Long Range

The New MG5 EV Long Range

Europe's first fully electric, fully loaded estate car

The new MG5 EV Long Range gives you more on every level. Whether you're taking off with the family or hitting the road on business, Europe's first fully electric, spacious and feature-filled estate gives you room for everything you need.

There's a host of features to make the journey easier – including our innovative MG Pilot driver assistance technology. One of the most reassuring features of the new MG5 EV Long Range is our 8 year warranty, giving you peace of mind journey after journey.

At a glance

Big on space

We all need personal space, and the new MG5 EV Long Range has plenty to offer.

Up to five passengers can travel in comfort, while the boot has ample room for everyone's luggage.

There's 479 litres with the load cover in place, or 578 litres with it retracted. Drop the 60:40 folding seat and you've got 1,367 litres for everything from large boxes and bikes to sports gear.

Big on features

The new MG5 EV Long Range keeps you connected and in control.

The 10.25" colour touchscreen features Apple CarPlay™, Android Auto™, reversing camera and satellite navigation.

Not to mention MG Pilot, our high-tech suite of driver assistance technology to give you more confidence and safety on the road.

Built for business or leisure

The new MG5 EV Long Range is designed for everyday life, but it's by no means ordinary. With generous boot capacity and a roomy cabin, your passengers can relax while it easily handles the load.

Whatever you need to transport, the new MG5 EV Long Range takes it all in its stride. From suitcases to bulky boxes, musical instruments to double buggies, you can move more in one go. And if the load is larger than normal, just drop the back seats and take advantage of 1,367 litres of space.

The spacious boot still leaves room for back seat passengers, who can enjoy plenty of head and legroom, even behind a taller-than-average driver. In the front, you can get comfortable with driver's lumbar support, a six-way adjustable driver's and four-way adjustable passenger seats.

On the SE there's fabric upholstery, while the Trophy comes with heated front seats and leather-style upholstery.

Smart Features

for a more satisfying drive

Drive safer

Our advanced MG Pilot driver assistance technology gives you the added confidence of state-of-the-art warning and alert features. It includes Adaptive Cruise Control to maintain a safe distance from the car in front; as well as Active Emergency Braking, Lane Keep Assist, Traffic Jam Assist, and Intelligent High Beam Assist that automatically dips the headlights when they detect an oncoming driver.

- MG Pilot
- Adaptive Cruise Control
- Apple CarPlay™ / Android Auto™
- 10.25" colour touchscreen
- Satellite navigation
- USB ports
- Bluetooth

From the electric powertrain upwards, the new MG5 EV Long Range is loaded with features that make your journey easier, smarter and safer.

Drive easier

Keyless entry and push button start make setting off simple. On the road, the 10.25" colour touchscreen puts DAB radio, Bluetooth, USB ports, satellite navigation, air conditioning, Apple CarPlay™ and Android Auto™ all at your fingertips - so you can keep track of the traffic in between your favourite podcasts or albums.

Driving Down running costs

Whether you're driving the family or on the road for business, you can look forward to low running costs with the new MG5 EV Long Range.

MG Pilot

The MG Pilot suite of high-tech driver assistance technology gives you added confidence on the road. A selection of warning and alert features assist the driver, maintaining safety and simplifying everyday driving.

Traffic Jam Assist (TJA)

Adaptive Cruise Control (ACC)

Adaptive Cruise Control (ACC)

Adaptive Cruise Control monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by releasing the accelerator or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

Intelligent Speed Limit Assist

The car will actively detect speed limit signs and alert the driver of the current speed limit by way of a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.

Intelligent High Beam Assist

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximise the use of high beam, making night-time driving safer, without the risk of dazzling oncoming traffic.

Active Emergency Braking (AEB)

At speeds below 12mph, the car will automatically apply its brakes to avoid a collision with a vehicle, bicycle or pedestrian. At speeds above 12mph, AEB will reduce the likelihood or mitigate the severity of an accident.

Lane Keep Assist (LKA)

Lane Keep Assist uses a camera to detect lane markings ahead and monitors the vehicle's position in its lane. When the function detects the vehicle is about to unintentionally move out of its lane, it warns the driver by means of a visual, audible and steering wheel vibration. The car will also control the steering to keep within its lane.

Traffic Jam Assist (TJA)

When Adaptive Cruise Control is turned on, Traffic Jam Assist continuously analyses the speed of the surrounding vehicles and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 35mph, the driver can activate TJA. The car will automatically follow the vehicle in front, controlling its acceleration, braking and steering within the same lane.

Stay connected & in control

MG iSMART Lite is here to help

The convenient MG iSMART Lite suite of connected technologies helps you make the most of every trip.

The MG5 Electric's intelligent functions include:

- Find your vehicle using the smartphone app
- Remote control for certain key functions
- Vehicle health scan
- 10.25" on-board touchscreen for managing car features
- Advanced vehicle control
- Connectivity functions including Bluetooth access
