OFFICE PARKING

QUALITY, DURABILITY AND RELIABILITY – NO TERRAIN TOO TOUGH

Forget tough days at the office – whether faced with difficult terrain or the stresses of everyday life, nothing can faze the new Hilux. That's because this pick-up is tougher than ever. Building on its legendary strength and reliability, the Hilux frame and body structure have been redesigned to ensure toughness, while a stronger, wider under-body now offers greater protection. In fact, all the components of the Hilux are made to withstand the most rigorous tests. The new frame also contributes to improved handling and ride comfort, working hand-in-hand with the new suspension and the newly designed gear ratios. To help you get through challenging environments, you can always rely on Active Traction Control (A-TRC) and the rear differential lock to ensure optimal traction. All these refinements add to Hilux's unique sense of effortless driving, on or off-road.

Hill-start Assist Control (HAC) maintains the brake force for up to five seconds after the brake pedal is released to give you a smooth start on steep inclines – without rolling back.

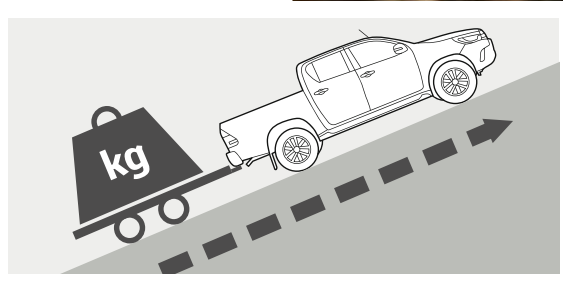

CEREAL FOR BREAKFAST

WORK HARD, TOW EASILY

They say breakfast is the most important meal of the day. So if you wonder where the Hilux gets its strength from, it's simple: this remarkable pick-up is designed first and foremost as a workhorse with a towing capacity of 3.5 tonnes* for Single and Extra Cabs (3.2 tonnes for Double Cab). While engine torque has been increased, the cooling performance of both engine and transmission have also been improved for effortless towing. Whether you want to tow grain, another vehicle or a caravan, the new Hilux tackles it with ease. It's also equipped with Trailer Sway Control (TSC) to ensure the vehicle stays steady when faced with crosswinds or changing road surfaces.

With increased engine torque and up to 3.5 tonnes* towing capacity, the Hilux tows the toughest load effortlessly.

* Available from October 2016.

GROCERY STORE

MORE CARGO SPACE, MORE POTENTIAL

You can never have enough of a good thing. The new Hilux can carry more than ever thanks to its 1 tonne payload*. The deck area has also been redesigned and increased giving you more space to carry bulky cargo. The deck measures up to 2315 mm in length and 1575 mm in width[§]. It also features steel plate brackets on the tailgate struts to withstand the heaviest loads. Plus, tie-down hooks fitted to the deck interior help secure your cargo.

* When 1-tonne payload is used on a regular basis, or for heavy conversions, the addition of heavy duty suspension is highly recommended. This suspension will slightly compromise ride comfort in an unloaded vehicle.

[§] Single Cab deck 2315 mm (length), 1575 mm (width); Extra Cab deck 1810 mm (length), 1540 mm (width); Double Cab deck 1525 mm (length), 1540 mm (width).

Downhill Assist Control (DAC), available with 6-speed automatic transmission, helps you tackle a steep descent with confidence. It applies individual brakes to maintain its low speed and to keep the vehicle stable, so you can focus on steering and avoiding any obstacles. It also works when reversing, for even safer driving.

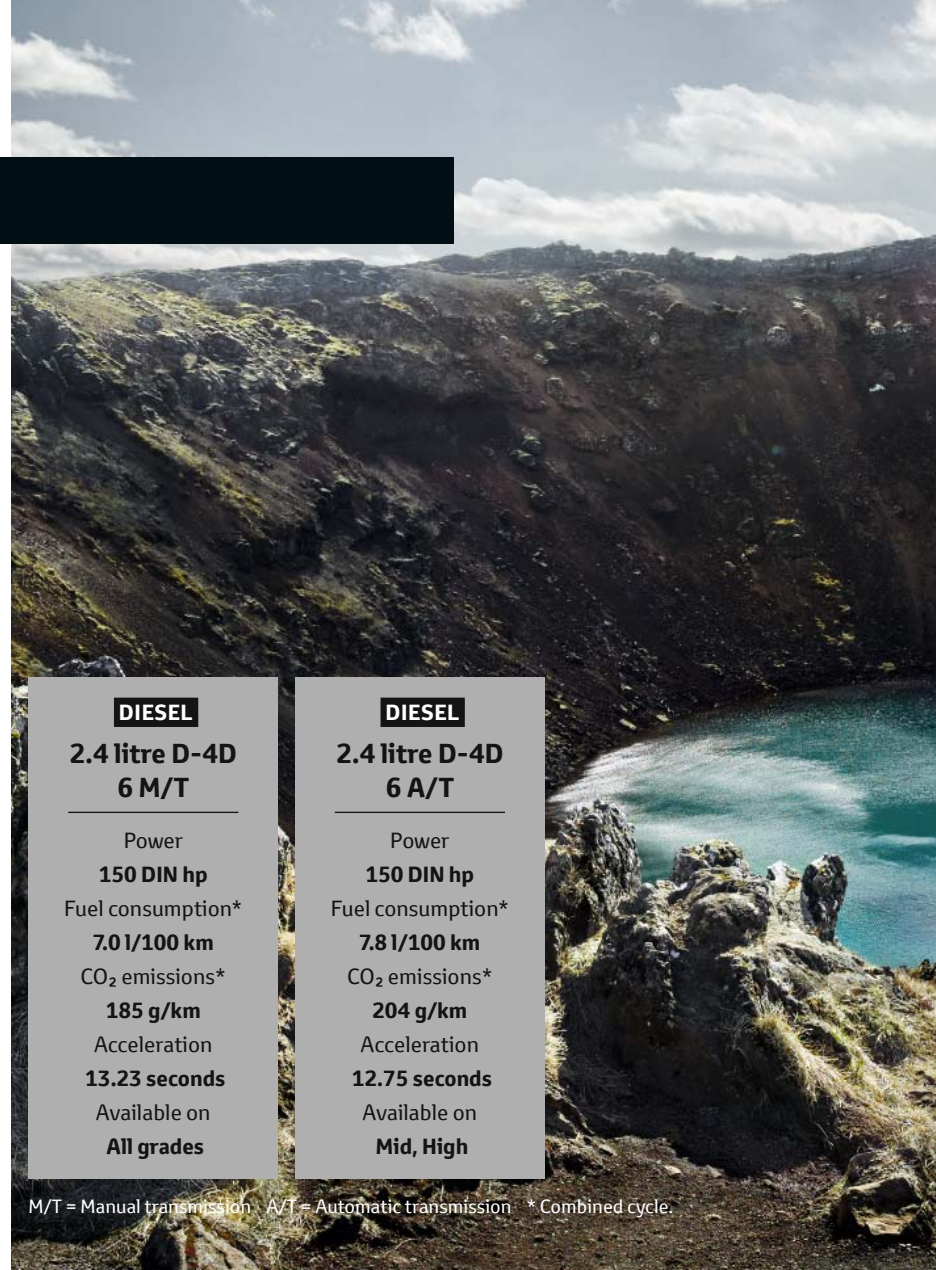

PLAYTIME

MEET THE TORQUE MASTER

Hilux challenges the perception of power with its brand-new diesel model. The 2.4 litre D-4D performs superbly thanks to new torque technology which dramatically increases torque in low to medium speed ranges and unprecedented acceleration. It also contributes to Hilux's exceptional towing capacity. This engine has been designed to keep noise levels down and efficiency up. In fact, the refined sound insulation can make you forget that you're driving a pick-up. The same is true for the efficient new 6-speed manual and 6-speed automatic transmissions: it adds to the premium SUV-style driving sensation.

The 2.4 litre D-4D diesel engine demonstrates excellent performance in particular in low to mid rpm torque ranges with outstanding acceleration as a result. Fuel efficiency has also been enhanced, while noise levels are kept to a minimum.

BBQ WITH FRIENDS

SMOKING HOT DESIGN

Few pick-ups are as proud to add mud or sand to their exterior as Hilux. Its rugged design is made to look its best on any job, challenge or outing – flaming hot or icy cold. This is Toyota signature design at its most audacious, full of strong shapes and sharp corners that reinforce intelligent toughness. Everything from the 3D grille – now integrated into the bonnet for a powerful, seamless look and framed by LED lights – to the muscular wheel flare and the dynamic sidelines spells sophisticated power. The chrome belt line along the windows and a wide choice of wheels add eye-catching highlights.

Strong features all round: LED daytime running lights and LED low-beam projector headlamps wrap around the fender for a wider, more muscular appearance.

Model shown: Hilux Double Cab – High with Invincible pack

Model shown: Hilux Double Cab – High

MAN CAVE

TOUGH OUTSIDE, COMFORTABLE INSIDE

This pick-up is all about quality surroundings and attractive, durable materials paired with the latest technology to maximise your comfort. A first-in-class electronic control to reduce body pitch and bounce ensures the ride feels as smooth as in a premium SUV. Equally, the newly designed adjustable leather seats offer greater comfort and support, while the height and depth adjustable steering wheel can be set to your ideal seating position. Automatic air conditioning and a clean air filter are also available and there's even a 220V outlet in the centre console to keep your electronic devices charged.

(1) The rear seats are split 60:40 and can be tipped up for added cargo space. **(2)** Whether you're heading off-road or to the office, the cool box above the glove compartment keeps your drinks chilled. Hilux is generous with an astounding 11 storage areas positioned around the cabin.

Toyota Touch® 2

This multimedia system will allow you to experience a world of information and entertainment in a stylish tablet-style 7" display. Simply flick through the screens to access a world of functions.

Multi-information display

The new colour multi-information display for easy access to essential journey information.

MISSION CONTROL

A NEW DIMENSION FOR PICK-UP TECHNOLOGY

Hilux is equipped with a range of innovative technology, designed to make every journey more relaxing. Take the tablet-style Toyota Touch® 2 screen, which combines plenty of multimedia features. It can be hooked up to a refined audio speaker system, while you adjust the volume via the steering wheel. Another Hilux first, the new 4.2" Multi-Information Display (MID) in the instrument panel incorporates 3D messages to help you drive more efficiently. It also holds the trip computer that displays essential journey data. All these functions can be easily accessed via the handy steering wheel controls.

Smart Entry & Start System

This allows you to unlock the car simply by pressing a button on the door handle. The start/stop button starts the engine. All you need to do is carry the Smart Entry key with you.

4-Wheel-Drive switch

For added convenience and style, the Hilux is also equipped with a 4-Wheel-Drive switch instead of a lever.

Toyota Safety Sense

Toyota Safety Sense adds advanced active safety systems for an even safer and more relaxed drive. Three active technologies – Pre-Collision System* with Pedestrian Detection, Lane Departure Alert and Road Sign Assist are at the heart of Toyota Safety Sense.

Pre-Collision System with Pedestrian Detection

This combines a millimetre-wave radar with a camera to detect other vehicles in the road ahead. The driver is alerted of a possible collision with audio and visual warnings and brake assistance is activated. If the driver fails to brake in time the brakes automatically engage to prevent or mitigate a collision. In addition, early detection of pedestrians is also made possible.

SINGING IN THE RAIN

HIGH NOTES FOR SAFETY

The Hilux excels when things get tough. After all, it's built to withstand the most testing situations. It comes with Toyota Safety Sense which includes three advanced active safety systems – Pre-Collision System* with Pedestrian Detection, Lane Departure Alert and Road Sign Assist – for an even safer and more relaxed drive. The redesigned frame and body structure features extensive use of High-Tensile Strength Steel (HTSS) to ensure all occupants are protected in an accident. The side members and cross members have been reinforced and enlarged helping to absorb even more energy in an impact and distribute the force effectively. Other active safety technology including Vehicle Stability Control (VSC) and seven Supplemental Restraint System (SRS) airbags also contribute to Hilux's excellent crash performance.

Lane Departure Alert

Using a camera to detect the lane markings in the road ahead, Toyota Safety Sense's Lane Departure Alert will alert the driver with audible and visual warnings if the vehicle starts to deviate from its lane without the turn indicator being applied – the driver can then take corrective action.

Road Sign Assist

Toyota Safety Sense's Road Sign Assist monitors the road signs ahead, displaying useful information such as the current speed limit or overtaking restrictions in clear view on the new colour TFT cockpit display. The system also provides a visual and acoustic warning if you are not following the road sign indication.

* Technical name: Pre-Crash Safety System.

PICKING UP ESSENTIALS

A BODY STYLE TO SUIT ALL YOUR NEEDS

The new Hilux has a body for every purpose. Whatever you're picking up, whether it's work or play, you'll find the perfect vehicle. The interior has been redesigned to provide more space for all passengers. At the front, there's more shoulder room and headroom. The seat adjustment range has also been widened to suit individual body shapes. Plus, increased legroom at the rear means everyone arrives completely relaxed, ready for the next Hilux adventure.

ALL SET FOR THE CHALLENGE

THERE'S NO LIMIT WHEN IT COMES TO HILUX'S HUNGER FOR ADVENTURE. BY OPTING FOR THE INVINCIBLE PACK YOU'LL ADD POWERFUL, FUNCTIONAL CHOICES TO SHOW OFF YOUR HILUX'S STRENGTHS – FOR WORK, FOR LEISURE, OR SIMPLY FOR YOUR INDIVIDUAL TASTE.

1. Invincible logo

A symbol of toughness to make your mark.

2. High over bar

Stainless steel design for a powerful, rugged appeal.

3. Inner bed liner

Precision-moulded for maximum load space: high-density polyethylene protects the deck bed, side and tailgate panels.

4. Side bars with step

Combined with the non-slip foot grips, the tubular stainless steel bars create a powerful entrance. They also protect the lower side panels against minor impacts.

5. Front guard with under guard

Emboldens your car with a tough and sturdy look.

6. Chrome fog lamp surrounds

Complement your car's front fog lamps and bumper with a stylish chrome detail.

7. 'Invincible' scuff plates

They create an immediate impression of style while protecting the door sills.

ADDED ATTITUDE

MUD TRACK OR HIGHWAY, THE HILUX ALWAYS MEANS BUSINESS. IF YOU WANT TO PROVE THESE TOUGH CREDENTIALS, YOU'LL LOVE THE GENUINE TOYOTA ACCESSORIES RANGE. IT HAS EVERYTHING FOR AN EVEN MORE STRIKING, FUNCTIONAL AND READY-FOR-ANYTHING HILUX.

SCAN THIS QR CODE.
Configure your Hilux.

1. Aluminium roll cover

Defend your Hilux against prying eyes: the lockable aluminium roll-top cover protects the deck contents.

2. Hard tonneau cover with high over bar

Eye-catching protection: the hinged lockable cover features a contoured spoiler. Available in all body colours and with an optional stainless steel high over bar.

3. Side bars

The distinctive tubular stainless steel bars grab attention and protect the side panels against minor impacts.

4. Leisure hardtop

Weather-resistant and incredibly practical, the hardtop also creates a solid, seamless look. Uniquely designed for the Hilux, it has lockable hinged and tinted windows and interior LED lights.

5. Towing hitch

With its 3200 kg capacity, a Toyota towing hitch gives you plenty of load-carrying flexibility.

6. Moving load floor

Glides along aluminium rails in the bed floor to help move loads up to 300 kg into the deck space. The textured anti-slip surface with raised edges keeps loads in place.

7. Storage box

Side-mounted on the deck, the storage box can be accessed easily. It's lockable and protects contents against water, mud and sand.

8. Aluminium bed liner

A tough layer of aluminium to protect the deck.

9. Auto folding mirror

The mirrors automatically fold in when locking, and fold open when unlocking your Hilux.

The fuel consumption, CO₂ and noise values are measured in a controlled environment on a basic production vehicle, in accordance with the requirements of European law published by the European Commission. For further information, or if you are interested in buying a basic production vehicle, please contact Toyota Motor Europe NV/SA. The fuel consumption and CO₂ values of your vehicle may vary from those measured. Driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, installed equipment, load, number of passengers, ...) play a role in determining a car's fuel consumption and CO₂ emissions.

GLOSSARY

LEARN MORE ABOUT THE ADVANCED ENGINEERING, SOPHISTICATED SAFETY SYSTEMS AND HI-TECH EQUIPMENT THAT MAKE HILUX A NATURAL LEADER.

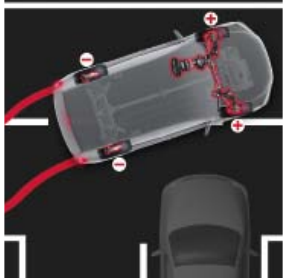

Follow-me-home headlights

Activated by the driver for added safety and practicality at night, the headlights remain lit for 30 seconds after parking your vehicle to illuminate your path to the front door.

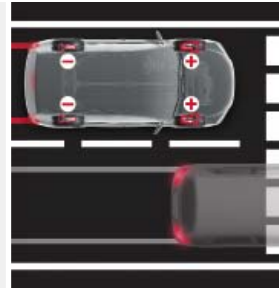

Smart Entry & Start System

Instead of a conventional key, the Smart Entry & Start System features a transmitter that allows you to unlock the doors by pulling the handle and lock them again by pressing a button. To start or stop the engine, simply press the Start/Stop button. All you need to do is carry the Smart Entry key in your pocket or handbag.

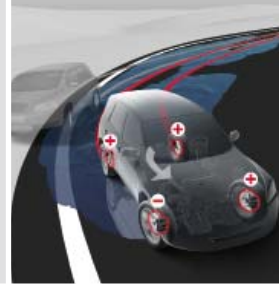

Anti-lock Braking System (ABS) with Electronic Brake force Distribution (EBD)

ABS prevents the wheels from locking while braking. EBD complements this by optimising brake force distribution between each wheel to compensate for different loads. Together the two systems help you to maintain steering control when braking heavily.

Brake Assist (BA)

If you attempt an emergency stop, BA will detect this and apply additional brake pressure. This enables ABS to work to its maximum potential.

Vehicle Stability Control (VSC)

VSC automatically activates each individual brake as needed and controls engine output to help maintain stability and prevent skidding when turning sharply or cornering on slippery road surfaces.

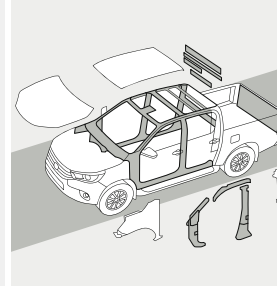

Trailer Sway Control (TSC)

TSC suppresses any trailer sway caused by wind, bumpy roads or steering etc. whenever you are towing. With sensors detecting yaw, acceleration and steering, TSC uses deceleration control and yaw moment to limit sway. The slip indicator bleeps when TSC is activated, and to warn drivers behind, the stop lamps are illuminated.

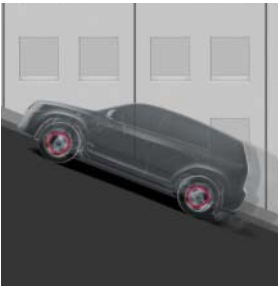

Active Traction Control (A-TRC)

Designed for on- and off-road, A-TRC helps to keep you moving in the most adverse conditions. This intelligent traction control applies brake force to one wheel that may be slipping, while distributing power evenly between the three that are not.

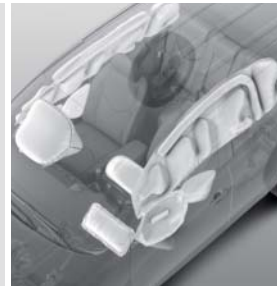

Robust body

All the sections of the body structure, including crossmember, side rail and suspension tower, have been reinforced for exceptionally high rigidity.

Hill-start Assist Control (HAC)

HAC helps to ensure a smooth start on steep inclines by applying the brakes for up to 5 seconds after the brake pedal is released. This prevents the vehicle from rolling back. It is activated by pushing the brake pedal harder after stopping as long as the transmission shift lever is in any forward gear position.

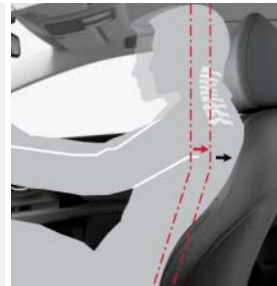

Supplemental Restraint System (SRS) – 7 airbags

This model is fitted with seven airbags. They include driver's knee airbag, SRS airbags for both driver and front passenger, side airbags for the front seats, and SRS curtain shield airbags covering both the front and rear seat passengers.

Downhill Assist Control (DAC)

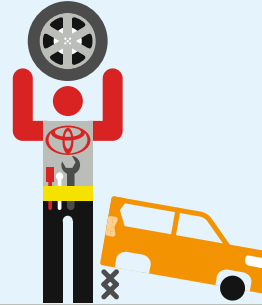

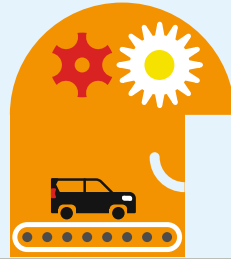

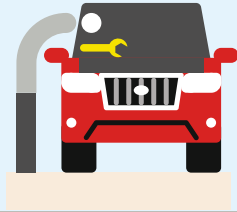

When descending off-road, DAC applies individual brakes to keep the vehicle stable and maintain its speed between 5 and 7 km/h. DAC works in forward or reverse, and when activated it requires no pedal input from the driver.

Driver and front passenger Whiplash Injury Lessening (WIL) seats

During an impact at lower speeds and particularly from the rear, WIL seats and headrests cushion the head and back. This reduces the risk of whiplash injuries.

COMPLETE PEACE OF MIND WITH TOYOTA.

Toyota Quality Service

Your Toyota retailer will advise you on your vehicle's service requirements. It will need a Health & Safety check at least once every 2 years/30,000 km (whichever comes sooner). An intermediate check is necessary every year or 15,000 km.

Toyota Low Maintenance Costs

All Toyota vehicles are designed and engineered to minimise your maintenance costs. This includes fewer parts that require servicing and, equally important, is that Toyota vehicle technology is made easily accessible so that maintenance labour time is less and pricing is competitive.

Toyota Genuine Parts

Providing the reassurance of Toyota quality, only genuine and approved components are used on your vehicle. If the vehicle is damaged, its design helps minimise the cost of repair because the most expensive-to-replace parts are deliberately located away from common damage zones. The result is ultimately less expense for parts and labour.

Toyota Accessories

Toyota genuine accessories are designed and manufactured with the same care, quality and attention to detail as Toyota vehicles. Adding a touch of style, comfort, convenience and practicality, they are tested for exceptional durability to enhance the enjoyment of your new vehicle. All accessories are covered by a 3-year warranty when purchased together with the vehicle*.

Toyota Comprehensive Warranty

Every new Toyota comes with a 3-year/100,000 km vehicle warranty, which covers any defect caused by a manufacturing fault. Transport to the nearest authorised Toyota repairer will also be covered. In addition, a 3-year/unlimited mileage paint warranty protects against defects and surface rust caused by a manufacturing fault (except pick-up beds which are covered for 1 year). Every Toyota commercial vehicle is covered by a 6-year/unlimited mileage anti-perforation warranty* against perforation of body panels caused by a manufacturing fault in materials or workmanship (except pick-up beds which are covered for 3 years).

Toyota Eurocare

Enjoy peace of mind driving with complimentary Toyota Eurocare roadside assistance in 40 European countries for 3 years[§]. If you experience a problem with your vehicle, Toyota Eurocare offers several possibilities to keep you on the road.

* Check with your retailer for specific warranty details.

[§] Belgium 5 years/Portugal and Denmark 1 year.

Toyota Added Security

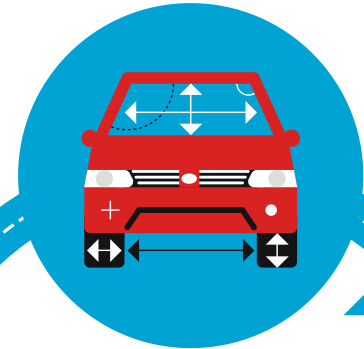

Toyota's comprehensive security system withstands the insurance industry's rigorous five-minute attack test. The alarm system and engine immobiliser are approved by all of Europe's major insurance companies.

TOYOTA'S LIFECYCLE APPROACH TO ENVIRONMENTAL ISSUES.

1

DESIGN AND MANUFACTURE

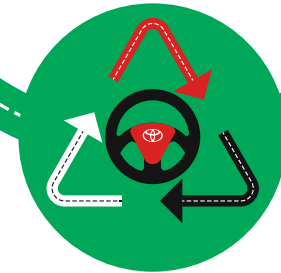

Minimising environmental impact runs through every part of the Toyota business. In designing and developing a new vehicle, every component is carefully considered to ensure environmental efficiency is optimised throughout its life.

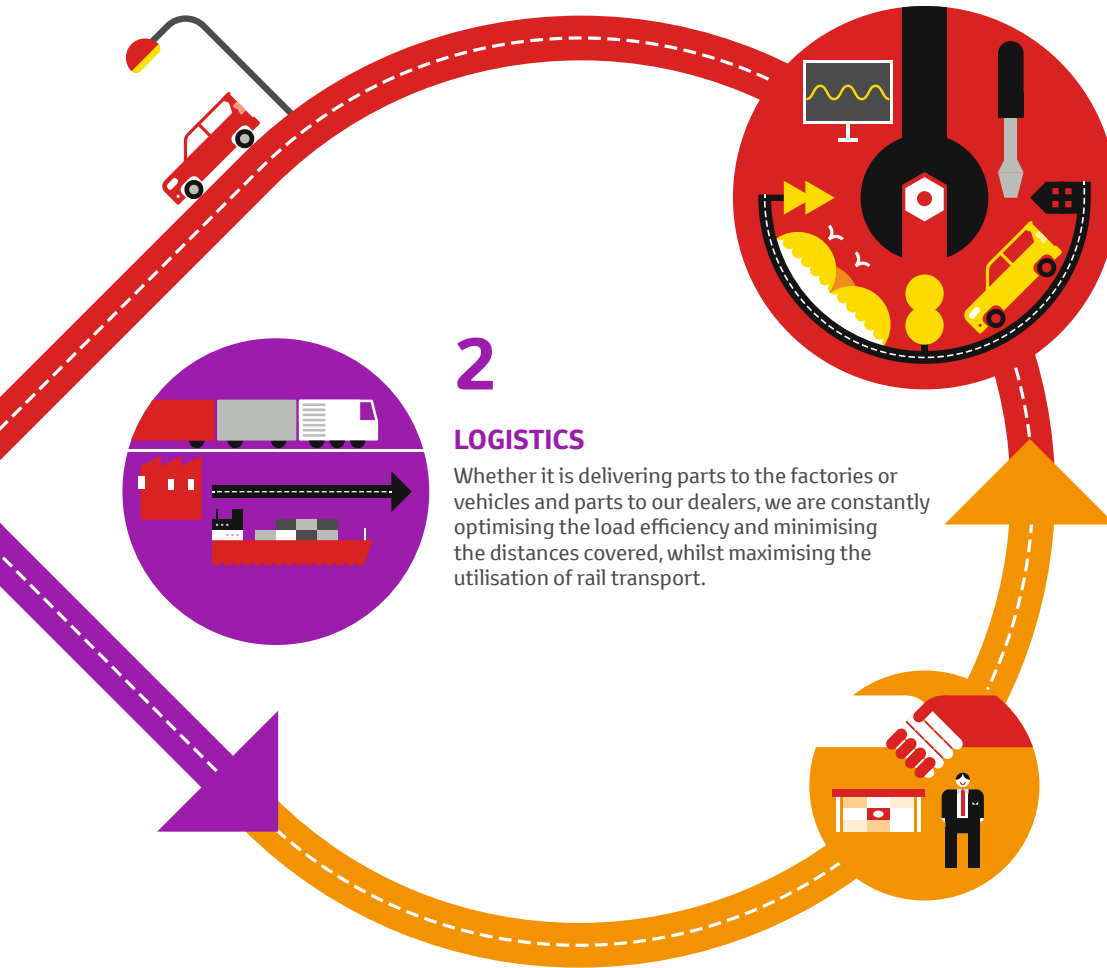

5

REDUCE, REUSE, RECYCLE

This is the mantra which has been at the heart of the Toyota business since it began. For example 95% of every Hilux is reusable and recoverable, 100% of the materials are coded for easier dismantling and four heavy metals have been completely eliminated all in accordance with the European Directive 2000/53/EC. Our environmental policy means that we offer you new and innovative ways of returning your vehicle when it eventually reaches "the end of the road". For more information visit: www.toyota.eu or contact your local Toyota retailer.

3

VEHICLE RETAIL

Improvements in the environmental efficiency of Toyota's network of showrooms are an on-going commitment. Sustainability initiatives such as energy audits, rainwater recovery, improved building insulation and an increased use of renewable energy sources all help to reduce energy and water consumption as well as waste.

4

DRIVING AND SERVICING

Driving your Toyota with greater thought could help reduce your fuel bill and CO₂ emissions by up to 30%.

Our sales teams can show you how to get the best out of your new vehicle and maximise its fuel efficiency.

Once out of the showroom let our highly trained aftersales teams take care of your vehicle to ensure its continued performance. The use of genuine and certain remanufactured genuine parts also helps to reduce further our impact on the environment.

PLAYING IN THE SANDPIT

LEGENDARY TOUGHNESS SINCE 1968

The Hilux is deservedly proud of its long history of resilience. Ever since its launch in 1968, this iconic pick-up has left its mark wherever it goes. It has travelled the world, racing through the African desert, conquering volcanoes, exploring the Amazon and reaching the North Pole. In 2015, a Hilux climbed the podium of the Dakar Rally once again to celebrate its third top-three finish in four years. Hilux's legendary strength and reliability are renowned across the globe. No wonder it's the most sold pick-up in the world.
