DISCOVER EFFORTLESS POWER

THE NEW
PAJERO SPORT
DISCOVER YOURSELF

Reaching the top has never been this easy. Step into the feature loaded Pajero Sport Automatic and get the muscle you need to stay ahead of the game. With an amalgamation of next generation technology, Automatic transmission and state-of-the-art interiors, one can experience nothing less than a smooth, effortless and a comfortable ride.

SMART 5-SPEED AUTOMATIC TRANSMISSION

The 5-speed automatic transmission system of the Pajero Sport works through the on-board computer that learns and adapts to each driver's preferences by monitoring engine, foot-braking data and gearshift timing to suit the driver's style, providing smooth, effortless acceleration and a more predictable ride.

2.5 LITRE 16-VALVE INTERCOOLED TURBOCHARGED DOHC COMMON RAIL DI-D

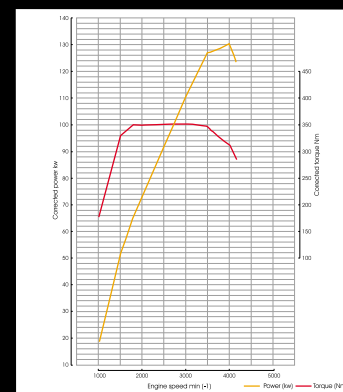

The 2.5 Litre diesel engine delivers an impressive 178 PS output. Using a common rail direct injection system (DI-D) for higher power and improved fuel efficiency DI-D feeds a high-pressure, precisely measured, fuel supply directly to the cylinders, ensuring each receives the optimal amount. Electronically controlled injection with feedback optimises fuel dispersion within the combustion chamber, allowing the system to make continual adjustments to always run at peak efficiency. The result is controlled power output with minimal emissions.

DIRECT INJECTION DIESEL

The Common Rail fuel system delivers a precise, steady fuel supply to each cylinder, enabling maximum output with minimum waste for better efficiency and emission reduction. The computer-controlled feedback system allows for continual adjustment, ensuring peak performance at all times.

16-VALVE LAYOUT

This arrangement creates a more complete air/fuel mixture and steadier flow for consistent high performance. The precisely balanced roller-rocker arms and scissor gears provide exact valve timing for more powerful combustion.

VG TURBO

The variable geometry turbo (VGT) delivers effortless power, right when you need it, while maintaining fuel efficiency by achieving an optimal turbo aspect ratio at any given speed. The VGT harnesses the power of the exhaust emissions, ensuring a constant delivery of fresh air to the engine for optimal output and performance.

INTERCOOLER

The intercooler allows more air to be pumped to the cylinders for more complete combustion and greater power. Positioned at the front of the radiator, this design gives Pajero Sport improved air-cooling performance.
