

LEXUS

THE ALL-NEW 2015 LEXUS

NX

NX

MEET LUXURY AND STYLE'S OVERACHIEVING OFFSPRING.

Intricately designed and meticulously crafted. Luxuriously appointed and surprisingly spacious. In the ever advancing and increasingly demanding luxury compact SUV market, the NX is more than ready for the road – and to exceed your expectations. Powerful meets practical in Lexus' first turbocharged SUV – and it's a beautiful thing.

HAS GOOD LOOKS, GETS GOOD LOOKS.

The imposing, aggressively sculpted NX body is rife with splendid details thoughtfully included with style in mind. Aggressively formed lines and protruding flares unite to the diamond-shaped body that starts at the spindle grille while the presence of the tires has been emphasized to show off its powerful stance. The bottom of the door panels kick up to pass through the peak of the rear combination lamp, creating unique proportions with a three-dimensional and dynamic feel.

LED HEADLAMPS THAT TRULY SHINE The distinctive L-shaped design expresses the Lexus signature in these optional LED headlamps. The headlamps are separated from the daytime running lamps.

MORE SKYROOF THAN SUNROOF Feel the wind and the sky with the available moonroof that slides open from 215 mm to 279 mm – the world's largest in its segment.

THE DOOR HANDLE, ELEVATED Even entry into the NX is stylish; the door handles themselves are accented by puddle lamps and an illuminated line that emphasize the silhouette of the upper section. The key is inserted in a gap between the handle and door panel to essentially create a keyhole-less design (a first of its kind) followed by a graceful illumination fade out.

LED TAIL LAMPS WITH BRILLIANT DESIGN

Dynamic tail lamp design seamlessly integrate bodylines at the back of the NX with signature L-shaped illumination.

KEEP METICULOUS TRACK OF HOW MUCH DUST YOU'RE KICKING UP.

The well-crafted interior of the NX offers a multitude of precise ways to monitor your drive, starting with what's right in front of the steering wheel. The newly designed combination meter displays temperature, tachometer, speed, and fuel, framed by a striking silver-painted ring. Beside is the multi-information display, a 4.2 inch Thin Film Transistor LCD panel that displays key driving information in vivid colour.

AVAILABLE REMOTE TOUCH INTERFACE

This touch-sensitive next generation Remote Touch Interface seamlessly fits in the advanced NX cockpit, to give you instant access to in-car information including climate, navigation, and audio.

VGA CENTRE MULTI DISPLAY The 7-inch standard VGA Centre Multi Display shares climate, audio, and navigation information. In an elevated location to minimize changes in driver line of sight, the VGA display is operated by the Display Audio controller or available Remote Touch Interface.

HEAD UP DISPLAY Key information like speed, current gear, rpm, and audio is beautifully projected in colour onto the bottom of the windshield ahead of you via a 6.2 inch Thin Film Transistor LCD panel.

ADVANCED VOICE RECOGNITION Command recognition in the NX has been greatly improved thanks to the new dual microphone system, Standard Voice Box® and Nuance® voice recognition technology that employ integrated onboard/off-board voice recognition.

A side profile of a silver Lexus NX driving on a road. The car is in motion, with a blurred background suggesting speed. The lighting is dramatic, with a bright light source from the right creating a strong highlight on the road surface and the car's body. The car's sleek design and alloy wheels are visible.

A HEARTY APPETITE FOR ASPHALT.

At the heart of the NX, remarkable power and exhilarating performance duke it out to a pulse-quickenning tie. You'll find this out - to your driving delight - on whatever road you choose to dominate.

NX 300h

MORE IMPACT ON YOUR
SENSES, LESS IMPACT ON
THE EARTH.

The Lexus Hybrid Drive system works in concert with the Electronically Controlled CVT (Continuously Variable Transmission) to environmentally upgrade your drive with high fuel efficiency, clean emissions, and surprisingly hushed quietness. All this without compromising on the driving experience. The 2.5-litre 4-cylinder engine¹ operates on the Atkinson Cycle and has highly efficient intake and exhaust systems to deliver optimal output performance.

**LEXUS
HYBRID
DRIVE**

NX 200t

PUT THE PEDAL TO THE TURBO-CHARGED METAL.

With its newly developed Lexus-First 2.0-litre 4-cylinder direct injection turbo-charged engine,¹ not surprisingly the NX 200t exhilarates as much as it accelerates. Operating on the Atkinson Cycle, excellent fuel efficiency and driving performance are achieved simultaneously while exhaust gas interference has been eliminated to improve response over a wider torque band. This coupled with a 6-speed Electronically Controlled Transmission with sequential shift and imposing dual exhaust ports.

EVEN MORE NX THAN NX.

An enviable options package that magnifies performance and style from the tires up. From the unique grille and bumper to the reflective metallic finish trim on the pedals and scuff plate to the perforated leather trim on the steering wheel and shift knob, the NX *F SPORT* grabs your attention and doesn't let go. The exquisite sports seats that hold you firmly in place were designed with performance conditions in mind.

ENJOY A SMOOTH FLIGHT Experience excellent handling stability thanks to the front and rear performance dampeners that enhance the vehicle's rigidity and minimize vibration.

SEATS DESERVING OF A STANDING OVATION

The NX's exclusive *F SPORT* seats bolster full support during high-performance driving with 4-way adjustable headrests and integrated foaming construction, all complemented by lush NuLuxe interior trim.

SOUNDLY SAFE.

The NX comes with eight airbags,¹⁸ standard fog lights, cornering lights, and available Blind Spot Monitor System⁸ that helps keep eyes on the parts of the road where your eyes may not see.

200t

STANDARD LUXURY

LUXURY AND CONVENIENCE:

Dual Zone Automatic Climate Control
Backup camera⁶
Cruise Control
Power-adjustable heated mirrors, integrated signal lamps
Auto-dimming rear view mirror
Power windows with auto up/down for all windows
Windshield wiper de-icer
Rear privacy glass
Variable intermittent wipers
Headlamp washers
Tilt and telescopic steering wheel
Leather wrapped steering wheel with audio controls
Leather wrapped shift knob
Fadeout dome lamp
Illuminated entry with fadeout
Illuminated vanity mirrors
17-inch aluminum alloy wheels with wheel locks
Roof mounted spoiler
Dual exhaust
Rear bumper protector
Front and rear splash guards

SEATING AND TRIM:

NuLuxe seat surfaces
Heated 8-way power adjustable front seats
Driver power lumbar support
Rear seat adjustments: 60/40 split rear seats
Rear recline and foldable seat, centre armrest

AUDIO, COMMUNICATIONS AND INSTRUMENTATION:

Lexus Display Audio with 8 speakers, Remote Touch interface
TFT multi information display
Shark fin type antenna
USB audio input
Bluetooth[®] capability¹⁴
12V auxiliary power outlet
ECO Indicator
Tachometer

STANDARD SAFETY AND SECURITY

ACTIVE SAFETY:

LED Brake Lamps
LED Headlamps – Low Beam
LED Daytime Running Lights
LED Fog Lamps
Direct Tire Pressure Monitoring System¹⁵
Low fuel warning

PASSIVE SAFETY:

Dual stage driver and passenger airbag Supplemental Restraint System (SRS)^{11, 18}
Front seat mounted side airbags¹⁸
Driver knee airbags¹⁸
Passenger seat cushion airbag¹⁸
Front and rear side curtain airbags¹⁸
Front seats and headrests with Whiplash Protection¹⁹
Anchor points for child restraint seats

SECURITY:

SmartAccess Key with Push Button Start⁵
Front door handle touch sensor lock/unlock
Anti-theft System
Engine immobilizer
First aid kit

LEXUS GENUINE ACCESSORIES:

Block heater
Body side moulding
Cargo liner
Hood deflector
Doorsill plate
Paint protection film
Roof rack
Running boards
Towing hitch
Trailer ball
Trailer wire harness
Towing platform

SERVICE COMMITMENT

On top of enjoying the highest quality product, Lexus also delivers through a professional Dealer network, a unique and uncompromising level of after-sales service. First Class Service Concept. The highest level of professionalism and vehicle support ensure that Lexus ownership experience is as luxurious as the vehicles.

WARRANTY

Our Lexus Warranty Comprehensive Coverage includes:

48 months/80,000 km

Hybrid-Related Components

96 months/160,000 km (applies to battery control module, hybrid vehicle control module, hybrid battery and the inverter/converter)

Powertrain

72 months/110,000 km

Corrosion Perforation

72 months/unlimited kilometres

Major Emission Control Components

96 months/130,000 km

Please see your Lexus Dealer for details. Lexus will even provide five days of alternate transportation if your vehicle is required to stay at the dealership for an extended period of time due to a warrantable condition.

EXTRA CARE PROTECTION

Extend beyond the new vehicle warranty and enhance your peace of mind with Lexus Extra Care Protection.

ROADSIDE ASSISTANCE

As a proud owner of a Lexus vehicle you won't have to worry about obtaining assistance when mishaps requiring Emergency Roadside Service or Mechanical Breakdown Towing are needed. Throughout Canada and the continental U.S., our Central Emergency Roadside Services Operator will always be there to ensure you receive prompt, efficient services from one of the many facilities qualified under our approved Roadside Assistance Program. Twenty-four hours a day, 365 days a year we will be there to help.

LEXUS FINANCIAL SERVICES

Come talk to the experts whose exclusive business is financing and leasing Lexus vehicles. You'll find our interest rates fully competitive and our terms flexible – up to 72 months. Our online services conveniently allow you to confirm current rates and receive your credit approval in advance of selecting the Lexus that's right for you. For help, visit your Lexus Dealer or lexus.ca, or call 1-800-26-LEXUS.

LEXUS CANADA

Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in standard equipment, options or product delays may occur, which would not be reflected in this brochure. Lexus Canada reserves the right to make these changes without notice or obligation. Some of the photography in this brochure features U.S. or overseas models, shown with optional equipment that may not be available in Canada. Your Lexus Dealer is the best source for up-to-date information.

lexus.ca 1-800-26-LEXUS

Lexus, One Toyota Place,
Toronto, Ontario M1H 1H9

Vehicles in this brochure shown with optional equipment. Some features mentioned and/or shown in this brochure may only be available as part of an optional package. Under very cold conditions, the operation of some vehicle electronic systems using liquid crystal technology (such as CD, DVD, NAV and Audio displays) may be adversely affected until a warmer interior vehicle temperature is reached. Lexus reminds you to place small children in CSA-approved car seats - in the rear seats, to always wear your seatbelts, and to drive safely. **1.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. **2.** Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. **3.** Lane Departure Alert is designed to read the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your Owner's Manual for further information. **4.** Do not rely exclusively on the Rear Cross-Traffic Alert System. There are limitations to the function, detection and range of the system. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm rearward clearance. For a complete list of limitations and directions, please see your Owner's Manual. **5.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **6.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. **7.** The Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Road system changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available for every city or roadway. Periodic updates available at an additional cost. See your Navigation System Owner's Manual for further details. Navigational systems in some vehicles are available with bilingual capability. **8.** Do not rely exclusively on the Blind Spot Monitor System to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are severe limits to the function, detection range and clarity of the monitor system. For a complete list of limitations and directions regarding use of the monitor system, please see your Owner's Manual. **9.** Dynamic/Radar Cruise Control was designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your Owner's Manual for important cautions and instructions. **10.** The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your Owner's Manual for further information. **11.** All Lexus vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Lexus Dealer. **12.** Vehicle Stability Control (VSC) and if applicable Vehicle Dynamics Integrated Management (VDIM) are electronic systems designed to help the driver maintain vehicle control under adverse conditions. They are not substitutes for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC and VDIM will be effective in preventing a loss of control. Please see your Owner's Manual for further details. **13.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **14.** Lexus tests certain Bluetooth® capable phones for compatibility with Lexus vehicles. Please see your Lexus Dealer for details. Note that the recommendation of Lexus is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. **15.** The Lexus Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. Please see your Owner's Manual for details. **16.** Automatic high beam feature can help improve vision at night. However, conditions such as a dirty windshield, rapidly changing light conditions or hilly terrain will limit effectiveness so the driver may need to manually adjust the highbeams from on to off. Please see your Owner's Manual for details. **17.** Maximum output indicates engine plus HV battery output. **18.** All the airbag ("AB") systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts. Do not use a rearward-facing child seat in any front passenger seat. Please see your Owner's Manual for further information/warnings. **19.** Whiplash Injury Lessening (WIL) front seats can help reduce the extent of whiplash in certain types of rear end collisions. **20.** HAC is designed to help minimize backward rolling on steep ascents. These suggestions are not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. **21.** Before towing, confirm your vehicle and trailer are compatible, hooked up properly and you have any necessary additional equipment. If gross trailer weight is above 5,000 lb (2,268 kg), it is necessary to use a weight-distributing hitch with sufficient capacity. Do not exceed any Weight Ratings and follow all instructions and cautions from your trailer-hitch manufacturer and vehicle Owner's Manual. The maximum amount you can tow depends on the total weight of any cargo, occupants and available equipment.
