

Highlander

TOYOTA

ALWAYS A
BETTER WAY

Go your own way.

Distinct styling

The new Highlander has a powerful presence. Inside and out, the look and feel is city sophistication.

Versatile space

You can seat seven people in comfort, or fold five seats flat in various combinations for tailored carrying capacity.

Drive enhancements

The Integrated Dynamic Drive System (IDDS), including on-demand All Wheel Drive (AWD), enhances driver control and vehicle stability.

Optimised safety

Highlander prepares you for the unexpected with advanced safety features such as Blind Spot Monitor (BSM) and Land Departure Alert (LDA).

A show of confidence.

The look is implicitly confident: strong and powerful yet also manoeuvrable and athletic. A bold upright grille tastefully edged with chrome combined with sleek LED headlamps and daytime running lights, create a stylish front. Along the side, crisp-cut lines flow smoothly front to back with subtle contours around the 19" double-spoke alloy wheels. The new Highlander has a distinct presence. It proudly stands apart for all the right reasons.

Your personal space.

Recognising quality is an instinctive sensory reaction. You'll experience it with the Highlander the moment you open the door and relax into those big leather seats. Soft-touch trim materials, tactile wood-look inserts and ambient lighting reinforce the feeling of prestige. A heated steering wheel together with ventilated and heated seating adds practical luxury. Wherever you go, through town or country, the Highlander offers a calming retreat from the world outside.

Connected technologies.

Information equals control, and with the Highlander you have both in abundance. A look, a finger-tip touch or a spoken command connects you with everything from driving data and in-car climate to entertainment and Bluetooth® services. The key is connectivity between your car's Toyota Touch® 2 multi-media system, the multi-information display and multi-information switches on the steering wheel. Furthermore, the JBL premium sound system gives you superior and immersive acoustics specially calibrated for Highlander's interior cabin. This is technology as it should be: meaningful, accessible and very user-friendly.

Toyota Touch® 2

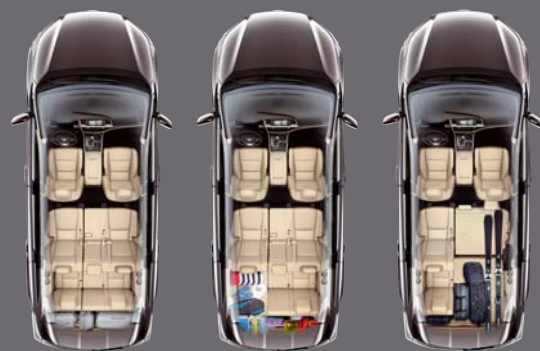

The Toyota Touch® 2 with Go multi-media system features an 8" screen, touch-sensitive controls, advanced audio, navigation and USB, iPod and smartphone compatibility.

Room for life.

The Highlander gives you versatile space for living life to the full. The option of seven seats and a spacious trunk make it ideal for families. The flexibility comes from folding the rear seats in different combinations to create flat surfaces for carrying anything from holiday luggage to sports gear or a mountain bike. In addition to this, the rear door has a smart power back door release as well as a glass hatch window for easy access and loading.

Versatility is the key

The second and third row seats fold flat in a 60:40 combination, giving you freedom to change the seating and load configuration to your personal needs.

Ready for everything.

The Highlander's Integrated Dynamic Drive System (IDDS), double wishbone rear suspension and rigid body all aid the vehicle's All Wheel Drive (AWD) technology to enhance handling, agility and cornering stability. IDDS transfers 10% torque to the rear wheels just before turning and up to 50% during cornering, maintaining complete vehicle control.

Electric Power Steering (EPS)

If your car begins to skid, IDDS changes the torque applied to the EPS and so helps you make steering adjustments to regain control.

Vehicle Stability Control Plus (VSC+)

When turning sharply or cornering on a slippery surface, VSC+ operates each brake independently, controls engine output and steering torque to maintain stability and prevent skidding.

Traction Control (TRC)

If you accelerate too hard and the drive wheels spin, TRC automatically reduces engine power and controls brake force to help restore traction.

Power on demand.

Peace of mind with advanced safety systems.

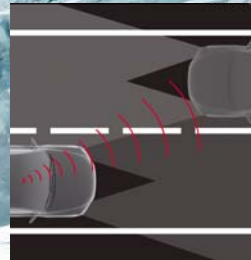

Blind Spot Monitor (BSM)

BSM makes lane change manoeuvres safer. A warning light illuminates on the appropriate side mirror if your car's rear-mounted radar sensors detect another vehicle in your rear or side blind spots. The warning light will then flash if you subsequently indicate to change lanes while the other vehicle is still there.

Lane Departure Alert (LDA)

LDA helps you maintain a steady course on multi-lane roads. It provides an audio and visual warning if your car starts to drift away from its lane markings without you having first used your turning indicators.

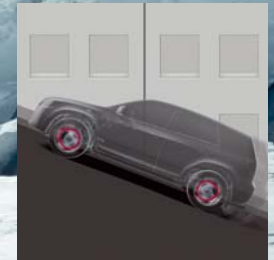

Automatic High Beam (AHB)

AHB optimises visibility for you and other road users during night driving. A camera located by the rear view mirror detects the lights of on-coming vehicles and also monitors street light brightness. Using this information the system automatically switches your lights between high and low beam, leaving you to concentrate on driving safely.

Supplemental Restraint System (SRS)

With the Highlander, you and your passengers are protected by a comprehensive system of 8 airbags – the highest number of SRS airbags in its class. In addition to front and head airbags for the driver and front seat passenger, there is also a driver's knee airbag, a passenger seat cushion airbag and side curtain airbags running the length of the car.

Hill-start Assist Control (HAC)

When moving from stationary on a steep incline, HAC automatically applies the brakes for up to two seconds after you have released the brake pedal and so prevents your car rolling back. You activate the system by pushing the brake pedal harder after stopping and leaving the transmission shift lever in a forward gear position.

Highlander features

1. Toyota Touch® 2 with Go

Toyota Touch® 2 with Go is a fully integrated multimedia system including a colour touch screen with drag and flick capabilities and an advanced audio system compatible with USB devices, iPods and smartphones. It also comes with a navigation system including full European map coverage, detour and eco-route functions.

Grade availability

— Standard on Lounge

2. JBL Premium Sound System

This premium sound system boasts 12 speakers and provides high quality surround sound to create that comfortable interior feel.

Grade availability

— Optional on Lounge

3. Stylish instrument tray

The luxurious soft-touch instrument tray extends from the driver's seat to the front passenger seat. A practical opening with wiring for connections means you can easily plug in your smartphone as well as other devices.

Grade availability

— Standard on all grades

4. Multi-information display

Sitting comfortably at driver's eye-level, the multi-information display provides all relevant vehicle information. A stylish new combination meter and 4.2-inch TFT (Thin Film Transistor) multi-information display allow for an easy view of the display at all times.

Grade availability

— Standard on all grades

5. State-of-the-art air conditioning

A triple-zone fully automatic air conditioning system with the ability to independently control each zone, as well as optimised airflow for the 3rd row, provides the ultimate in interior comfort.

Grade availability

— Standard on all grades

6. Multi-information switches

The multi-information switches, conveniently located on the steering wheel, give you instant and easy access to the JBL sound system, camera display, your mobile phone, voice recognition and Bluetooth® hands-free system.

Grade availability

— Standard on all grades

Highlander features

1. Large storage console box

The soft-top centre console box is conveniently equipped with a large (A4-sized) storage area that can hold a medium-size tote bag. Even when left open, this console box can be used as an armrest, promising a truly comfortable drive.

Grade availability

— Standard on all grades

2. Easy entry

A walk-in mechanism is now provided for the 2nd row on both right and left seats, meaning 3rd row passengers can enter and exit the vehicle with more ease.

Grade availability

— Standard on all grades

1.

2.

3. Versatile seating

The Highlander opens up a multitude of options when it comes to seating or for stowing your luggage easily on a completely flat surface. Both 2nd row and 3rd row seats have a 60:40 split to maximise versatility. Furthermore, the 3rd row can recline to truly enhance interior comfort and provides under-floor seat storage.

Grade availability

— Standard on all grades

4. Ambient lighting

Soft blue ambient lighting illuminates the instrument panel and door trim ornaments in the front and rear areas to produce a luxurious atmosphere.

Grade availability

— Standard on Lounge

The Highlander range

Live

Main features

- 18" alloy wheels (5 double-spoke)
- Daytime running lights (LED type)
- Multi-reflector halogen headlamps
- Front fog lamps
- Privacy glass
- Automatically retractable door mirrors
- Rear-view camera
- Black fabric
- 3-spoke urethane steering wheel
- Urethane gear shift knob
- Soft instrument panel
- Three-zone automatic air conditioning
- Height-adjustable driver's seat
- 60:40 split-folding 2nd row rear seats
- Large storage area in console box
- Toyota Touch® 2
- Multi-information display
- Vehicle Stability Control Plus (VSC+)

Active

Main features (additional to Live)

- 19" alloy wheels (6 double-spoke)
- LED headlamps
- Rear door with glass hatch
- Smart power back door release
- Roof rails
- Rain sensor
- Black perforated leather
- Ivory perforated leather
- 3-spoke leather steering wheel
- Heated steering wheel
- Leather gear shift knob
- Smart Entry & Start System
- Chrome-plated inside door handles
- Power lumbar support for driver's seat
- Heated outer rear seats

The Highlander range

Lounge

Main features (additional to Active)

- Puddle light integrated in side mirrors
- Black perforated leather
- Ivory perforated leather
- Memory function on door mirrors
- Woodgrain inner door instrument garnish
- Memory on driver seat
- Driver and passenger air ventilated seats
- Toyota Touch® 2 with Go
- 8" display
- Dynamic guidelines on camera display
- Coloured TFT multi-information display

The fuel consumption, CO₂ and noise values are measured in a controlled environment on a basic production vehicle, in accordance with the requirements of European law published by the European Commission. For further information, or if you are interested in buying a basic production vehicle, please contact Toyota Motor Europe NV/SA. The fuel consumption and CO₂ values of your vehicle may vary from those measured. Driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, installed equipment, load, number of passengers, ...) play a role in determining a car's fuel consumption and CO₂ emissions.

Glossary

Discover more about the Highlander technology.

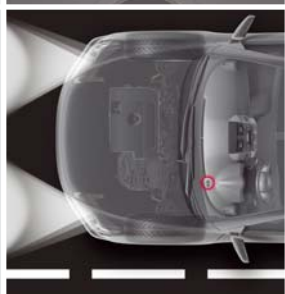

Rear-view camera

Reverse more safely using the rear-view camera. The clear colour image displayed on screen helps you spot hidden hazards and park with ease.

Rain sensor

The automatic rain sensor instantly sets the appropriate wiper speed and intervals.

Dusk sensor

The dusk sensor monitors light levels and automatically switches on the headlights when the light is low.

Smart Entry & Start System

Instead of a conventional key, the Smart Entry & Start System features a transmitter that allows you to unlock the doors by pulling the handle and lock them again by pressing a button. To start or stop the engine, simply press the Start/Stop button. All you need to do is carry the Smart Entry key in your pocket or handbag.

All Wheel Drive (AWD)

In normal road conditions, drive is through the front wheels, but on loose or slippery surfaces the system automatically and continuously distributes the torque between front and rear wheels. This optimises traction and driving stability and also maximises fuel economy.

Toyota Touch® 2 with Go

Building on the Toyota Touch® 2 multimedia base unit, Toyota Touch® 2 with Go includes a navigation system with full European map coverage, detour and eco-route functions. Its WVGA screen displays a 2D and 3D map view with connected services including real-time traffic updates and local online search facilities. Advanced Bluetooth® enables features such as Toyota Eurocare roadside assistance and SOS emergency call support.

Toyota Touch® 2

Toyota Touch® 2 is a fully integrated multimedia system, featuring a colour touch screen with drag and flick capabilities, and advanced audio system compatible with USB devices, iPods and smartphones. Bluetooth® 3.0 enables features such as hands-free calls, SMS integration and music streaming. The WVGA screen is also linked to a rear-view camera for safer reversing.

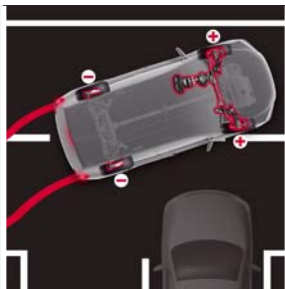

Dynamic guidelines on camera display

Reverse more safely using the dynamic guidelines on the rear-view camera display. The display shows the area behind the vehicle, as well as the vehicle's anticipated course when reversing. The clear colour image helps you to spot hidden hazards and dynamic guidelines will adjust as the vehicle manoeuvres to help you reverse and park with ease.

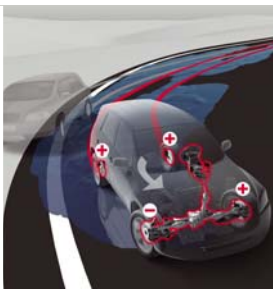

Glossary

Discover more about the Highlander technology.

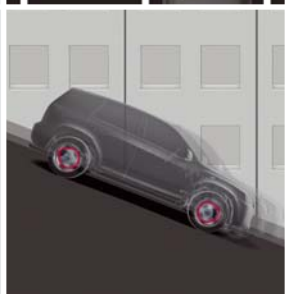

Anti-lock Braking System (ABS) with Electronic Brake force Distribution (EBD)

ABS prevents the wheels from locking while braking. EBD complements this by optimising brake force distribution between each wheel to compensate for different loads. Together the two systems help you to maintain steering control when braking heavily.

Vehicle Stability Control Plus (VSC+)

VSC+ helps to maintain stability and prevent skidding when turning sharply or cornering on slippery surfaces. Whenever the start of a skid is detected, it automatically activates individual brakes and controls engine output. In addition, it applies steering assistance to make it easier to get back on course.

Downhill Assist Control (DAC)

When descending off-road, DAC applies individual brakes to keep the vehicle stable and maintain its speed between 5 and 7 km/h. DAC works in forward or reverse, and when activated it requires no pedal input from the driver.

Supplemental Restraint System (SRS) – 8 airbags

This model is fitted with eight airbags. They include driver's knee airbag, SRS airbags for both driver and passenger, a passenger seat cushion airbag, side airbags for the front seats and SRS curtain shield airbags covering both the front and rear seat passengers.

Pre-tensioners and force limiters

Integral to the front 3-point ELR seat belts, pre-tensioners and force limiters are designed to help avoid injuries to the chest area.

3.5 l V6 Dual VVT-i

The powerful and efficient 3.5 litre V6 Dual VVT-i petrol engine uses low-friction, lightweight components to deliver maximum performance with lower fuel consumption and emissions. Dual VVT-i technology controls valve timing and lift, while the Acoustic Control Induction System (ACIS) optimises the air intake for greater efficiency and torque at all speeds.

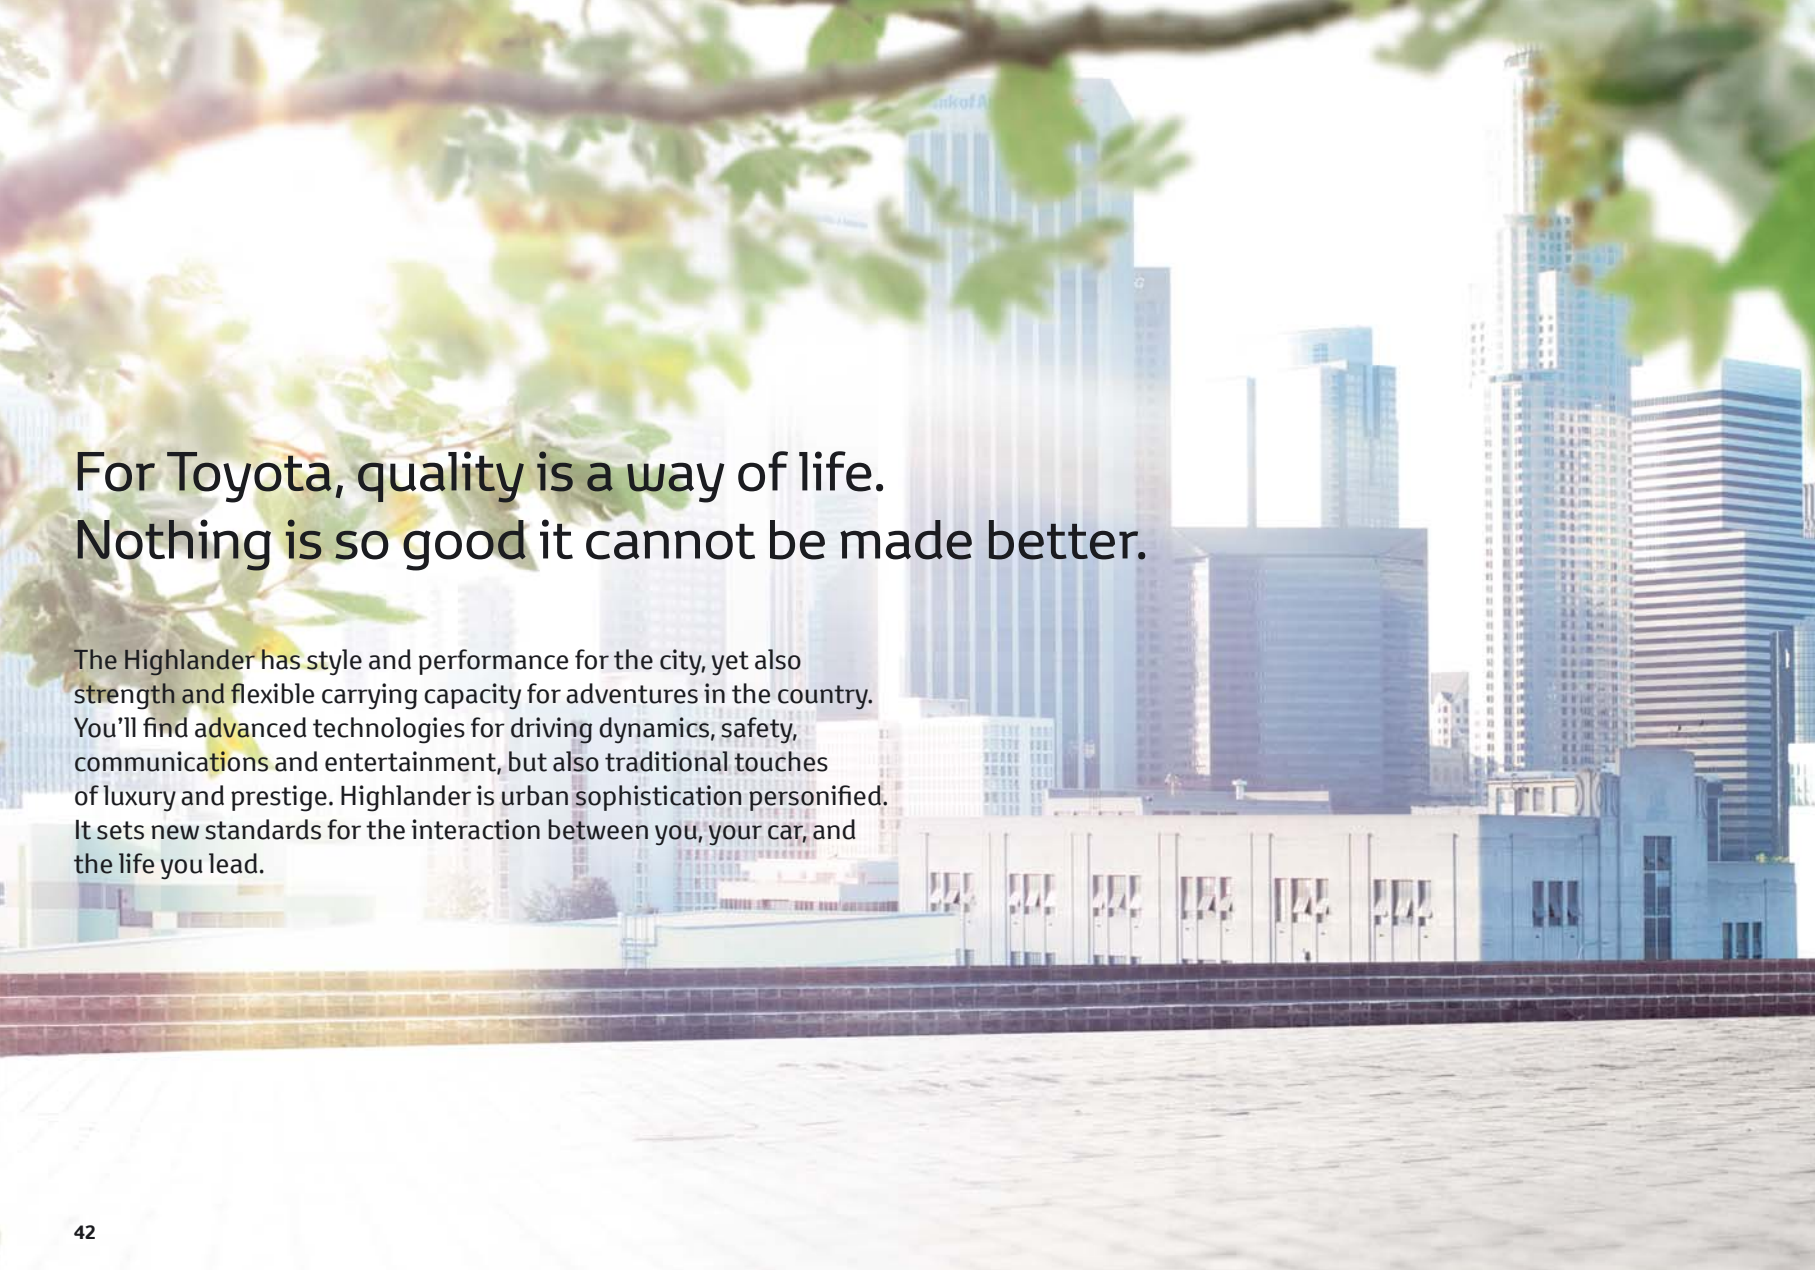

ISOFIX seat fixing

Seats incorporate special anchor points, including a top tether that helps prevent the seat tipping forward. These provide a safe and convenient way of correctly securing ISOFIX child seats (available from your Toyota dealer).

Automatic transmission

Toyota's automatic transmissions offer a smooth, effortless drive with minimal driver effort. Gear changes are quick and responsive, and additional manual modes (availability depending on model) enable greater control if required. Automatic transmissions are engineered for the best balance of performance and economy.

A city skyline is visible in the background, featuring several tall skyscrapers. In the foreground, there is a body of water, likely a river, and a low wall or railing. The upper left corner of the image is framed by out-of-focus green tree branches and leaves, with sunlight filtering through them, creating a soft, warm glow.

For Toyota, quality is a way of life. Nothing is so good it cannot be made better.

The Highlander has style and performance for the city, yet also strength and flexible carrying capacity for adventures in the country. You'll find advanced technologies for driving dynamics, safety, communications and entertainment, but also traditional touches of luxury and prestige. Highlander is urban sophistication personified. It sets new standards for the interaction between you, your car, and the life you lead.
