

XC60

WE'RE VOLVO. WE PUT PEOPLE FIRST.

We're Swedish. Scandinavian designers always start with the person who's going to use an object and ask, "What can we do to make this person's life better, easier or more comfortable?" We've always used this philosophy when we design our cars. So, while other car manufacturers might start with technology and try to squeeze people in around it, we begin by designing our cars around you. We ask what you need, and then use our technical skills to make your life easier, better, safer and more beautiful. Form follows function, and when you design a car inside and out with people in mind, it looks naturally beautiful. We think that looking at and interacting with our cars should make you feel great, every day.

Designing cars around people has led to many innovations over our 86-year history. The three-point safety belt in your current car? That was our invention from 1959. And we hope that one day, every car will have a device to protect people on the outside of the car, like the Pedestrian Airbag we premiered in 2012. We've solved a few environmental issues, too - in 1976, we developed the Lambda Sond - a sensor that monitors exhaust gas, reducing emissions and boosting performance as well as economy. It's still part of every petrol-engined car in the world.

Innovation is at the core of Volvo. Perhaps it's because of where we come from.

IN SWEDEN, GREAT DESIGN IS A
WAY OF LIFE, NOT A LUXURY.

For such a small country, we've produced more than our share of creative talent. That's because we know that to be truly creative, you've got to believe in yourself and do things the way you know they should be done, regardless of what others are doing.

Take our seats. In the early 1960s, we consulted with a team of orthopaedic surgeons at Chalmers University of Technology here in Gothenburg. They wondered why a group of car designers wanted to see them. Nobody had thought to ask an orthopaedic surgeon's advice when designing a car seat before. But the ergonomic seat designs we developed as a result have made our cars world famous for their outstanding long-distance comfort.

Like all Scandinavian craftsmen, we use only the best materials for the job, like the ultra-strong boron steel in our safety cages. We use natural, authentic materials inside our cars – not because they're fashionable this season, but because they make you feel good when you touch them and they're better for your health.

Creating a beautiful experience for you is natural for us. Because in Sweden, great design is a way of life, not a luxury.

THE XC60. MEET THE SUV THAT'S GREAT TO DRIVE.

Your lifestyle says you need an SUV; your heart says you want a stylish, driver-focused road car. If this is your dilemma, we've designed our Volvo XC60 as your solution. It's the perfect car for demanding drivers in search of adventure – both in town and beyond the city limits. And now, thanks to a whole range of improvements both inside and outside the car, our dynamic, refined, perfectly proportioned SUV just got even better.

You really have to drive an XC60 to appreciate its superb handling. Thanks to its class-leading chassis and Corner Traction Control, a system that makes cornering even more fun, it doesn't feel like a towering, top-heavy SUV: it's every bit as nimble and agile as a ground-hugging road car. But its ride height gives you a commanding driving position and added confidence when negotiating busy city traffic. And with its generous ground clearance, it'll take you wherever your adventurous spirit leads you.

ALL THE BEST PLACES ARE
TOUGH TO GET TO.
SEE YOU THERE, THEN.

In Sweden we say there's no such thing as bad weather, just the wrong clothes. We think that applies to cars, too. We've always designed our cars to incorporate the latest driving technology so you can go anywhere regardless of what's under your tyres, or what the weather is throwing your way. Think of our cars like a coat – just a very versatile one.

Choose All-Wheel Drive and your XC60 will feel just as natural off-road as it does on your home town's boulevards. Thanks to its high ground

clearance you can negotiate rough terrain with ease. Hill Descent Control boosts that capability even further, making the XC60 a true all-round vehicle that's equally at home in city streets as it is on country lanes.

The overall impression of powerful agility and assurance is testament to our advanced chassis set-ups: we've spent thousands of hours perfecting and tuning them, heightening your responsive, in-command driving experience to a new level.

WE SWEDES LIKE TO THINK
WE'RE TOO NICE TO JUDGE
THINGS ON THEIR LOOKS.

WE'RE NOT.

"I was inspired by a river near my home," explains the XC60's exterior design manager Steve Potter. "The water was flowing incredibly fast over the rocks. We set about creating this visual tension and constant movement, which changes depending on your point of view – it's alive. The result is a very human, organic feel."

Our new XC60 gets a smarter, more purposeful look that's as much at home on a city street as a country lane. We've refined the design so the car is now all one body colour, which gives our SUV a more urban twist. The new headlamps give the XC60 a focused, determined face with huge road presence, and the intense vertical daytime running lights are positioned far out to the corners of the car to emphasise the XC60's height and stature.

True to our Scandinavian design principles, we've worked on every last element to reduce what our designers call visual "noise". We care about small details like moving the washer nozzles out of sight and masking anything that might detract from the XC60's elegant, clean surfaces. And we've given the car a new, bigger Iron Mark – Volvo's iconic badge – which again enhances the car's self-confident look.

The XC60 D5 Summum comes with beautifully crafted integrated tailpipes. They remain perfectly in place, even though the pipe system expands by 25 mm as the engine reaches its operating temperature. This is a true Scandinavian precision engineering.

SCANDINAVIAN INTERIOR DESIGN. ON FOUR WHEELS.

If you enjoy driving, order our new gearshift paddles. They offer faster gear changes and by allowing you to keep your hands on the steering wheel, they also ensure you're always 100 percent in control of your car. In addition to its dynamic handling, the XC60 also has the comfort you expect from a luxury car. "We're famous for our seats," says the XC60's project leader, Stefan Sällqvist, "They're something we never compromise on. We're proud of our new Sport seat. It looks fantastic and hugs you and supports you from your thighs to your shoulders. True to Volvo's renowned ergonomic design, you'll be able to drive for hours sitting in them without getting tired."

Our all-new Ambient Light illuminates any features you might need to find at night. A crisp white glow ensures you'll never have to fumble in the dark for cupholders or seat controls, or root around blindly in the luggage areas.

WHICH XC60 ARE YOU?

ELEGANCE MODE

ECO MODE

The Adaptive Digital Display console which is carried over from the Volvo V40 Cross Country, is a true expression of our philosophy. It uses an active TFT (Thin Film Transistor) crystal display to bring the driver personalized information. The TFT console sits beautifully in the centre that makes the whole experience intuitive and functioning a breeze. With changing dynamics of driving, the interactive dashboard changes colour matching the mode and assists you in maintaining optimization and not to mention the mood.

PERFORMANCE MODE

OH YES. DID WE MENTION SAFETY?

INTELLISAFE

In 1927 our founders, Assar Gabrielsson and Gustaf Larson, decided to make really strong cars that could cope with our rough country roads. But strength alone wasn't enough. They also had a vision: "Cars are driven by people," they said, "so the guiding principle behind everything we make at Volvo is – and must remain – safety." Now our goal is that, by 2020, nobody shall be seriously injured or killed in a new Volvo. We think our founders would have approved.

In order to help us achieve this goal, and in keeping with our philosophy of making your life easier, your XC60 has a whole suite of intuitive safety technologies inside it. They're there to support your daily driving, protecting you in the event of an accident and often preventing collisions in the first place. We call this IntelliSafe.

We know XC60 owners love driving, but in a world of busier and busier roads, you are constantly

exposed to other people's mistakes. That's why IntelliSafe offers some really smart technologies such as City Safety.

And because you love driving, it's good to know that your XC60 doesn't just protect you – it actively supports you, too.

Our Dynamic Stability and Traction Control (DSTC) is another IntelliSafe technology. If there's a risk of your XC60 losing stability, DSTC applies just the right amount of brake force and reduces engine power as needed in order to prevent any skidding. You'll probably never notice a thing. But that's OK, we're just doing our job.

In town, City Safety is designed to prevent you from colliding with the car in front if it stops suddenly. This advanced IntelliSafe system works at speeds of up to 50 km/h and senses if you're about to collide with another car, then, if necessary, applies the brakes.
