

RS e-tron GT

Ideas start the future

The formula for a head start.

The 800-volt lithium-ion battery integrated into the flat underbody, offers extremely high performance – both when charging and when driving. In combination with the recuperation system, it provides a range of up to 472 km according to the WLTP measurement procedure.

Dynamic expression: The RS design packages

The RS design package, red adds striking accents to the vehicle interior through contrasting stitching in express red. The RS design package, grey underscores the design of the vehicle interior through a combination of high-quality interior materials and subtle contrasting stitching in steel grey.

Charge the future

Output

440 kW

Charging system

800 volt

Energy charged in for 100 km

5 min approx.

Up to 270 kW at 800-volt charging stations – as standard. It takes approx. 5 minutes to charge enough power for the next 100 km. Around 22.5 minutes will take the battery charge from 5 % back up to approx. 80 %.

The Audi RS e-tron GT can be charged at a maximum alternating current (AC) charging capacity of 11 kW as standard. Faster charging at 22 kW at home requires the optional e-tron charging system connect in combination with the optional on-board charger up to 22 kW (AC).

RS e-tron GT

Everything in view

The pared-back cockpit with fully digital 12.3-inch colour display and the centre console are ergonomically oriented to the driver. Sport seats in the front provide good lateral support even while cornering at speed.

Sporty look. Sporty character:

The distinctive outer rear seats with an additional, central seat option emphasise the sporty character. The materials used in the interior are a demonstration of progress. Here, there is a choice between high-quality leather upholstery or a leather-free interior.
