V40

CROSS COUNTRY

We created the all-new Volvo V40 Cross Country to make your world bigger, your everyday adventures more fun and your roads more inspiring. It's a smarter and more stylish way of grabbing life by the horns and simply saying: it's you.

T5 AWD, SUMMUM, RAW COPPER METALLIC WITH MEFITIS 18" WHEELS.
ACCESSORY SIDE SCUFF PLATES AND REAR DECO TRIM.

You'll spend a lot of time here. So why not surround yourself with top class materials, distinctive Scandinavian design and an adventurous ambience? Get inside the Volvo V40 Cross Country, your place to be, and enjoy uncomplicated style and functionality. Take a look and see for yourself.

Scandinavian Design

Effortlessly blending sophisticated Scandinavian design with a rugged touch, the all-new Volvo V40 Cross Country easily deals with the challenges ahead of you. It's simply a more athletic and capable way of doing your thing – inspired by the adventurous you.

Scandinavian Design

What will you feel the moment you enter this perfectly crafted interior? Is it excitement for the uncompromised Scandinavian design and the touch and feel of the high-class materials? Fascination with the confident mix of elegance and ruggedness? Maybe it's amazed wonder at the clever details for your convenience and comfort, or how smoothly the interior adapts to the mood you're in? Some things you'll notice immediately, others you'll fully appreciate after spending hours in your V40 Cross Country. But don't be surprised if you get a relaxed feeling, perhaps like coming home. Once here, you'll love the idea of coming back.

Clean interior

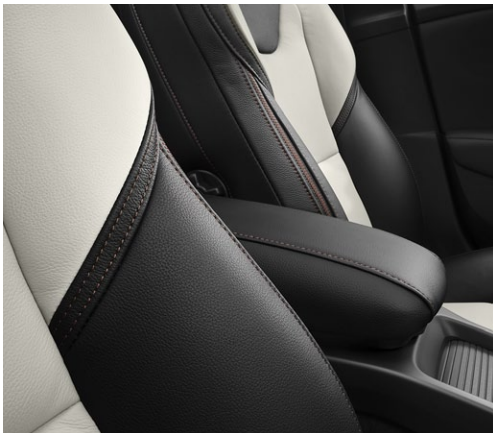

Well-being starts on the inside. All upholstery and interior textiles are allergy-tested, and the Interior Air Quality System keeps harmful airborne substances outside your cabin. Good for you, and for anyone who shares the ride.

Ergonomic seat design

Have some quality time inside your Volvo V40 Cross Country. The ergonomically designed seats feature a unique two-tone design and accent stitching. And wherever you're seated, you'll experience iconic Volvo comfort. Your body is relaxed, your senses are focused and you'll arrive at your destination with a smile on your face.

Panoramic glass roof

Want more energy? The panoramic glass roof gives you a vitalising dose of light therapy every time you're inside your car. It also adds a luxurious touch to any journey – wherever you're seated. Prepare to get energised with the speed of light. And if there's too much light and sunshine, just close the sliding curtain with a press of a button.

Interior theatre light

Why settle for just one standard interior light setting? In the all-new Volvo V40 Cross Country, the interior theatre light instantly adjusts to your wishes with seven individual colour settings. So whether on your daily commute or dining out on the town – just pick the interior mood that's you. Or allow the interior light-colour to adapt to your temperature settings in the climate system.

Illuminated gear knob

Want some extra drama inside your all-new Volvo V40 Cross Country? The illuminated gear knob not only harmonises perfectly with the centre console illumination. It's also a delight and strongly addictive. Just like your V40 Cross Country.

Dynamic Driving

Nothing challenges us like the task of creating the perfect driving experience. And no resources have been spared to achieve our most adventurous and personal cross country car ever. Want control? Take your position in the lavish driver's seat, select your settings and go for it. This is having fun on your terms.

All-Wheel Drive with Instant Traction™ (AWD)

Traction is good, and with Volvo's electronically controlled all-wheel drive technology, you get a load of it. On slippery roads, you'll enjoy reassuring stability. And on your curvy favourite roads, higher traction conveniently translates into more fun. All-Wheel Drive is available with the T5 AWD.

Hill Descent Control (HDC)

A steep descent on a rough slippery road? Simply push a button and your V40 Cross Country will descend smoothly using the brake system so that you can concentrate on steering. HDC is available with the T5 AWD.

Chassis

We fine-tuned every single detail of the chassis to act as one with you. The rigid body, the well-dimensioned state-of-the-art chassis components and the high-ride chassis design including large wheels make this a true all-roader. Behind the wheel, you get both a commanding driving experience and instant steering response, as well as the precise, nimble moves it takes to stay on top of busy urban traffic. The elevated ride height adds to more powerful looks and a commanding position for you as the driver.

Turbo engine

How much power do you want? Each engine for your V40 Cross Country – from the hyper-efficient D2 turbo diesel to the breathtaking T5 AWD – features advanced turbo technology to maximise your driving experience without compromising fuel efficiency. Volvo's smart Start/Stop technology saves even more fuel on your commute. You'll simply get more out of less. Which engine are you?

Torque Vectoring

Want some fun? Torque Vectoring ensures traction is always on your side. It gives you faster acceleration out of corners and a dynamic driving experience. It will also have a profound effect on the direction of the corners of your mouth.

Speed-dependent steering wheel forces

You're probably not in the same driving mood all the time. That's why you can select your personal steering characteristics. Choose Low, Medium or High power assistance – the all-new Volvo V40 Cross Country means driving on your terms without compromise.

Does control make you feel good? We created the Driver Support Package to inform and assist you in all traffic situations. Advanced radar and camera technologies help you keep an eye on vehicles in front and behind, road signs and pedestrians. It helps you keep a safe distance at all speeds and even brakes automatically if necessary. It can also alert you if you're tired or weave out of your lane.

Surrounded by all this supportive intelligence you can enjoy a more relaxed driving experience – more in touch with your senses and the world around you.

THE DRIVER SUPPORT PACKAGE FEATURES:

Adaptive Cruise Control (ACC)

Queue Assist

Enjoy smooth cruising at any speed. ACC automatically maintains your set speed and distance to the vehicle ahead of you – whether you're driving on the highway or in slow-moving stop-and-go traffic.

The stop and go function from 0 to 30 km/h requires an automatic gearbox.

Collision Warning with Full Auto Brake

Stay out of trouble. Collision Warning warns you if you approach a vehicle so fast that there's risk of a collision. If you don't react to the warning and a collision is imminent, full auto-braking is applied to help you avoid or mitigate a collision.

Pedestrian Detection with Full Auto Brake

Using radar and camera technology, your Volvo can detect pedestrians in front of your car. It can alert you if a pedestrian unexpectedly steps out and – if you don't react to the warning – brake automatically to help keep the pedestrian out of harm's way.

Driver Alert Control (DAC)

Stay alert and in control. The Driver Alert Control monitors your driving behaviour and alerts you if your behaviour shows signs of drowsiness or distraction and politely suggests a break.

Lane Keeping Aid (LKA)

Keep your position. If you begin to drift on the road, Lane Keeping Aid helps you stay in your lane by applying a gentle steering wheel torque. And should you unintentionally cross the lane markings you'll be alerted by haptic vibrations in the steering wheel.

Active High Beam (AHB)

Enjoy relaxed vision even when it's dark. With Active High Beam, your Volvo will recognise vehicles in front of you and automatically adapt your beam to give you maximum vision without blinding other drivers.

Road Sign Information (RSI)

Ensure you're constantly updated. The Road Sign Information displays and alerts you of important road signs, such as speed limit and no overtaking signs, in the driver information module to help keep you informed about current limitations.

Blind Spot Information System (BLIS)

Reveal the blind spot. Using radar sensors in the rear bumper, BLIS helps you keep a lookout behind and on the sides of your car. If a vehicle enters your blind spot or approaches quickly from behind, BLIS will alert you.

Lane Change Merge Aid (LCMA)

Watch your back. LCMA constantly scans the road 70 metres behind your V40 Cross Country and alerts you of rapidly approaching vehicles.

Cross Traffic Alert (CTA)

Get eyes in the back of your head. When you back out of a parking space with limited visibility, Cross Traffic Alert can alert you of oncoming traffic from the sides.

Please note: Various levels of the Driver Support Package are available depending on market.

Less worries and more control. That's the idea behind the advanced safety technologies of your Volvo V40 Cross Country. It's all about expanding your senses and margins, and helping to protect you, your passengers and even people outside your car in the event of a collision. This is one of Volvo's legendary strengths and never before has total control and peace of mind been so easy to achieve.

Park Assist Pilot

Honestly, who likes to park? Park Assist Pilot makes parallel parking less of a hassle and can park your V40 Cross Country by searching for a feasible parking space and operating the steering automatically. You just control the speed, gearbox and follow the step-by-step guidance in the instrument cluster while the technology takes care of the rest. It's like magic and we dare say, quite entertaining.

City Safety

Always expect the unexpected. City Safety detects if you're about to run into a vehicle and brakes automatically to avoid a collision. Very smart and very courteous in slow moving city traffic – for you, your passengers, your insurance company and anyone in the car in front of you. City Safety is active up to 50 km/h.

Lighting

Spread your light in the dark. The front and rear lights both look great and optimise your vision in all conditions. For an even more relaxed driving experience, try the Active Bending Lights (ABL) with Dual Xenon technology that provides you with a very powerful low and full beam in all situations. And when cornering, the light beam automatically follows the road to optimise your vision throughout the bend.

Pedestrian airbag technology

Hopefully you'll never experience this Volvo safety world first in action. But should there ever be a frontal collision between your V40 Cross Country and an unprotected road user, the pedestrian airbag will help reduce the severity of pedestrian injury. This innovation is an important step to reduce the consequences of frontal collisions between cars and pedestrians. The pedestrian airbag is active at speeds from 20 km/h to 50 km/h.

Usually, cars in this class offer just one set-up of driver information. But we believe you deserve more. With the digital instrument cluster you can easily adapt the instrument interface to your driving desires. You have three display themes to switch between – Elegance, Eco and Performance. Which mode are you in today?

Elegance

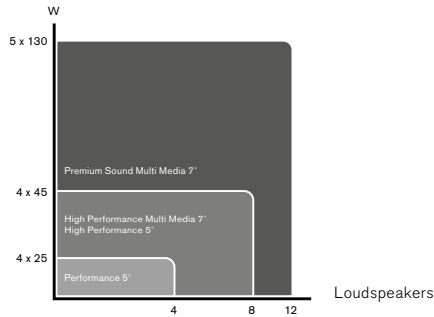

Matching perfectly with the Copper Dawn interior design details, Elegance is your sophisticated and stylish display theme. The speedometer is displayed in the centre dial and a highlighted needle facilitates reading. With manual transmission, a gearshift indicator helps you drive in the most energy-efficient way.

Eco

Switch to Eco, and green is what you get. The instrument layout is similar to the Elegance theme, but in addition to the fuel-saving gearshift indicator, you also get an Eco guide. Guiding you by showing real time fuel consumption and average consumption from the last few minutes, the Eco guide helps you drive in the most fuel-efficient way. And when driving really economically, you'll receive a symbolic reward on the display.

Performance

Are you in the mood for active driving? Go for the Performance theme and enjoy an uncompromised sporty look with the centre dial rev counter and a digital speedometer that enhances your feeling of being in command. Not to mention the power meter that displays how much engine power you use and have at your disposal before overtaking.

Sensus Media Centre

The smartest technology is the one you operate intuitively. That's why you don't find zillions of complicated buttons inside your Volvo V40 Cross Country. Instead, the easy-to-use driver control interface Sensus Media Centre puts you in control of the advanced functions of your V40 Cross Country. While keeping your hands on the steering wheel, you conveniently operate the multimedia systems and select your personal car settings using the buttons and the smart scroll-wheel control integrated in the steering wheel. All the information you need is clearly displayed on the Sensus colour screen. Very intuitive, and very Volvo.

Connectivity technology

How about connecting your V40 Cross Country with your mobile phone? Bluetooth technology instantly connects your mobile phone* with the hands-free system in your Volvo. It also allows streaming of music from your phone to the car's audio system. And with Volvo On Call's smartphone applications, you can control and monitor your V40 Cross Country from anywhere at anytime just using your smartphone.

*Visit www.volvocars.com to find out if your mobile phone is compatible with the Bluetooth technology of the V40 Cross Country.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Volvo Car Corporation is under licence. Other trademarks and trade names are those of their respective owners.

Audio and Multimedia technology

This is for the music lover inside you. Whatever music on your playlist, Volvo's innovative audio technology will do it full justice. Especially if you choose the 5x130 W Premium Sound Multi Media – our top of the line sound system, specially-designed for the interior acoustics of your Volvo V40 Cross Country. You and your passengers can enjoy a supremely faithful, colourful and powerful sound – in all seats. In the integrated multimedia screen you can watch TV or a movie while having a full cinematic surround sound experience. Sounds like music? You bet.

RTI Navigation

You'll easily find your way in the Volvo V40 Cross Country. Just text or speak your command to the RTI navigation system and you'll be smoothly guided all the way to your destination. Keeping you informed about the next change of direction, turn-by-turn arrows are conveniently displayed in the centre dial. This intuitive system is elegantly integrated with your car and is easily operated without you having to lose attention on the traffic. And should there be traffic obstacles ahead, you'll be helped finding alternative routes if you have access to TMC (Traffic Media Channel) radio data broadcasts.

Drive smartly and enjoy life in your all-new Volvo V40 Cross Country. We designed it to use fuel as efficiently as possible. It will take you longer, and sure it feels better that way.

99 g CO₂/km

How about getting much more out of less? Satisfying itself with 3.8 litres/100 km and emitting only 99 g CO₂/km, the 115 hp D2 turbo diesel is frugal with everything except performance and comfort. You'll experience the punchy 270 Nm of torque and enjoy a flexible and refined engine character. Finally, eco driving no longer means compromising the fun of driving.

Fuel consumption and CO₂ emission data apply for the standard version of your Volvo. The addition of extra equipment, such as wider tires, may result in somewhat higher figures.

Aerodynamic design

Great looks and excellent aerodynamic properties combined into one attractive package: your all-new Volvo V40 Cross Country. Its slim roofline, sharply inclined windscreen and a sculpted rear section optimise the airflow around the car. Together with the smooth under body panels, this translates into lower CO₂ emissions and improved driving dynamics at higher speeds.

Start/Stop technology

Why have the engine emitting CO₂ at traffic lights? Your V40 Cross Country is smarter than that. Instead of idling at standstill, the engine shuts off automatically and you can enjoy the appreciating looks from pedestrians passing by. And when you need power again, the engine restarts automatically in milliseconds and you're on the go. Volvo's Start/Stop technology reduces your fuel consumption by up to 8% in city traffic and comes with all engine and transmission variants of your Volvo V40 Cross Country.

Engine brake energy regeneration

Take advantage of energy. Every time you engine brake your V40 Cross Country, the kinetic energy that would otherwise be wasted is fed back to the battery. Your fuel consumption is reduced by an extra 2-3% – a small contribution to fuel economy and lower CO₂ emissions.

Electrical power assisted steering (EPAS)

Have fun and save fuel. Volvo's electrical power assisted speed-dependent steering consumes less energy while responding to your commands precisely and intuitively. Comes with all engine variants.

Your Volvo V40 Cross Country easily helps you deal with the more down-to-earth stuff of life. The smart two-level load floor gives you a flat load floor, a grocery bag holder and extra storage capacity. Combined with the load organiser mat including aluminium load dividers, you'll keep your stuff well organised under the floor. And to help you keep other small items easily accessible under the parcel shelf, we have created a special compartment net.

Parcel shelf net

Mounted under the parcel shelf, this compartment net for loose items helps you maintain order in the load compartment while keeping your stuff easily accessible when you need it.

Load carriers

To help you fully utilise the roof of your Volvo, we've developed a range of versatile load-carrying accessories. This system is designed to carry up to 75 kg. The specially-designed roof rails make the load carriers easy to fit. Various load accessories – such as roof boxes and different holders for bikes, skis, snowboards and kayaks – can be attached to the load carriers to meet your needs.

Load organiser mat

This gives you both a durable load mat and a smart organiser. Three moveable aluminium dividers allow you to create storage areas exactly as you want them. This organiser perfectly complements the two-level load compartment floor as you can keep your stuff well organised under the floor. It's also available for cars with the standard load compartment floor.

Steel grille

This colour-coordinated steel protective grille helps protect the occupants from unsecured cargo during hard braking. It also creates a safe place for a dog travelling in the load compartment.

Dirt cover, load compartment

This durable liner protects the floor, the sides of the load compartment and the backs of the seats against grime and water. The backrest section is split to allow the rear seat backrests to be folded down separately.

Accessories

To make your V40 Cross Country even more individual and well suited to the challenges ahead, we've created a range of specially designed accessories. The Exterior Styling Kit includes side scuff plates, rear deco trim, a rear skid plate and double end pipes. Combined with the unique Alecto 19-inch wheels, this kit further boosts the refined and powerful looks of your V40 Cross Country. Go on and discover the adventurous you in the Volvo V40 Cross Country.

Rear skid plate with double end pipes

Partly colour-coordinated with the exterior and partly aluminium coloured, the rear skid plate – with elegantly integrated oval double end pipes in chromed stainless steel – provides a powerful, yet refined finish to the V40 Cross Country's rugged design.

Side scuff plates

Perfectly complementing the rugged character of your V40 Cross Country, the stylish aluminium coloured side scuff plates add an extra touch of attitude.

Deco trim, rear

This robust yet elegant aluminium coloured trim with rubber inlays perfectly matches the other Exterior Styling Kit details while protecting the rear bumper when you load and unload your V40 Cross Country.

Alecto 19-inch aluminium wheels

Available in five stylish colour combinations, these unique 19-inch wheels add extra dramatic touch to the adventurous looks of your Volvo V40 Cross Country.

V40

CROSS COUNTRY

Your Volvo V40 Cross Country starts here.

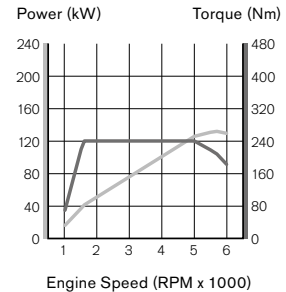

The engine you choose will define a major part of the experience ahead. Some engines favour high performance, while others favour high mileage, but all of these petrol and diesel engines deliver instant power and smooth running while state-of-the-art technology makes the most of every micro-drop of fuel. Which engine is going to start you up? Find out more about the engines at www.volvocars.com

T4

man: **129** g CO₂/km | **5.5** l/100 km | **180** hp | **132** kW | **270** Nm (including **30** Nm overboost) | **Euro 5**

auto: **143** g CO₂/km | **6.1** l/100 km | **180** hp | **132** kW | **270** Nm (including **30** Nm overboost) | **Euro 5**

With the turbocharged 180 hp powerful T4, you get more from less. The direct fuel-injection technology reduces CO₂ emissions and fuel consumption, while the turbocharger provides this 1.6 litre engine with the power and torque to deal with any driving situation. Low engine weight contributes to crisp handling on winding roads. Volvo's innovative Start/Stop technology and engine brake energy regeneration help you save even more fuel. This is downsizing everything except the fun of driving. The T4 is available with a six-speed manual gearbox or a dual-clutch six-speed Powershift automatic with sport mode.

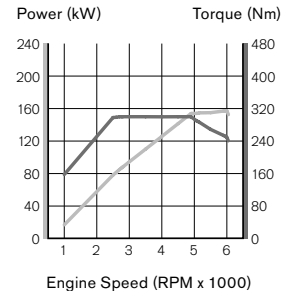

T5/T5 AWD

T5 auto: **182** g CO₂/km | **7.8** l/100 km | **254** hp | **187** kW | **400** Nm (including **40** Nm overboost) | **Euro 5**

T5 AWD auto: **194** g CO₂/km | **8.3** l/100 km | **254** hp | **187** kW | **400** Nm (including **40** Nm overboost) | **Euro 5**

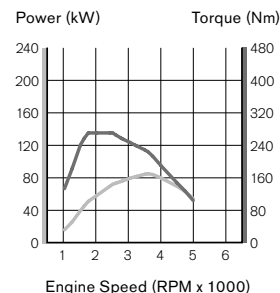

Looking for a truly sporty driving experience? Go for the high-performance 254 hp five-cylinder T5 or T5 AWD. This smooth source of energy delivers an exceptionally quick and powerful response throughout the entire rev range. And featuring Volvo's All-Wheel Drive with Instant Traction™, the T5 AWD is the natural choice if you want to maximise your performance. Start/Stop technology and engine brake energy regeneration contribute to excellent fuel economy and reduced CO₂ emissions. The T5 and T5 AWD are mated to a six-speed Geartronic automatic with sport mode.

D2

man: **99 g CO₂/km** | **3.8 l/100 km** | **115 hp** | **84 kW** | **270 Nm** | **Euro 5**

Take advantage of the benefits of supreme fuel economy and ultra-low CO₂ emissions without any trade-offs in comfort, safety or performance. Epitomizing Volvo's environmental Drive-E technologies, this all-aluminium four-cylinder 1.6 litre D2 turbo diesel features Start/Stop technology and engine brake energy regeneration. Advanced diesel engine technology provides high torque across the rev range to assure a rewarding driving experience in all conditions. The D2 comes with a manual six-speed gearbox.

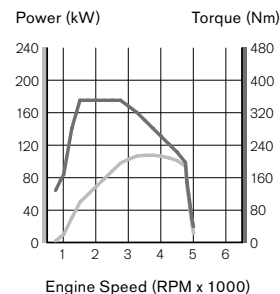

D3

man: **117 g CO₂/km** | **4.4 l/100 km** | **150 hp** | **110 kW** | **350 Nm** | **Euro 5**

auto: **137 g CO₂/km** | **5.2 l/100 km** | **150 hp** | **110 kW** | **350 Nm** | **Euro 5**

The relaxed character and flexibility of this 2.0-litre five-cylinder turbo diesel will infuse your drive with the composed feeling of being in control in all situations without compromising on the fun of driving. And superior mileage and low CO₂ emissions are there for you to enjoy. Further enhancing fuel efficiency, the D3 also features engine brake energy regeneration and Volvo's Start/Stop technology. This engine comes with a six-speed manual gearbox or a six-speed Geartronic automatic with sport mode.

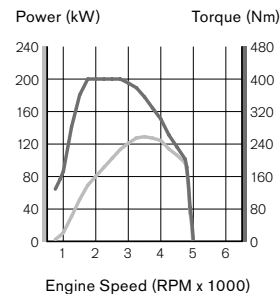

D4

man: **117 g CO₂/km** | **4.4 l/100 km** | **177 hp** | **130 kW** | **400 Nm** | **Euro 5**

auto: **137 g CO₂/km** | **5.2 l/100 km** | **177 hp** | **130 kW** | **400 Nm** | **Euro 5**

This inspiring five-cylinder 2.0 litre turbo diesel takes performance, fuel efficiency and refinement to new levels. State-of-the-art engine technology and low interior friction add to responsive, sporty engine characteristics and low CO₂ emissions. Start/Stop and engine brake energy regeneration technology further optimise fuel efficiency in all conditions. Choose between a six-speed manual gearbox and a six-speed Geartronic automatic that also allows manual gearshifts with sport mode.

The engine programme may vary from country to country and all technical data may be subject to change. Please ask your Volvo dealer for further information.

Leather

This fine embossed leather creates an unrivalled feeling of natural quality that attracts the senses immensely. With its unique look and meticulous craftsmanship into the smallest seam, these leather-faced sculpted seats have a refined touch and feel that's a joy to live with for many years to come. Like all Volvo leather, this is allergy-tested and chrome-free for your ultimate well-being.

Lindholmen T-Tec/textile

This sporty upholstery really enhances the sculpted character of the seats in your Volvo V40 Cross Country. The seat surfaces are divided into sections of stylish textile and contemporary T-Tec – a synthetic skin inspired by wet suits and durable outdoor gear. Contrasting seams (in the Charcoal variants) and leather detailing further enhance the impression of dynamic elegance.

Lorensberg textile

This basic full textile upholstery already affords your Volvo an ambience of sporty elegance. The Charcoal colour is deeply black for a confidently stylish impression, and the accent stitching further enhances the seats' sculpted design. And choosing this upholstery, you also get textile in the door panels.
