

V O L V O

The Advanced XC60

Petrol Mild-Hybrid

WE ARE REDEFINING PERSONAL MOBILITY.

Our aim is to provide freedom to move in a personal, sustainable and safe way. We do this by putting your needs first – using the best available technology to serve you, inventing new technology where none already exists and combining technologies to deliver new experiences.

At Volvo Cars, we have always put people first. We believe that technology should set us free – not restrain us. The car shall be an enabler of a richer, less complicated life. And as a progressive provider of personal mobility, we want to enable a future of fully connected, fully electrified and self-driving cars.

We are committed to pursuing our visions:

- We want to give back one week of quality time per year through a new Volvo car by 2025.
- Around 50 per cent of the cars we produce and sell will be electric by 2025.

These visions reflect our commitment to protecting what's important to you and the world we share. This is summarized in the Swedish word 'Omtanke' which stands for caring and consideration. It also means 'to think again', so we collaborate with some of the world's top tech companies to nurture innovations that will take us into a better, more sustainable future.

Our goal is to make your life easier and more enjoyable – and to give back that sense of joy and freedom that the car represents.

THE EVOLUTION OF THE DYNAMIC SWEDISH SUV EXPERIENCE.

The Volvo XC60 is the perfect balance between comfort and control. It's the SUV where bold design meets a beautiful interior, where technology is natural and where every drive is a pleasure.

With its dynamic, commanding presence, the XC60 is the SUV with a unique Scandinavian attitude. The exterior mixes muscular dynamism with clean, elegant Scandinavian design. One glance tells you this is a car that's ready for whatever activity or

challenge awaits. And the interior is crafted from the finest Swedish materials, making sure it's full of natural light and packed with clever touches to make every day easier.

Behind the wheel, you can enjoy technology with a human touch. You're connected, and our most advanced safety technology will help looking out for you, your passengers and other road users.

This is the dynamic Swedish SUV experience. Evolved.

The Volvo XC60 possesses all the qualities of good Scandinavian design - understated yet confident, uncluttered and beautiful. It is an SUV that projects poise and power. In profile, the bonnet, rising side window line and sharply angled tailgate highlight its dynamic nature. Large wheels and pronounced wheel arches express the car's athleticism and capability.

Up close, the sharp creases and sculpted side panels emphasise its muscular, contemporary character. Full-LED headlights with distinctive T-shaped daytime running lights create an unmistakable impression, day or night, while rear lights that flow into the tailgate are a Volvo design cue that emphasise the car's strength. Everywhere you look there is something to delight. The XC60 is a car that you will always be proud to own and which you will never tire of looking at.

PLEASURE FOR YOUR SENSES.

The Volvo XC60 is built for enjoyment, because we think you should enjoy every drive in your car, no matter how short or long the journey. That's why we crafted the XC60 to be a car that you feel inspired and confident to drive. One where you always feel in control, and where technology is there to support you and make every interaction second nature.

With its strong, lightweight construction and sophisticated suspension components, the chassis of the XC60

allowed us to find just the right balance between comfort and control. To create a car that offers great driver feedback but which leaves you feeling fresh, even after a long journey.

Experience the rewards offered by the dynamic handling in a cabin that provides outstanding comfort and a calm, restful environment. with seats designed to perfectly complement the human form, quiet powertrain and first-class sound system.

THE COMMAND CENTRE.

When you sit in the driver's seat of the XC60 you're in control. In control of everything the car can do for you and in control of your journey, from the driving position to the way you interact with the navigation system.

The experience starts with the driving environment. The dashboard and centre console wrap around, creating the feeling of a cockpit and putting you in command. Beautifully designed and finished controls

make every interaction with the XC60 a pleasure.

We put as much thought into materials as we do into design. The tailored dashboard with contrasting stitching and decor in genuine wood allows the materials to speak for themselves. You're surrounded by the precision of skilled craftsmanship, where everything works with accuracy and precision. In the XC60, it's effortless to be in command.

YOUR SANCTUARY.

When designing the interior of our cars, we apply the same principles you would when designing a living room.

High-quality materials, intelligent use of space and attention to detail, work together to create a warm, inviting environment. And it's for all of your passengers. Everyone who travels in the XC60 gets the same standards of comfort, space, light and design. Everyone will enjoy the journey, no matter where they sit. Welcome to a sanctuary that calms and soothes.

Exceptional seating is at the heart of the experience. We build all of our seats to give the same high standards of comfort and support, with plenty of adjustment so everyone can find a position that suits them.

The design of the interior is as important as the way it's built. Light floods in through the panoramic roof to make the cabin bright and airy. Reducing the number of buttons and switches creates a distinctly Swedish feel of uncluttered calm. And the clever use of space, such as

the storage compartments under the rear seats, is typical Scandinavian ingenuity. They're just the right size to store electronic devices, like a tablet, out of sight.

Unlock the car and the door handles light up to make getting into the XC60 quick and easy. At night the cabin glows with the warmth of its interior lighting, welcoming you into the car. The lighting package includes ground lighting in all of the doors to illuminate the area below an open door, so you can avoid stepping into puddles, as well as additional interior lighting such as a worklight in the tailgate.

Advanced Air Cleaner technology means the air you breathe inside the car is clean and fresh, regardless of the air quality outside the vehicle. It filters dust, pollen, particulates and odours while monitoring the air quality and closing the intakes if pollutant levels rise too high. It happens automatically – all you need to do is set the temperature you want and the XC60 does the rest.

The combination of clear, easy-to-read instruments and the distinctive lines of the dashboard look great and work beautifully. They exemplify the meeting of form and function.

Rich materials and intricate detailing, like the linear lime trim, and yellow Aramid Fibre speaker cones behind stainless steel speaker panels, provide contrast and visual interest.

A crystal gear selector by the Swedish glassmakers Orrefors delight the senses.

VERSATILITY'S NEW LOOK.

A car has to be more than great design and a rewarding driving experience – the XC60 is versatile, a place which complements and copes with your active life, with extra usefulness built in.

Inside you'll find a large, evenly shaped load compartment that makes it easy to accommodate irregular sized objects.

A loading hatch in the seats means you don't have to fold the seats to carry long objects, so you can still carry passengers. And, to make your XC60 even more useful, add extra equipment from our accessories range, which are designed to complement the car's interior.

STAY CONNECTED AND IN COMMAND.

We create technology to serve you and make life easier. Everything that's complicated or doesn't add to your experience is removed.

You control your Volvo intuitively and easily. And seamlessly connected with the car and the world around you, you're in command of every aspect of your journey. At the focal point of the cabin, you find a sleek 22.86 cms (9 inch) centre display with touch screen. It's as easy and straightforward to operate as your smartphone.

Essential driving information is clearly

presented in our 31.24cms (12.3 inch) driver display. For even better control, our head-up display projects vital driver information at a comfortable view distance. It looks like the graphics hover in front of the car, which allows you to stay informed without taking your eyes off the road.

Your Volvo also listens to you. Keep both hands on the steering wheel and speak naturally: our voice control will carry out your command to operate climate control, navigation, entertainment. In a Volvo, you and your car act as one.

FEEL THE MUSIC.

Inside the cabin of your Volvo you can enjoy an audio system designed to put you closer to the music you love, wherever you're seated.

All our audio systems are tailored to the acoustics of your Volvo. Our audio philosophy is very simple: it's all about the soul of music, not the number of speakers or watts. And together with the audio specialists at Bowers & Wilkins, we have created some of the best-sounding audio systems in the class.

If you're truly passionate about music, the

Bowers & Wilkins audio system with a full 1100W output will take the experience to an even higher level. The 15 separate high-end speakers – including a tweeter-on-top centre speaker that minimises acoustic reflection from the windscreen and our unique air-ventilated subwoofer – will surround you with a powerful, pristine sound that feels more spacious and true to life than ever.

It's all about music and making it possible for you to experience it just as it was intended when it was created.

Our Bowers & Wilkins audio system integrates seamlessly with the cabin architecture of your Volvo to deliver the most realistic immersive sound possible. Innovative audio processing technology allows you to recreate the acoustics of a specific room inside your Volvo, bringing you even closer to the music. And to enable extremely low and undistorted bass tones, the air-ventilated subwoofer uses innovative technology that allows it to pulse large amounts of air, actually turning the cabin into one big woofer.

Intuitively connected. You operate the audio system and hands-free phone easily using the touch-screen controls, steering wheel buttons or voice control. Bluetooth® connection also allows convenient streaming of music via your phone.

PILOT ASSIST. DESIGNED TO MAKE DRIVING SAFER AND EASIER.

Our latest advances in supportive driving technologies allow you to enjoy smooth, intuitive driving from standstill up to motorway speeds.

To make driving in demanding traffic less stressful, we created Pilot Assist and Adaptive Cruise Control. This means your Volvo automatically helps you maintain a safe distance from the car in front of you by adapting your speed while helping to keep you centred in the lane by automatically making small steering adjustments.

This technology also makes driving in stop-and-go traffic more effortless. Maintaining the set distance, your car follows the car ahead of you and can brake automatically to a full stop when needed. And if the car in front just makes a short stop, your car starts following it as it takes off again.

This is driving made safer and easier, with the aim to optimise your control, comfort and convenience.

Please note: The driver is always responsible for how the car is controlled, the functions described here are only supportive.

CITY SAFETY TECHNOLOGY. YOUR PRO-ACTIVE PARTNER ON THE ROAD.

With advanced pro-active safety technology we add extra power to your senses and enhance the confident feeling of being in control.

At the heart of our safety technologies is City Safety. By helping you to keep a lookout and brake or steer away if necessary, it makes driving more enjoyable while helping to prevent accidents.

City Safety can identify other vehicles, pedestrians, cyclists and large animals ahead of you, even at night. It warns you if needed and can brake automatically to help you avoid a collision or reduce the impact. And our advanced Oncoming Mitigation by Braking technology – a

Volvo safety world first – can detect if there's another vehicle driving towards you and can brake automatically to help mitigate the impact.

Your Volvo can also support if you're forced into a rapid evasive action at speeds between 50 and 100 km/h. As you begin to steer away, City Safety can help you do it as effectively and safely as -possible by braking the inner wheels individually and reinforcing your steering input.

City Safety is simply your perfect partner; pro-active when it's needed, and staying discreetly in the background the rest of the time.

Oncoming Mitigation by Braking

A Volvo Cars safety world first, this innovation can detect vehicles heading towards you on the wrong side of the road. If a collision can't be avoided, it can brake your car automatically and tighten the front safety belts in order to help reduce the effect of a collision.

Oncoming Lane Mitigation

Using automatic steering assistance, this system helps you avoid collisions with oncoming vehicles. If you drift across the lane markings in the way of an oncoming vehicle, your car can alert you and gently help steer you back into the correct path.

Run-off Road Mitigation

Stay safely on the road with this Volvo Cars safety innovation. If Run-off Road Mitigation detects you're about to leave the road un-inten-tionally, it can provide steering input and, if necessary, brake support to help you back on track.

Lane Keeping Aid

If you're about to cross a lane marking unintentionally, the Lane Keeping Aid can gently help steer your car back into its lane. If this is not enough or you keep steering across the lane markings, you'll be alerted with vibrations in the steering wheel

PERFECT PARKING, EVERY TIME.

In a Volvo, you can enjoy smooth parking. When parking, you're supported by front and rear park assist functions that alert you if there are obstacles in your way. And by adding our 360° camera, you get a detailed bird's eye view of the area surrounding your Volvo – a great help when you reverse or manoeuvre in confined areas with impaired visibility.

360° camera

The 360° camera uses images from discreetly mounted cameras to create a bird's eye view of your car and its closest surroundings. In the centre display, you can see obstacles all around you, which makes it easier to park and manoeuvre in tight spaces.

DESIGNED TO PROTECT.

Protecting you and your passengers has always been at the heart of every car we make, and the advanced safety features in your Volvo are the result of decades of passionate innovation.

In a Volvo, it's the interaction between all the safety features that determines how efficiently the car will protect you and your passengers in a collision. Everything, from the design of the seats to the surrounding safety cage and the safety belts and airbags, works together to help minimise the strain on all occupants and maximise protection.

The front seats not only provide world-class comfort. They are also designed to protect you in the event of an impact. Our

unique whiplash injury protection helps protect your back and neck if your car is hit from behind. And in a run-off road scenario, the energy-absorbing front seat structure will help protect your spine in a hard landing, should the car become airborne.

It's this range of safety technologies and attention to detail that makes your Volvo a safe place to be.

Crash-absorbing front seats

The sculpted front seats in your Volvo are more than just beautiful to look at. Their unique structure helps to absorb a vertical impact, helping to protect your spine if the car lands heavily after leaving the road. It's another example of how we make every part of a Volvo work harder for your safety.

Volvo safety cage

The passenger compartment uses a high percentage of ultra high-strength boron steel to create a protective cage around everyone inside the car, while front and rear deformation zones help dissipate the crash energy. The safety belts and airbags work together to cushion you and your passengers in a controlled fashion.

Child safety

At Volvo Cars we've spent decades continually researching and improving child safety. Our unique approach includes creating and carrying out tests based on real-life traffic situations, as well as testing our child seats* alongside our cars. With our latest range of child seats, we offer unparalleled protection.

*This is an accessory & does not come with the regular features of the car.

ENJOYING MORE, USING LESS.

With the perfect balance between performance and efficiency, Volvo powertrain gives you a great drive with low fuel consumption and reduced emissions. The combination of lightweight, low-friction engine design and advanced boosting technology allows you to enjoy outstanding performance and a smooth, agile driving experience. Reduced size and weight also frees up interior space and contributes to the car's dynamic handling.

Precise manual transmissions and our eight-speed Geartronic™ automatic gearbox make the most of each engine's potential. Designed to minimise power loss and maximise performance, Geartronic™ will always select the right gear for whatever is coming next, or you can choose to change gear yourself in manual mode.

DRIVE, DON'T COMPROMISE.

We believe a car can be both great to drive and comfortable, so we built the XC60 to strike that balance between control, precision and comfort. It's a car that rewards the way you drive with response and control. A car for long distances and memorable journeys.

Sophisticated double-wishbone front suspension and our innovative integral axle rear suspension work together to put you in control of every drive. You get a car that responds to your commands but doesn't sacrifice the comfort you need.

Our AWD technology with Instant Traction™ gives you an edge by increasing driving stability and traction – on all road surfaces and in all weathers. As conditions change, wheels with the best grip get the most power to optimise your drive.

MILD HYBRID CARS.

An integrated starter generator supports the car's petrol engine for a smoother drive with reduced fuel consumption and lower tailpipe emissions.

A MILD HYBRID CAR HOW DOES IT WORK?

Our mild hybrid cars recover brake energy to charge a 48V battery when braking. An integrated starter generator uses this energy to momentarily support the combustion engine. Together, this gives you a more fuel-efficient and smoother driving experience.

Smoother drive

The mild hybrid technology adds to a more refined driving experience. The engine restarts instantly and you can enjoy smoother drive from standstill.

More power

Using recuperated electric energy, the integrated starter generator boosts the combustion engine for more powerful acceleration.

Lower fuel consumption

The integrated starter generator actively reduces engine load for lowered fuel consumption, especially in urban driving situations.

BREATHE CLEAN AIR WITH WORLD-FIRST AIR QUALITY TECHNOLOGY INSIDE NEW VOLVO XC60.

Volvo has introduced the world-first premium air quality technology in its cars, allowing Volvo drivers to breathe clean and healthy air inside the cabin.

The company's new Advanced Air Cleaner technology comes with a sensor that measures PM 2.5 levels inside the cabin.

This optimises air quality inside the car, limiting the adverse health effects that are associated with air pollution and fine particulates. Cleaner air inside the car also helps to advance safe driving, as healthy and fresh air can help boost driver concentration.

"With our Advanced Air Cleaner technology, you can rest assured that the air you breathe inside your Volvo is cleaner and healthier,"

VOLVO PROUDLY PARTNERING WITH GOOGLE.

Volvo Cars is the first company to team up with Google on integrating an infotainment system powered by Android with Google apps and services built in.

To give customers the same experience that they are used to on their phones but adapted for hands-free interaction while driving. Volvo Cars is introducing the Digital Services package, which will be available for all Volvo cars with the Android-powered infotainment system with Google apps and services built in*.

Google apps and services enhance the functionality of the Android-powered system by providing hands-free help from Google Assistant, best-in-class navigation

through Google Maps, and a broad ecosystem of native in-car apps via Google Play.

With Google Assistant, drivers can use their voice to get things done while keeping their focus on the road. Drivers can do things like control the temperature, set a destination, play music and podcasts, and send messages, all while keeping their hands on the wheel.

Music and media apps optimised and adapted for cars will be available through Google Play, while Google Maps will be able to provide up to date map and traffic data.

Just ask Google. Inside your Volvo.

* Google, Google Play, Google Maps and YouTube Music are trademarks of Google LLC. Google Assistant is not available in certain languages and countries. Sequences shortened and simulated. Display is for illustrative purposes only. Functions may vary between configurations and markets.

ULTIMATE A HIGHER GRADE OF REFINEMENT.

We created the exclusive Volvo XC60 Ultimate to meet your highest expectations on Swedish luxury. It's a highly personal expression that evokes a strong sense of elegant refinement. Each detail is carefully selected to give you and your passengers a stylish and invigorating experience. Distinguished exterior design cues enhance the luxurious look and feel of the XC60, while the meticulously crafted interior with leather seats gives you ample room for a relaxed driving experience.

Exceptional seating is at the heart of the experience. We build all our seats to give

the same high standards of comfort and support, with plenty of adjustment so everyone can find a position that suits them. With the front massage seats, you and your front seat passenger can easily tailor the massage function to your preferences. This luxurious amenity massages your back during long journeys.

The Volvo XC60 Ultimate epitomises our proud heritage of human-centric design. And when it comes to intelligent luxury imbued with distinctive style and fresh thinking, the XC60 Ultimate is in a class of its own – just like you.

LUXURY INTERIORS.

The exclusive Volvo XC60 Ultimate with its subtle jewellery touches and beautifully crafted wheels expresses the essence of contemporary Swedish luxury. On the inside, you are surrounded by genuine materials and fine craftsmanship. It's a sensory experience, further enhanced by the Comfort seats in Leather, our Tailored dash-board and Linear Lime decor-all to make the Volvo XC60 Ultimate your own personal statement of dynamic luxury.

Front Massage Seats - The backrest features ten massage points, with five programs, three speeds and three intensities to choose from. Available for Comfort seats with Perforated Fine Nappa Leather upholstery.

48.26 cms (19 inch) 5 Spoke
Black Diamond Cut

The power-operated Comfort seats with Leather upholstery and front seat cushion -extensions and the exclusive Linear Lime decor add to the sensory experience of contemporary luxury.

Crystal gearknob

Wireless Phone Charging

There's a space next to the gear knob where a mobile phone can be stored and wirelessly charged, helping to reduce clutter and make it easy to reach when you need it.

Our Tailored dashboard with contrasting stitching and genuine Linear Lime decor enhance the luxurious interior ambience, while the intuitive 31.24cms (12.3 inch) driver display with four graphic modes and the 22.86 cms (9 inch) centre display with touch screen puts you in the centre of action.

SWEDISH LUXURY, YOUR WAY.
