MOTORS
Drive@earth

The Destination Is Up to You

Whether your life is at the heart of the city or off the beaten path, Pajero Sport is built to bring you to the best of both worlds. It's a sleek new look that blends together more than three decades of Mitsubishi 4x4 design experience with sophisticated styling and smooth performance. Active and dynamic, Pajero Sport is always ready to move you.

2.5-liter DI-D High-Power / Titanium Gray Metallic [U17]
Equipment may vary according to market.

Command Your Environment

From up here, the world simply looks easier. Step into the driver's seat, and Pajero Sport awaits your decision. Ergonomically-designed controls and a luxuriously upholstered, fully-adjustable seat create a driving environment that feels tailored to your needs. The interior is wide and spacious, with plenty of legroom for the 2nd and 3rd rows, so your passengers will enjoy the journey almost as much as you do.

2.5-liter DI-D High-Power 7-seater / Black / beige interior with beige leather seats
Equipment may vary according to market.

2.5-liter DI-D High-Power 5-seater / Black / gray interior with gray leather seats
Equipment may vary according to market.

Note: 3.2-liter model meter cluster shown below.
Actual red zone may differ according to models.

Engine and Drivetrain

2.5-liter DI-D High-Power / Titanium Gray Metallic [U17]
Equipment may vary according to market.

DI-D COMMONRAIL

The Common Rail fuel system delivers a precise, steady fuel supply to each cylinder, enabling maximum output with minimum waste for better efficiency and emission reduction. The computer-controlled feedback system allows for continual adjustment, ensuring peak performance at all times.

Intercooler

The intercooler allows more air to be pumped to the cylinders, for more complete combustion and greater power. Positioned at the front of the radiator, this design gives Pajero Sport improved air-cooling performance.

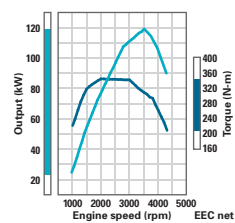

16-valve layout

This arrangement creates a more complete air/fuel mixture and steadier flow for constant high performance. The precisely balanced roller rocker arms and scissor gears provide exact valve timing for more powerful combustion.

Turbocharger

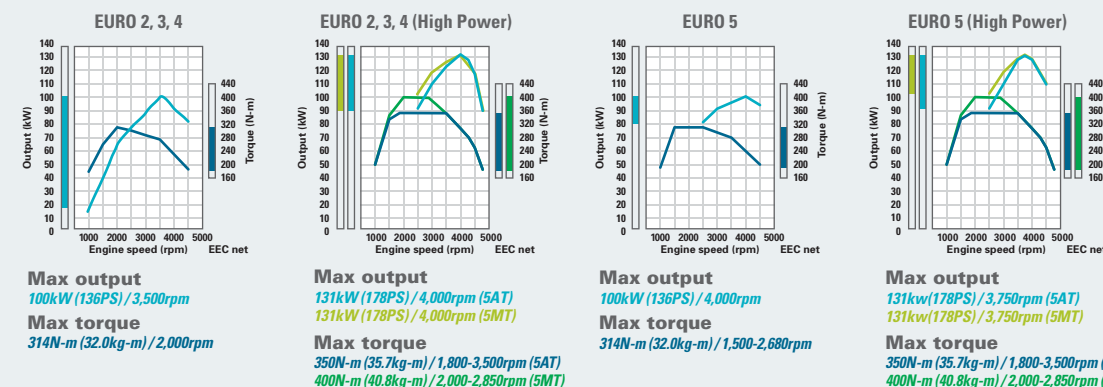

The turbo system adds an impressive boost to air intake pressure, producing more power from each cylinder stroke.

3.2-liter 16-valve Intercooled Turbocharged DOHC Common Rail DI-D (4M41)

Max output
120kW (163PS) / 3,500rpm
Max torque
343N-m (35.0kg-m) / 2,000rpm

2.5-liter 16-valve Intercooled Turbocharged DOHC Common Rail DI-D (4D56)

Note: Please refer to P19 for 3.5-liter ECI-MULTI and 3.0-liter MIVEC engines.

SUPER SELECT 4WD

Mitsubishi's rally-proven Super Select 4WD lets you move from smooth 2H mode highway performance to rugged 4H mode traction without breaking stride. With shift-on-the-fly convenience at up to 100km/h, the right driving mode is always at your fingertips.

2H
(2WD high range)

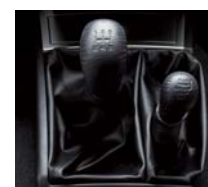

4H
(4WD high range)

4HLc
(4WD high range with locked center differential)

4LLc
(4WD low range with locked center differential)

EASY SELECT 4WD

Mitsubishi's rally-proven Easy Select 4WD lets you move from smooth 2WD highway performance to rugged 4WD off-road traction without breaking stride. With shift-on-the-fly convenience at up to 100km/h, the right driving mode is always at your fingertips.

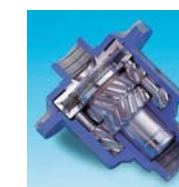

5-speed MT

The 5-speed manual transmission is available for those who prefer the feel of control that only a stick shift can give. The smooth lever movement and intuitive placement make shifting easy and confident.

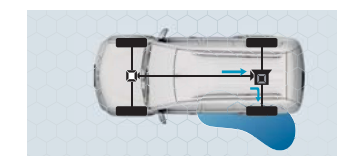

INVECS-II AT with Sports Mode

For drivers who prefer the convenience of an automatic, INVECS-II 4-speed and 5-speed automatic transmissions provide smooth, intelligent shifting. INVECS-II shift control analyzes driving conditions to select the best shifting style, and can even study driving preferences to create a profile that matches driver characteristics. Sports Mode gives drivers direct command over shifting with all the control of a manual transmission and the convenience of an automatic.

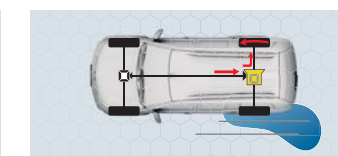

Hybrid LSD

The hybrid-type Limited-Slip Differential (LSD) gives excellent off-road response, combining the torque-sensing benefit of helical gears and a speed-sensing of a viscous coupling unit, all designed to work together with ABS.

Without LSD

The LSD uses an internal clutch escape mechanism to prevent torque loss if one wheel starts spinning.

With LSD

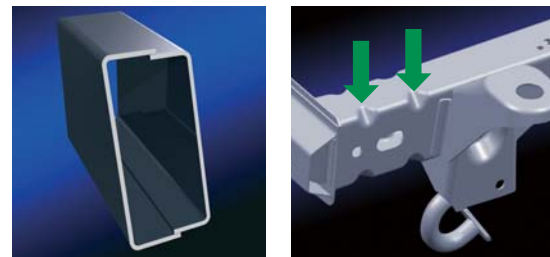

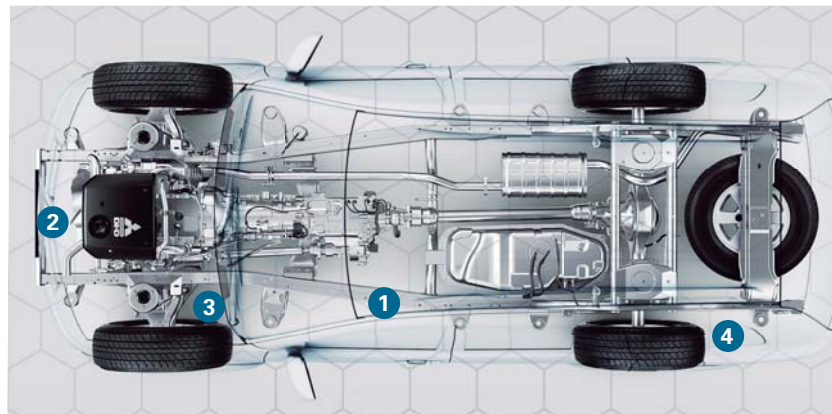

Driving Ability

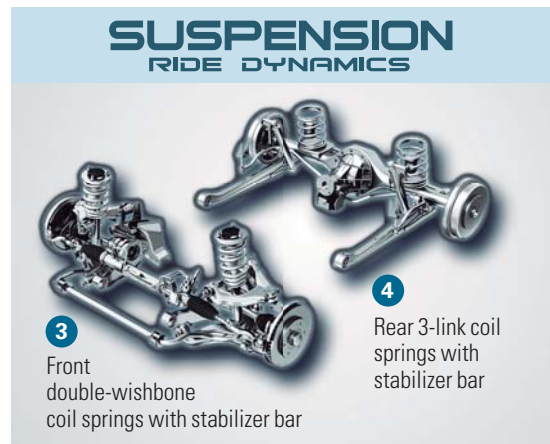

2.5-liter DI-D High-Power / Titanium Gray Metallic [U17]
Equipment may vary according to market.

4WD traction

A double-wishbone front suspension with coil springs combined with a 3-link coil spring rear suspension, both with stabilizer bars, give unmatched traction and stability with a high ground clearance for going off-road.

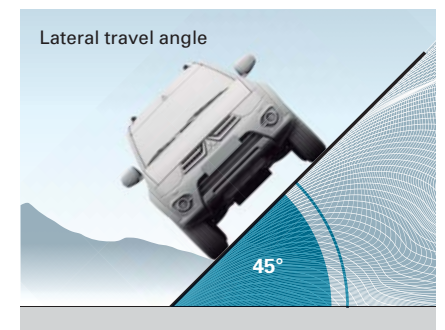

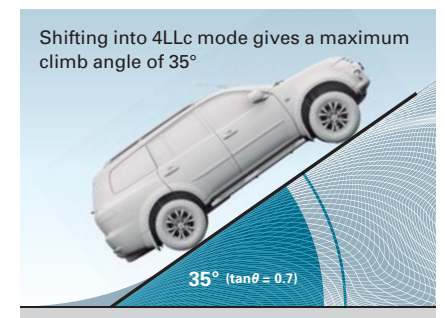

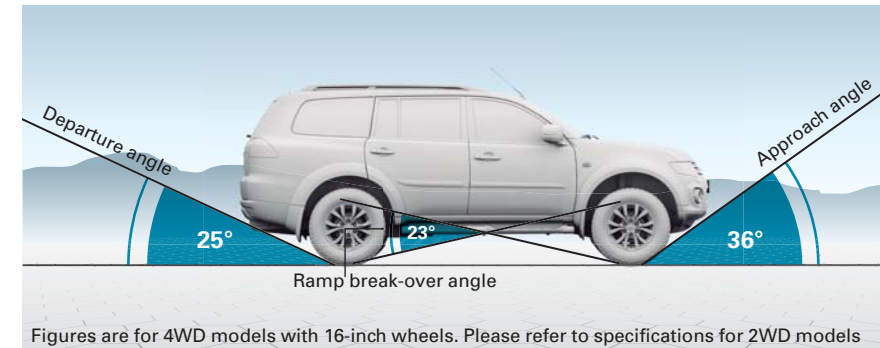

- 1 Tougher, lighter frame beams**
Pajero Sport uses beams made from thinner, lighter steel that provides all the strength of thicker beams, with less weight.
- 2 Impact-absorbing collapsible beads**
Built within the frame, they help absorb collision energy before it can reach the cabin interior, providing added protection to occupants.

- SUSPENSION RIDE DYNAMICS**
- 3** Front double-wishbone coil springs with stabilizer bar
 - 4** Rear 3-link coil springs with stabilizer bar

Superior terrain handling ability

Some measure performance in seconds, some in millimeters. Mitsubishi measures it in obstacles overcome and goals reached. Because challenges come in all shapes and sizes, Pajero Sport is designed to climb up, over, around and through the toughest terrain that nature can provide.

Tight minimum turning radius

Pajero Sport's remarkably tight 5.6m minimum turning radius gives drivers the ability to maneuver through tight spaces with ease.

Safety

RISE BODY

Mitsubishi's exclusive RISE (Reinforced Impact Safety Evolution) body design puts a protective framework around you and your passengers. In the event of a collision, energy is safely absorbed by crumple zones and directed around the cabin, away from occupants.

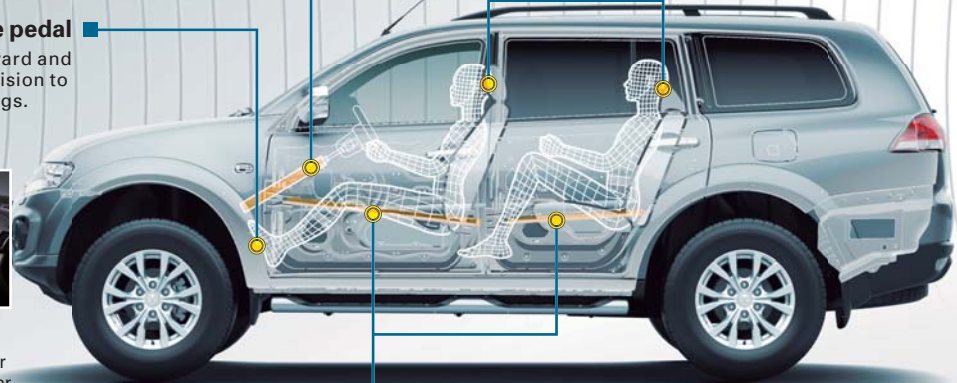

Anti-intrusion brake pedal

The brake pedal folds forward and inward during a frontal collision to help protect the driver's legs.

6-Airbag System

In addition to front SRS airbags for both driver and front passenger, curtain airbags provide added protection to first- and second-row occupants. Together with seatbelts, they provide an excellent degree of collision safety.

Collapsible steering column

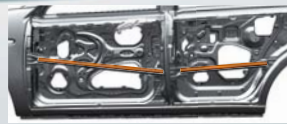

In a forward collision, the steering column will collapse and crumple, helping to prevent injury to the driver.

ELR seatbelts with pretensioners and force-limiters

During an emergency stop, the pretensioners on the ELR (emergency locking and retractable) seat belts automatically tighten to reduce body movement. The force-limiters then gradually release to more evenly distribute stopping force, further reducing the chance of injury.

Side door impact bars

Thick side bars along the doors resist impact force in the event of a side collision, helping to protect occupants.

Powerful brakes with vacuum booster

For quicker stopping in all conditions, Pajero Sport features large front ventilated disc and rear drum brakes. With an added vacuum booster to multiply emergency stopping power, drivers can now feel confident and safe even when conditions turn hazardous.

Front brakes
16-inch ventilated discs

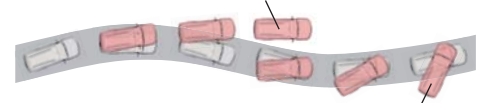

Rear brakes
11.6-inch leading and trailing drums (16-inch drum-in-disc brakes are optionally available)

Active Stability & Active Traction Control (ASTC)

ASTC utilizes a network of control units and intelligent sensors to monitor vehicle status as well as the driver's steering. As road and vehicle conditions change, ASTC manages the forces on all wheels by precisely controlling engine torque and braking force going to each one, providing improved vehicle control, trace ability and traction in all driving conditions. ASTC lets driving enthusiasts enjoy the full potential of Pajero Sport in complete confidence.

Active Stability Control (ASC)

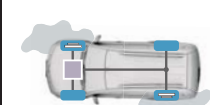

In understeer, ASC determines appropriate yaw rate and applies braking force to the inner rear wheel to prevent drift-out and ensure better trace control.

In oversteer, ASC determines appropriate counter yaw moment and applies braking force to the outer front wheel to prevent spinout and ensure better trace control.

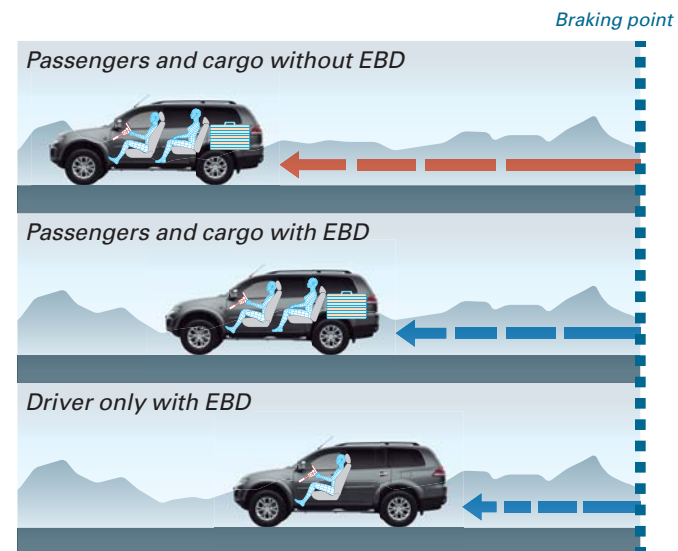

Active Traction Control

When wheel spin is detected, engine output is governed and braking force is applied to the spinning wheels to prevent driving torque loss.

ABS with EBD

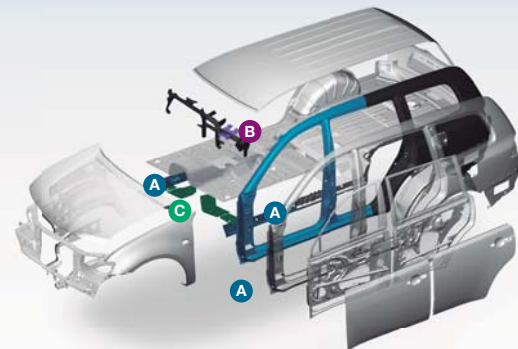

ABS keeps wheels from locking up to maintain control of the vehicle during hard emergency braking, preventing slipping and skidding. Electronic Brake-force Distribution (EBD) assists by redistributing braking force to the rear brakes as needed, enabling quicker stops even when carrying passengers and heavy loads.

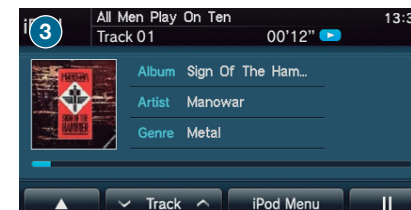

Extra-strong body construction

Pajero Sport uses high-tensile steel in key locations, creating an extra-rigid frame of beams and support pillars surrounding the cabin. The rigid beams help to direct damage around and away from the interior in the event of a collision.

- A** Collapsible A-pillars absorb collision energy, so that less reaches the cabin interior
- B** Collapsible pedals reduce the risk of leg injury to the driver
- C** Underfloor beams redirect collision energy around the cabin

Audio Visual

Note: Each of the above four functions are optional. Please consult your local dealer/distributor for more detailed information.

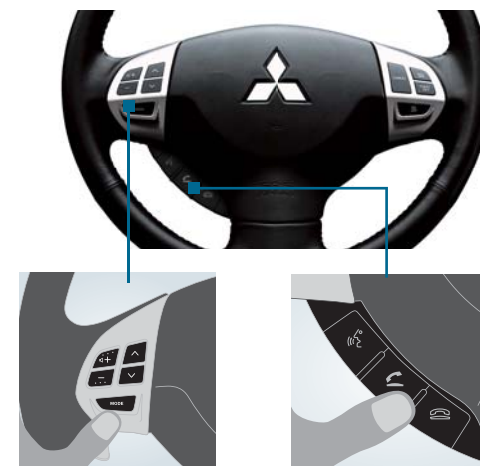

Audio System with 6.1-inch Full-color Display

Pajero Sport now features a next-generation display with 6.1-inch full-color touch screen. In addition to giving you full control over a wide range of audio options, the display also links to the rearview camera.

- 1 Easy-to-select menu**
The intuitive interface makes selecting functions safe and easy.
- 2 Rearview camera**
Safely navigate into even tight parking spaces.
- 3 USB connectivity**
Use the touch panel to select music directly from your portable player.
- 4 Hands-free Bluetooth® telephone**
Incoming calls are displayed for easy viewing.

Steering Wheel Controls

Pajero Sport features audio and Bluetooth® telephone controls built directly into the steering wheel, allowing drivers to manage their listening environment or make calls without needing to take their hands from the wheel.

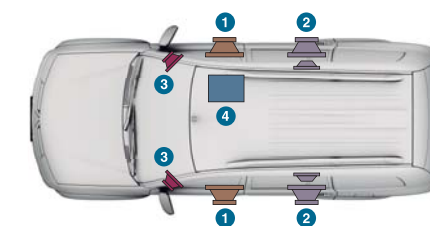

MITSUBISHI POWER SOUND SYSTEM

Mitsubishi's exclusive sound system delivers high power audio output throughout the interior. Speakers are placed for optimal sound balance and maximum enjoyment of all occupants from front to rear. Whether you prefer to listen to the radio or play your favorite CDs, MITSUBISHI POWER SOUND SYSTEM puts you squarely at center stage.

420W (Max) High Power Amp and 8-speaker System

- 1** 16cm metalized hybrid PP diaphragm mid-bass speaker (front doors)
- 2** 16cm metalized hybrid PP diaphragm 2-way coaxial speaker (rear doors)
- 3** 3.5cm aluminum hard dome tweeter with ridge line
- 4** 420W (Max) 6-channel high power amplifier

	Gross vehicle weight	kg	2,600			2,710						
Seating capacity	persons	5/7*										
PERFORMANCE	Max. speed**	km/h	179	175	178	179	176	164	167			
	Max. climbing ability	tanθ	0.7									
	Approach angle		36°									
	Ramp break-over angle		23°									
	Departure angle		25°(with 265/65R17 tires: 24°)									
	Min. turning radius	m	5.6									
	ENGINE	Type (code)	3.5-liter 24-valve V6 SOHC (6G74)			3.2-liter 16-valve intercooled turbocharged DOHC Common Rail DI-D (4M41)		2.5-liter 16-valve intercooled turbocharged DOHC Rail DI-D (High-Power) (4D56)		2.5-liter 16-valve intercooled turbocharged DOHC Common Rail DI-D (4D56)		
Displacement		cc	3,497			3,200		2,477		2,477		
Max. output (EEC net)		kW (PS)/rpm	137 (186) / 4,750			120 (163) / 3,500		131 (178) / 4,000 (EURO 2.4) 131 (178) / 3,750 (EURO 5)		100 (136) / 3,500		
Max. torque (EEC net)		N-m (kg-m)/rpm	303 (30.9) / 3,750			343 (35.0) / 2,000		400 (40.8) / 2,000-2,850		350 (35.7) / 1,800-3,500		
FUEL SYSTEM	Fuel supply equipment	ECI-MULTI (Electronic Controlled Injection - Multi Point Injection)						Electronic		Common Rail Direct Injection		
	Fuel tank capacity	liters	70									
DRIVE SYSTEM	Type	Super Select 4WD (SS4)						Super Select 4WD (SS4) / Easy Select 4WD*				
STEERING	Type	Rack-and-pinion, power assisted										
	Front	Double-wishbone, coil springs with stabilizer bar										
SUSPENSIONS	Rear	3-link, coil springs with stabilizer bar										
	Front	16-inch ventilated discs										
BRAKES	Rear	11.6-inch leading-and-trailing drums (16-inch drum-in-discs*)										
	Front and rear	265/70R16 (265/65R17*)										

*Available as an option ** Measured by Mitsubishi Motors Corporation *** High safety performance model
Note: These specifications are subject to change without notice. Please consult your local Mitsubishi dealer/distributor for more detailed specifications.
