RETURN OF THE CLASSIC

Plus 4

To own a Morgan is to join a very special family, to become a part of a classic motoring tradition, one that now combines the latest technology with motoring history.

Back by popular demand, the new Morgan Plus 4 is built on the same principles as the 1950s original – put a big torquey motor in a lightweight car and go!

But don't be deceived by the traditional looks. A blend of power and craftsmanship, this car has a better power to weight ratio than a Cooper S or a Golf GTi. The new 2.0 litre Duratec is the latest generation engine and with 145 Bhp will propel you to 120mph and 0-62 in just 7.3 seconds – time and again.

The new Plus 4 – a modern Morgan classic.

Definitive story: launched in 1951, a very successful club racer in the 50s and 60s. Now back by popular demand.

PLUS 4

Classic lines: like no other, the distinctive and flowing contours are just part of the Morgan Plus 4 driving experience.

Timeless presence: same principle as the original,
big torque engine in a lightweight body.

Finest material: leather and wood plus individually hand crafted Morgan details for every new Plus 4.
