INTRODUCING A NEW SPECIES OF SUV

Power should always be used towards the greatest ends. Indeed, power should be beautiful. A philosophy embodied by the new ŠKODA KODIAQ.

An all-new vision of what an SUV should be, the KODIAQ's stunning exterior design is as robust as it is beautiful. Its 4x4 capabilities take on any terrain with effortless ease, while inside, a host of connectivity features, generous space and unmatched comfort will make the entire family hungry for adventure. And as always, numerous Simply Clever features ensure that your escapades remain delightfully practical.

The KODIAQ is yet another example of our tradition of making beautifully designed cars that are as passenger-focused and fun to drive now, as they were back when we started.

That's Simply Clever. That's ŠKODA.

A photograph of a white SUV parked on a dirt path in a forest during autumn. The ground is covered with fallen yellow and orange leaves. A large tree trunk is visible on the left side of the path. The background shows more trees and a misty atmosphere.

EXTERIOR DESIGN

BEAUTY OF THE BEAST

Ready to take on the toughest conditions, the ŠKODA KODIAQ radiates majestic power. Its precise, sharp lines are shaped by ŠKODA's new design language for SUVs, making it distinctive and timeless. Whether judged on its details or as a whole, it's clear that form and function are in perfect harmony here. The KODIAQ is a muscular beauty that combines a robust body with impressive off-road capability.

HEADLAMPS AND FOG LAMPS

The concept for the front headlights is one of the KODIAQ model's characteristic elements. The location of the sharply drawn fog lamps at the height of the radiator grille, where they are protected from damage, clearly shows the car's off-road ambitions.

**SIDE VIEW**

The sharp edges combined with smooth surfaces create unique conditions for the effective interplay of light and shadow. The square wheel arches, angular mud flaps with plastic edges and the protective sill covers show that this car is equally at home on rough roads.

REAR VIEW

The roof railings emphasise the attractiveness of the exterior. The rear lights penetrate deep into the fenders, thus also perfectly illuminating the car from the side.

DOOR SILL STRIPS

The style quotient of the car is underlined by the decorative door sill strips with the KODIAQ inscription - a clear nod to the car's overall blend of form and function.

HONEYCOMB TRIM STRIP

The strip between the "cat's eye" reflectors has an aesthetic as well as practical function. It runs around the edge of the luggage space, protecting the bumper from damage during load handling. A closer look at the strip reveals a honeycomb motif.

PANORAMIC SUNROOF

The KODIAQ opens up new vistas with the electrically-adjustable panoramic sunroof, which enhances the feeling of space.

LIGHT DESIGN

A photograph of a city skyline at dusk, viewed from a rooftop parking lot. The foreground shows a wet asphalt surface with white parking lines and a yellow bumper. The background features several illuminated skyscrapers under a cloudy sky.

THE ART OF ILLUMINATION

Innovative crystalline design meets innovative technology. With its mysterious beauty, the illuminated KODIAQ represents an impressive experience and is also the uncompromising embodiment of the credo "see and be seen".

FULL LED HEADLAMPS WITH AFS AND FOG LAMPS

The LED headlamps offer high performance and high energy efficiency. The AFS (Adaptive Frontlight System) adjusts the lighting intensity to specific conditions (e.g. city, motorway or driving in the rain), while the main headlamps boast an eye-catching integrated strip of LED daytime running lights. Under poor light conditions, the LED fog lamps come into their own, ensuring maximum safety.

LED REAR LIGHTS

The rear lights have LED technology as standard, while the crystalline design refers to Czech cubism and the country's glass-making tradition. Their sharp lines and distinctive C-shape, which is typical of ŠKODA cars, makes the vehicle stand out confidently.

A photograph of the interior of a Volvo car, showing the steering wheel, dashboard, and front seats. The text "INTERIOR DESIGN" is overlaid in large white letters.

INTERIOR DESIGN

INNER BEAUTY

Make your space more cosy and comfortable with soft, harmonious ambient lights running along the inside of the car, setting the perfect mood for any journey.

LED AMBIENT LIGHTING

It's up to you to choose one favourite colour or to complement each day with a different tone. The ambient lighting offers ten appealing colour options - Cool White, Fire Orange, Cinnamon, RS Red, Pink, Purple, Dusk Blue, Azure, ŠKODA Green and Acid Green.

FOOT AREA ILLUMINATION

The discrete illumination turns a comfortable space into an exceptional one. Experience ultimate comfort thanks to the interior lights, and enjoy a discreetly lit ambience during your journey.

Green ambient lighting

Blue ambient lighting

Red ambient lighting

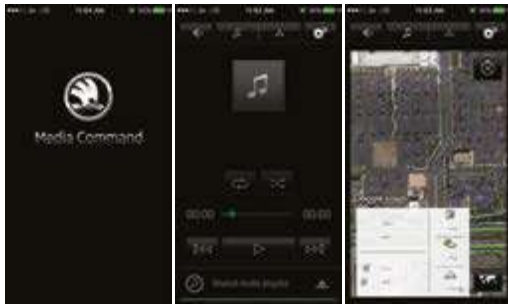

CONNECTIVITY

INFOTAINMENT ON THE GO

Infotainment has moved on in leaps and bounds. You can look forward to an attractive design and plenty of amazing functions, while the KODIAQ seamlessly syncs with your external devices. Better still, your kids will never get bored on a journey.

MEDIA COMMAND APP WITH BOSSCONNECT

The new ŠKODA Media Command App with BossConnect allows you to control the infotainment system on your phone. This feature is integrated into the Amundsen infotainment system and the new ŠKODA App, even allowing people in the back to operate the functions using their smart device.

SMARTLINK

With the SmartLink system (ŠKODA Connectivity bundle supporting MirrorLink®, Apple CarPlay and Android Auto), the car's infotainment system enables the driver to safely use the phone while driving. Plus, all installed applications that are certified as safe for vehicles are compatible with MirrorLink®, Apple CarPlay or Android Auto.

AMUNDSEN NAVIGATION SYSTEM

The top-range navigation and entertainment center features a sharp and vibrant colour touch-screen to display maps and other functions. It also offers a USB/Aux-in connection, SD card slot, Bluetooth and SmartLink Connectivity. The device can be used to control the car menu.

CANTON SOUND SYSTEM

Enjoy absolute sound clarity, whether it's music or the spoken word, on the Canton Sound System with ten speakers, including a speaker in the dashboard and subwoofer in the luggage compartment. The total power output is 575 W.

ŠKODA ONE APP

OneApp is a versatile application grouping together an array of useful assists. OneApp not only helps you to stay on top of the vehicle status and current driving data, but can also be used as a multimedia tool, for navigation, or to check the weather forecast. Smart widgets let you customise the application to reflect your personal preferences.

**SIMPLY
CLEVER**

ŠKODA'S LITTLE HELPERS

Life is easier when equipment is practical. The KODIAQ comes with features based on your real needs and includes Simply Clever details that are as ingenious as they are intuitive.

DOOR EDGE PROTECTION

When opening all side doors, plastic strips eject and cover the edges. In this way the KODIAQ protects itself against damage while also being considerate to other cars. Perfect for tight parking spaces, for instance.

UMBRELLA STORAGE COMPARTMENTS

Ingenious compartments with two original ŠKODA umbrellas are fitted inside both front doors. They are designed to let water drain away from the car, keeping the interior dry.

TICKET HOLDER

When you need to display a parking ticket in a visible place, the solution is simple. The car is equipped with a parking ticket holder under the windscreen.

A POCKET FOR EVERYTHING THAT MATTERS

Children, dogs, bears, toys, snacks, plus situations you cannot anticipate – that's par for the course when travelling with the family. And the KODIAQ can handle it.

UPPER STORAGE COMPARTMENT

You will find this surprisingly spacious compartment with tilting lid in the upper part of the dashboard by the front passenger seat.

LOWER STORAGE COMPARTMENT

The closed tilting storage compartment in the lower part of the dashboard by the front passenger seat can be air-conditioned, so you have a place to store chilled refreshments during your travels.

JUMBO BOX

The spacious storage compartment is housed in the front armrest. You can, for example, store your electronic items safely inside.

FRONT DOOR COMPARTMENTS

You will find a 1.5L bottle holder and a rubber strap in a spacious compartment in the front door. This is also where you can place a removable waste basket.

DRIVER'S STORAGE BOX

The driver can utilise a practical tilting storage compartment located directly below the steering wheel.

BOTTLE AND MOBILE PHONE HOLDERS

We haven't forgotten about the comfort of passengers on the third row of seats. They will appreciate the holders in the luggage compartment side cover.

A photograph of the interior of a Volvo car, showing the front and rear seats upholstered in beige leather. The steering wheel is visible on the left, featuring the Volvo logo. The dashboard and door panels are dark with wood grain accents. The text "SPACE TO SHARE" is overlaid on the image.

SPACE TO SHARE

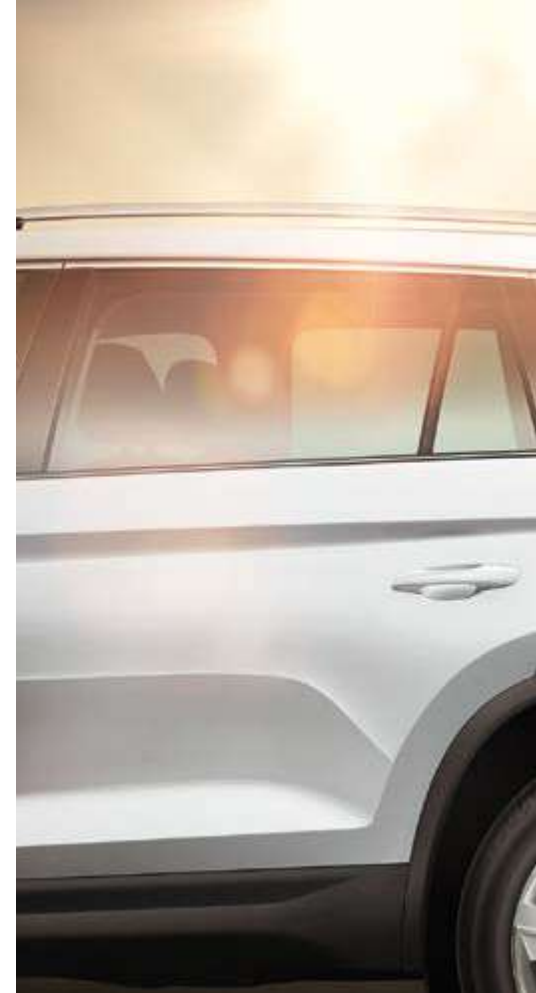

How big is your family? Up to seven people can travel with ease.

The elegant, functional interior inspires confidence and evokes a peaceful ambience. All the better for reconnecting with family and friends on that great outdoor adventure.

LUGGAGE, WITHOUT THE BAGGAGE

A look behind the 5th door will impress you because the KODIAQ offers unrivalled boot capacity and exceptional variability. In addition, we offer a range of Simply Clever details and solutions which you can choose according to your specific needs.

VIRTUAL PEDAL

How do you open or close the luggage compartment when your hands are full? Just swipe your foot underneath and, hey presto, it will open for you automatically.

The virtual pedal enables contact-free access and it's available exclusively with the electrically-controlled 5th door and KESSY (Keyless Entry, Start and exit SYstem).

**ELECTRICALLY-CONTROLLED 5TH DOOR**

It opens and closes at the mere touch of a button on the remote control or in the driver door, especially handy during unfavourable weather. You can also adjust the upper door position to suit your needs. There is a button for closing the 5th door directly on the door, too.

**LED FLASHLIGHT**

A practical removable LED flashlight can be found on the left side of the luggage compartment. It recharges automatically while the engine is running.

ROOM FOR UNEXPECTED GUESTS

Seven-seat interior

CAPACITY

If you aren't planning a journey with a full load of passengers, you can create the luggage space that you happen to need in the car. Lay the third row of seats flat, and you get 630 litres. Lay flat the second row as well, and you get a massive 2005 litres.

HOOKS

Hang up bags on the tilting hooks and you will find everything in its right place after the trip.

DOUBLE FLOOR

When using the third row of seats, it is necessary to remove the luggage space cover. The double floor provides a special storage space for it, so you don't have to keep it in the garage or at home.

NET PROGRAMME

The car also comes with practical details to make it even more versatile. In the luggage space you will find hooks for the net programme to help you keep everything tidy in the car and prevent luggage from shifting.

A serene landscape photograph featuring a large, leafy tree on the right side of the frame. The tree's branches and leaves hang down, partially obscuring the sky. In the foreground, there is a grassy bank with some yellow wildflowers. A calm body of water, likely a lake or a wide river, stretches across the middle ground. In the background, there are rolling hills and mountains under a soft, hazy sky. The overall mood is peaceful and natural.

COMFORT

COMFORT IS YOUR CO-DRIVER

The KODIAQ lets you turn a routine trip into an extraordinarily pleasant experience. Treat yourself to some luxury on your journey to work or the shops, for the children when they are going to school, or for trips to see friends. Set out for ordinary, routine destinations with a special feeling.

KESSY

Cars equipped with KESSY (Keyless Entry, Start and exit SYstem) feature a Start/Stop button on the steering column for keyless ignition and switching off the engine.

HEADLAMP WASHERS

Integrated telescopic headlamp washers easily take care of dust and mud.

LED BOARDING SPOTS

The Boarding Spots with LEDs, designed to illuminate the entry area, are located on the external side-view mirrors.

CRUISE CONTROL

In addition to maintaining the pre-selected speed, cruise control enables you to increase or reduce speed without using the pedals.

3-ZONE CLIMATRONIC

With this state-of-the-art air conditioning system, you can set different temperatures for the driver, co-driver and rear passengers. It's also fitted with a humidity sensor, which reduces windscreen misting, and sun sensor.

ROLLER BLINDS FOR THE REAR SIDE WINDOWS

Mechanical roller blinds significantly increase passenger comfort in the rear seats on sunny days.

POWER NAP PACKAGE

Rear passengers will sleep sweetly through a long journey thanks to the Power Nap Package. It includes variable headrests of the outer seats for a comfortably supported head posture while sleeping, plus blankets.

REAR PART OF THE JUMBO BOX

On the rear part of the Jumbo Box you will find a 12V socket with 3-zone air-conditioning. You will also find the control for the rear seat zone here.

A blurred view from a car window showing green foliage, with the word "SAFETY" overlaid in large white letters.

SAFETY

THERE'S HELP AT HAND

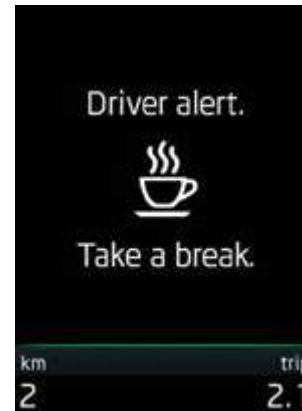

We have done everything in order to ensure that you arrive at your destination safely. The KODIAQ comes with plenty of assistants allowing you to react to various situations promptly. Some of the systems can even prevent an impending collision all by themselves.

HANDS-FREE PARKING

The KODIAQ's state-of-the-art hands free parking doesn't just give you greater comfort and orientation while parking. It gives you confidence to park like a pro every time.

Hands-free parking minimises the hassle of parking in tight spots by automatically selecting an appropriate parking place in a row of parallel or perpendicularly parked vehicles. When parallel parking, it only needs a space 60 cm longer than the car itself. In today's crowded cities and space-starved streets, hands-free parking is a blessing indeed.

iBUZZ FATIGUE ALERT

This clever assistant system evaluates data from the power steering sensors to detect any driver fatigue behaviour. In such cases, the colour MaxiDOT display warns the driver to take a break.

KEEPS THE CUBS SAFE

The KODIAQ is an excellent choice for everyone who wants to ensure the best safety for their children on the road. The reliable and robust body, equipped with many advanced safety elements, protects little passengers under all circumstances. Enjoy a feeling of maximum assurance and peace of mind.

A SPACE FOR CHILDREN

Your children will ride in the back in absolute safety and comfort. Putting the children into car seats is a pleasant business too, thanks to the large side doors and lots of space in the rear part of the interior. You can find a mount preparation for two child seats with Isofix safety on the rear side seats.

ONE-TOUCH ANTI-PINCH WINDOWS

With the One-touch Anti-pinch technology protecting you, the presence of even the smallest obstacle will stop your windows from shutting.

SAFETY FIRST, AND SECOND.

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over – like the airbags. Your car is equipped with nine of them.

FRONT DRIVER AND PASSENGER AIRBAGS

While the driver airbag is enclosed in the steering wheel, the passenger airbag is located in the dashboard.

KNEE AIRBAG

This airbag, which is located under the steering wheel column, protects the driver's knees and shins.

**HEAD AIRBAGS**

Upon activation, head airbags create a wall protecting the front and rear occupants against head injury.

**FRONT AND REAR SIDE AIRBAGS**

These four airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

PERFORMANCE

FORCE OF NATURE

Every family has a different story. Be it frequent trips to the mountains or long drives along the motorway. An urban adventure or off-road expedition. Whatever the story, we have the right alternative for the family. And in every case, we offer dynamism combined with excellent fuel consumption.

DIESEL ENGINE

The 2.0 TDI/ 110 (150)kW(PS) diesel engine, offers high power output, is more refined, fuel-efficient, and features lower emissions as well.

TRANSMISSION WITH 4 X 4

The car is equipped with 7-speed DSG (Direct Shift Gearbox). Whatever conditions are thrown at you, enjoy absolute comfort and fuel efficiency with a 4x4 drive.

ADAPTS TO ANY ENVIRONMENT

The KODIAQ with 4x4 drive has an adventurous spirit and great potential. Naturally, you will appreciate its great handling during every journey, but you'll enjoy it most when you go off-road. High hills, deep valleys, gravel, mud, snow, potholes? No problem.

ALL-WHEEL DRIVE

The 4x4 drive is provided by an inter-axle electronically-controlled multi-plate clutch. The coupling of the rear axle is automatic, so under normal conditions the car can utilise the advantages of front-wheel drive, and under extreme conditions the excellent traction of the 4x4 drive.

DRIVE MODE SELECT*

The Driving Mode Select for the 4x4 version includes Snow Mode, which ensures good handling even on low-grip surfaces.

*Select Modes available for India.

INTELLIGENT DRIVE MANAGEMENT

Be it on road or off road, experience a smooth and flawless drive with the ŠKODA KODIAQ. With the power to adapt to any terrain, this intelligent SUV makes your driving experience truly beautiful. Not just that. Its clever technology adjusts the torque as per the road conditions, making it handling the car a cakewalk.

CHASSIS PROTECTION

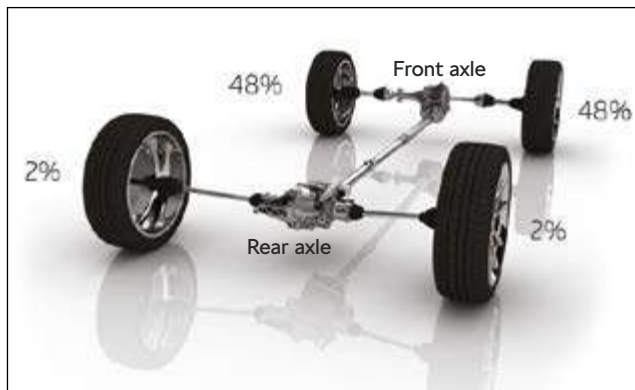

As standard, the bottom part of the KODIAQ is protected by plastic covers that, besides their protective function, are shaped aerodynamically to optimise the air flows under the car.

To increase the degree of chassis protection, the vehicle is fitted with the Rough Road Package, taking the form of additional protection for the rear suspension lateral arms and the brake hoses.

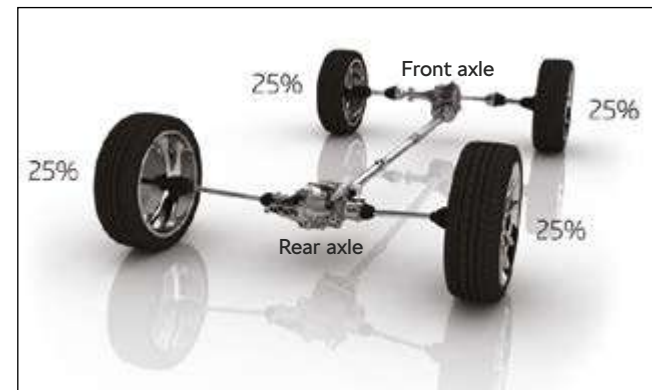

FOUR-WHEEL DRIVE

The four-wheel-drive system is based on an electro-hydraulically controlled multi-disc inter-axle clutch designed to smoothly distribute the torque between the front and rear axles in ratio ranging between 96%-4% and 10%-90%. The system can transmit as much as 85% of the available torque to a single wheel (in conjunction with the EDS).

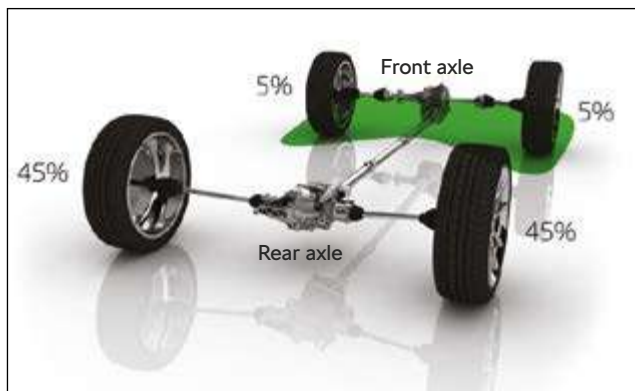

Torque distribution in various driving conditions – cooperation among the four-wheel drive system and the brake systems (ABS, ASR, EDS).

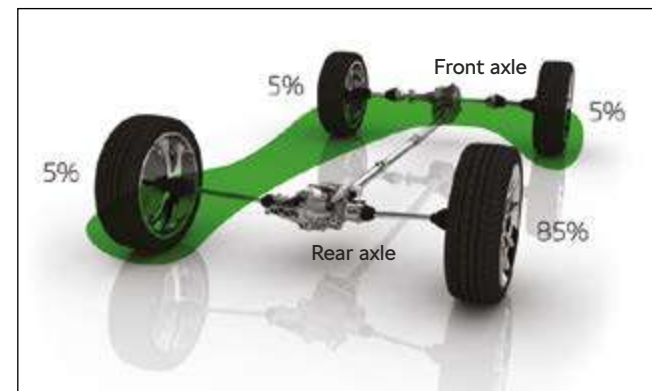

Dry road
(good traction conditions)

Slippery road
(worse traction conditions, identical for all wheels)

Poor front-wheel traction
(worse traction conditions under the front wheels)

Extreme conditions
[worse traction conditions under the front wheels and the rear left wheel (EDS intervention)]
