High performance. Redefined.

The Audi RS 3 Sedan

RS 3

The Audi RS 3 Sedan

Motion is beautiful. Motion which combines power with elegance is fascinating. To watch. And even more: to feel. This is for the statement makers, the giant leapers, the rule rewriters and the ones you only ever read about. The all-new Audi RS 3 is calling your name. Reserved for the extraordinary.

Expressive and unmistakable.

But when you push limits and dare to do something new. That's when magic happens. With its pixel field of 3 x 5 LED segments, it provides something unique – a checkered flag appears in the left headlight as a dynamic leaving and coming home scene, and the RS 3 lettering appears on the driver's side. When driving, the checkered flag lights up on both sides.

Additional eye-catching details have also been added to bring the all-new Audi RS 3 to life. Behind the front wheel arches are new air outlets. Once coupled with the motorsports-inspired finishing touches include the redesigned RS-specific rear bumper with integrated diffuser and the RS exhaust system with two large oval tailpipes, the all-new Audi RS 3 is reserved for those who want more out of life than just a little peace and quiet.

Torque of the town.

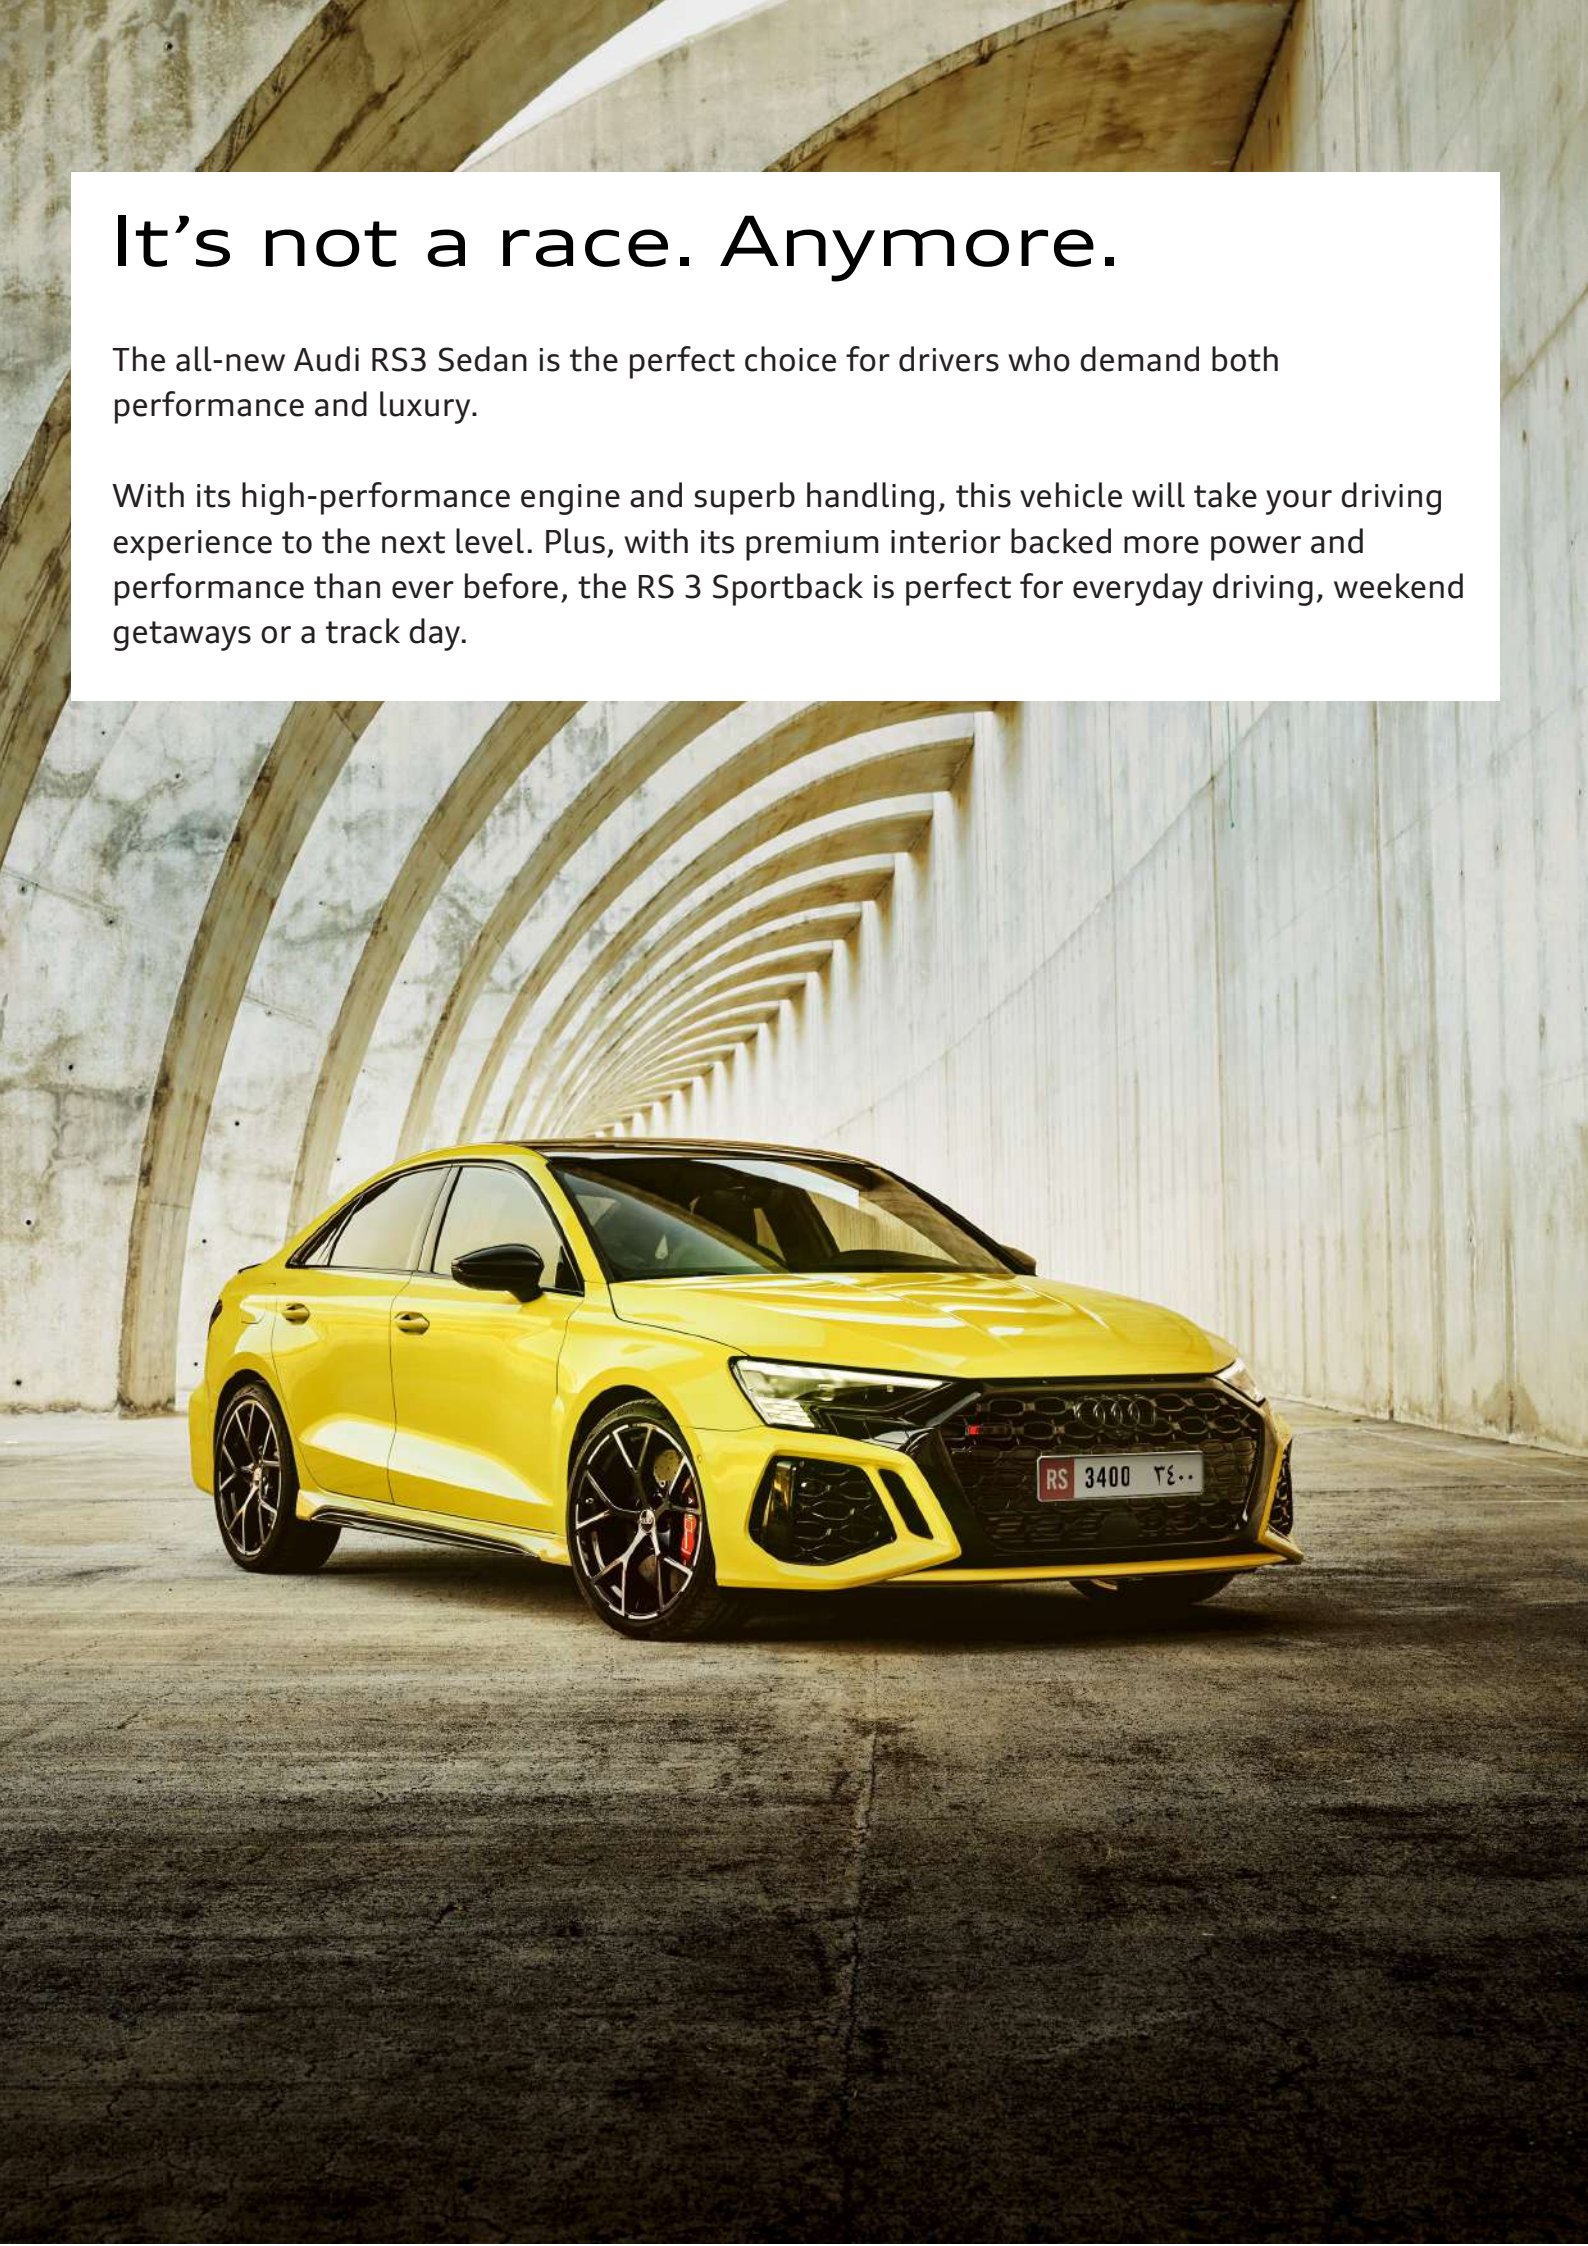
Standard-equipped with flat, wedge-shaped LED headlights and LED taillights including dynamic turn signal lights, it creates an unmistakable look. Matrix LED headlights are available as an option, with darkened bezels that feature digital daytime running lights around their outer downturned angles.

The all-new Audi RS 3 has an even more dynamic and powerful design. With a wide RS front bumper, newly redesigned and distinctive Singleframe honeycomb grille and large air intakes, this compact sportscar roars with character.

It’s not a race. Anymore.

The all-new Audi RS3 Sedan is the perfect choice for drivers who demand both performance and luxury.

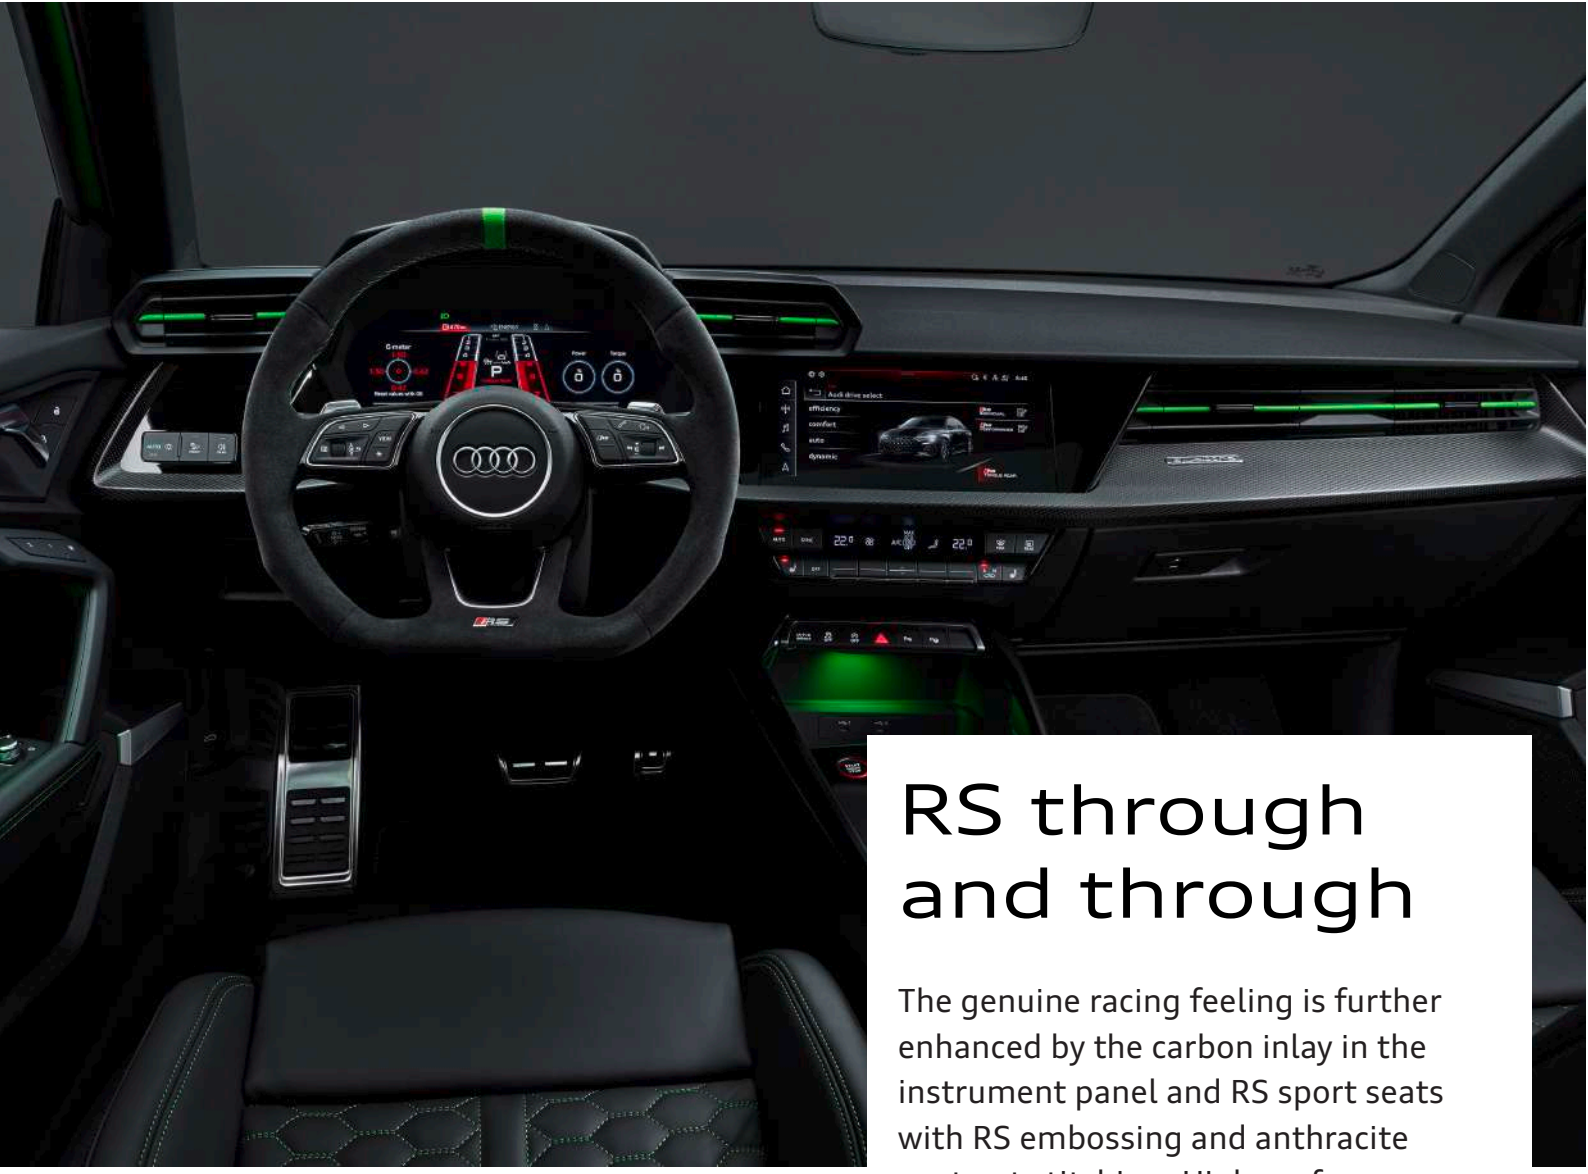
With its high-performance engine and superb handling, this vehicle will take your driving experience to the next level. Plus, with its premium interior backed more power and performance than ever before, the RS 3 Sportback is perfect for everyday driving, weekend getaways or a track day.



Say it all. Without saying a word.

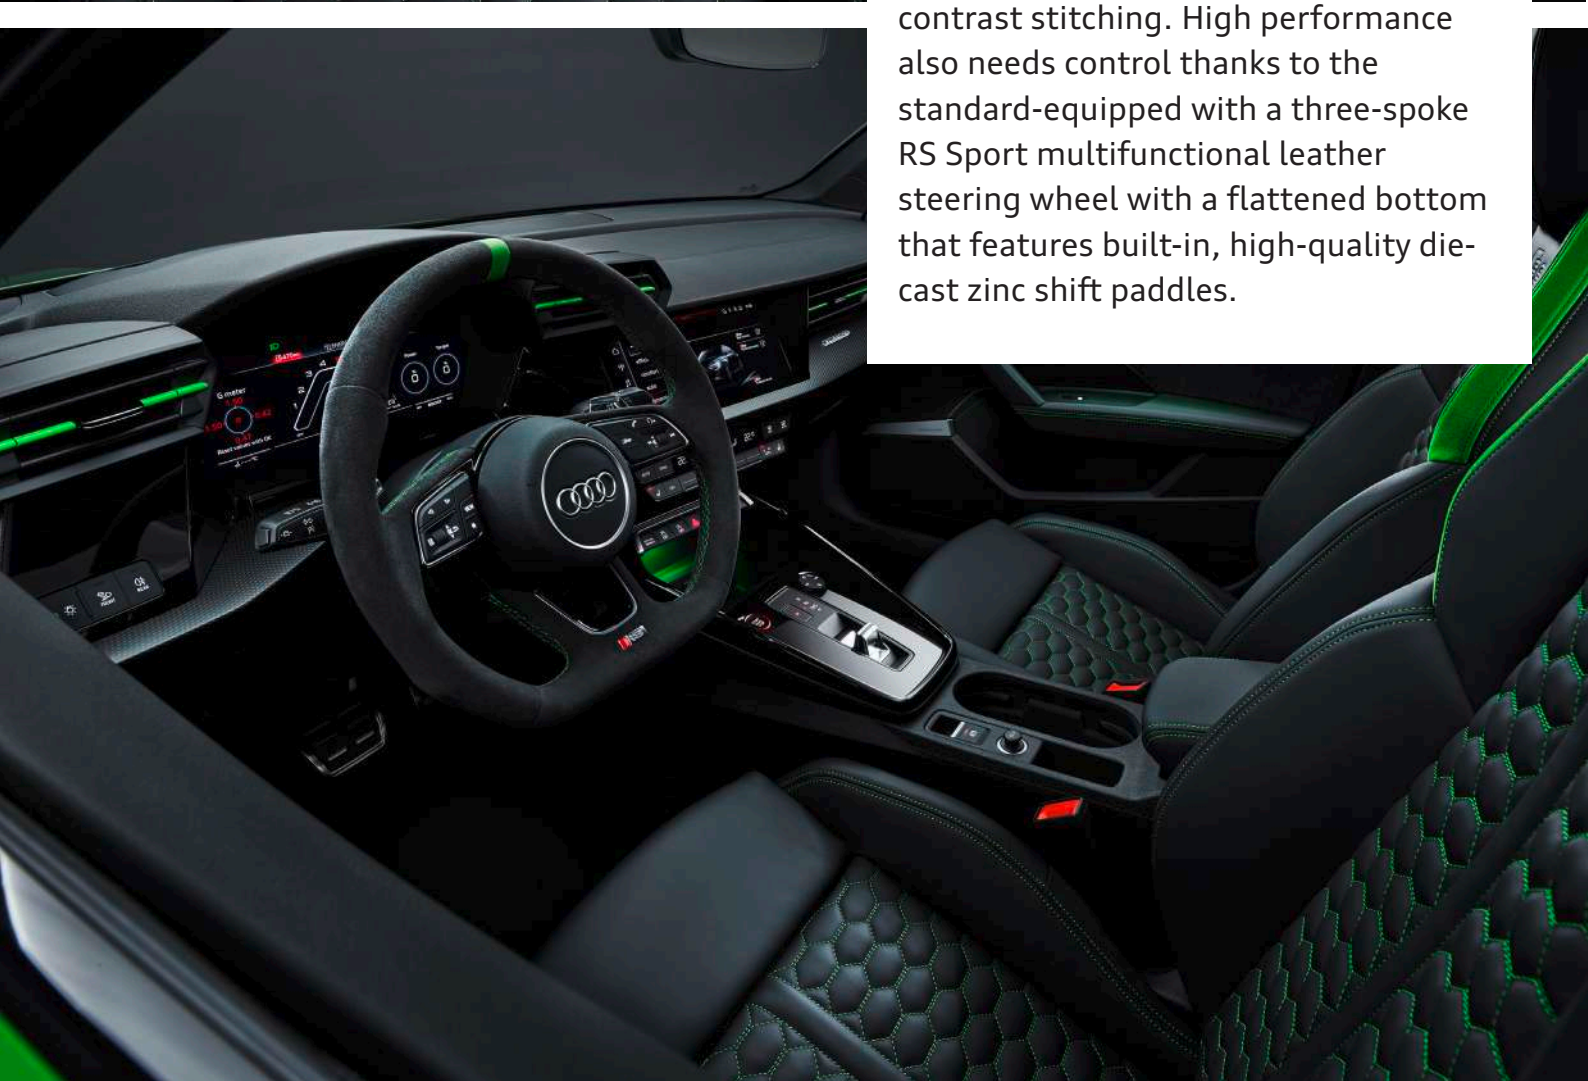
You get the genuine racing feeling from not just outside but inside the all-new Audi RS 3 too. With numerous elements specific to the RS, spottiness is accentuated and redefined once more. The 12.3-inch Audi virtual cockpit plus displays the rpms in the form of a bar graph and shows power and torque as percentages.

The rpm display in the “RS Runway” design is new. Here, the values are displayed in the opposite direction in a manner that visually resembles an airplane runway – the highest speed in the foreground and the lowest speed in the background. In addition, the Audi virtual cockpit plus includes displays for g-forces, lap times and acceleration.
The RS-specific blinking shift indicator in manual transmission mode changes the rpm display from green to yellow to red, blinking in a manner identical to that used in motorsports, to indicate the ideal time to change gears.



RS through and through

The genuine racing feeling is further enhanced by the carbon inlay in the instrument panel and RS sport seats with RS embossing and anthracite contrast stitching. High performance also needs control thanks to the standard-equipped with a three-spoke RS Sport multifunctional leather steering wheel with a flattened bottom that features built-in, high-quality die-cast zinc shift paddles.



1 - 2 - 4 - 5 - 3

That iconic track. This particular cylinder firing sequence and the odd number of cylinders make for a very special rhythm and unique engine sound we all know and love. The new Audi RS 3 is also the first Audi model that comes standard-equipped with a torque splitter. It replaces the rear axle differential and the previous multiple disc clutch package on the rear axle. Instead, an electronically controlled multiple disc clutch is used on each of the drive shafts.The RS Performance mode, created specifically for the racetrack, is another never-before-seen innovation. It uses a specific engine and transmission configuration and is precisely tailored to the semi-slick tires that are, for the very first time, available for the RS 3 as a factory option.

Technical Specifications

RS 3

Real magic happens between 2,250 and 5,600 rpm. If you're a real petrolhead, you'll know what that means. The 5-cylinder turbo is back. International engine of the year. 9 times in a row.
