

LEXUS

2016

ES

A NEW IDEA IS BORN

Before Lexus, cars tended to be one thing or another. Some delivered performance, but not comfort; safety, but not style. With the 1990 release of the LS 400, Lexus introduced itself as a challenger to the status quo, bringing luxury, performance, and technology together for the first time. Over the quarter-century of relentless innovation that followed, Lexus has written a story that is truly Amazing in Motion.

'YET' PHILOSOPHY

Opposites in harmony. This idea is the heart of the Lexus 'Yet' Philosophy, one of our guiding principles since we introduced the very first LS 400. It is why you are able to experience an exhilarating, powerful drive, yet with exceptional fuel efficiency. It is the epitome of luxury, yet with equally high environmental standards. It means surrounding you with the most advanced, yet elegantly intuitive, technology.

OMOTENASHI

Anyone can deliver customer service. But only Lexus delivers *omotenashi* – the Japanese word for hospitality. More than simply fulfilling your requests, at the heart of *omotenashi* is anticipating your needs in advance and delivering service so exceptional it becomes an unexpected pleasure. This higher level of attention comes from an insightful understanding of your individual wants and needs, and a commitment to treating every customer as nothing less than a guest in our home. Like every car we build, we apply the same unrivalled standard to customer care.

L-FINESSE

The philosophy of 'Yet' is also at the heart of the Lexus design philosophy, L-Finesse. The 'L' is for leading edge, and 'Finesse' is the attention paid to every single detail. It is this fusion of radical design concepts yet subtle refinements that surrounds you in the ultimate in both exterior and interior design.

SIGNATURE

The new, yet already iconic, Lexus spindle grille boldly commands attention with its aggressive yet graceful lines. The dramatic curve of our L-shaped LED taillights appear to have been sliced out of the surrounding metal with purpose yet delicacy. Subtler in design yet equally powerful in effect are features like ambient lighting, which acts as much as a visual aid as a warm welcome, and interior instrumentation that perfects both classic and modern styling.

TAKUMI

At Lexus, we never forget that our cars are driven by real humans in the real world. That's why the power of human touch and sight are integral to every step of our manufacturing process. This synergy of technology and craftsmanship comes together in the skilled hands and eyes of the *takumi*, or master craftspeople. To be a *takumi* is to have both exceptional technical expertise and sure senses honed by decades of rigorous experience. In other words, the flawless fit and finish of every Lexus, as well as your enjoyment and peace of mind, is literally in their hands.

PERFECTED FORM

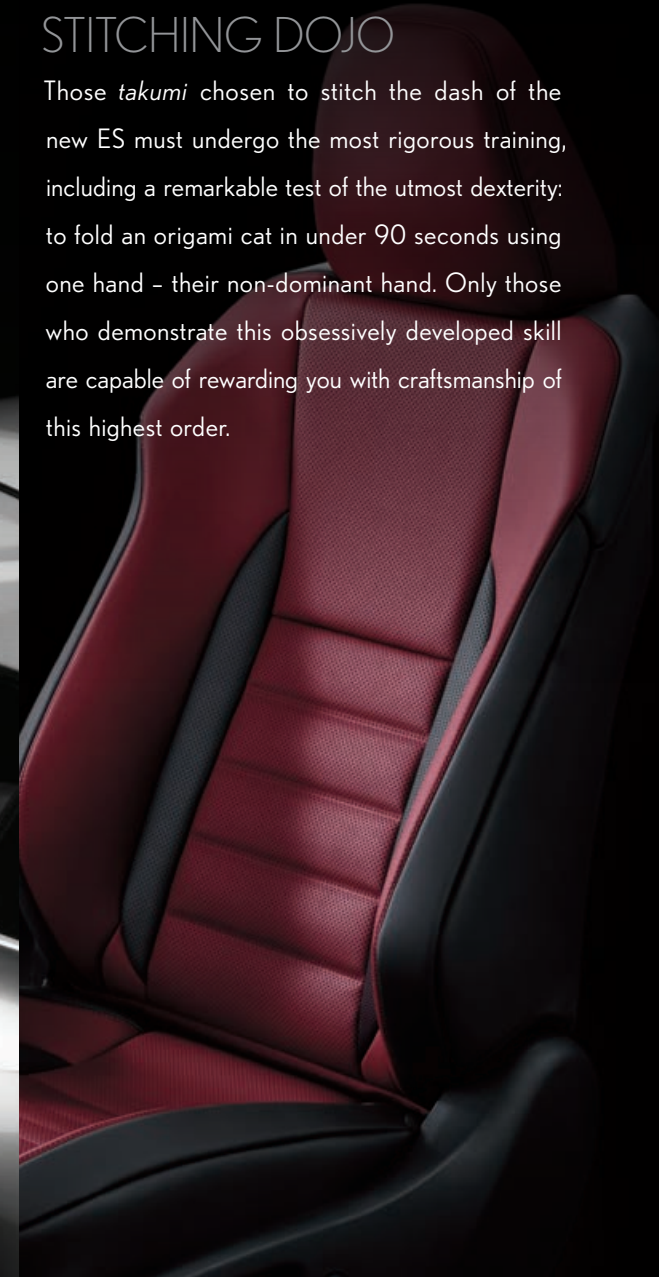

38 days, 67 labour-intensive manufacturing steps are required to create our *Shimamoku* - "striped wood" - steering wheel, a previously unimaginable work of art. Through a fusion of modern machinery and traditional craftsmanship, the end result pleases both the eye and touch.

FLAWLESS FINISH

The *takumi* who work in the body stamping division think in microns. Running their hands over moulds and body pieces, they are able to detect the presence of a fleck of dust or a strand of hair. Their mission is to prevent the slightest imperfection from compromising the flawless quality of your Lexus.

STITCHING DOJO

Those *takumi* chosen to stitch the dash of the new ES must undergo the most rigorous training, including a remarkable test of the utmost dexterity: to fold an origami cat in under 90 seconds using one hand - their non-dominant hand. Only those who demonstrate this obsessively developed skill are capable of rewarding you with craftsmanship of this highest order.

HYBRID

With over 500,000 hybrid vehicles on the road and a greater selection than any other luxury manufacturer, hybrid is neither new nor novel to Lexus. Designing vehicles that deliver the most visceral performance, yet minimize environmental impact, hybrid is a core technology deep at the heart of Lexus. True to our 'Yet' Philosophy, Lexus Hybrid Drive combines an advanced electric motor and powerful yet efficient gasoline engine to deliver a perfectly balanced drive.

SUSTAINABILITY

We lead the industry in more than just hybrid technology. With bio-plastics, made from plants such as bamboo, sugarcane, and soybeans, already used in the cargo area of the CT and in the seats of the RX, Lexus ensures its cutting edge innovations preserve our environment.

LFA

Lexus engineers strove for a decade to create a world-class supercar. In 2010, the result was released: the LFA, a cutting edge machine capable of reaching 100 km/h in just 3.7 seconds. Translating power delivery, handling, and sound into instantaneous and potent sensory stimulation, it has come to represent Lexus, and defines the peak performance of its lineage, the F and *F SPORT* lines.

F

Our F lineup epitomizes the pinnacle of our devotion to high performance and agenda-setting engineering. More than finely tuned handling, aggressive bodywork, and exceptional sporting interiors, these vehicles broadcast speed at every turn.

The 5.0-litre V8 of the IS F supplies track-worthy acceleration via an 8-speed Sport Direct-Shift Transmission that enables lightning fast manual shifts. Even at a standstill, the powerful, projecting form of the LF-CC conveys forward momentum.

F SPORT

From seat design and suspension tuning, to advanced aerodynamics and bold styling, the powerful genes of the LFA live in every Lexus that wears the *F SPORT* badge. Like an injection of racing technology, these high performance packages supply better chassis rigidity, enhanced brakes, transmission, and more. Performance is a pillar of every Lexus model. The *F SPORT* package amplifies it.

CUTTING EDGE SIMULATION

It may not have the stunning lines Lexus is known for, but we are just as proud of this machine as any vehicle we ever built. And just like our vehicles, we built it for you. The world's most advanced driving simulator puts a real driver, in a real Lexus, in real driving situations, but without the real consequences. By observing how drivers react to dangerous situations we can better develop technology that anticipates these dangers in order to help drivers react quickly to avoid them. At Lexus, a world without accidents isn't just a dream, it's a distinct possibility.

LEXUS SAFETY SYSTEM-PLUS (LSS+)

True to innovative form, Lexus has raised its safety standards with Lexus Safety System+, an optional accessory package of automated driver-assist technologies. Introduced for select models in 2016, and available on each model by 2018/19, LSS+ helps protect against accidents by scanning for hazards and working to avoid them. With features like Pre-collision System,²⁶ Lane Departure Alert,²⁵ Automatic High Beam,²⁸ and Radar Cruise Control,⁷ the integrated system helps prevent or mitigate collisions, assist drivers to keep within their lane, and enhance road safety during night driving. Whatever the speed, LSS+ enhances driver awareness, decision-making, and vehicle operations to deliver a safer, more engaging driving experience. Visit lexus.ca for more details.

LEXUS SAFETY SYSTEM +

LF-C2

The LF-C2 roadster signals a new frontier for Lexus. Its bold "Time in Design" styling allows light to caress its angled body and showcase different features depending on where one views it from. Amplifying this fusion of design and performance, the LF-C2 also features an open cabin to deliver an even freer sense of movement.

LF-SA

The LF-SA 2+2 ultra-compact announces itself through a dynamic, muscular exterior, paired with nimble handling to create a sense of unbridled performance in even the most constricted urban environments. With a Stellar silver exterior finish that captures a spirit of space exploration, this new Lexus signals its ceaseless drive towards new horizons.

THE STORY CONTINUES

Driving forward, the relentless innovation that defines the history of Lexus shows no signs of letting up. Experience this continuing revolution in the 2016 Lexus ES.

REDEFINING REFINEMENT.

Take hold of the available wood and heated leather-trimmed steering wheel and immediately you know. The ES has it all. Behind its redesigned modern front fascia and enhanced front bumper, the sleek, whisper-quiet cabin features power-adjustable heated and ventilated front seats and dual-zone automatic climate control. The agile suspension and 6-speed sequential-shift transmission powering new 17-inch alloy wheels make for a smooth yet exhilarating ride. The spacious trunk can manage even the longest of weekends.

MAKE YOUR PRESENCE SEEN.

A revised design of the energy efficient L-Finesse headlamps project bewitching LED low beams from the sculpted front of the ES. Complemented by new L-shaped LED tail lamps and an upgraded exhaust outlet design, this luxury sedan makes an exit as dynamic as its entrance.

AERODYNAMICS Its stunning design delivers a luxurious and surprisingly aerodynamic on-road experience. That means your eye-catching style is practically invisible to the wind. Even at highway speed, the ES gives you a quieter, more efficient ride.

IMPOSING GRILLE The striking form of an even bolder signature spindle grille is just the first announcement of the car's exquisite design. The elegant LED L-shaped arrowhead daytime running lights. The lower, sportier profile. Despite these daring styling elements, the ES still manages an authoritative and composed look overall. Finally, a luxury sedan that is unafraid to show some muscle.

THERE'S ROOM
FOR EVERYTHING.
EXCEPT COMPROMISE.

Along with its meticulously crafted interior, the ES features generous rear seating, automatic dual-zone climate control and available 15-speaker Mark Levinson® Premium Surround Sound Audio System.

SEATING Climb into your 10-way power adjustable heated front seat with ventilation fan and a cockpit that puts navigation and entertainment at your fingertips. Premium leather seats are also available with the Executive package.

STEERING WHEEL Grab hold and behold the new sporty steering wheel. Redesigned for the 2016 ES, it provides improved feel and view of the instrument panel. For even more comfort, a heated leather wrapped power telescopic steering wheel is available with Touring and Executive packages.

MULTI-INFORMATION DISPLAY With the new 2016 ES, staying connected has never been easier and more enjoyable. Experience the 4.2-inch Thin Film Transistor (TFT) multi-information display with Eco Drive Monitor, which places vehicle route statistics and multimedia information front and centre.

A COMMANDING PERFORMANCE THAT COMMANDS ATTENTION.

Behind the icy sheen of the newly reshaped arrowhead LED daytime running lights and bold spindle grille lies a true luxury sedan focused on the power and spaciousness needed for genuine comfort and style. With its extended and low, aerodynamic profile, the ES delivers outstanding ride quality and stability.

DRIVE MODE SELECT Why be amazing in just one way? Choose between three styles of driving. Normal, ECO and Sport modes for your desired balance of refinement, performance and fuel efficiency.

3.5 L V6 WITH DUAL VVT-i The 268-horsepower 3.5-litre V6¹ is responsive even when the ES is loaded with passengers. The engine is mated to a 6-speed Electronically Controlled Transmission (ECT) for deliciously smooth shifts and enhanced performance at all speeds.

SUSPENSION Featuring increased body rigidity, tuned shock absorbers, front and rear Macpherson struts, and stabilizer bar, the 2016 ES offers enhanced stability and improved driving feel while also reducing noise and vibration.

A STATE OF THE ART SAFETY NET.

The ES lavishes you with innovative comforts but it also surrounds you and your passengers with cutting-edge safety technologies. Ten airbags¹⁷ are just the beginning. The ES is bristling with available cameras, sensors, and traction control systems that are constantly on guard, so you can focus on enjoying the ride.

VEHICLE STABILITY AND TRACTION Vehicle Stability Control (VSC) and Traction Control (TRAC) work together to help enhance driving stability at high speeds and in inclement weather. By harmonizing the steering, braking, and stability systems, VSC works with TRAC to balance driving control before a driving wheel loses its grip.

BLIND SPOT MONITOR AND DYNAMIC RADAR CRUISE CONTROL⁶ Available safety features include the Blind Spot Monitor System,⁶ which uses radar sensors to help alert you to vehicles in your blind spots, and Dynamic Radar Cruise Control, helping you maintain a safe distance from other vehicles by automatically slowing the throttle or braking when cars ahead slow down.

10-AIRBAG SYSTEM¹⁷ Standard airbags include driver and passenger knee airbags, front seat-mounted side airbags, front and rear side-curtain airbags and rear seat side airbags. In addition, front seats are designed to help decrease the severity of whiplash-type injuries in certain rear collisions.

A MASTER OF
HYBRID TECHNOLOGY.
AND THE ROAD.

Lexus is the defiant innovator of hybrid technology. The ES Hybrid is proof of that mastery. It produces an impressive 200 net system horsepower¹⁶ while producing nearly 70% fewer smog-forming emissions than comparable gas or diesel engines.² Best of all, this incredible power and efficiency comes without the need for premium fuel.

h

THIRD GENERATION HYBRID

One of our most advanced and efficient hybrid systems to date. It offers sumptuous comforts and shockingly low emissions, all with the rock-solid reliability that can only come from the Lexus nameplate.

STANDARD LUXURY

LUXURY AND CONVENIENCE:

- SmartAccess with push-button Start/Stop⁴
- Multi-function, in-key remote entry system with rolling-code technology
- Integrated garage door opener (HomeLink®)¹⁹
- Auto-dimming inside rearview mirror with digital compass
- Analog clock with LED illumination
- 12 volt accessory power outlet
- Intuitive parking assist
- Premium illuminated entry system

SEATING AND TRIM:

- Perforated NuLuxe Piano Black interior trim
- 3-spoke leather-wrapped steering wheel and shift knob
- 10-way power-adjustable heated front seats with ventilation fan

AUDIO, COMMUNICATIONS AND INSTRUMENTATION:

- 8-speaker Lexus premium audio system
- Steering wheel-mounted audio, phone and display controls
- All-new Remote Touch Interface
- Lexus Display Audio with display audio controller
- Integrated XM® Satellite Radio¹³
- USB and auxiliary minijack audio input for iPod/iPhone®¹⁵ and music player integration with audio system
- Bluetooth¹² audio profile for wireless integration of compatible music players and automatic phonebook synchronization
- Electroluminescent instrumentation
- Analog clock with LED illumination
- Drive Mode Select with Normal, ECO and Sport modes
- 4.2" TFT multi-information display with Eco Drive Monitor

STANDARD SAFETY AND SECURITY

ACTIVE SAFETY:

- Star Safety System
- Smart Stop Technology (SST)¹⁸
- Vehicle Stability Control (VSC)¹⁰
- Traction Control (TRAC)
- Electronic Brake-force Distribution (EBD)
- Direct Tire Pressure Monitor System¹⁴
- Automatic on/off projector-beam headlamps
- LED headlamps
- LED fog lamps
- Heated exterior rearview mirrors with integrated turn signal lamps
- Intuitive parking assist with clearance and backup sensors

PASSIVE SAFETY:

- Driver and front-passenger airbag system (SRS)^{9,17}
- Front seat-mounted side airbags¹⁷
- Rear outboard seat-mounted side airbags¹⁷
- Front and rear side curtain airbags¹⁷
- Driver and front-passenger knee airbags¹⁷
- Active front headrests²¹
- Child Restraint System (CRS) tether anchor brackets for rear outboard seats

SECURITY:

- Vehicle theft-deterrent system
- Engine immobilizer system
- Tool kit
- First aid kit

SERVICE COMMITMENT

On top of enjoying the highest quality product, Lexus also delivers through a professional Dealer network, a unique and uncompromising level of after-sales service. First Class Service Concept. The highest level of professionalism and vehicle support ensure that Lexus ownership experience is as luxurious as the vehicles.

WARRANTY

Our Lexus Warranty Comprehensive Coverage includes:

48 months/80,000 km

Hybrid-Related Components

96 months/160,000 km (applies to battery control module, hybrid vehicle control module, hybrid battery and the inverter/converter)

Powertrain

72 months/110,000 km

Corrosion Perforation

72 months/unlimited kilometres

Major Emission Control Components

96 months/130,000 km

Please see your Lexus Dealer for details. Lexus will even provide five days of alternate transportation if your vehicle is required to stay at the dealership for an extended period of time due to a warrantable condition.

EXTRA CARE PROTECTION

Extend beyond the new vehicle warranty and enhance your peace of mind with Lexus Extra Care Protection.

ROADSIDE ASSISTANCE

As a proud owner of a Lexus vehicle you won't have to worry about obtaining assistance when mishaps requiring Emergency Roadside Service or Mechanical Breakdown Towing are needed. Throughout Canada and the continental U.S., our Central Emergency Roadside Services Operator will always be there to ensure you receive prompt, efficient services from one of the many facilities qualified under our approved Roadside Assistance Program. Twenty-four hours a day, 365 days a year we will be there to help.

LEXUS FINANCIAL SERVICES

Come talk to the experts whose exclusive business is financing and leasing Lexus vehicles. You'll find our interest rates fully competitive and our terms flexible - up to 72 months. Our online services conveniently allow you to confirm current rates and receive your credit approval in advance of selecting the Lexus that's right for you. For help, visit your Lexus Dealer or lexus.ca, or call 1-800-26-LEXUS.

LEXUS CANADA

Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in standard equipment, options or product delays may occur, which would not be reflected in this brochure. Lexus Canada reserves the right to make these changes without notice or obligation. Some of the photography in this brochure features U.S. or overseas models, shown with optional equipment that may not be available in Canada. Your Lexus Dealer is the best source for up-to-date information.

Vehicles in this brochure shown with optional equipment. Some features mentioned and/or shown in this brochure may only be available as part of an optional package. Under very cold conditions, the operation of some vehicle electronic systems using liquid crystal technology (such as CD, DVD, NAV and Audio displays) may be adversely affected until a warmer interior vehicle temperature is reached. Lexus reminds you to place small children in CSA-approved car seats - in the rear seats, to always wear your seatbelts, and to drive safely. **1.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. **2.** The Lexus Hybrids have nearly 70% fewer smog-forming emissions compared against similarly equipped conventional gasoline power vehicles. Based on North American sales data and Federal Tier 2 engine emission requirements. **3.** Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. **4.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **5.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. **6.** Do not rely exclusively on the Blind Spot Monitor System to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are severe limits to the function, detection range and clarity of the monitor system. For a complete list of limitations and directions regarding use of the monitor system, please see your Owner's Manual. **7.** Dynamic/Radar Cruise Control was designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your Owner's Manual for important cautions and instructions. **8.** Mark Levinson is a registered trademark of Harman International Industries Inc. **9.** All Lexus vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Lexus Dealer. **10.** Vehicle Stability Control (VSC) and if applicable Vehicle Dynamics Integrated Management (VDIM) are electronic systems designed to help the driver maintain vehicle control under adverse conditions. They are not substitutes for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC and VDIM will be effective in preventing a loss of control. Please see your Owner's Manual for further details. **11.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **12.** Lexus tests certain Bluetooth® capable phones for compatibility with Lexus vehicles. Please see your Lexus Dealer for details. Note that the recommendation of Lexus is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. **13.** Functioning Satellite Radio requires a monthly service fee. Please see your Lexus Dealer for further details. Reception of satellite signal may vary depending on location. **14.** The Lexus Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. Please see your Owner's Manual for details. **15.** iPod/iPhone® is a registered trademark of Apple Inc. **16.** Maximum output indicates engine plus HV battery output. **17.** All the airbag ("AB") systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts. Do not use a rearward-facing child seat in any front passenger seat. Please see your Owner's Manual for further information/warnings. **18.** Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes to bring the vehicle to a stop. Factors including speed, road conditions, driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your Owner's Manual for further details. **19.** HomeLink is a registered trademark of Johnson Controls. **20.** Continuous average power, all channels driven, at less than 0.1% THD; 20-20,000 Hz. **21.** Active headrests can help reduce the extent of whiplash in certain types of rear-end collisions. **22.** The Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Road system changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available for every city or roadway. Periodic updates available at an additional cost. See your Navigation System Owner's Manual for further details. Navigational systems in some vehicles are available with bilingual capability. **23.** A single disc DVD player is standard on vehicles equipped with the dual-screen Rear-Seat Entertainment System. A separate DVD player or game system utilizing the centre console's video/audio inputs is required in order to use the split-screen function. **24.** Do not rely exclusively on the Rear Cross-Traffic Alert System. There are limitations to the function, detection and range of the system. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm rearward clearance. For a complete list of limitations and directions, please see your Owner's Manual. **25.** Lane Departure Alert is designed to range the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your Owner's Manual for further information. **26.** The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your Owner's Manual for further information. **27.** Intelligent high-beam system operates at speed above 21 mph. Situations such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to turn off manually. See Owner's Manual for details. **28.** Automatic high beam feature can help improve vision at night. However, conditions such as a dirty windshield, rapidly changing light conditions or hilly terrain will limit effectiveness so the driver may need to manually adjust the highbeams from on to off. Please see your Owner's Manual for details.
