ATTESA E-TS™ AWD G35x Sedan

- Advanced Total Traction Engineering System for All Electronic Torque Split (ATTESA E-TS™) AWD features complete electronic control with electromagnetic coupling, variable-engaged coupling torque and millisecond response time. Advanced torque control automatically apportions power front-to-rear based on vehicle and road conditions. Infinitely variable torque split from 100 percent rear to 50/50 percent front-to-rear. In every situation, this control system provides an effective torque split.

STEERING

- Brake Assist: Brake Assist senses emergency-braking situations via how the driver depresses the brake pedal. If emergency-braking is detected, Brake Assist applies maximum brake force until the brake pedal is released.
- Electronic Brake force Distribution (EBD): EBD varies front-to-rear brake proportioning based on vehicle load, for improved braking performance.

TRACTION AND DIRECTIONAL STABILITY

Traction Control System (RWD)

- Senses wheelspin and automatically reduces engine output and/or up-shifts the transmission to regain traction. Includes Electronic limited-slip which brakes the spinning wheel to divert power toward the wheel with greater traction. (RWD A/T models only)

Traction Control System (AWD)

- Senses wheelspin and with the ATTESSA E-TS™ AWD System, automatically reduces engine output and/or up-shifts the transmission to regain traction. Includes Active Brake limited-slip differential which brakes slipping wheel(s), diverting power to the wheels with greater traction. (AWD G35x Sedan only).

Vehicle Dynamic Control (VDC)²

- VDC compares the driver's input to the vehicle's response while cornering. By selectively braking individual wheels and/or reducing engine output, VDC can help the driver maintain control of the vehicle.

Rear Differential

- Viscous limited-slip rear differential (6MT Sedan)

WHEELS AND TIRES

- Wheels: 6-spoke or (5-spoke in Aero Package), 7.0 x 17-inch aluminum-alloy.
