurious tone. The cabin embraces a striking combination of materials, including aluminum interior accents, paddle shifters and Sport pedals. Leather gloves may be a thing of the past as the heated front and rear seats and steering wheel are wrapped in leather, while the 12-way power driver seat includes 4-way lumbar support with power bolsters and manual thigh support. With standard conveniences like a wireless charging pad, headlamp washers and hands-free liftgate, Alfa Romeo Stelvio effectively marries body and machine.

Added for 2024, the Stelvio Competizione captures the Alfa Romeo racing legacy in unique, new ways. Wrapped in the available, sophisticated Moonlight Grey Matte finish, Competizione offers an elevated mix of style, tech and performance that begins under the hood; a 2.0L Direct-Injection (DI) Turbocharged engine delivers 280 horsepower and 306 lb-ft of torque. An electronically adjustable suspension and a limited-slip differential help ensure an exceptional driving experience.

COMPETIZIONE: THE WINNING SPIRIT DISTILLED

Competizione shown in Moonlight Grey Matte.

Stelvio Competizione cuts a formidable figure from every angle. Signature LED headlamps, LED daytime running lamps (DRLs) and taillamps are a step up in terms of design and visibility, while Auto High-Beam Headlamp Control and headlamp washers make things even clearer. Available 21-inch Dark 5-hole aluminum wheels put a unique spin on the whole package.

Competizione shown in Moonlight Grey Matte.

The Stelvio Competizione interior is designed to get everything racing. Black leather-trimmed, logo-imprinted Sport seats, steering wheel and instrument panel contours are accented with Red stitching. A 14-speaker Harman Kardon® premium audio system provides the perfect soundtrack for life in the fast lane, while its dark window tint signals this unique SUV's serious, take-no-prisoners demeanour.

QUADRIFOGLIO: A DIFFERENT ANIMAL

Quadrifoglio 100th Anniversary shown in Verde Montreal.

Stelvio Quadrifoglio is an SUV in a different class altogether — and it's at the top of that class, to beat. With 505 horsepower, it produces 443 lb-ft of torque and an unsurpassed 0 – 100-km/h time of 3.8 seconds. A checklist of high-performance features complements its power: 20-inch Dark 5-hole aluminum wheels, performance front and rear fascias, and a dual-mode quad exhaust. Powerful control has never been more personal with the four-mode Alfa DNA Pro Drive Mode Selector, featuring Race Mode. An independent adaptive damping suspension and the mechanical limited-slip differential are all designed and engineered for the track.

TOP TRACK SPEED

The Quadrifoglio marque is reserved for only the very top Alfa Romeo performers since 1923. When the Stelvio SUV earned this prestigious marque, it shook up the entire category. Fittingly, Stelvio Quadrifoglio is equipped with many performance-based features, like the available 21-inch Dark 5-hole aluminum wheels, Brembo® high-performance brakes, a performance rear fascia and a dynamic dual-mode quad exhaust.

This is the command centre for an SUV powerhouse. It starts with the Quadrifoglio-specific steering wheel, which includes a Red push-button start, Red accent stitching and all-aluminum, column-mounted paddle shifters to maximize the driving experience of the most direct steering available. Black Performance Sport leather-trimmed seats with Dark Grey accent stitching, leather-wrapped dash and upper door trim with accent stitching, and genuine Carbon Fibre interior trim all add finish-line touches.

SPARCO® RACING SEATS: THIS PERFORMANCE DESERVES A BETTER SEAT

The Sparco SPX racing seat represents the ultimate evolution of the Sport seat. The SPX uses a combination of carbon fibre and advanced composites that give the driver both comfort and performance in a lightweight package. With the ergonomic shape of the carbon fibre backrest and the seating position of the Resin Transfer Moulding (RTM) composite lower, the SPX firmly holds the driver during extreme lateral forces and is comfortable for long road trips. Available on Quadrifoglio.

Quadrifoglio interior shown with Sparco Black leather-trimmed and Alcantara® racing seats with Green and White accent stitching.

Q4 AWD: WEATHER OR NOT

Veloce shown in Misano Blue Metallic.

The Q4 All-Wheel Drive (AWD) system offers the performance and driving pleasure of Rear-Wheel Drive (RWD), switching to AWD only when warranted. Under normal conditions, the Q4 AWD system sends 100 percent of the engine torque to the rear axle. When necessary, the system can automatically transfer up to 60 percent of the torque to the front axle, thanks to the Active Transfer Case (ATC). It continuously monitors road conditions to deliver enhanced torque distribution, maximizing grip and performance.

ALFA ACTIVE SUSPENSION

Both the Alfa DNA Drive Mode Selector and Quadrifoglio's exclusive Alfa DNA Pro instantaneously adapt the behaviour of the vehicle to the selected driving mode.

The systems automatically reset to "Natural" at the vehicle start while retaining the ability to change modes at any time.

RACE (only on Quadrifoglio with Alfa DNA Pro) activates the over-boost function, opens up the dual-mode exhaust system and turns off Electronic Stability Control (ESC),* increasing torque to maximize performance.

DYNAMIC opens the dual-mode exhaust and delivers a sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving.

NATURAL is a comfort setting for a perfect balance in daily driving and is calibrated to be the default setting.

ADVANCED EFFICIENCY is engineered to deliver maximum fuel efficiency; on Quadrifoglio, it also changes the threshold for all of the safety systems.

Alfa Romeo Stelvio has audio system options that will be music to everyone's ears. Included as standard is a 180-watt system that surrounds occupants with an acoustically impressive performance, thanks to 8 speakers (4 tweeters and 4 woofers).

CRAFTED TO CREATE NEW AUDIOPHILES

Alfa Romeo has partnered with Harman Kardon® to make concert-like sound available for the ride. Its 900-watt, 12-channel, class-D amplifier and Logic 7® sound technology distribute clear sound through a system of 14 premium speakers with a subwoofer. Brushed aluminum speaker surrounds add a visually pleasing note — all proof that Stelvio is as adept at carrying a tune as it is cargo.

KEEPING IN TOUCH

APPLE CARPLAY² COMPATIBILITY This is the smarter, safer way to use your iPhone while you drive. Get directions with Apple Maps, listen to songs with Apple Music, send messages, make calls and much, much more — all with your voice via Siri³ or through your touchscreen dashboard.

ANDROID AUTO^{TM2} COMPATIBILITY Bring the best of Google with you in your Stelvio. Talk to Google Assistant on Android Auto and get things done with your voice so you can keep your focus on driving. Easily send messages, get directions, control media and more. Just say, "Hey Google" or long-press the voice-control button on your steering wheel. Standard.

FULLY ANTICIPATE

FORWARD COLLISION WARNING (FCW) WITH FULL-SPEED STOP⁴ This system provides both audible and visual warnings to the driver and, under certain conditions, the system works to bring the vehicle to a full stop when a frontal collision may be imminent. Standard.

AIR BAG⁵ SYSTEM Stelvio features a standard comprehensive system that includes driver and front-passenger dual advanced air bags, supplemental front-seat-mounted side air bags (pelvic-thorax), front and rear side-curtain air bags, along with driver and front-passenger inflatable knee air bags.

ANTISLIP REGULATION (ASR) AND TRACTION CONTROL SYSTEM (TCS) The standard ASR limits the spin of the driving axle during a driver torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC) These standard systems aid the driver during manoeuvres when the vehicle is on a slope. HSA maintains and releases brake pressure during vehicle drive-off, while HDC maintains a constant speed by varying brake pressure, allowing a controlled vehicle descent.

ADAPTIVE CRUISE CONTROL WITH FULL STOP (ACC STOP)⁴ This system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, can bring Stelvio to a full stop without driver intervention. Standard.

LANE DEPARTURE WARNING (LDW)⁴ Drivers benefit from this feature that emits an audio and dash-light visual warning when the system detects an inadvertent lane departure, reminding the driver to stay the course. Standard.

BACK-UP CAMERA⁴ WITH DYNAMIC GRID LINES AND REAR PARK SENSORS⁴ Offering views from different angles and visual guidelines, these features help direct you during some of driving's trickiest manoeuvres: parking and backing up. Standard.

DYNAMIC STEERING TORQUE (DST) Electronic Stability Control (ESC)¹ directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations — like when there is a different adherence for each wheel. Standard.

ALFA STEERING TORQUE (AST) The AST functionality integrates ESC¹ with electric steering in order to increase the safety level of the vehicle. Thanks to AST, in dangerous situations like braking on a surface with varying grip, ESC will order the activation of additional torque on the steering wheel. Standard.

BLIND-SPOT MONITORING (BSM)⁴ This system has dual ultra-wideband radar sensors that aid the driver when changing lanes and, when trailing vehicles are in the blind spot, via an illuminated sideview mirror icon. Standard.

REAR CROSS-PATH DETECTION⁴ This system is activated any time the vehicle is in Reverse. It lets the driver know there is an object in the rear pathway with illuminated icons on the sideview mirror and with an audible chime. Standard.

THE ACTIVE DRIVER ASSIST SYSTEMS

Alfa Romeo offers Enhanced Driver Safety and Active Driver Assist Systems (ADAS) that represent the latest steps toward a future of autonomous driving. With these systems, drivers are complemented with advanced safety technology when behind the wheel. Standard on Ti models and above with the Active Assist Plus Package.

LANE KEEP ASSIST⁴ With a forward-looking camera system, this system actively helps keep the vehicle within the marked lane by changing the direction of the vehicle by applying brake drag or affecting the steering system. It helps reduce collision potential and road departures by providing a visual and audible warning should the system detect the vehicle drifting outside of lane boundaries or if the driver removes their hands from the wheel. Available.

ACTIVE BLIND SPOT / “SIDE ASSIST”⁴ Change lanes confidently or stay right where you are with this warning system that detects approaching traffic from behind, along with its rate of travel. An LED signal in the corresponding exterior side mirror indicates a vehicle that’s too close, while steering-wheel resistance adds another accident-avoidance action. Available.

TRAFFIC SIGN RECOGNITION⁶ This system can detect posted speed-limit signs and, along with information in the navigation system’s map database, recommend to the driver to adapt their set cruising speed accordingly. Available.

DRIVER ATTENTION ALERT⁴ The system monitors for and detects signs of drowsiness based on driver behaviour, following up with a driver alert and recommendation for rest. Available.

HIGHWAY ASSIST SYSTEM (HAS)⁷ HAS is an autonomous system designed to help with acceleration, braking and steering on highways, reducing driver workload and fatigue. While performing lane-centring steering, it requires drivers to remain engaged by keeping hands on the wheel. Available.

TRAFFIC JAM ASSIST⁸ When traffic is moving slowly on well-marked roads (up to 60 km/h (37 mph)), this enhancement to Adaptive Cruise Control with Full Stop (ACC STOP)⁴ assumes control of the accelerator, brake and steering to keep the vehicle within its lane. Front radar sensors and a front camera help the system orient itself to lane markings, traffic and structures; when conditions reach the limits of the system’s abilities, it alerts the supervising driver to take over. Available.

HISTORICAL HIGHLIGHTS

The courage to reach further — it's what sets this Brand, its designers and its drivers apart. Racing still serves to prove and inspire Alfa Romeo design, long known to be geared for both track and street. It has produced a wide range of innovative vehicles that are now hailed as classics.

1910 The 24 HP was the very first car produced at the ALFA factory, with a top speed of 99 km/h (62 mph). The "Corsa" version of the 24 HP stood out at the 1911 Targa Florio.

1929 Enzo Ferrari began as a test driver for Alfa and soon took charge of the entire racing program. He established "Scuderia Ferrari" in Modena, modifying and tuning every Alfa Romeo race car, resulting in a winning record that still shines brightly on the Alfa Romeo name.

1932 In the 1930s, the Vittorio Jano-designed Gran Premio Tipo P3 was a force — it clocked an unheard-of top speed of 233 km/h (145 mph). It took 46 Grand Prix checkered flags in a three-year period.

1938 Alfa Corse, the in-house racing team for Alfa Romeo, prepared four 8C 2900B cars for the 1938 Mille Miglia, continuing to dominate there by taking the top two positions.

1953 A derivation of the Alfa Romeo 6C 3000 prototype increased engine capacity to 3,495 cc and produced a top speed of 251 km/h (156 mph). It was the winner of the first Gran Premio Supercortemaggiore held in Merano in 1953.

1954 Alfa Romeo introduces Giulietta in several different street models along with a competition-only two-seater, the Giulietta Sprint Zagato. Its all-aluminum and plexiglass construction achieved optimal power and weight ratios with lightweight strength innovations.

1965 Production of subsequent Giulia models for both road and track continued on and off for decades to come, achieving numerous class wins in demanding events such as the 24 Hours of Le Mans, the Targa Florio, 12 Hours of Sebring and the Nürburgring 1,000 km (621 miles).

1967 Enter the Tipo 33 Stradale — often called the most beautiful car of all time. With only 18 produced, the car is extremely rare. The value of each is almost impossible to determine as the 33 Stradale is hardly ever traded.

2015 After the long-awaited North American introduction of the Alfa Romeo 4C, June 2015 revealed the new Giulia Quadrifoglio, the most impressive reincarnation of the Giulia to date, featuring a whole new level of power-to-weight engineering.

2016 The Alfa Romeo Stelvio was the very first high-performance compact luxury crossover SUV manufactured and marketed by Alfa Romeo. Stelvio was first revealed at the 2016 Los Angeles Auto Show and entered production at the Cassino Plant in Italy at the end of 2016. It is named for the Stelvio Pass: Italy's highest mountain pass, noted for its thrilling switchbacks.

(1) No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. (2) Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice controls, when it is safe to do so. Requires compatible iPhone. See retailer for phone compatibility. Data plan rates apply. To use Android Auto on your car display, you'll need an Android phone running Android 8 or higher, an active data plan and the Android Auto App. (3) Requires an iPhone with Siri. Certain features are not available while the vehicle is in motion. iPhone must be within active cellular range. Customer's existing iPhone data rates apply to Internet-supported features. (4) This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of his or her surroundings and be prepared to take corrective action to avoid collisions. (5) The Advanced Front Air Bags in this vehicle are certified to the Federal regulations for Advanced Air Bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a front-passenger air bag. All occupants should always wear their lap and shoulder belts properly. (6) Traffic Sign Recognition is not a substitute for safe and attentive driving. Factors including weather and condition of the traffic sign can impact the recognition and display of the sign. Always check traffic signs visually while driving. (7) HAS requires the driver to keep his or her hands on the steering wheel at all times. This system is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and maintain control of the vehicle. (8) Traffic Jam Assist requires the driver to keep his or her hands on the steering wheel at all times. This system is a driver's convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and maintain control of the vehicle. (9) **If you decide to continue service after your trial, the subscription plan you choose will continue and you will be charged according to your chosen payment method at then-current rates unless you cancel your services.** Fees and taxes apply. Some services and features are subject to device capabilities and location availability. Please see the SiriusXM Customer Agreement at www.siriusxm.ca/terms for complete terms and how to cancel, which includes calling SiriusXM at 1-888-539-7474. All fees and programming are subject to change, provided that we will notify you in advance of any price change. We use personal information in accordance with our Privacy Policy, available at www.siriusxm.ca/privacy. (10) Not compatible with all garage door openers.
