THE WAY OF INFINITI

WE BEGIN WITH A FULL SHEET OF PAPER.
A LIST OF SENSATIONS WE INTEND TO CREATE.
FROM TRANQUILLITY TO INVINCIBILITY.
WE LOOK TO NATURE FOR INSPIRATION.
AND TO THE SKILLS OF JAPANESE CRAFTSMAN FOR CREATION.
WE SEEK THE MOST BEAUTIFUL SHAPES, THE MOST LUXURIOUS TEXTURES,
THE MOST DYNAMIC FORCES.
ALL TO BUILD A DEEPER SENSORY CONNECTION BETWEEN CAR AND DRIVER.
A MORE MOVING EXPERIENCE.

THIS IS INSPIRED PERFORMANCE.

THIS IS THE WAY OF INFINITI.

INSPIRED PERFORMANCE WELCOME TO THE WORLD OF INFINITI

Infiniti from Japan is defined by both pioneering performance and all-encompassing hospitality.

In an Infiniti, you'll enter a whole new dimension of driving pleasure. Up to 390 PS with the 5.0-litre V8 petrol engine. Up to 550 Nm torque with the 3.0-litre V6 diesel engine. Stunning hybrid acceleration of 0–62 mph in 5.5 seconds.

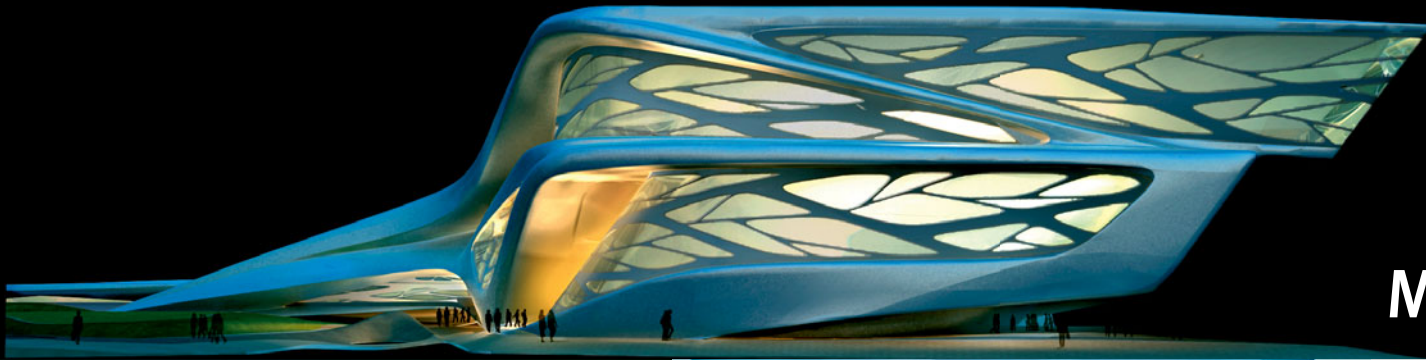

Infiniti enriches this power with the elegant simplicity of advanced aerodynamic design. Implementing forms and materials inspired by nature, each vehicle harmonises the interior and the exterior, so you immediately feel at home. An experience of hospitality that already begins at the Infiniti Centre, a living expression of Japanese culture at its finest.

Choosing an Infiniti is an expression of the desire for something different and new – for something progressive and tailored to your needs. An experience inspired by Japanese fine arts and culture, while still delivering the performance you demand.

The beauty of luxury is in the balance – breathtaking grace and stunning power in one.

Keep an eye out for the upcoming market release of Infiniti Etherea, designed for a new generation of confident buyers eager to challenge conservative stereotypes. With its supercharged 2.5-litre 4-cylinder hybrid engine, the Infiniti Etherea redefines the compact luxury car: part stylish coupé, part spacious sedan, part practical hatchback, and a large dose of sports car.

MODERN PERFORMANCE-DRIVEN DESIGN

THE HIGH **ART** OF JAPAN TODAY

AN INSPIRED PARTNERSHIP

Pulse-racing acceleration. Precision handling. Masterful performance. Infiniti is no stranger to exhilaration behind the wheel. Nor is Red Bull Racing.

Two pioneers with a passion for the extraordinary, it only makes sense that Infiniti and Red Bull Racing have joined forces in an exciting brand partnership.

As well as the perfect meeting of hearts, minds and souls, Infiniti and Red Bull Racing are proud to be in the company of two of today's most exciting drivers: the hard-charging Australian Mark Webber and 2010's youngest ever Formula One World Champion, Sebastian Vettel. For the drivers, the performance continues off-track, as well, each driving their own Infiniti.

Shared passions. Mutual ambitions. An inspired partnership.

Welcome to a whole new level of performance.

DIGITAL ART REIMAGINING DESIGN

Digital design is the art of the future. The Infiniti Digital Art Competition initiative thereby springs from the very heart of Infiniti's commitment to inspired performance – transforming the predictable into the extraordinary, combining radical design with innovative and intuitive technology.

In a groundbreaking international competition, young artists from around the world have been invited to add artistic panache to the newest Infiniti Centres opening throughout Europe. An international jury of art, automotive and advertising experts will handpick the most innovative and compelling designs for exhibition. Look forward to pioneering departures from the status quo of traditional design at selected Infiniti Centres in 2011/12.

Find out more about the competition by going to www.designboom.com/infiniti

TOTAL OWNERSHIP EXPERIENCE

COME TO OUR CENTRES,
WHERE EVERY MOMENT OF INFINITI IS UNIQUE.

By choosing Infiniti you have chosen to break with tradition. You have chosen a new form of expression instead of traditional emotions, you have chosen to be catered for in an environment that surpasses traditional luxury and to be treated in a genuine way that transcends traditional service.

OUR PHILOSOPHY – MORE THAN ONLY A CAR
Infiniti is a special journey, unique and personal. It begins the first time you step inside an Infiniti Centre and continues throughout your ownership of the car, even when you are not driving.

This all-round Infiniti experience is the Reward of individualiti™. A reward which includes driving an exclusive car, of course, but also the entire buying experience, our inspiring staff and extraordinary services.

THE INFINITI CENTRE – DESIGNED TO ENCHANT YOU
Welcome to a completely new car showroom experience. Contemporary architecture, avantgarde artwork and bespoke furnishing make each Infiniti Centre unique, fresh and inviting – reminiscent more of a boutique hotel than a car dealership.

Enjoy the details: the well-appointed lounge, the stylish coffee bar, custom-composed music. You are invited to relax, to enjoy a moment of reflection in a professional setting. If work can't wait, use our WiFi access to answer urgent e-mails – while remaining immersed in an oasis of calm.

Explore the cars: the models on display and those available for test drive as well as the entire Infiniti range – on interactive 57" HD touch screens, which let you traverse the spectrum of colours and options available for each Infiniti.

**YOUR INFINITI AMBASSADOR –
HOSPITALITY FUELLED BY PASSION**

Every member of staff at the Infiniti Centre is an ambassador of the brand, embodying our values and representing our beliefs. In-depth service training is one part of the equation, the other is real enthusiasm and individuality.

**YOUR DIRECT CONTACT PERSON AT INFINITI
IS THERE TO INSPIRE YOU.**

INFINITI SERVICES TAILORED TO YOUR LIFESTYLE

FOR AN INFINITI OWNER, WE KNOW TIME IS PRECIOUS. THAT'S WHY INFINITI SERVICES ARE CONCEIVED TO MAKE YOUR LIFE EASIER AND YOUR EXPERIENCE OF INFINITI EVEN RICHER.

TOURING ASSISTANCE

Flat tyre? Lost key? If you are away from home and require assistance, our Mobility Services are available 24 hours a day, 7 days a week. Should you need a hotel or replacement vehicle, we provide only premium class accommodation and courtesy cars. Should you need to continue your travels urgently, we fly you business class.

Regardless who is driving your Infiniti (you, your spouse, or a friend), everyone aboard is covered, throughout Europe. It doesn't even matter if you are travelling in another vehicle, you are still eligible for Touring Assistance. Just because you own an Infiniti.

WARRANTY

For your peace of mind, our comprehensive warranty policy covers the first 3 years of Infiniti ownership or 60,000 miles. Just one of the highlights: the warranty includes full coverage for any paint defects, regardless of the number of miles driven. The policy even covers body perforation by corrosion for a total of 12 years.

INFINITI OWNERSHIP

The moment your Infiniti leaves the showroom, you are added to our exclusive guest list for premium events and other services.

Infiniti is a special journey,
unique and personal.
It begins the first time you
step inside an Infiniti Centre
and continues throughout
your ownership of the car.

All-Wheel-Drive (AWD)

Sports Brakes

Rear-Wheel-Drive (RWD) and front mid-ship platform

DYNAMIC PERFORMANCE

Infiniti engineers mix proven concepts with bold new detail to redefine the driver's relationship with the car. Smoothly dynamic. Intuitively responsive. Pleasantly invigorating.

Effortless Acceleration

Stunning power coupled with unbelievable smoothness – that's what distinguishes the Infiniti 3.7-litre V6 engine (5.0-litre V8 in the FX50). Plus, thanks to **Variable Valve Event and Lift (VVEL)** technology, you get the best of both worlds without compromise: maximum power with refined delivery. The visceral intensity of 320 PS (390 PS in the FX50) and a surging acceleration swell make the power seem effortless. Accelerate to 62 mph in only 5.8 seconds in the FX50 and listen closely to the roar of the engine – the beauty is in the details: confident and exuberant.

Dynamic Agility

For maximum agility, optimum balance and smoother directional changes, the engine is placed as far back as possible in a front mid-ship format, better balancing the weight distribution between the axles.

The **four Wheel Active Steering (4WAS)** in the G37 S Premium, G37 Coupé S, S Premium and Infiniti M S, S Premium maximises grip and increases stability at higher speeds without sacrificing driving sensation. And in extreme situations, a viscous Limited Slip Differential (LSD) distributes torque between the rear wheels. For athletic precision on the road, the FX50 features **Rear Active Steering (RAS)**¹.

Pleasure and Control

The intelligent **All-Wheel-Drive system (ATTESA E-TS AWD)**, standard on the FX, EX and optional on the G, dynamically adapts to road conditions: shifting power to the front wheels to boost traction and control when conditions are difficult and, in good conditions, shifting power to the rear wheels for greater driving pleasure.

Powerful Brakes

Sports brakes are available on almost all models, featuring lightweight aluminium opposite piston callipers to allow for bigger brake discs without added weight. The 350 mm and 355 mm discs ensure better control, improved fade resistance and faster, stronger stopping power.

Infiniti V6 Petrol – pioneering power

Regularly celebrated by international awards, the twin-cam 24-valve, 3.7-litre Infiniti V6 engine produces 320 PS and an impressive 360 Nm torque at 5,200 rpm. This all-alloy sporting engine endows the Infiniti range with performance that pleasantly exceeds expectations. The secret behind the V6 is the VVEL system (Variable Valve Event and Lift), Infiniti's patented technology that continuously adjusts the valves, unleashing not just great power but, compared to conventional variable valve designs, also delivering higher torque and improved

Engine type	V6 Petrol	V8 Petrol	V6 Diesel	V6 Hybrid
Displacement (cc)	3,696	5,026	2,993	3,498
Output (maximum kW/PS)	235/320	287/390	175/238	268/364 (combined engine)
Torque (maximum Nm) at (rpm)	360 at 5,200	500 at 4,400	550 at 1,750	350 at 5,000 (petrol motor) 270 at 1,770 (electric motor)
Emission compliance	Euro 5	Euro 5	Euro 5	Euro 5

emissions. It's a free-revving difference you'll notice with even the slightest hint of pressure on the accelerator.

Infiniti V8 Petrol – breathtaking engineering

While VVEL was pioneered for the 3.7-litre V6, the technology really comes into its own in the 5.0-litre V8 at the heart of the FX50 – one of the fastest and most rewarding crossovers on the road, with a breathtaking turn of speed and the muscular exhaust note to prove it. The engine delivers a stunning 390 PS at 6,500 rpm, with acceleration from 0–62 mph in just 5.8 seconds. Plus, plenty of ample torque (500 Nm at 4,400 rpm) that's never in short supply.

Infiniti V6 Diesel – even more torque on board

Infiniti transfers this same driving pleasure and exhilarating performance to the new Diesel engine. Available in EX and FX models from early 2010 and in the Infiniti M from September 2010, the new 3.0-litre V6 Diesel engine offers the highest torque of any Infiniti (550 Nm from 1,750 rpm) – that's even higher than the V8 Petrol engine. The 7-speed automatic transmission with adaptive programming benefits both drivability and fuel economy – with no compromise on performance either. Touch the gas pedal and you'll feel immediate response, with top output reaching an impressive 238 PS at 3,750 rpm.

Infiniti Hybrid – improved fuel economy, performance and driving pleasure

The Infiniti Hybrid continues our focus on maximising driving pleasure, redefining the concept of the Hybrid with innovative Direct Response technology and one of the most powerful electric motor in a passenger Hybrid Electric Vehicle. Available in the Infiniti M from 2011, the Hybrid features a charismatic V6 petrol engine with Rear-Wheel-Drive (RWD) handling. Drivers can look forward to exhilarating performance and smooth, consistent control in all conditions – as well, of course, to unparalleled fuel efficiency and low emissions.

¹ Rear Active Steering cannot help prevent accidents as a result of abrupt steering movements, inattentiveness or dangerous driving. Please always drive safely.

PERFORMANCE. EFFICIENCY. NO COMPROMISE.

The Infiniti M35h combines elegant and distinctive design with innovative and intuitive technology. Its pulse-racing acceleration from one of the most powerful electric motors in a hybrid engine vehicle will provide you with invigorating sensations, without compromising between performance and low CO₂ emissions.

The Infiniti Hybrid maximises performance and fuel efficiency

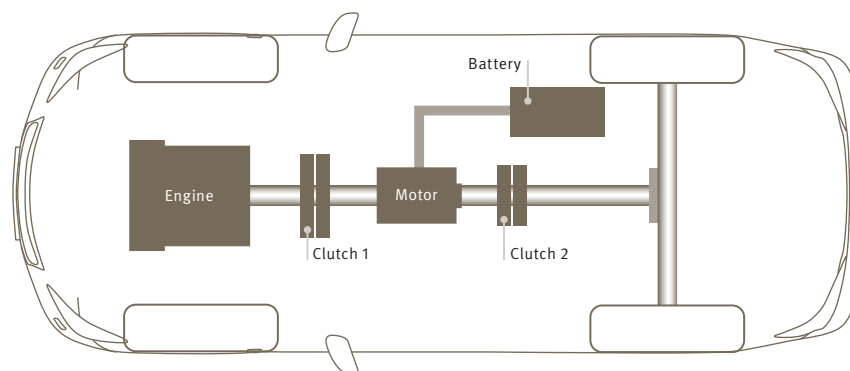

Uncompromising harmony of hybrid drive and high performance

In the new Infiniti M35h, both high efficiency and thrilling exhilaration have been successfully crafted into one system – without compromise. It is a system that achieves low CO₂ emissions, while delivering powerful dynamics, with a stunning acceleration of 5.5 sec. from 0 to 62 mph. Forget your prejudices about hybrids. Welcome to inspired performance.

Infiniti Direct Response Hybrid system

The Infiniti M Hybrid combines a petrol 3.5-litre V6 engine (306 PS and 225 kW) with an electric motor (68 PS and 50 kW) to produce a thrilling 364 PS. By using two clutches, that power flows directly, smoothly and unrestricted through the 7-speed automatic transmission to the rear wheels. The result is more power with greater efficiency and a stronger feeling of connection – this is what Infiniti means by Direct Response.

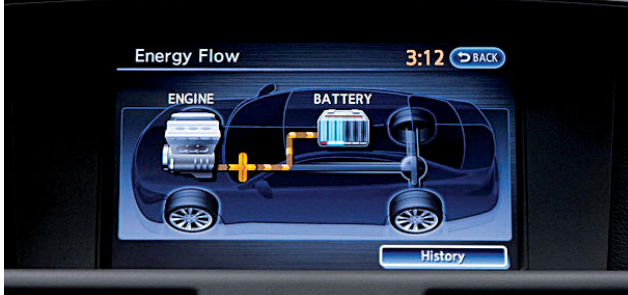

SMOOTHER, GREENER, FASTER

Infiniti's first hybrid, the M35h, has been engineered to the highest technological standards, featuring a remarkably powerful lithium-ion battery, cutting-edge hybrid electric power steering and Infiniti's innovative Vehicle Sound for Pedestrians (VSP) technology.

The generation and deployment of vehicle energy can be seen in an energy flow screen on the board monitor

The 3.5-liter V6 petrol engine is coupled with a 7-speed automatic transmission and two clutches so power flows without interruption to the rear wheels

The regenerative brakes help recharge the high performance lithium-ion battery when needed

Half the size, twice the power – the lithium-ion battery

At the heart of the Infiniti M35h is the innovative lithium-ion battery. Remarkably small in size, this battery technology is light and compact. Coupled with the ability to store more energy, the M35h battery marks a breakthrough in power efficiency, as well. As a result, it is able to charge and discharge energy considerably faster than other hybrid batteries.

Thanks to this impressive power density, this full hybrid Infiniti M35h - meaning it can use the electric motor as the sole source of propulsion for low-acceleration driving – has the ability to reach 62 mph strictly in electric mode. The powerful battery also enables drivers to cruise on electric power alone at a constant 50 mph on a level highway.

Effortless handling with innovative hybrid electric power steering

Innovative hybrid electric power steering provides driving assistance that maintains the smooth feel of hydraulic steering in all circumstances, while at the same time optimising fuel economy.

Regenerative braking helps recharge the battery

The regenerative braking system takes advantage of all kinetic energy produced when braking and transforms it into useful electric power. When applying the brakes, energy that would normally be lost is re-routed to charge the high performance lithium-ion battery, enabling longer autonomy and better fuel economy.

The Approaching Vehicle Sound for Pedestrians system

The Infiniti M35h is one of the world's first hybrids to feature an audible pedestrian warning system as standard. When in electric drive mode, the new Approaching Vehicle Sound for Pedestrians (VSP) system in the Infiniti M35h emits a range of distinctive sounds to make pedestrians aware of the presence of a vehicle. The generated sound sweeps from high to low frequency depending on vehicle speed and whether the M35h is accelerating or decelerating.

PEACE OF MIND

Individuality unfolds best when the environment is supportive. Your needs are met, your safety ensured, your preferences are fulfilled. Infiniti offers peace of mind to discerning drivers with an eye for essential details.

See and be seen

When reverse-parking, a discreet **rear view camera** (standard on FX, G Convertible and Infiniti M, optional on other models) transmits colour images of the area directly behind your vehicle to the centre console display. These images are complemented by visual and audible signals from the front and rear **parking sensors**. Alternatively, the optional **Around View Monitor (AVM)** uses front, rear and side-mounted cameras to provide you with a bird's eye view of your Infiniti EX or FX.

When you're driving on twisting roads, the **Adaptive Front-lighting System (AFS)** provides you with better visibility at night. The bi-Xenon headlights increase lighting effectiveness by swiveling in response to steering angle and vehicle speed. AFS is standard with bi-Xenon lights on Infiniti M, G, G Coupé, G Cabrio and FX, and standard on EX with **Xenon lights**.

Safe as can be

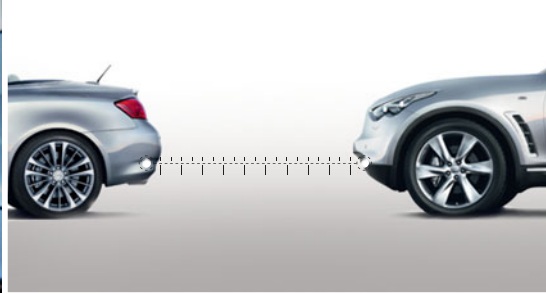

Electronic Stability Programme (ESP)¹ and **Electronic Brakeforce Distribution (EBD)** are standard on all Infiniti cars. ESP provides enhanced control in emergency manoeuvres while EBD reduces brake wear and the vehicle's tendency to dive when braking. The **Infiniti Airbag² System** is also standard in all models. In case of a serious accident, sophisticated sensors trigger the deployment of six different air bags within a matter of milliseconds.

The optional **Intelligent Cruise Control (ICC)³** uses laser sensors to detect vehicles ahead of you, maintaining a preset distance between you and the car in front of you. If the distance between your Infiniti and the vehicle in front decreases dramatically, the braking system is automatically activated with the **Intelligent Brake Assist (IBA)**, thus reducing the consequences of any potential impact. In city driving, the **Low Speed Following (LSF)** feature maintains a preset distance to the car ahead in the same lane – speeding up and slowing down as the traffic progresses.

Around View Monitor (AVM)

Intelligent Cruise Control (ICC)

Adaptive Front-lighting System (AFS)

The advanced **Dynamic Safety Shield (DSS)** package bundles a number of these anticipatory safety technologies to provide a bubble of protection around your car (available only on Premium grades of Infiniti M, FX and EX). In addition to ICC and IBA, this pioneering safety package includes **Lane Departure Prevention (LDP)**, which senses unintended lane drift and automatically assists you back toward the centre of your lane, **Distance Control Assist (DCA)** and **Forward Collision Warning (FCW)**. The DSS package for Infiniti M Premium grades additionally features the world's first **Blind Spot Intervention™ system**, which alerts you to the presence of another vehicle in your blind spot area during lane changing and assists you in moving away from it.

Inspired Safety from Infiniti

The ultimate measure of vehicle safety is how well the driver and passengers are protected in the unfortunate case of an accident. At Infiniti, dedicated engineering teams are involved right from the design stage to ensure every model not only offers the highest level of protection but also leads the way in introducing new safety technologies for the future. In 2009, the FX was the first Infiniti to be tested by Euro NCAP – the world's most demanding independent crash test organisation – and earned all five stars in the new Safety Assist category.

Amongst other features, Euro NCAP awarded the FX a top score for its stability control system, seat-belt reminders for all seats, and its driver-set speed limiter – all features standard in every FX. Euro NCAP's awarding of the maximum five stars to the FX is an endorsement of the holistic, high-tech approach to safety that Infiniti takes with all its models. The results are a testament to the

engineers' efforts and the commitment to road safety that's been at the heart of Infiniti since the company was formed 20 years ago.

Enhanced Comfort

The optional **Bose® Premium Sound system** has been custom-designed for the cabin of each model – so you can experience the pure, unfiltered emotion of music as if in a concert hall performance.

In the Infiniti M, innovative **Active Noise Control (ANC)** is standard to neutralise undesirable engine sounds. While your body registers the gravitational pull of the car's breathtaking acceleration and impressive torque, the roar of the powerful engine is discretely muffled to a reassuring purr.

Intelligent Key (I-Key) is another attractive feature.

At a mere touch on the door handle button, you unlock your car, and the driver's seat, steering wheel and exterior mirrors adjust to your pre-defined personal settings.

Scratch Shield paint is a soft clear coat of paint that heals light scratches and swirl marks for long lasting brilliance of the exterior colour.

For a comfortable interior environment in all seasons, the optional **Forest Air™ system** on the Infiniti M (standard on premium grades) automatically regulates air-flow, temperature and humidity, while auto recirculation neutralises odour and purifies cabin air. The system also includes Breeze Mode, Plasmacluster air purifier, a Grape Polyphenol Filter and a selection of essential oil fragrances to further embellish the incoming ventilation.

For greater driving comfort and control, the **Infiniti Drive Mode Selector** configures the dynamic characteristics of the Infiniti M to four preset performance modes: Standard, Sport, Snow or Economic. The mode can be changed smoothly at any time, according to street conditions or your preferred driving style.

The **Infiniti Eco Pedal** assists you in optimising fuel consumption by applying reactive force to the accelerator and displaying warning lights on the combimeter. Eco pedal is standard on Petrol and Hybrid premium grades (M37 S Premium, M37 GT Premium and M35h GT Premium).

¹ ESP cannot help prevent accidents as a result of abrupt steering movements, inattentiveness or dangerous driving. Please always drive safely.

² Airbags are simply a supplementary restraint system. Make sure you always wear your seat belt. Even if occupant-recognition sensors are fitted, rear-facing child seats should not be used in the front passenger seat. All children aged 12 and under should ride in the rear seat properly secured by child seats, booster seats or a seat belt, depending on their respective age. Airbags are only deployed in certain accident scenarios. Consult the owner's manual for further information.

³ Intelligent Cruise Control with Intelligent Brake Assist: these systems are not designed to prevent collisions. They do not automatically bring the vehicle to a stop (the power of automatic braking is limited to 20%). Failure to apply the brakes may lead to an accident.

FEEL THE EXQUISITE

An inviting atmosphere is created with the fine-tuned interplay of spatial design, high value materials, meticulous finish and clever functionality.

The touch and feel

Take a seat inside your Infiniti and before you even turn anything on, it already feels like a masterpiece: the superior quality of the materials, the breathtaking finish, the spatial design.

Such a refined balance of art and modernity reveals a Japanese soul within. The **genuine aluminium inlays** draw on elements from the katana sword. The texture of the surface structures correspond to that of Shodo paper. The **finely-stitched seats** are inspired by the cut and drape of the Japanese kimono.

In the Infiniti M, elegant **White Ash wood finishing** has been hand-buffed by Japanese craftsmen, rendering the surfaces warm to the touch. The soft **semi-aniline leather** of the GT and GT Premium grades of the Infiniti M offer an exquisite and natural feel, like luxury furniture, a sheer masterpiece of quality and texture.

The up to **14-way adjustable seats** make sure you are always riding in utmost comfort, while also sitting secure. Driver's power lumbar support is also available, standard on GT and S grades.

Bask in the electro-luminescent glow of the **Fine Vision instruments**: futuristic, highly legible and exquisite.

Irresistibly convenient

Did your previous car have **electric folding rear seats** or an extendable **coat hanger** behind the driver's headrest? You'll soon learn to appreciate the practicality of these features in your EX. And you'll never want to do without them again.

Dual zone automatic climate control is standard on all models, heated leather seats are available – and for the FX, **ventilated driver and front passenger seats** are standard.

You may miss being inside your Infiniti when you're at home or at work. But when you return, EX and FX recognise the Intelligent Key in your pocket and the **outside lights greet your approach**.

INFINITI CONNECTIVITI+

Infotainment System adds ease and pleasure to your drive

Infiniti Connectiviti+ is a pioneering in-vehicle technology. At the heart of the system is a hefty 40 GB Hard Disk Drive (HDD). This empowers lightning fast operation and ample data storage for multi-country information and entertainment on the road.

Just some of the main highlights:

- Class leading simplicity thanks to choice of operation by touch screen, steering wheel, voice operation or Infiniti Controller
- Hard Disk Drive navigation for faster reaction (incl. real time traffic information, when available)
- Integrated Michelin Red and Green Guides with hotel, restaurant, point of interest information and scenic tours
- 10 GB Infiniti Music Box large enough to store 300 CDs
- Full iPod integration
- Enhanced graphics and realistic 3D imaging of intersections in 10 countries
- DVD playback capability (when stationary)
- High resolution 7" or 8" display

And to keep you on course, no matter where you are, the built-in mapping extends from Spain to Norway to Russia and Greece. Plus, choose from 8 different languages for on-screen instructions (English, French, German, Spanish, Italian, Portuguese, Dutch & Russian).

Pioneering cooperation with ViaMichelin

As the European specialist in digital travel assistance services, ViaMichelin draws on over a century of Michelin experience in travel and maps – and now provides the full extent and depth of its Michelin Red and Green Guides on Infiniti Connectiviti+.

This makes Infiniti the world's first automotive brand to offer in-vehicle access to the renowned ViaMichelin Guides in their entirety. That is, all listings of Michelin rated hotels and restaurants, as well as tourist attractions, monuments, museums, and scenic tours in digital format (the equivalent of 9 titles from the Michelin Red Guide series and more than 35 titles from the Michelin Green Guide collection)!

This integrated Michelin knowledge-base provides a whole new dimension of convenience and comfort when on the move. Just try a multi-criteria search (such as restaurants with an outside terrace, credit cards accepted, etc.) and you'll not only get a list of nearby addresses, but also the option to make a hotel or restaurant reservation with one touch dialling, thanks to standard Bluetooth® connection to your phone in the vehicle. Plus, of course, you then get directions to the chosen destination.

In-vehicle music management and web updates with Gracenote® music database

Place a music CD in your Infiniti Connectiviti+ system and, if you wish, the music will automatically be added to your on-board music collection. The built-in Gracenote® music database recognises and displays song information from your music CDs, including album cover, artist name, and song title. If song titles and artist name are not displayed, you can easily update untitled music files by using the online Gracenote® music database. Simply login to <http://www.infinitieurope.com/ownership/gracenote-page.html> and follow the few simple steps described there.

So the next time you listen to your Infiniti Music Box, all of your song, artist and album information is displayed on the Connectiviti+ screen.

**The heart of the Infiniti FX50
is a powerful V8 5.0-litre engine.**

390 PS, developing 500 Nm of torque and all at a minimum weight.

INFINITI

FX

FX – THE DUEL

NOTHING IN THE WORLD CAN STOP YOU IF YOU'RE OUT TO BLAZE NEW TRAILS! TWINS MIKE AND STUART BELBAS TOGETHER MANAGE A SUCCESSFUL PARAGLIDING SCHOOL IN VERBIER. ALL IN PERFECT HARMONY, BUT GIVE THEM TWO WILD PIECES OF SPORTS EQUIPMENT AND THAT'S WHEN IT REALLY TAKES OFF. TODAY, THEY WANT TO KNOW WHO GETS THERE FASTER: INFINITI FX50 OR PARAGLIDER? THE RESULT IS WORTH SEEING!

100 percent excitement. Wind, the landscape, crazy speed, and undiluted adrenaline.

With the paraglider, you feel invincible. Just you, your glider, the skies and unlimited freedom. What is there to be frightened of? It's clear that you will take on any challenge: car versus paraglider, road versus clouds, the pure passion for competition and speed.

Your opponent is your brother. Your arena is the steep rock and hairpin bends of the Swiss Alps. Allons! You check out the buckles and the lines of your glider, turn to face into the wind and start running. You feel the tension in the harnesses as the canopy soars above you. Then you run, until the ground suddenly disappears beneath your feet.

The contact to the 'sports arena' is direct and intensive. Accelerate, brake, steer round, accelerate out of the curve, uphill, and downhill – what a chase.

Thermals are your allies if you know how to use them. You feel the wind, the landscape, crazy speed and undiluted adrenaline because below, the other guy is pushing you to the limits. Sometimes you're ahead, sometimes he is. You hear the unmistakable sound echoing through the valleys as only an engine can sound as it hungrily breathes the mountain air through its 32 valves. Variable timing running within milliseconds.

The goal is getting closer and that's all that counts – to be first, if it's just a matter of seconds.

Then you go into an Immelmann turn and feel the extreme acceleration forces pulling at your body. But now you are right behind him. You tug at the steering lines, push your weight into the curve, change the trim, reduce the angle of pitch and accelerate your flight – full of concentration and with your ears pushed flat against your head. But your opponent has his hands more than full as well. Maybe it's less windy but his contact to the 'sports arena' is much more direct and intensive. You can be sure he

has switched into sports mode. The V8 engine of his Infiniti FX50 draws 390 PS from 5.0-litre of capacity and its maximum torque of 500 Nm is transferred to the road with ease, thanks to the intelligent All-Wheel-Drive system (ATTESA E-TS AWD). The brother knows how to make the most of the car effortlessly shifting through the seven gears and pushing the car along this demanding road without giving away a metre. The road holding is unbelievable, thanks to the sports car proportions.

Accelerating, braking, steering into the bends, accelerating out of them, uphill and downhill. A mudslide has flooded the road and the AWD (All-Wheel-Drive) reacts without hesitation, translating the performance into the best traction possible. The car is both reliable partner and accomplice – and the fact that is one of the lightest model of its category, with the best power/weight ratio, is an added bonus for this driver.

FX50 S Premium, Midnight Mocha colour

POWER IS NOTHING WITHOUT GRACE

The ideal piece of sports equipment for freestyle challenges that are far removed from everyday experiences.

The goal is getting closer and that's all that counts – to be first, if it's just a matter of seconds. One more corner and one more gust of wind that could decide everything.

So how did it finish? Let's just say that this time it was a draw – and hats off to these guys!

This story is fictitious; please remain watchful and respectful of traffic law.

EX – GUERILLA SHOOTING

PERMISSION TO PHOTOGRAPH?
THE HELL THERE IS!
INTO THE INFINITI EX, EVERYBODY OUT
OF THE CARS, SHOOT AND MOVE ON.
AND THAT'S WHAT MAKES FASHION FUN.

Right: out of the cars and move it! Even while the doors are being opened, the camera shutters are clicking. Swiftness is of the essence and speed makes its mark. With its 320 PS, agile behaviour on the road, comfortable cabin, ergonomic seat and generous rear roominess for a coupé, the Infiniti could have been purpose-built! Why? This session of constantly changing locations means that the whole team has to be every bit as diverse as the car so let's leave the fancy lighting arrangements and obsessive detail to all those other guys. Our photoset is going to simmer with life. It suits the designers and their fashion better – and the cars. Sai So and Hiroaki Kanai are causing an almighty stir in the fashion world with their breathtaking collections. As is Infiniti with the EX as the first coupé compact crossover in the automotive world.

INFINITI

EX

The EX37 GT, the first coupé compact crossover with adrenalin as standard.

320 PS engine with Intelligent All-Wheel-Drive (AWD).

Speed is of the essence and performance is everything. The EX is our perfect ally.

So where to shoot? Right there where they all enjoy it – or even don't. Models, camera and team make a spontaneous decision and react as quickly as the car. The set is wherever Berlin is most vibrant, be it at Potsdamer Platz or in a small road. It doesn't matter, as long as it is where there is life in this mad city. Why? Because creativity does not need bureaucracy. Permission to photograph is something for those who always dance to the rules and not something for pictures that are going to break all the rules. You'll see that in the pictures. A wonderful apparition, cheeky, intensive and with a surreal beauty. A split second captured by the camera's lens.

After ten minutes, it's all over again as if nothing had happened and the next spontaneous location

is waiting. So the collection, vanity cases and equipment get piled into the versatile trunk, the models leap onto the rear seat, we jump into the EX37 GT Premium V6, take a 360 degree view in the Around View Monitor (AVM) and off we go. Pure euphoria from the successful shoot make it tempting to floor the accelerator and let the automatic box drop a cog or two to get us to one hundred in 6.4 seconds with seven changes, reaching the magical top speed of 149 mph (240 km/h), but reason triumphs. Spontaneity and quick reactions are called for, not top speed. At least not here in town, despite the amazing braking power, Intelligent All-Wheel-Drive (AWD) system and because of a certain desire to keep the driving licence clean!

EX37 GT, Liquid Platinum colour.

WHAT ALL COUPÉS WANT TO BE WHEN THEY GROW UP

So – back to basics. Fashion should be genuine, lively and authentic, like our EX, the automotive embodiment of temptation. The seductive silhouette of a coupé combined with the masterful seating position of an SUV and the versatility of an estate. A surprisingly successful blend of comfort and performance that is unconventional and clear.

EX37 GT Premium, Wheat upholstery, Black lacquer and Aluminium trim.
(European EX model shown. All EX Models for UK are righthand-drive.)

A COUPÉ YOU'LL LOVE AS MUCH AT THE WEEKEND AS YOU DO IN THE WEEK

Fashion doesn't ask permission for how it may or may not do or be which is why we are fascinated by both during this photo-shoot: fashion and car. They are both trendsetters and both define the high pace. That's how we are showing it to you: just how we like it. And how about the public on the streets of Berlin? They thought it was great fun. As did the team, and as we do now.

This story is fictitious; please remain watchful and respectful of traffic law.

INFINITI G – PERFORMING INDIVIDUALITY AS STANDARD

A DISTINCTIVE ELEGANCE IN THE CITY THAT DEPLOYS ALL ITS CAPABILITIES IN THE MOUNTAINS – WHETHER IT'S A NEW RESTAURANT YOU'RE TRYING OUT, A BUSINESS MEETING YOU'RE RUSHING TO, OR A SKI TRIP YOU'RE TAKING WITH YOUR FAMILY, WITH THE INFINITI G YOU'LL ARRIVE IN STYLE.

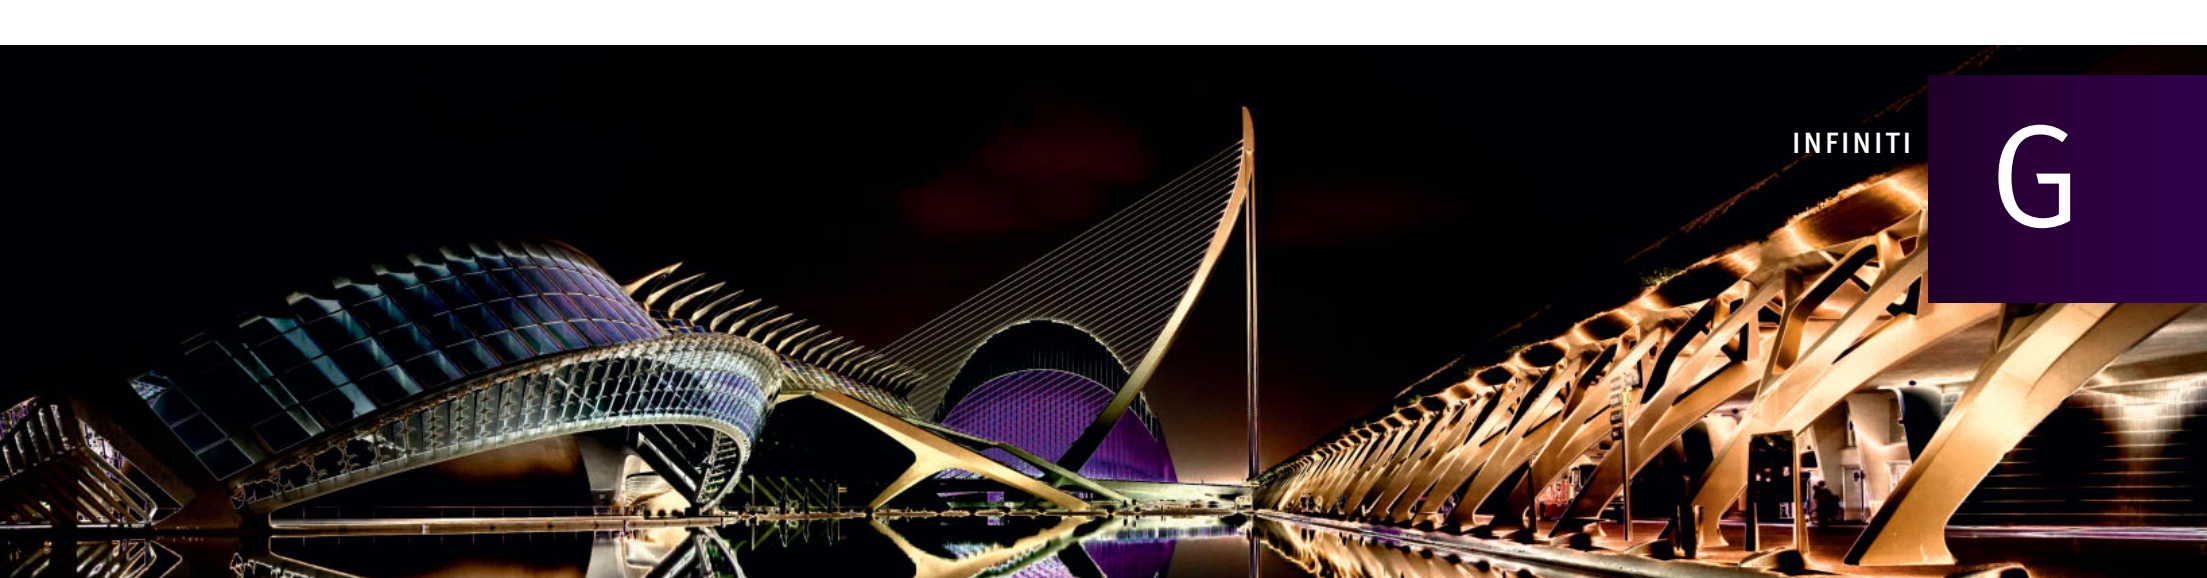

ELEGANCE MATTERS

While the sleek elegance of the Infiniti G discreetly blends into any modern urban landscape, the intricate craftsmanship gives it an almost organic appearance – full of nuance, warmth, intelligence and precision. There is the sporty wave of the bonnet, visually alluding to the powerful V6 VVEL engine within, the lightness of the Katana sword inspired front grille and the distinctive bumper that gracefully flows out of the lines of the hood and body – while the G's low centre of gravity and front mid-ship platform exude a reassuring aura of stability and maximum agility.

Designed to go beyond machine, the G37 holds the imprint of a life force.

INFINITI

G

3.7 l VVEL engine,
235 kW/320 PS output,
360 Nm torque.

All photos taken on location in Spain, at *La Ciudad de las Artes y de las Ciencias de Valencia* designed by architect *Santiago de Calatrava*

PERFORMANCE INSPIRES

Step on the accelerator to feel the full force of the G's 3.7 litre VVEL engine and 235 kW/320 PS output. You might just think the engine is hardwired to your pleasure centre as the powerful Rear-Wheel-Drive (RWD) catapults you from 0 to 62 mph in 5.9 seconds flat.

INTELLIGENCE RESPONDS

Let the 7-speed automatic transmission shift for you, or tap the magnesium paddle shifts behind the steering wheel for manual control when overtaking traffic or veering round tricky corners. Choose the G37x version with intelligent All-Wheel-Drive (AWD) for enhanced performance in all weather conditions.

THE PERFECT FUSION OF INDIVIDUALITY AND PERFORMANCE

SAFETY THINKS AHEAD

At Infiniti, we believe technology should not only enhance your drive, but your life as well. Our visionary safety features include Bi-Xenon lights with Adaptive Front-lighting System (AFS) that dynamically light up the road ahead in curves. And for more extreme situations, the S Premium grade features viscous Limited Slip Differential (LSD), which smartly redistributes torque. The S Premium grade also includes 4 Wheel-Active-Steering (4WAS) for outstanding handling performance.

G37x GT, Smokey Quartz colour.
(European G model shown. All models for UK are right-hand drive.)

AS SOON AS YOU SHUT THE DOOR, A NEW WORLD OPENS UP

COMFORT SEDUCES

The mood of the interior is skilfully crafted for a unique balance of line, shape, light and texture. Features such as the Shodo aluminium trim evoke the thoughtfulness of an artist's touch. State-of-the-art technology perfects the experience. The Multimedia Pack (on GT Premium and S Premium grades) empowers lightning fast navigation upgraded by leisure information with fully integrated digitised Michelin Red and Green Guides.

G37x GT Premium, Graphite upholstery and Shodo aluminium trim.

G COUPÉ – THE PULSE OF THE DESERT

FOLLOWING A RECOMMENDATION TO CATCH A SPECTACULAR VIEW OF THE DAWN,
I ENJOY DRIVING MY INFINITI G COUPÉ ACROSS ISOLATED TERRAIN TO
A MYSTERIOUS VANTAGE POINT IN THE SAHARA. BUT I AM NOT ALONE.

It's 4:00 a.m. The desert darkness shimmers eerily in the moonlight. I'm driving swiftly, sure of my path thanks to the bi-Xenon Adaptive Front-lighting System (AFS), which precisely swivels the head-lights dynamically to my direction, steering angle and speed.

I'm not exactly sure where I'm headed, but the front midship Rear-Wheel-Drive (RWD) platform catapults me forwards with such confidence, and the smooth, linear feeling of the steering feels so natural, it almost seems like home turf.

INFINITI

G
COUPÉ

**G37 Coupé, designed
for pure performance.**

320 PS with Rear-Wheel-Drive (RWD).

Underscoring this sense of control is the 14-way adjustable sports seat...

Underscoring this sense of control is the 14-way adjustable sports seat which comfortably hugs the contours of my body – as well as my perfect line-of-sight to the instrumentation, which automatically moved in response to the steering wheel adjustments I made before launching.

It's just me and my muscular steed under the velvety desert sky. Then something flashes in the moonlight. A robed figure on a tall Arab steed galloping along the sharp silhouette of the horizon.

Effortlessly, I accelerate the powerful 320 PS 6-cylinder engine, relishing the enormous thrust as I charge forward. Taking full advantage of the 4 Wheel Active Steering (4WAS) I swerve through sharp corners in full command, the viscous Limited Slip Differential (LSD) squeezing out extra momentum from the rear wheels.

ENGINEERING EXCITEMENT

I am gaining on the rider. In the faint glow of the coming day, I recognise a woman's shape beneath the robes. She is veiled, but I remember the eyes – I saw them last evening at an Embassy reception. My pulse races as she turns her head away and gallops out of sight over a ridge. Too absorbed in the chase to delegate affairs to the 7-speed automatic transmission, I intuitively apply the magnesium paddle shifts on the steering wheel, Downshift Rev Matching (DRM) ensuring a smooth and swift gear change as I begin a steep ascent.

G37 Coupé S, Vibrant Red colour.
(European G Coupé model shown. All G Coupé models for UK are right-hand drive.)

FAIR PLAY: HERE THE POLE POSITION IS NOT RESTRICTED TO THE FRONT ROW

I catch sight of her again. In an adventurous feat of horsemanship, she charges ahead. We're neck and neck now, but she's ignoring me as we mount the crest of a hill. I slam on the 355 mm sports brakes and the 4-piston opposed callipers bring me to a prompt and controlled halt. I jump out as she leaps to the ground. The first ray of the golden sunrise sparkles in her eyes.

As if in unison, we turn to the east.
It's dawn, and she's all mine.

This story is fictitious; please remain watchful and respectful of traffic law.

G37 Coupé S Premium, Graphite upholstery and Shodo aluminium trim.

G Coupé GT standard features*

- Speed sensitive power steering assistance
- 6 airbags (front driver and passenger airbags, front hip-thorax side airbags and front-to-rear curtain airbags)
- Active front headrests
- Rain sensor and light sensor
- Auto dimming rear view mirror
- Cruise Control
- Speed limiter
- Full colour central display with Infiniti Controller
- Front and rear parking sensors with display
- Bluetooth® technology for mobile connectivity and voice activation
- Bluetooth® audio streaming
- I-Key with smart access, trunk release, smart ignition
- All-doors power windows with auto-closure linked to I-Key
- Follow-me home lighting system
- Analogue Infiniti clock
- Dual zone adaptive climate control with auto-recirculation
- Illuminated vanity mirrors (driver, front passenger)
- Electric glass sunroof
- 7-speaker audio system
- 1 CD reader with MP3 WMA compatibility and 2 GB Infiniti Music Box
- USB/iPod connectivity and AUX-in RCA
- Multifunction steering wheel

- Leather steering wheel and gear shift lever
- Power reach and rake adjustment for steering column
- Aluminium pedals and foot rest
- Shodo Aluminium interior trim
- Leather seat facings
- 10-way power driver's seat
- 8-way power front passenger seat
- Driver's power lumbar support
- Memory for driver's seat, steering wheel column and door mirrors (linked to I-Key)
- Heated driver and front passenger seats
- Folding rear seat back rest
- ISOFIX seat mounting points in the rear seats
- First aid kit with warning triangle
- 18" 10 spoke alloy wheels
- Temporary spare wheel
- Body colour exterior mirrors
- Heated, electrically folding exterior mirrors
- Bi-Xenon lights with Adaptive Front-lighting System (AFS), auto-level and headlight washers
- Integrated front and rear fog lamps
- LED rear lamps
- Scratch Shield paint

S features (in addition to GT features)*

- 4WAS (4 Wheel Active Steering)
- Viscous Limited Slip Differential (LSD)
- Sports suspension
- Opposed calliper brakes (front 4 pistons; rear 2 pistons)
- Tyre Pressure Monitoring System (TPMS) (warning)
- 14-way power driver's seat
- Front sports seats including power lateral thigh (driver only) and back-rest width adjustment (driver only), manual thigh extension
- 19" 5 triple-spoke light alloy wheels
- Red "S" grade exterior badge

S Premium features (in addition to S features)*

- Intelligent Cruise Control (ICC) with full speed range and Intelligent Brake Assist (IBA)
- Multimedia pack:
 - High resolution touch screen central display with Infiniti Controller
 - Rear view camera with front and rear parking sensors with display
 - 30 GB HDD Navigation system with RDS-TMC (Traffic Message Channel), Michelin guides and 3D POI content
 - Voice recognition for navigation system
 - Bose® Premium Sound System with 11 speakers
 - 1 CD/DVD reader with MP3 WMA DivX compatibility and 10 GB Infiniti Music Box supported by Gracenote® music database

The G37 Convertible – take a deep breath for four

MEL GEE HENDERSEN IS AN UNUSUAL WOMAN WITH AN ADVENTUROUS SOUL, WHO HAS MADE A CAREER OUT OF HER PASSION: SHE TRAVELS THE GLOBE FOR THE TV SERIES “ESCAPESEEKER” TO GET A UNIQUE PERSPECTIVE ON THE WORLD’S MOST BEAUTIFUL AND EXOTIC PLACES. IS IT ANY WONDER SHE WOULD CHOOSE TO DRIVE AN EXTRAORDINARY CAR?

320 PS, three piece retractable metal roof and four seats.

INFINITI

G
CONVERTIBLE

G CONVERTIBLE – GRACE IN ALL CIRCUMSTANCES

Accompanied by her camera team, Mel Gee Hendersen is just approaching Aix-en-Provence in her Infiniti G Convertible. She's basking in the sunshine with the roof down – also the best way to enjoy the magnificent sound of the 3.7 litre V6 cylinder engine. She revs it just for fun, the perfectly symmetrical exhaust system emitting a thrilling roar – it's also thrilling to know the engine gives her the power to accelerate from 0 to 62 mph in only 6.4 seconds.

Because it combines such power with incredible lightness, she's named her car "Grace". But also, adds Mel, because of its "gorgeous, dignified beauty, like Grace Kelly". Indeed, the designers of the convertible have made no compromises with regards to beauty – most notably, the ingenious 3-piece folding metal roof which tucks away almost magically behind the rear seats. And because the car looks just as great when the top is up, you could even mistake it for a coupé.

And because the car looks just as great when the top is up, you could even mistake it for a coupé.

Mel Gee finds plenty of beauty in the details, as well. The beautiful Monaco Red interior colour, the comfort of heated and ventilated front seats, the convenience of adaptive automatic climate control which adapts to vehicle speed, outside temperature and roof position. The pleasure of the car is experienced even fuller in absolute comfort!

When her day's work is done. Mel Gee consults her Infiniti Connectiviti+ navigation system. Thanks to its unique integrated Michelin Green & Red Guides, she can quickly find the perfect restaurant for her and the crew to dine at. There are times when Henderson still can't believe her luck. Even after years of travelling to countless idyllic destinations, she says her life still feels like a dream vacation. As she whisks along a Provencal country road, easing back into the leather seats and the crystal clear music pulsating from the personal speakers of the Bose® Personal Speakers, it is certainly always a dream to drive her powerful, open-to-the-sky Infiniti.

HIGH PERFORMANCE HOSPITALITY IN THE INFINITI M

Journey to the inner soul
of Japan

Experience what true performance means with every nerve and fibre of your body. Whether powered by the 320 PS, 3.7-litre petrol engine, the 3.0-litre common rail diesel engine with stunning 550 Nm torque, or the refreshing exhilaration of the soon to debut 3.5-litre hybrid, the Infiniti M is an immersive treat for all your senses.

* Standard on S and S Premium grades

INFINITI M

Japan is a mysterious, multi-faceted world. The more you explore, the fascination only grows. Our journey begins in Tokyo, the vibrant hub of Japanese sophistication. The Infiniti M awaits us, enticing us with its smooth lines and quiet beauty. Let's drive it for a change of pace.

We head for the resort district of Hakone: to the renowned ryokan of Gora Kadan, a traditional Japanese inn where hospitality is perfected to an art.

In the Infiniti M – the purest translation of Japanese hospitality into precision engineering – the journey is the goal. The experience is almost meditative. Active Noise Control and double-glazed windows seal out unnecessary disturbances. The Drive Mode Selector smoothly adapts the transmission to your preferred driving style. The Forest Air™ system discretely disperses essential oils into the air, completing the Zen-like atmosphere.

The top performance is pleasantly reassuring, as well. The front mid-ship chassis with Rear-Wheel-Drive (RWD) enables piloting with pinpoint accuracy and unerring balance. The 4 Wheel Active Steering (4WAS)* and sports car suspension deliver invigorating handling. The confident, aerodynamic body lines reinforce unparalleled control with “zero-lift” driving stability.

Groundbreaking design,
breathtaking performance

Nature is raw power. Archaic,
mythical, revitalising. This is the
inspiration of every Japanese
ryokan. Immersive hospitality at the
edge of the unknown. Protective,
yet also inviting us to explore.

Like most ryokans, the buildings of Gora Kadan are perched around a natural hot springs and designed to reflect the purifying power of their surroundings. Unobtrusively. Much like the evocative exterior of the Infiniti M. Flowing like a rising wave, the low bonnet and fenders gracefully hint at the raw power beneath. High performance immaculately dressed.

At the wheel of the Infiniti M, we are immersed in holistic comfort. The artfully selected colours evoke

a sense of calm. The design of the dashboard reflects the purity of ocean waves and desert dunes. The driving position is natural and sporty, affording an immediate and unobstructed view of the distinct, easy-to-read instruments and the world outside.

What awaits us in Hakone? Upon arrival at Gora Kadan, we will be greeted by the owner Miwako Fujimoto. At every ryokan, the female innkeeper, or “okami”, tailors her services to the exact needs of each guest.

Design, Fujimoto will tell us, is never an end in itself, it is part of the bigger picture of “omotenashi”: to take care of guests in a graceful and unassuming way. The journey in our Infiniti M has prepared us perfectly for this. Understated, timeless, magnetic.

Expressing every aspect of
performance

The Infiniti M is infused with trailblazing technology that looks and thinks ahead as you drive, from touch screen navigation, featuring 3D maps, a Michelin travel guide and intelligent routing, to the pioneering Dynamic Safety Shield Package*, including Blind Spot Intervention™, Lane Departure Prevention and Intelligent Brake Assist.

* The advanced Dynamic Safety Shield Package (available exclusively on Premium grades) includes innovations that provide the highest level of protection for the driver and passengers. The world's first Blind Spot Intervention™ system will alert you to the presence of another vehicle in your blind spot area during lane changing and assist you to move away from the object in your blind spot. Lane Departure Prevention (LDP), in turn, senses unintended lane drift and automatically assists you back toward the centre of your lane. The safety package also includes Intelligent Cruise Control (ICC), which adjusts your speed to the current flow of traffic, Distance Control Assist (DCA), Forward Collision Warning (FCW) and Intelligent Brake Assist (IBA).

IN THE INFINITI M,
THE JOURNEY
IS THE GOAL

Inside the Infiniti M, the driver is always at the centre of attention. The innovative Forest Air™ system* automatically generates a comfortable atmosphere with intuitive control of air-flow, temperature and humidity, while digital 5.1 channel decoding envelopes you in lushly enriched audio from the 16-speaker Bose® Premium Surround Sound system*.

* Standard on Premium grades, optional on GT and S grades with the Multimedia Pack

Infiniti M37 S, Malbec Black colour.
(European Infiniti M model shown. All Infiniti M models for UK are right-hand drive.)

All materials in the Infiniti M have been chosen for comfort and enduring quality. For example, the White Ash wood finishing* hand-buffed by Japanese craftsmen or the soft semi-aniline leather* with its exquisite and natural feel. The Infiniti M also comfortably seats up to three adults in the back, enthroned in sculpted, elevated seating.

* Available exclusively on GT and GT Premium grades

IMMERSE YOURSELF IN THE EMOTION

Infiniti M GT Interior, Java leather upholstery, white
ash wood with silver-powder finish.

THE FINE ART OF CRAFTSMANSHIP IN JAPAN – HOME OF INFINITI

To be cutting edge nowadays is not only about high technology. It is also about high art. A command of intricate details. A sophisticated and deep understanding of form and materials.

Infiniti is a modern automotive brand from Japan. But each car also lives and breathes an ancestral Japanese aesthetic, flowing from a rich history of artisan experience. Infiniti craftsmanship is driven by the same dedication to skill, artistry and passion to create superior solutions that has guided traditional Japanese craftsmanship for centuries.

In May 2010, Infiniti set out on a journey across Japan to meet the country's most innovative, actively working craftsmen – modern ambassadors of the soul and resilient performance of Japan.

In the process, Infiniti paid a visit to Sueshiro Sano, one of Japan's most talented woodworkers. Born into a family of shipbuilders, Sano applies an age-old understanding of natural materials to building hand-crafted bicycles, almost entirely of wood.

The human element makes all the difference. Instead of cold engineering, it is the artisan's attention to detail, dedication to perfection and the preserved spirit of immaculate Japanese craftsmanship that inspires the Infiniti method of product development: we seek the most beautiful shapes, the most luxurious textures, the most dynamic forces. All to build a deeper sensory connection between car and driver.

Infiniti draws inspiration from rare remnants of artisan knowledge passed down through generations of dedicated craftsman families.

"You can only make this kind of wooden bicycle by bringing together tradition with innovation. The past and future are interacting together to create something amazing."

"Everyone thinks my bikes are made as a design project", Sano smiles. "I first aim to make them safe and functional, and if it's beautiful in the end, well, that's fine."

In addition to applying Japanese hospitality and technological know-how to our work, it is an express goal of Infiniti to infuse each automobile with Japanese aesthetics. Not only in the choice of materials and design, but also based on the craftsman's endeavour to always serve a tangible function. Aesthetics that empower unparalleled functionality.

Sano claims that his bicycles, which sell for about 20,000 euros apiece, greatly outperform aluminium models and even carbon fibre. They are light, strong and utterly unique. Just like Infiniti cars, Sano's wooden bikes are made to be ultra-high performance.

Such craftsman's passion can be found in the sensuous texture of our cars' interior surfaces, in the astounding performance of the engines, in the dynamic responsiveness of the steering wheel as well as in pioneering safety technologies like Blind Spot Intervention™ which are redefining the role of car manufacturer as a custodian of human life.

At Infiniti we say: "It all starts with a single line." Born of the flowing yet equally immaculate craft of calligraphy, the line is a brushstroke that inspires the silhouette of every car. Emerging from the very soul of Japan. The origin of Infiniti.
