The Amarok

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Life is full of challenges.

Are you ready?

Where others reach their limits, the Amarok makes its way without compromise. It unites cross-country mobility, flexibility and efficiency like no other pickup: thanks to the optional all-wheel drive, the outstanding off-road safety – thanks to the special off-road ABS and its aligned Electronic Stabilisation Programme – with the broadest load area in its category and, last but not least, thanks to the robust ladder frame chassis, which offers a high level of stability during even the toughest assignments. The Amarok breaks new ground on conventional roads as well: with its high-quality interior and driving characteristics that leave nothing to be desired, it also sets a whole new standard in terms of comfort and dynamics.

02 The Amarok.

- 59 Technical data.
- 61 General information.

1st challenge:

You want to get to work on time. Take a short-cut by driving through the river.

Solution:

**4MOTION all-wheel drive
for perfect and safe cross-country mobility.**

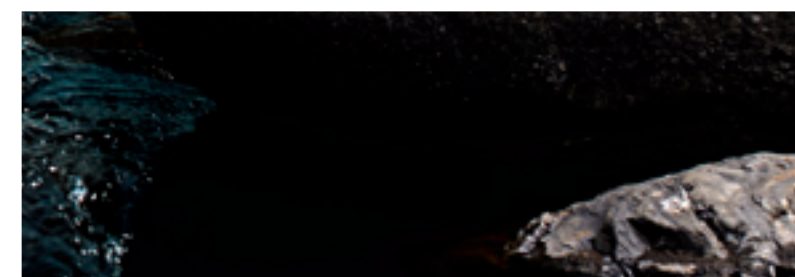

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

2nd challenge:

**Transport a load from
A to B. There's a hill with a
12% incline on the way.**

Solution:

**up to 3.2 t trailer load capacity that
can face all kinds of challenges.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

3rd challenge:

**Drive through difficult terrain.
And feel like you're travelling
in a limousine.**

Solution:

**an ergonomic design, high-quality workmanship,
low interior noise – for outstanding driving comfort.**

4th challenge:

**Discover the most remote corners
of the world. Make as few fuel stops
as possible.**

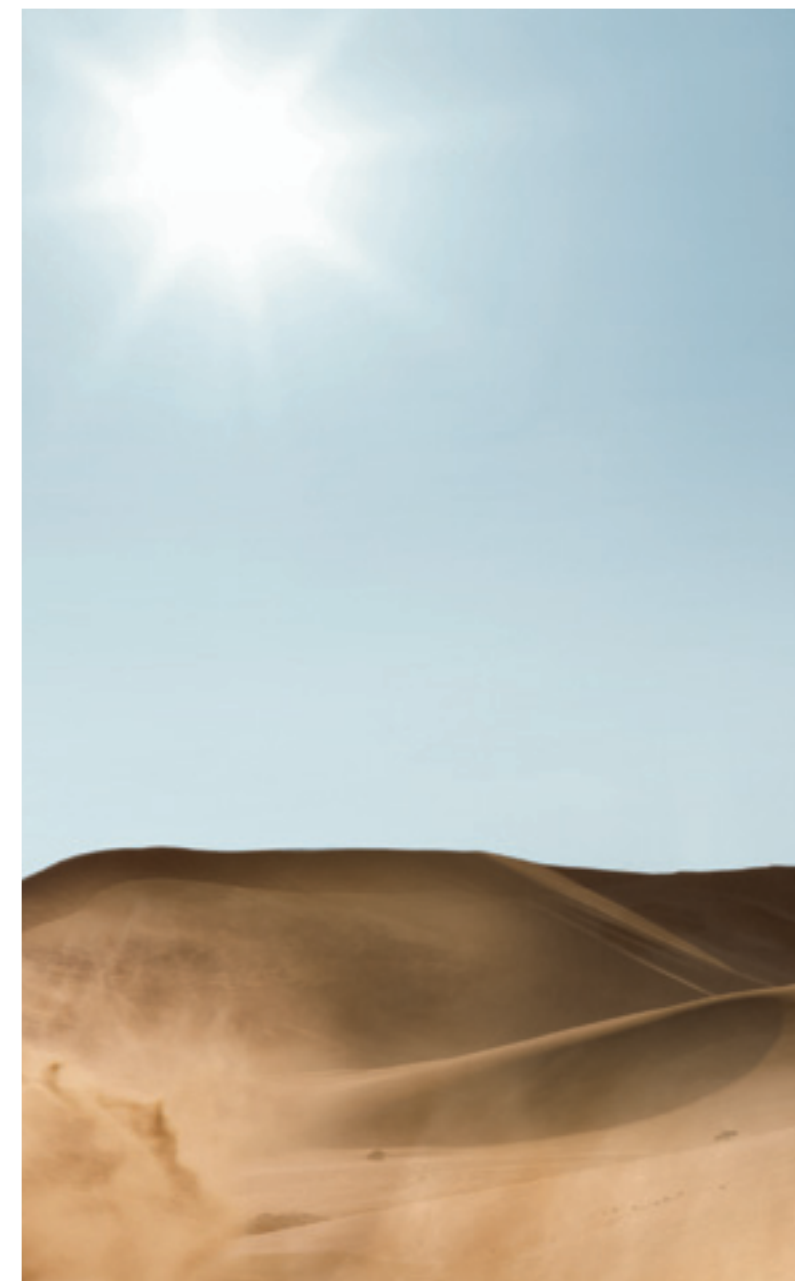

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Solution:

**highly efficient drive concepts for
a range of over 1,000 km.**

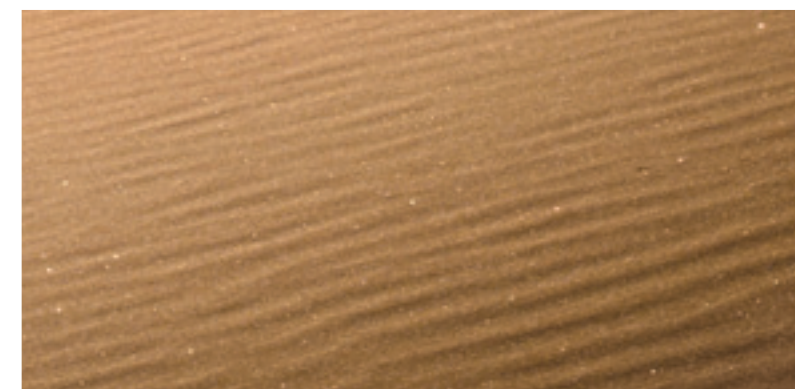

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

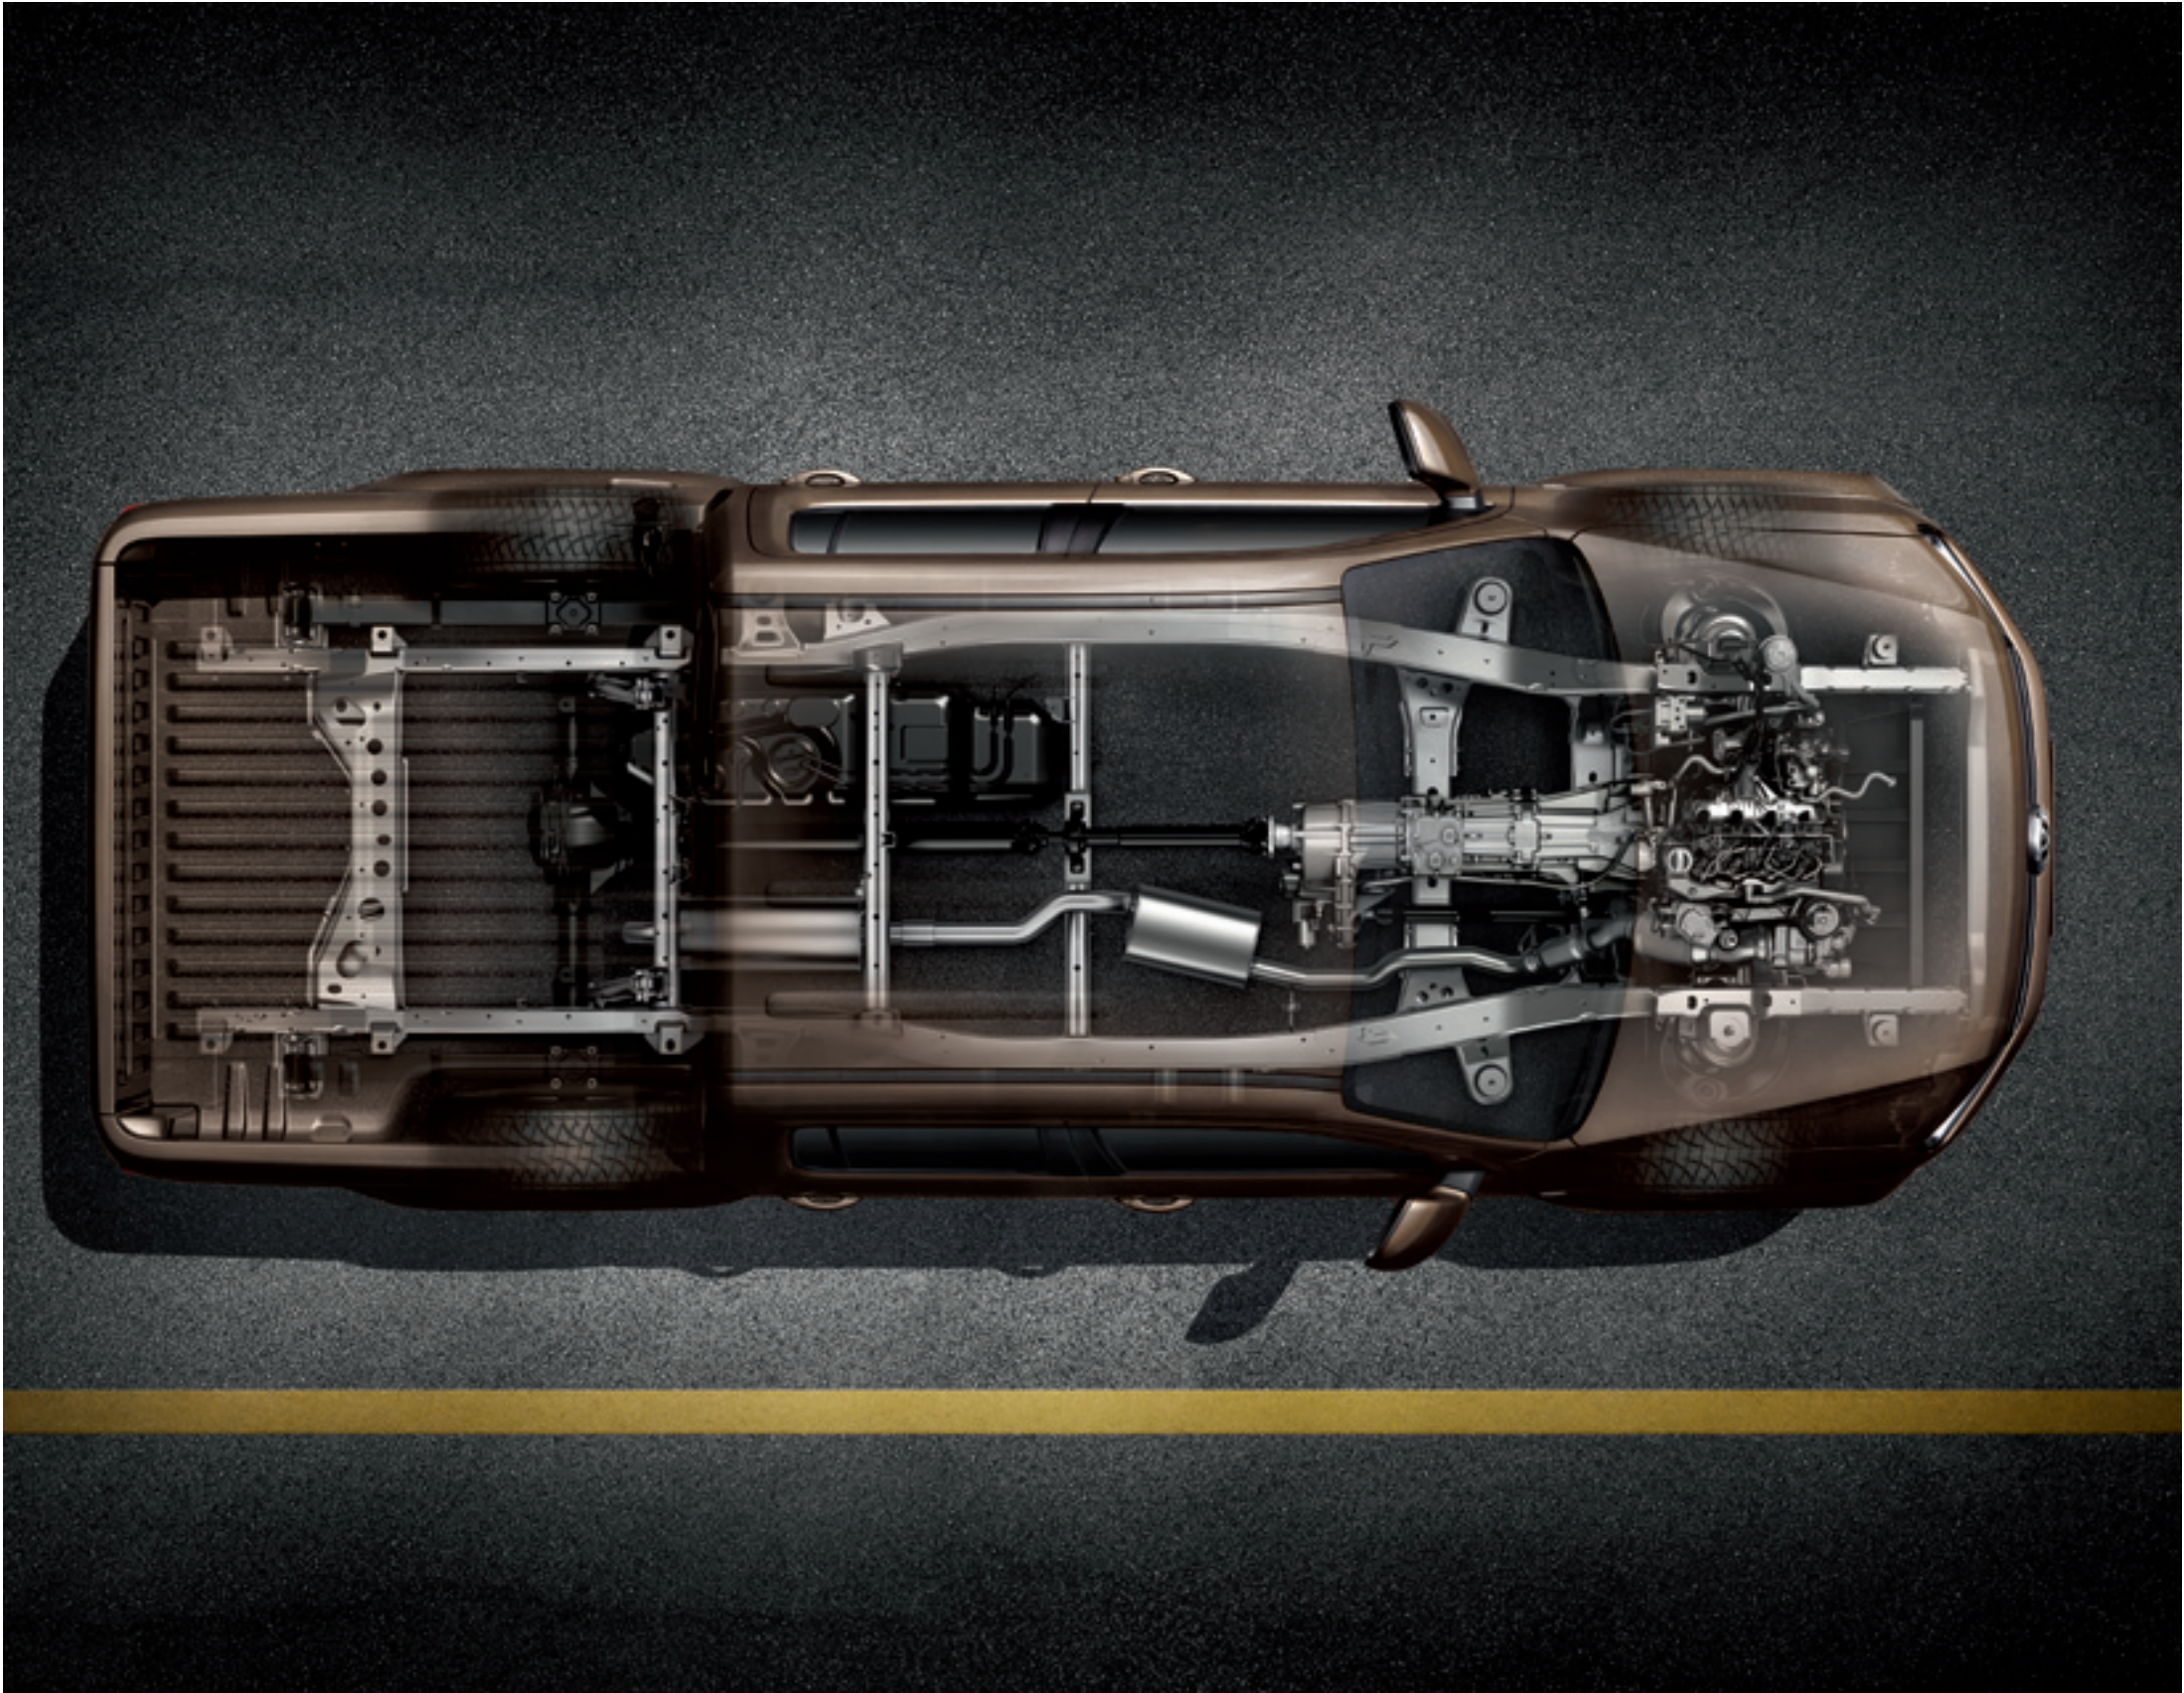

5th challenge:

**You want a pickup that offers
the best performance on all terrains.
Don't compromise.**

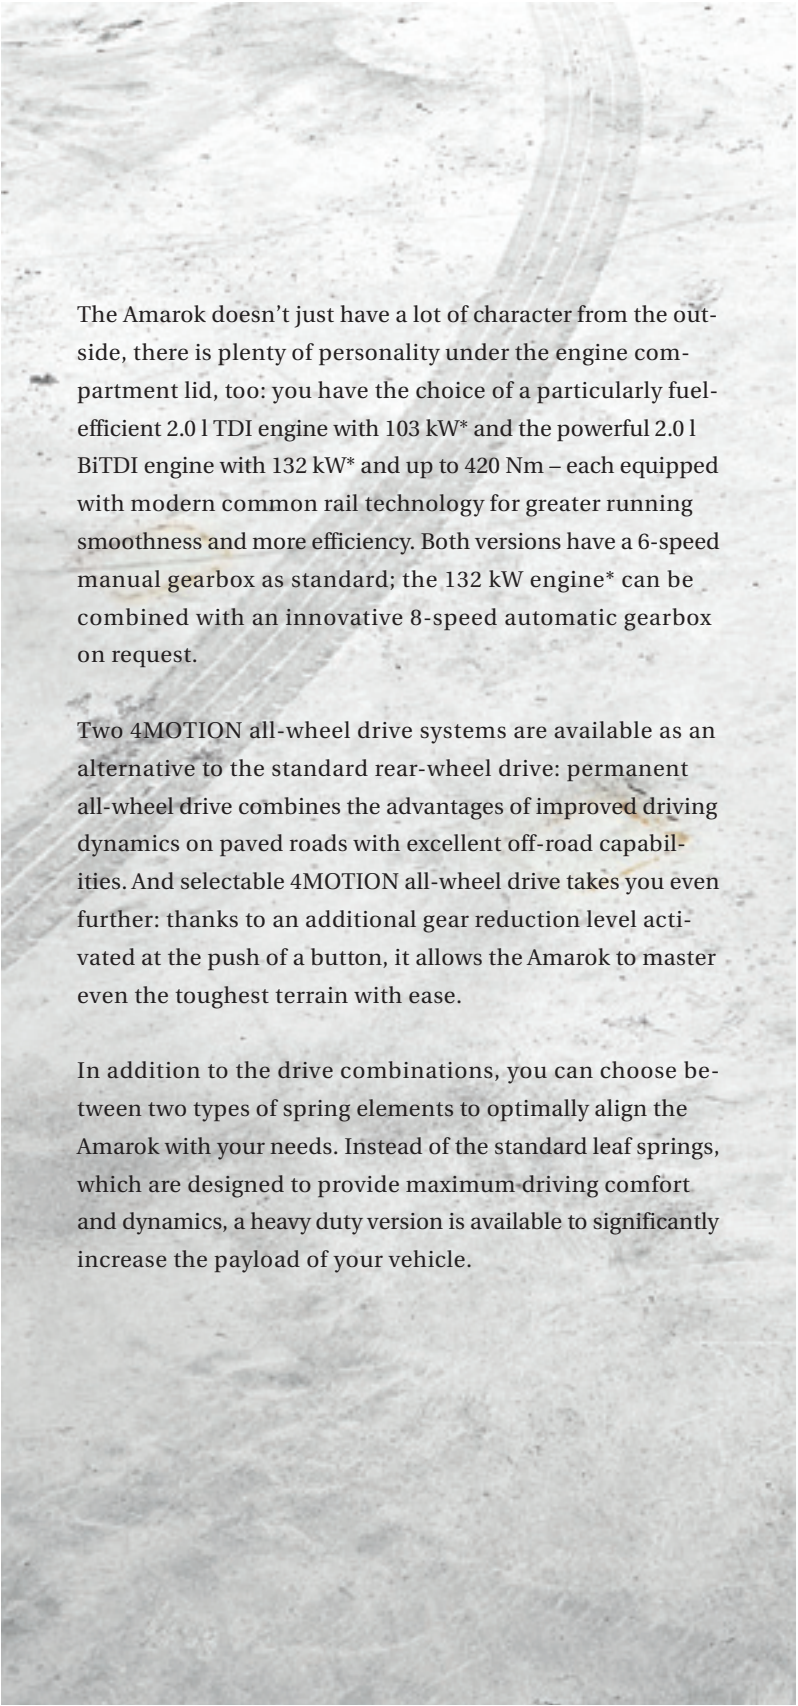

Solution:

**two powerful 2.0 l TDI engines*, three drive concepts,
two gearbox alternatives and two types of spring elements.**

*Please refer to page 59 for information on fuel consumption and CO₂ emissions.
Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The Amarok doesn't just have a lot of character from the outside, there is plenty of personality under the engine compartment lid, too: you have the choice of a particularly fuel-efficient 2.0 l TDI engine with 103 kW* and the powerful 2.0 l BiTDI engine with 132 kW* and up to 420 Nm – each equipped with modern common rail technology for greater running smoothness and more efficiency. Both versions have a 6-speed manual gearbox as standard; the 132 kW engine* can be combined with an innovative 8-speed automatic gearbox on request.

Two 4MOTION all-wheel drive systems are available as an alternative to the standard rear-wheel drive: permanent all-wheel drive combines the advantages of improved driving dynamics on paved roads with excellent off-road capabilities. And selectable 4MOTION all-wheel drive takes you even further: thanks to an additional gear reduction level activated at the push of a button, it allows the Amarok to master even the toughest terrain with ease.

In addition to the drive combinations, you can choose between two types of spring elements to optimally align the Amarok with your needs. Instead of the standard leaf springs, which are designed to provide maximum-driving comfort and dynamics, a heavy duty version is available to significantly increase the payload of your vehicle.

6th challenge:
Save fuel and money.
Without forgoing pulling power
or cross-country mobility.

Solution:
the Amarok with BlueMotion Technology.

*Please refer to page 57 for information on fuel consumption and CO₂ emissions.
Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The Amarok with BlueMotion Technology unites what has so far been regarded as mutually exclusive: the off-road qualities of a pickup and the low fuel consumption of a passenger car. Compared to an Amarok model without BlueMotion Technology, this vehicle can save up to 0.5 litres of fuel per 100 km, which keeps the emission of harmful substances to a minimum and reduces damage to the environment.

Amongst other things, the innovative technology package offers a start/stop system and regenerative braking (recuperation). It can be combined with the 103 kW and the 132 kW engine*; the latter can be equipped with either a 6-speed manual gearbox or an 8-speed automatic gearbox. In both cases, the highest gear has an especially long transmission ratio which lowers the engine revs and therefore the fuel consumption. Thus, the 103 kW* Amarok with BlueMotion Technology has an average fuel consumption of just 6.8 l per 100 km, which corresponds to combined CO₂ emissions of 179 per kilometre.

7th challenge:
Find the Amarok that suits you.
Choose from three equipment lines
and numerous body versions.

The Amarok SingleCab offers ample space for your freight: its 3.57 m² load platform can handle a payload of up to 1,245 kg. A rigid ladder frame and extremely resilient heavy duty leaf springs offer a high level of stability, even with heavy loads and when driving off the beaten track. For even more pulling power, the standard rear-wheel drive can be replaced with selectable 4MOTION all-wheel drive as an option.

But the Amarok SingleCab has been built for heavy work assignments in other aspects, too: the front bumper, the handles and the door mirror housings are made of black grained, hard-wearing plastic and the footwell in the cab is fitted with a robust carpet floor covering.

Not only does the Amarok SingleCab have the broadest load platform in its class – like all Amarok models – but it is also the only one to offer space for further work tools behind its height-adjustable folding seats.

**The spacious and durable solution:
the Amarok SingleCab.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**The robust and practical solution:
the Amarok DoubleCab.**

Even the toughest challenges are easy assignments for the Amarok DoubleCab: it has been designed to consistently provide high resilience and functionality – from the broadest load area in its category to the standard Electronic Stabilisation Programme, which automatically adjusts to the load conditions, to the comfortable seats in durable “Spacer” Anthracite cloth.

When you’re on the road, the “RCD 210” radio system with a MP3-compatible CD player is sure to put all passengers in a great mood. The Amarok DoubleCab offers that little bit extra at all times – particularly in terms of its passenger compartment space. Look forward to generously laid out leg and head room, which remains unequalled in this category. And your tools and small objects have also been taken into consideration: lots of practical storage trays provide ample space to store everything in an orderly manner.

The Amarok DoubleCab is equipped with a black grained rear bumper as standard. This feature may also be deselected on request, in which case the tailboard can be completely folded down at a 180° angle for increased ease of loading.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The Amarok DoubleCab can transport large quantities – and therefore takes even the toughest challenges in its stride. This is ensured by the 2.52 m² load area, which can be protected by a robust special coating on request. The particularly low load

platform height and large tailboard make loading and unloading easier. And in case you wish to explore difficult roads off the beaten track, you can equip your Amarok DoubleCab with a choice of either permanent or selectable 4MOTION all-wheel drive.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

No matter what you transport with your Amarok DoubleCab – bales of straw, seed potatoes or silage – it can handle any load effortlessly thanks to its high payload and its enormous pulling power. To ensure that everything stays in place, the load area has

four lashing eyes that can be used to secure your load with tie-down belts. And should your journey take you over sticks and stones, this is not a problem either. An underride guard each is available as an option to protect the engine, gearbox and tank from heavy blows.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Working materials, tools, manpower. With the Amarok DoubleCab, you'll be able to carry enough of everything you need and comfortably seat up to five people. A Euro pallet can be loaded crosswise on the load area – the broadest in its category. In combination with the optional robust heavy duty leaf springs, a payload of up to 1,151 kg is possible. And in case of rain, you can safely store your power drill or chainsaw in the double-cab – because the cinema-style rear seating can be divided $\frac{1}{3}$ to $\frac{2}{3}$ and folded in part or entirely.

The pickup with certain extras. Compared to the basic model, the Amarok DoubleCab Trendline offers an even more dynamic design of the exterior and enhanced interior equipment functionality. It is equipped with top-quality 16" "Taruma" alloy wheels as standard. Additionally, the door handles, door mirror housings and the front bumper with chrome applications on the upper radiator grille are painted in the colour of the vehicle. Two fog lights are integrated into the bumper as standard.

Inside the passenger compartment, the seats are upholstered with the cloth "Trail" – available in Anthracite or Buffalo. A centre armrest provides added comfort. Particularly practical: there are storage pockets under the front seats to store small items.

The "RCD 210" radio with a MP3-compatible CD drive as well as the semi-automatic "Climatic" air conditioning system to regulate the temperature inside the vehicle are available as standard to ensure your well-being. The doors can be comfortably locked via the radio remote-controlled central locking and the windows can be opened electrically with the push of a button.

**The comfortable and versatile solution:
the Amarok DoubleCab Trendline.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Sometimes, your workplace is not located in the middle of an industrial area, but out in the open country. And the best way to get there is in an Amarok DoubleCab Trendline 4MOTION. Whether with permanent or with selectable 4MOTION all-wheel drive

with gear reduction – you are sure to reach your destination fast and reliably. And if your worksite is even further off the beaten track: with an economical driving style, the efficient 2.0 l TDI engine* can comfortably take you over 1,000 km with just one tank of fuel.

Why should work always come before pleasure? The Amarok DoubleCab Trendline offers you plenty of comfort on your way to your clients – and makes a professional impression when you get there. It also supports you in your work: the load area is easy

to access via the sturdy, easy-to-open tailgate. A protection grille is available for the rear window as an option. And the standard Electronic Stabilisation Programme automatically adjusts to the load conditions.

*Please refer to page 59 for information on fuel consumption and CO₂ emissions. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The elegant and top quality solution: the Amarok DoubleCab Highline.

The Amarok DoubleCab Highline not only brings you to the top of the highest mountain with its selectable or permanent 4MOTION all-wheel drive, available as optional extras, it also fulfils the high standards of the city. In addition to the equipment available for the Amarok DoubleCab Trendline, the 17" "Aldo" alloy wheels with flared wheelhouses, partially chrome-plated door mirrors and further chrome applications on the front bumper as well as the chrome rear bumper turn the Amarok DoubleCab Highline into a real eye-catcher.

And the interior will also draw admiring glances: The steering wheel, gear lever knob and handbrake lever are leather-covered. And the seats are available in high-quality, partial leather trim on request with, for example, with fine grain "Vienna" Anthracite leather upholstery. Various chrome applications further enhance the cockpit.

On the road, the "RCD 310" radio system or the optional "RNS 315" radio/navigation system, each with six loudspeakers, ensure great entertainment while the "Climatronic" air conditioning system provides a pleasant, cool temperature.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Amarok Tipper

Amarok elevating work platform

Amarok Chassis

Amarok Fire-fighting vehicle

Amarok surveying vehicle

The Amarok fulfils almost every conceivable requirement. The vehicle can be combined with tailored solutions from various body manufacturers. The robust ladder frame has standardised mounting points to make subsequent assembly easier. An electric interface serves as a connection for crane bodies, beacons, winches and hydraulic power units. In addition, all three equipment lines can be ordered without a load platform.

The base vehicle leaves the choice up to you, no matter whether you are looking for increased payload thanks to the heavy duty leaf springs or rear-wheel drive, permanent or selectable 4MOTION all-wheel drive with an optional separate rear axle differential lock. In conjunction with a payload of up to 1,269 kg, the chassis variation options are almost endless. You will find examples of the professional special bodies and conversions for Volkswagen Commercial Vehicles at www.umbauportal.de, which offers a comprehensive overview of various transport solutions and special body manufacturers who work closely with Volkswagen Commercial Vehicles.

**The functional and flexible solution:
the Amarok.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The Amarok.
The right solution, no matter what the challenge.

Exterior.

The design of the Amarok is not only functional, but extremely impressive to look at, too. You'll recognise the typical Volkswagen “face” with its distinctive front headlights from far away. In addition, the Amarok DoubleCab Highline is equipped with flared wheelhouses as standard. Large rear lights and a wide, sturdy tailboard perfectly round off the vehicle’s strong look on all models. The Amarok DoubleCab Trendline and DoubleCab Highline both have a particularly easy-to-use tailgate handle with a rear lock as standard for additional comfort.

Chassis. On request, all three Amarok equipment lines are also available without a load platform. This way, you will receive the versatile and robust Amarok Chassis for individual special bodies. When the load platform is deselected, the wheelhouse shells, the tailboard as well as the rear lights and number plate light are also omitted. Please note that the vehicle will only become eligible for registration upon completion by the special body manufacturer.

- ☐ standard
- ☒ optional extra

Load area for the Amarok SingleCab. Thanks to a total floor space of 3.57 m² and a through-loading width of 1,222 mm, two Euro pallets can fit on the load area of the Amarok SingleCab crosswise when the tailgate is closed. The tailboard can be used as a practical extension of the load area on Amarok SingleCab models. As the number plate is not visible in this case, an additional number plate holder is required so that you can continue on your journey. On models without a rear bumper, the tailboard can also be folded down at a 180° angle.

Aluminium load compartment lining. The front wall, load area and the tailgate are protected by perfectly fitted corrugated aluminium sheets while the side walls are also protected with an optimally fit plastic liner.

May lead to longer delivery periods. A T H

Load area. Thanks to a loading width of 1,222 mm between the wheel housings, the Amarok can even transport Euro pallets crosswise – unthinkable for most pickups. This is due to the fact that the entire 2.52 m² load area is used in an optimal manner. If needed, the sturdy tailboard can be used as a practical extension of the load area. As the number plate is not visible in this case, an additional number plate holder is required for your journey. On models without a rear bumper, the tailboard can even be folded down at a 180° angle to make loading and unloading as easy as possible. And to ensure that everything stays in place, the load can be secured on four different lashing eyes using tie-down belts.

Interior.

However tough a work assignment may be, nothing will shake you in the Amarok. The comfortable interior has equipment that you would only expect to find in a passenger vehicle. From the optional leather upholstery to the clearly laid out dashboard, the passenger compartment has been designed to make you feel comfortable. Particularly the generous amount of head and leg room provides you with plenty of space for enjoyment.

Centre console. A practical storage compartment is located behind the gear lever knob. On the Amarok DoubleCab Trendline and Amarok DoubleCab Highline, it is additionally equipped with a lockable lid as standard and can therefore also be used as a centre arm rest.

SC

A

T

H

*In case you have selected “Amazonit” or “Aragonit” wheels, the spare wheel will be equipped with the standard wheel rim of the respective model. Our vehicles are equipped with summer tyres as standard. Your local Volkswagen dealer will be pleased to advise you. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Carpet floor covering. It is particularly robust and creates a warm atmosphere in the passenger compartment.

SC

A

T

H

Robust floor covering. A washable surface makes it even easier to keep the interior clean.

SC

A

T

H

Height-adjustable seats. The driver and front passenger seats can be adjusted individually and ergonomically. So you'll arrive at your destination feeling relaxed.

SC A T H

“Comfort & function” package. The windows and heated electric door mirrors can be operated electronically at the push of a button. This package also includes central locking with radio remote control.

SC A T H

Stowage pockets in the doors. The driver's door and front passenger door each have side pockets which can hold a drink bottle of up to 1.5 litres. The stowage pockets in the rear doors can each hold a 1 litre bottle.

SC A T H

Multi-use mounting points. The Amarok is equipped with two multi-use mounting points on the dashboard – easily accessible and in clear view for the driver. Several practical attachments are available for these mounting points: a cupholder, a picture frame, a note clip or a magnetic holder for metal objects.

May lead to longer delivery periods.

SC A T H

Cupholders. Integrated in the centre console, the cupholders keep your drink secure. For the Amarok DoubleCab Trendline and the Amarok DoubleCab Highline, there are two additional folding cupholders in the passenger compartment.

SC A T H

Rear Interior. As soon as you sit down in one of the comfortable Amarok seats, you won't want to get up again. There is an impressive amount of head room and leg room on the rear passenger bench seat. Increased safety is assured by the three head restraints, three 3-point retractable seat belts and two ISOFIX child's seat mounting points. The cinema-style seats can be folded up quickly and easily. Entering and leaving the vehicle is just as easy thanks to the two grab handles attached to the B pillars on the Amarok DoubleCab Trendline and Amarok DoubleCab Highline.

A T H

The driver's seat and front passenger seat. The two ergonomically shaped front seats offer individual height-adjustment and can even be heated on request. On the front passenger side, a grab handle facilitates entry into the vehicle; on the Amarok DoubleCab Trendline and the Amarok DoubleCab Highline a grab handle is also attached to the A pillar on the driver's side. Two cupholders keep coffee and refreshments securely in place. Another practical touch: there are stowage facilities underneath the seats on the Amarok DoubleCab Trendline and the Amarok DoubleCab Highline so that you can store smaller items. Of course, your safety is also catered for: a driver's airbag and a front passenger airbag as well as two head/thorax airbags protect you in the unlikely event of an accident.

Amarok DoubleCab Highline

Engines, running gear and transmission.

Unlike any other vehicle in its class, the Amarok feels equally at home on and off the road. It is equipped with state-of-the-art technologies to ensure the highest level of comfort, cross-country mobility and traction, and can be optimally aligned to meet the most diverse requirements. Two diesel engine options are literally at the heart of it all: they are especially smooth-running and extremely efficient, thanks to common rail technology. You have a choice of a particularly economical 2.0 l TDI engine with 103 kW¹⁾, which has an average fuel consumption of just 6.8 l of fuel per 100 km in the Amarok SingleCab with BlueMotion Technology, as well as a 2.0 l BiTDI engine with 132 kW¹⁾ and 400 Nm – two exhaust turbochargers provide an impressive vehicle response at low revs and more powerful performance at high revs. The engines have a 6-speed manual gearbox as standard. On request, the 132 kW engine¹⁾ can be combined with an 8-speed automatic gearbox, which improves comfort and increases the maximum torque to 420 Nm.

Ramp angle. The Amarok comfortably takes you across sticks and stones. And over significantly bigger things, too. With a ramp angle of 23°²⁾, even large obstacles such as tree trunks and rocks are no longer a problem.

SC A T H

Approach and departure angle and wading depth. The Amarok can brave steep hills as well as small fords. It has an impressive approach angle of 28° and a departure angle of 23.6° (28° without bumper) as well as a wading depth of up to 500 mm.

SC A T H

1) Please refer to page 59 for information on fuel consumption and CO₂ emissions. 2) These figures may vary depending on the equipment line and engine type. 3) The side slope angle on the left-hand side is 49.7° and 50.8° on the right-hand side. Please note that these are static calculated figures. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Hill-climbing ability. The Amarok can climb almost every mountain and carry your load at the same time: a trailer load of 3.2 t²⁾ is not even a problem at a 12% incline. With a payload of 1 t²⁾, it can conquer hills with a 100% (45°) incline.

SC A T H

Side slope angle. The Amarok has an affinity for extremes and can even handle roads with a lateral tilt of approximately 50°²⁾,³⁾. Now you'll be able to cross any slopes without a problem.

SC A T H

Rear-wheel drive (not illustrated). During acceleration, the vehicle weight is transferred to the back wheels for optimal road contact. Additionally, rear-wheel drive enables steering that is not influenced by the engine torque.

Selectable 4MOTION all-wheel drive (not illustrated). The selectable 4MOTION all-wheel drive ensures reliable traction on all road surfaces. Once activated via pushbutton, it distributes 50% of the engine output to each of the axles to improve forward thrust. An additional gear reduction setting can be engaged to cope with extremely tough terrain or steep inclines. The Electronic Stabilisation Programme also functions when selectable all-wheel drive is activated. And you continue to drive your vehicle with rear-wheel drive when travelling on paved roads.

SC

A

T

H

SC

A

T

H

8-speed automatic gearbox. An automatic gearbox is available as an option for the 132 kW engine¹⁾. The first gear is optimised for off-road use and pulling away when towing a trailer. This eliminates the need for additional gear reduction. The eighth gear, on the other hand, has a longer gear ratio and is designed for fuel-efficient driving at lower revs.

optional extra
- ☒

Amarok DoubleCab

Permanent 4MOTION all-wheel drive (not illustrated). This 4MOTION all-wheel drive with Torsen differential makes the most of the dynamic driving benefits of all-wheel drive and is suitable for driving on paved roads as well as on open terrain. It is only available in conjunction with comfort leaf springs.

A

T

H

Standard leaf springs (not illustrated). The standard leaf springs are the ideal choice for those who require a payload of up to 952 kg²⁾ but wish to have the vehicle response of a passenger car. These leaf springs significantly increase driving comfort, especially at higher speeds, and minimise the noise level at the same time.

A

T

H

Heavy duty leaf springs (not illustrated). They allow a payload of up to 1,151 t²⁾, provide a high level of load safety and are so robust that they can even cope with extreme terrain effortlessly when carrying a heavy load.

Amarok DoubleCab Highline

Amarok with BlueMotion Technology.

With BlueMotion Technology, Volkswagen Commercial Vehicles is setting a whole new benchmark for sustainable mobility. A technology package, consisting of a start/stop system, regenerative braking, cruise control, low rolling resistant tyres and a multifunction display, significantly lowers the fuel consumption. It can be combined with the 103 kW engine¹⁾ as well as the 132 kW engine¹⁾ with 8-speed automatic gearbox. The Amarok with BlueMotion Technology and a 103 kW engine¹⁾ only requires an average fuel consumption of 6.8 l per 100 km, which corresponds to combined CO₂ emissions of 179 g/km.

The **BlueMotion Technology badge**. This badge shows that you are driving a pickup with extremely low fuel consumption, which is less harmful to our environment.

SC

A

T

H

Start/stop system. The start/stop system provides fuel-efficient and low-emission driving. When you stop in traffic or at a red light, all you have to do is release the clutch, put the gear in neutral and the engine automatically turns off. To continue driving, simply press the clutch again. With the 8-speed automatic gearbox, leave your foot on the brake when you come to a standstill and the engine will switch off. When you release the brake, the engine automatically restarts.

SC

A

T

H

1) Please refer to page 59 for information on fuel consumption and CO₂ emissions. 2) These figures may vary depending on the equipment line and engine type. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Low rolling resistant tyres (not illustrated). The Amarok with BlueMotion Technology makes contact with the road via tyres with optimised rolling resistance. Thanks to the lower rolling resistance, fuel consumption and therefore CO₂ emissions are reduced.

SC

A

T

H

Regenerative braking (not illustrated). Special energy management boosts the alternator's voltage during coasting and braking. This recharges the battery of the vehicle. When driving at a constant speed, the voltage is reduced to lower fuel consumption.

SC

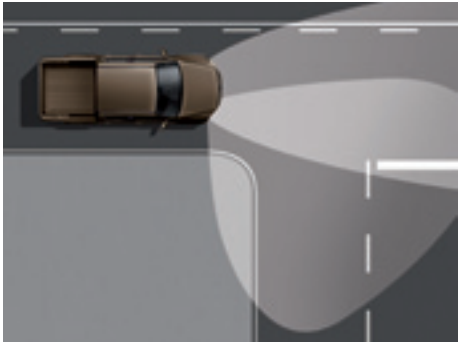

A

T

H

Safety.

The Amarok smoothly handles even the toughest terrain thanks to its numerous safety and assistance systems. The elaborate technology package, consisting of off-road ABS and next generation Electronic Stabilisation Programme with Hill Start and Hill Descent Assist, is unique in the pickup category. During extreme off-road driving, the off-road ABS ensures controlled blocking of the wheels so that small bits of material from the ground build up to create brake wedges. This can substantially reduce the stopping distance of the vehicle without having a negative impact on its manoeuvrability. The Electronic Stabilisation Programme automatically adjusts to the load conditions and helps prevent the vehicle from swerving. These measures – combined with maximum stability thanks to the robust ladder frame – makes the Amarok an ideal partner for the intense rigours of day-to-day work.

Turning lights. The inner fog light on the bend illuminates the edge of the road when you are turning off at a speed of 40 km/h or less. Possible dangers can therefore be recognised more quickly for greater safety during the journey.

SC A T H

Hill Start and Hill Descent Assist (not illustrated). It prevents the Amarok from rolling backwards on strong inclines and allows a comfortable handling of the vehicle when pulling away uphill. Upon activation of the off-road function, the assistant automatically brakes the vehicle to allow a safe and controlled descent.

SC A T H

Light and Sight package (not illustrated). The automatic driving light control with a “coming home” and “leaving home” function illuminates the area around the vehicle for safety when getting in and out. The rear view mirror dims automatically when the lights of the vehicle behind are too bright. In addition, a rain sensor in the mirror registers even light rainfall on the windscreen and activates the windscreen wipers immediately.

SC A T H

Anti-theft warning system. In addition to interior monitoring, this system comprises an electronic immobiliser, a back-up horn as an audible warning signal, an opening protection for the doors and engine compartment lid and the towing protection.

SC A T H

Mechanical differential lock (not illustrated). When the rear differential lock is activated, both wheels at the back of the vehicle are powered with the same amount of force and rotations. This offers optimal traction, even on sandy or slippery surfaces.

SC A T H

Fog lights. These provide optimal visibility and increased driving safety, even in adverse weather conditions. The fog lights are integrated into the bumper.

SC A T H

Airbags (not illustrated). Every Amarok is equipped with up-to-date airbag technology. Just a few milliseconds after the crash sensors register an impact, the driver’s airbag and the front passenger airbag are inflated with a gas mixture to protect the head and upper body area of the passengers. In addition, combined head/thorax airbags are integrated into the sides of the front seats. These are immediately activated following a side collision.

SC A T H

Anti-lock braking system (ABS). If a wheel is in danger of locking, the system immediately intervenes by reducing the brake pressure in a controlled manner. This helps to keep the Amarok fully steerable when braking hard.

SC A T H

Electronic Stabilisation Programme. The electronics help prevent the vehicle from swerving. In order to respond to critical driving conditions, the system evaluates data provided by a network of sensors. It can, for example, recognise what direction the driver is steering in and what direction the vehicle is moving in – and it is also informed on the load situation. Thus, it can build up brake force to offer directional stability when needed. At the same time, the Electronic Stabilisation Programme is synchronised with the ABS, MSR and ASR functions and also remains activated with selectable 4MOTION all-wheel drive. The laws of physics cannot, however, be overruled by the Electronic Stabilisation Programme.

SC A T H

Emergency stop signal (not illustrated). In the event of an emergency stop at 50 km/h or above, the brake lights start flashing. If the vehicle comes to a standstill, the hazard warning lights are activated and will automatically switch off again as soon as you reach a speed of 10 km/h when you resume driving.

SC A T H

Trailer stabilisation (not illustrated). Specially configured for the Volkswagen towbar, the trailer stabilisation complements the Electronic Stabilisation Programme: should the trailer start to fluctuate heavily, the system slows it down by means of controlled braking and reduced engine torque. This steadies the trailer and increases driving safety. The laws of physics cannot, however, be overruled by the trailer stabilisation programme.

SC A T H

Electronic differential lock (EDL)(not illustrated). If one wheel starts to spin, it brakes the wheel and transfers the entire power to the second rear wheel on vehicles with rear-wheel drive and to the other three wheels on vehicles with 4MOTION all-wheel drive. The electronic differential lock (EDL) can also be combined with a mechanical differential lock for the rear axle.

SC A T H

Anti-Slip Regulation (ASR) (not illustrated). If one of the driven wheels has an undesirably high rotation speed (slip rate), the system activates a partial braking procedure. This prevents wheel-spin and facilitates a smooth acceleration.

SC A T H

Off-road ABS. In addition to the conventional anti-lock braking system, the Amarok is also equipped with off-road ABS, which has been specially developed for use off the beaten track. As soon as this function has been activated – by pressing a button – the braking interval is increased. The wheels lock up in a controlled manner so that small wedges of material from the ground (such as gravel or sand) build up in front of each wheel. This can substantially reduce the stopping distance of the vehicle.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Comfort.

When your day-to-day work assignments are tough and demanding, your journey to work should be as comfortable as possible. That’s why the Amarok offers you a variety of comfortable equipment such as the generous head room and leg room, the optional leather fittings for the Amarok DoubleCab Trendline and the Amarok DoubleCab Highline, and the high-quality air conditioning systems to ensure a pleasant interior temperature. To offer you and your front passenger a comfortable start to the day during the cold months of the year, the Winter package includes heating for the front seats as well as heated windscreen washer jets.

“Climatronic” air conditioning system. Its 2-zone temperature adjustment recognises the intensity of the sun’s rays and the outside temperature and adds cool air accordingly. The automatic air distribution mechanism and air quality sensors ensure a pleasant climate.

SC A T H

“Climatic” air conditioning system. It has an interior sensor, which continually regulates the climate inside the vehicle to meet the desired temperature setting. The degree of temperature, air distribution and blower speed can be adjusted individually.

“Rear Assist” reversing camera (not illustrated). In conjunction with “RNS 315” or “RNS 510”, the area behind your vehicle as well as the anticipated path can be displayed during reverse parking.

SC A T H

Technology package. It consists of a cruise control and a multifunction display. The latter provides you with various data to help you drive economically and safely. This information includes, for example, the remaining range.

SC A T H

“Cool & Sound” package (not illustrated). Ensure a pleasant journey: the “Climatronic” air conditioning system with 2-zone temperature adjustment as well as the “RCD 310” radio system with a MP3-compatible CD drive and six loudspeakers, a leather-covered steering wheel, a leather-covered gear knob and a leather-covered handbrake lever.

T

Supplementary water heater. On request, a supplementary water heater is available for all Amarok models in conjunction with the “Climatic” and “Climatronic” air conditioning systems. It enables the engine to be preheated and facilitates rapid heating of the passenger compartment and/or ensures that it is also preheated. The operating unit is integrated into the overhead console and is easy to reach. However, the supplementary water heater can also be switched on and regulated with the help of the radio remote control.

SC A T H

Multifunction steering wheel. All available radio systems, the radio/navigation systems as well as the hands-free kit can be operated via the controls of the multifunction steering wheel. It is leather-covered and therefore feels extremely comfortable in your hands.

SC A T H

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Multimedia.

In case the call of the wild isn’t enough for you, the Amarok offers a variety of attractive sound experiences: the radio systems provide great entertainment for the entire interior with up to six loudspeakers. And thanks to the hands-free facility, you can even talk to your loved ones while you’re at the wheel. Now nothing can stand in the way of an exciting yet relaxing drive.

Hands-free kit. A mobile phone hands-free kit with a Bluetooth function, a microphone in the roof console and a 3-button control unit is available in conjunction with all radio and radio navigation systems.

SC A T H

“RCD 310” radio system. It has all the functions of the “RCD 210” and additionally offers two more loudspeakers¹⁾ in the rear compartment as well as a diversity aerial and a large display that is compatible with ParkPilot.

SC A T H

“Touch Phone Kit” Bluetooth hands-free kit.²⁾ The TFT colour touch screen with a diagonal of over 7.1 cm is even safe to use while you drive, thanks to it’s voice control.

May lead to longer delivery periods. SC A T H

“RCD 210” radio system. This radio has a RDS display, a MP3-compatible CD player, an interface for a mobile phone provision and two loudspeakers with an output of 20 watts each.

SC A T

AUX-IN interface (not illustrated). External audio sources such as a MP3 player can be connected using the cinch socket and operated via the attached device. The AUX-IN interface is standard for the “RNS 315”.

SC A T H

“RNS 315” navigation function for the “RCD 310” radio system. The “RNS 315” has all the functions of the “RCD 310” and is additionally equipped with a touch screen colour display and a Bluetooth compatible hands-free set for mobile phones. Six loudspeakers provide optimum sound. The selected maps have been preloaded on the 4 GB flash memory so that you can listen to your favourite CD at the same time. An AUX-IN interface and a SD-card slot are integrated at the front of the system.

SC A T H

“RNS 510” radio/navigation system. This system offers all functions of the “RNS 315” but has a colour touch screen with a diagonal of over 16 cm and a 30 GB hard disk with navigational data. In conjunction with the multifunction steering wheel, the system also offers voice recognition.

1) With rear-wheel drive. 2) Amarok SingleCab only available with selectable 4MOTION, Amarok DoubleCab available with either permanent or selectable 4MOTION. 3) Only available for Amarok DoubleCab. 4) Attachment parts relevant to the fuel consumption and emissions have been taken into consideration. 5) The fuel consumption and emission figures have been determined in accordance with the measuring method stipulated (the version of EC regulation 715/2007 which is currently valid). CO₂ emissions arising from the production and provision of fuel and/or other energy sources are not taken into consideration when determining the CO₂ emissions in accordance with directive 1999/94/EC. The figures do not refer to a particular vehicle and do not constitute part of the offer but are purely for comparison purposes between the various types of vehicle. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for global warming.

The Amarok: official vehicle of the “move the world”-expedition.

The adventurer Joachim Franz has set his sights on an ambitious target: with his “world aids awareness expedition”, he would like to provide more information about HIV and Aids and further raise awareness in the poorest countries around the world, thereby lowering the rate of infection. The expedition set off in April 2011 under the motto “move the world” – with the Amarok as the official tour vehicle.

With five expedition vehicles, the team travelled 64,452 kilometres in 111 days. The route was shaped like a giant “W” and led the team from Vancouver across the entire American continent to Europe, Africa, Asia and even all the way to Australia. Equipped with all-wheel drive and off-road gear reduction, the Amarok mastered all challenges during 85 days of pure driving: journeys through the jungle, across gravel tracks, off-road trails and potholes as well as through torrential rainfall and large landslides. The Amarok didn’t let the team down in snow and ice, or when driving in up to 50 °C hot desert sand. The robust pickup was even able to handle the permanent pressure on the Australian continent with ease - with over 8,000 km of asphalt, crushed red stone and kangaroos crossing the road.

And the Amarok did all of this for a good cause: in almost every country visited, a round table was established with the help of the German Embassy and local Non-Governmental Organisations in order to develop new strategies for the fight against HIV and Aids together with leading personalities in the areas of politics, business, religion, tradition and equal rights.

General information.

Take-back and recycling of end of life vehicles

Volkswagen meets the challenges of modern society and takes them into consideration in all new products of the Volkswagen brand. This naturally also applies to protection of the environment and resources. All new Volkswagen can therefore be recycled in an environment-friendly way and, subject to fulfilment of legal prerequisites, can be returned free of charge. You can obtain further details on the take-back and recycling of end of life vehicles from your local Volkswagen Commercial Vehicles dealer, on our Internet website www.volkswagen-commercial-vehicles.com and under the telephone number 0800 – Volkswagen (0800 – 86 55 79 24 36) which is free of charge in the Federal Republic of Germany.

4MOTION® and TDI® are registered trademarks of Volkswagen AG and other companies in the Volkswagen Group in Germany and in other countries. The fact that a trademarked name is not shown with an ® sign in this document cannot be interpreted to mean that this is not a registered trademark and/or that it may be used without prior approval in writing from Volkswagen AG.

Some of the vehicles shown are equipped with options at extra charge. Decoration contained in the illustrations is not included in the standard specification.

Furthermore, some of the special equipment and optional extras listed here are bound to specific combinations and/or cannot be combined and may be subject to certain legal requirements. Volkswagen will explicitly not be held liable for the improper use of such optional equipment. Some options may result in longer delivery periods for the vehicle. Only the available ordering systems of Volkswagen are applicable and relevant for the correctness and completeness of the information and combination requirements provided.

The standard and optional equipment cannot be shown in full in this brochure.

Quality guaranteed

In addition to the statutory warranty, you receive a 2-year Volkswagen guarantee for all new Volkswagen vehicles, a 3-year guarantee for paintwork and a 6-year guarantee against rusting through. All details of the Volkswagen guarantee and of the Volkswagen paintwork guarantee apply solely to vehicles of the Volkswagen brand in accordance with the current range of vehicles offered for the Federal Republic of Germany, and which are issued with a service booklet from Volkswagen AG for the German market. The services offered on these pages apply only to the German market.

The data given here on specifications, equipment, appearance, technical data and operating costs of the vehicles is based on the features of the German market and is in accordance with the information available at the time of going to print. Your local Volkswagen Commercial Vehicles dealer will be pleased to give you details of the differences in your specific country. Subject to change without notice.
