MITSUBISHI PASSENGER VEHICLES

**OUTLANDER
PHEV**

Sometimes all you want is Everything

The Outlander PHEV has everything you've ever wanted... and more. Cutting-edge technology. The world's first 4WD plug-in hybrid electric SUV. The clean, green power of electricity combined with a petrol engine that cannot be beaten on efficiency. The convenience of charging your car in your driveway. Sleek, streamlined style. A driving experience that goes beyond every expectation you've ever had for comfort, smoothness and serenity.

Technology that keeps you in Control

1. Twin Motor 4WD and S-AWC

Separately mounted motors at the front and rear axles deliver incredibly responsive 4WD performance with S-AWC (Super All Wheel Control) ensuring excellent driving stability and intuitive, linear handling.

2. 2.0-litre petrol engine

The powerful, highly efficient engine minimises CO2 emissions.

3. Generator

The high-performance generator transforms engine power into electricity to recharge the drive battery and assist the motors when needed.

4. Front Motor PDU & Rear EMCU

These intelligent control units contribute to heightened energy efficiency and optimal motor control with instant maximum torque that outperforms a 3.0-litre diesel engine.

5. Drive battery

The battery is stored under the floor to maximise interior space and lower the centre of gravity for improved safety and handling.

Smooth Linear Response

The Outlander PHEV responds faithfully to every command to keep you in total control.

Innovative Twin Motor 4WD teams with S-AWC to supply optimal torque and traction to each wheel. So you enjoy smooth, powerful acceleration and sure, stable handling in all road conditions.

S-AWC (Super All Wheel Control)

This integrated control system, only available from Mitsubishi Motors, delivers incredible power and control. By optimally managing Active Yaw Control (AYC), ABS (Anti-lock Braking System) and Active Stability Control (ASC) with Traction Control (TCL), it brings out the full potential of Twin Motor 4WD without compromising safety, comfort or fuel efficiency. When desired, you can press the 4WD LOCK button to simulate locking of a centre differential and optimally distribute torque to all four wheels for improved traction and stability.

Twin Motor 4WD

High-output motors separately mounted at the front and rear axles instantly supply torque on demand for incredibly responsive yet smooth 4WD performance.

Electric Heater

The electric heater uses the electric water pump to circulate hot water and warm the cabin even if the engine isn't running, such as during EV driving. So you can run it early in the morning or late at night without bothering the neighbours. In extremely cold weather, the electric heater can also be used to supplement heat generated by the engine.

Tomorrow's Efficiency Today

The innovative Plug-in Hybrid EV system is remarkably eco efficient. Enjoy zero fuel consumption and zero CO2 emissions during all-electric driving - as well as an incredibly quiet ride. Or enter hybrid mode to travel even greater distances with low emissions and an impressive 1.8 litre/100 km combined fuel efficiency. You can even generate electricity as you drive to enjoy vast stretches of wilderness with total confidence.

Easy Charging at Home and While Travelling

You can charge while sleeping in around five hours* with the onboard charger and charging cable. Or use the quick charger to charge in as little as 30 minutes (up to 80% capacity) at public charge points. Charging status is conveniently displayed on the instrument panel.

* With 230V/10A electric power supply.

Regular Charging
Conveniently charge at home.

Quick Charging
When travelling, use the quick charger to save time.

Automatically selected drive modes

Electric Driving

EV Drive Mode: Electric power only
The motors power the vehicle using electricity from the battery, resulting in zero fuel consumption and zero CO2 emissions. This drive mode is quiet, clean and powerful. Maximum speed is 120 km/h.

Hybrid Driving

Engine generates electricity

Series Hybrid Mode: Electric power + engine assistance
The motors power the vehicle using engine-generated electricity. The engine generates electricity when the battery level is low and to increase power when accelerating rapidly or climbing hills.

Surplus power charges the battery

Parallel Hybrid Mode: Engine power + motor assistance
The engine powers the vehicle (at high speeds, etc. when engine efficiency is high) with assistance from the motors when extra power is required.

Convenience Without Compromise

Innovation spells convenience in the new Outlander PHEV. Simply connect the Outlander PHEV with a power outlet at home to charge the drive battery.

Regenerative Braking Level Selector (Paddle Type)

Located on the steering wheel, the convenient regenerative braking level selector lets you easily adjust regenerative braking strength to any of six settings.

Energy Usage Indicator

How efficiently are you driving? The energy usage indicator informs you by pointing the needle toward the Power, Eco or Charge zone.

Charge And Save

Control over battery usage is at your fingertip command. Press CHRG to charge the battery via engine. Press SAVE to reduce battery power usage.

ECO Mode Control

Press for more energy-efficient use of the motors, engine, air conditioning and 4WD.

ECO Score

Indicates the eco-friendliness of your driving. The more green leaves, the better.

Special PHEV Display Functions

The Multi-information Display shows various PHEV display functions including driving range indicator, EV drive ratio indicator and energy flow indicator.

Driving Range Indicator

EV Drive Ratio Indicator

Energy Flow Indicator

Mitsubishi Multi Communication Display

3D Map View

Shows 3D polygon landmarks on city maps.

Split HD Display

Simultaneously displays map information, audio information, etc. on the same screen.

Sound Quality Control

Supports easy adjustment of various sound control functions.

ECO Information Indicator

Displays your ECO score and other EV/PHEV drive related data.

Mitsubishi Remote Control

Timed Charging

For convenience, use your smartphone to remotely control the charging timer, reschedule charging for late at night when electricity fees are low, monitor the remaining charge time and more. The Mitsubishi Remote Control app also enables immediate or timer activation of cabin heating or cooling.

Note: The vehicle and smartphone have to be interconnected within a Wi-Fi area. Some smartphones may not be supported.

Spacious Comfort and New Refinement

Enter an oasis of comfort and refinement where driving pleasure is enhanced by generous legroom, new luxurious amenities and a supremely quiet ride.

The seats are meticulously finished with high quality material and the rear seatbacks can be folded to flexibly meet your changing luggage needs.

USB Port & 12V Power Outlets

These amenities are conveniently located within the centre floor console, allowing easy access once you open the lid.

Convenient Charging Cable Storage

A storage space beneath the rear cargo area floor is ideal for conveniently storing the charging cable.

Functional features - standard

Satellite Navigation System

Multi-around Monitor System with Steering Camera Switch & Corner Sensors

Multi-functional Heated Steering Wheel with Cruise Control & Bluetooth Connectivity

Black or Brown Leather Seat Upholstery with Seat Heater for Front Seats & Electrically Adjustable Driver Seat

Keyless Operation System with Power Switch

Dual-zone Automatic Air Conditioning

Safety for Peace of Mind

Advanced new safety features intelligently support safer driving in the Outlander PHEV.

You can drive with greater confidence knowing that you and your passengers are solidly protected by a robust RISE body and comprehensive, award-winning safety measures.

Collision safety performance is significantly enhanced by Mitsubishi Motors' RISE (Reinforced Impact Safety Evolution) body, which efficiently absorbs energy and maintains high cabin integrity in the event of a collision.

Multi Around Monitor

The views from cameras mounted on the front, rear and sides of the vehicle (including a bird's-eye view) can be displayed in various combinations to reveal what is in blind spots and help you park more safely.

7 SRS Airbags

Front airbags, side airbags, curtain airbags and a driver's knee airbag help protect you and your passengers in the event of a collision.

Hill Start Assist (HSA)

When starting on a steep slope, HSA helps prevent you from rolling backwards while you release the brake by maintaining the braking force for up to two seconds until the accelerator is applied.

Active Stability Control (ASC)

If wheels lose their grip on slippery surfaces or while turning, ASC automatically adjusts engine output and applies braking force at the appropriate wheels to help maintain control and prevent skidding.

Auto Dimming Rear View Mirror

This mirror automatically reduces glare from the headlights of cars behind you to maintain a clear rear view and support safer driving.

Overall width (mm)	1,800
Overall height (mm)	1,710
Wheelbase (mm)	2,670
Seating capacity (persons)	5
Cargo area capacity (litre)	463
Kerb weight (kg)	1,845
Gross vehicle weight (kg)	2,340

OUTSTANDING AFTER SALES FOR CAREFREE MOTORING

PEACE OF MIND AS STANDARD

While our vehicles enjoy a strong reputation for reliability Mitsubishi Motors Ireland proves this by providing a confident 8 Year / 150,000km (whichever comes first) warranty as standard on all passenger vehicles.

If you sell your Mitsubishi vehicle before the warranty expires, you can even transfer it to the new owner making it even more attractive to buyers and helping you better maintain the car's value.

Warranty terms and conditions apply - see mitsubishi-motors.ie.

FREE ANNUAL VEHICLE HEALTH CHECK

Your Mitsubishi Motors Ireland warranty is strictly subject to the presentation of your vehicle to an authorised Mitsubishi Motors dealer in the Republic of Ireland at least once every year, or every 15,000 Kms / 20,000 Kms, whichever comes first. The dealer must be given the opportunity to complete the mandatory Mitsubishi Motors vehicle health check when your vehicle is presented. The free annual vehicle health check can be completed independently of a service or it can be performed in conjunction with a scheduled service. Free Vehicle Health Check terms and conditions apply.

MITSUBISHI MOTORS GENUINE PARTS

Mitsubishi Motors Genuine Parts have been developed and tested to stringent quality standards. It is recommended to use Mitsubishi Motors Genuine Parts in order to maintain the safety and integrity of your vehicle and that of your passengers. Mitsubishi Motors Genuine Parts are available at all Mitsubishi Authorised Service Points. All Mitsubishi Motors Genuine Parts have a 2 year guarantee. Terms & conditions apply.

MAP – MITSUBISHI ASSISTANCE PACKAGE

In order to demonstrate our commitment to your mobility and the faith we have in the reliability of our vehicles, you will receive a free MAP card valid for 5 years with your new Mitsubishi. With MAP your mobility is guaranteed in more than 30 countries throughout Europe, should you ever need assistance in the event of breakdown, accident, theft or vandalism.

Wherever you are, 24 hours a day, 7 days a week – just call the number on your card and the problem will be fixed on the spot. If it's more serious, your car will be taken to the nearest Mitsubishi dealer and you'll be offered services such as a hotel, continuation of journey, a replacement car and vehicle repatriation.

Around 2,500 Mitsubishi Motors Authorised Service Points in Europe are committed to helping you wherever you are.
