MG ZS EV
MG ZS EV
Recharge yourself

New look
Longer range
100% Electric

The new MG ZS EV takes affordable electric driving further. With its fresh design, updated technology and the choice of two new powerful battery packs, it opens up even more roads into the future, ready to conquer more drivers' hearts.

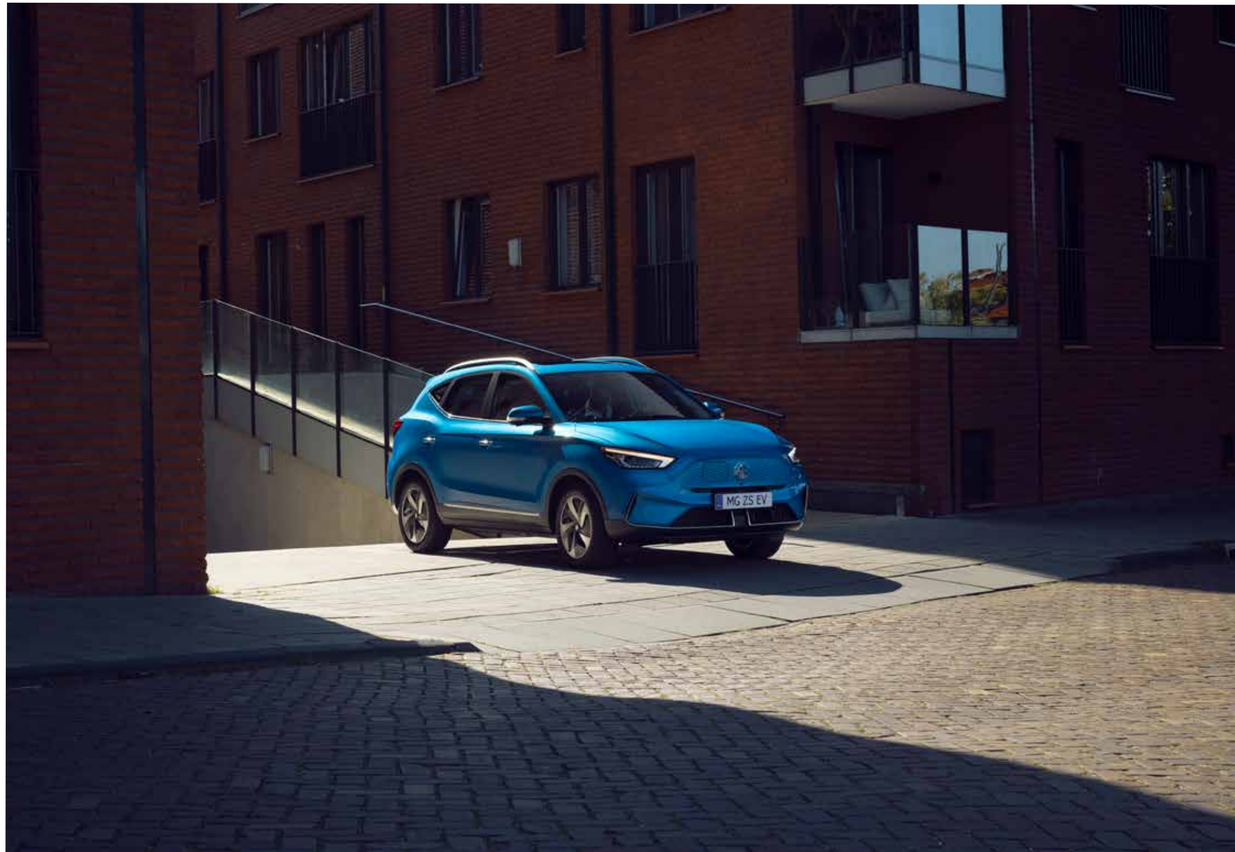

The MG ZS EV is the perfect 100% electric car for your daily commute, a spontaneous weekend getaway, a scenic ride with your family, or driving up to visit your friends outside the city. So...

Reset. Rethink. Recharge. And enjoy!

MG ZS EV

MG ZS EV

Intelligent electric design

From back to front and in every detail, the new MG ZS EV rethinks what a compact urban SUV can be, taking your driving pleasure to the next level.

The large cabin space brings together comfort and practicality, and the spacious interior creates ample room for carrying all your essentials. Located behind the grille, the updated charging port has been redesigned for easier access, with a spring-loaded cover that opens sideways and creates a better seal. Also, on the MG logo interface, the improved charging indicator shows you the car's current battery level at a single glance.

Get ready to receive some double-takes as you cruise the city, because the MG ZS EV is a real eye-catcher. The sleek, grille-less front exudes urban confidence, and the new 'Silverstone' front lights combine 21 LED units for a decidedly modern look. And at the rear, the newly designed 'Phantom' LED tail lamps give the car a bold, distinctive expression.

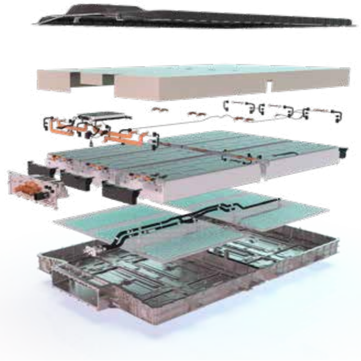

Take the road to anywhere

Any day, anytime, whatever the destination – the new MG ZS EV will take you there. You now have a choice of two different battery packs, each based on a novel modular design that realizes higher energy density without sacrificing battery safety or size.

The standard battery on the MG ZS EV now offers an improved range of up to 320 km WLTP, while the high-capacity version delivers an extended range of up to 440 km WLTP. With the 92-kW DC rapid charging capability, both options will charge the car from 5% to 80% in just 40 minutes.

So you'll be ready for your next ride in no time. And thanks to the convenient 3-phase 11-kW AC fast charging, you'll have a full battery at the start of every day.

MG ZS EV

Putting the U in SUV

Utility is built into every detail of the MG ZS EV. Its generous 500-kg towing capacity lets you transport up to five passengers and their belongings. And with the practical roof rail, you can carry up to 75 kg in a roof box, freeing up space inside.

In the back, the easily accessible trunk space accommodates 448 L of cargo. And by lowering the 40:60 foldable rear seats, you can flexibly expand the total load capacity up to 1166 L. Plenty of room for moving house, an adventurous camping getaway for two, or some serious downtown shopping.

The handy V2L (vehicle-to-load) reverse charging function extends the utility of the battery pack. Connect external devices like an electric barbecue, cooling box or e-bike and power them off the car's own battery. It's like having your own portable power station.

Sit back & enjoy the drive

The new MG ZS EV offers pure electric performance for your driving pleasure. Enjoy the thrill as the highly efficient electric motor accelerates you from 0-50 km/h in just 3.6 seconds. Experience silky smooth manoeuvring thanks to the vehicle body's high tortional rigidity. Feel completely in control, with multiple sensors and cameras that provide an overview of your surroundings beyond the visual range.

The automatic transmission is controlled through a rotary gear selector in the centre console and is engineered to provide ultimate refinement under all driving conditions. There are three driving modes on the MG ZS EV – Eco, Normal and Sport – allowing the car to fully adapt to your everyday driving needs, be it on a long relaxing drive or a more dynamic urban route.

Relax on the road

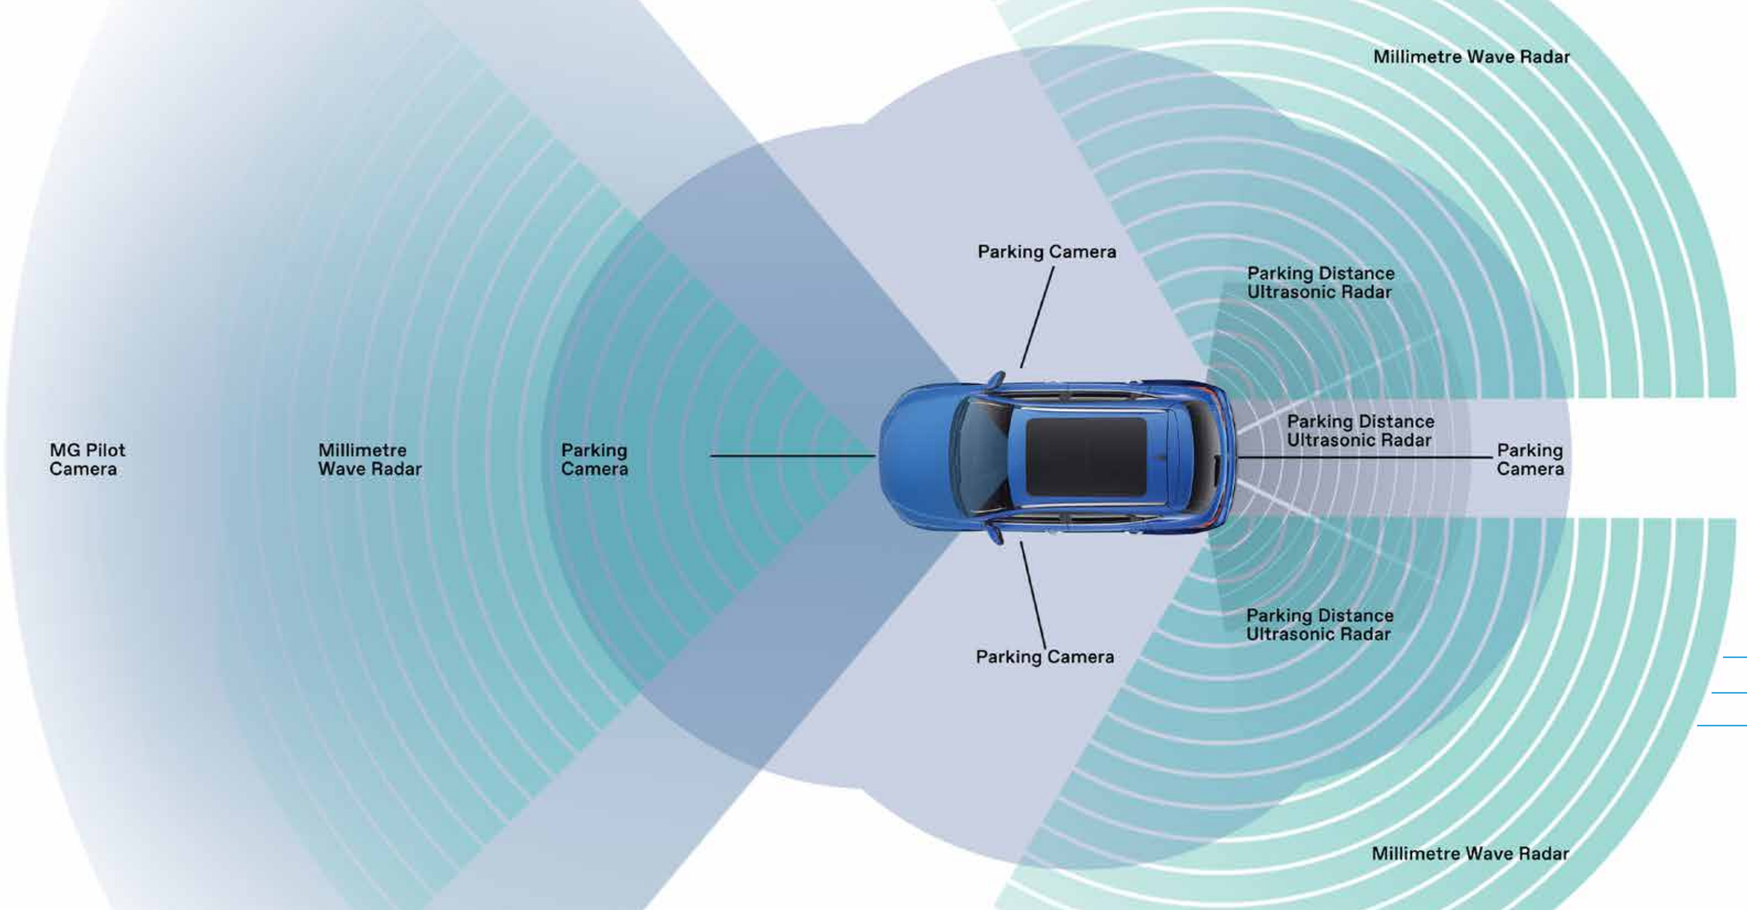

Every inch of the MG ZS EV's stylish, spacious interior with 1.19 m^2 panoramic sunroof has been tailor-made to ensure that both driver and passengers want for nothing.

The new design-led interior has a modern carbon-fibre look and uses soft materials to offer you the perfect environment to recharge in. The redesigned automatic air conditioning with front and rear air vents includes a high-class air purification system, guaranteeing a healthy interior air quality.

The redesigned 10.1" floating touchscreen control panel has a generous 170° viewing angle and is easy to read even in strong sunlight, and the all-digital 7" virtual cluster displays all the information you need on the futuristic goggle-style display.

Want to enjoy your favourite music? The 6-speaker sound system creates an immersive 3D sound effect, so you'll feel those energizing beats in your veins. While you listen, your smartphone is charged in the wireless phone charger. And with three Type-A and two Type-C USB ports, everyone on board can easily charge their devices at the same time.

No worries about parking the spacious MG ZS EV. The Park Assist feature with 360° cameras (including the MG Pilot camera and four parking cameras) will help you to confidently park your car in even the most challenging spots.

Do more with MG iSMART

The new MG ZS EV is now connected to our innovative MG iSMART technology network, which integrates car, internet and user communication. Hands-free voice control lets you operate many of the car's functions with minimum distraction, and the dedicated MG smartphone app helps you find your parked car, check its status, and find a nearby charging point. You can even pre-start the climate control system to cool or heat the car before you step inside.

Connectivity functions include a Wi-Fi hotspot to connect you with the internet, over-the-air firmware updates on the car's MG iSMART software, and a Bluetooth key that you can activate remotely when needed.

Want to find places of interest or stream online music? Just ask the 10.7" touchscreen, and you're good to go. Use the app to schedule battery charging to whatever time works best for you. Create a Wi-Fi hotspot for your passengers, and don't forget to check the weather before you leave. MG iSMART can do it all.

MG Pilot
drive safely, always

Like all MG models, the MG ZS EV offers MG's own advanced safety system. MG Pilot is an extensive suite of partially automated driver-assistance technologies that give you a helping hand and added confidence on the road.

- Adaptive Cruise Control (ACC)
- Intelligent High Beam Control (IHC)
- Speed Assistance System (SAS)
- Front Collision Warning (FCW)
- Automatic Emergency Braking (AEB)
- Lane Departure Warning (LDW)
- Traffic Jam Assistance (TJA)
- Traffic Sign Recognition (TSR)
- Lane Keep Assistance (LKA)
- Lane Change Warning (LCW)
- Emergency Lane Keeping (ELK)*
- Blind Spot Monitoring (BSM)
- Rear Traffic Alert (RTA)

*Road lane/edge only
