

The Audi e-tron S Sportback

S stands for Superior

More than just a car; it's a lifestyle choice. With the Audi e-tron S Sportback, service intervals are less frequent and maintenance of your vehicle is less expensive than petrol engines. Brake pads last longer and batteries may be replaced individually. It's a future worth investing in.

S stands for Sophisticated

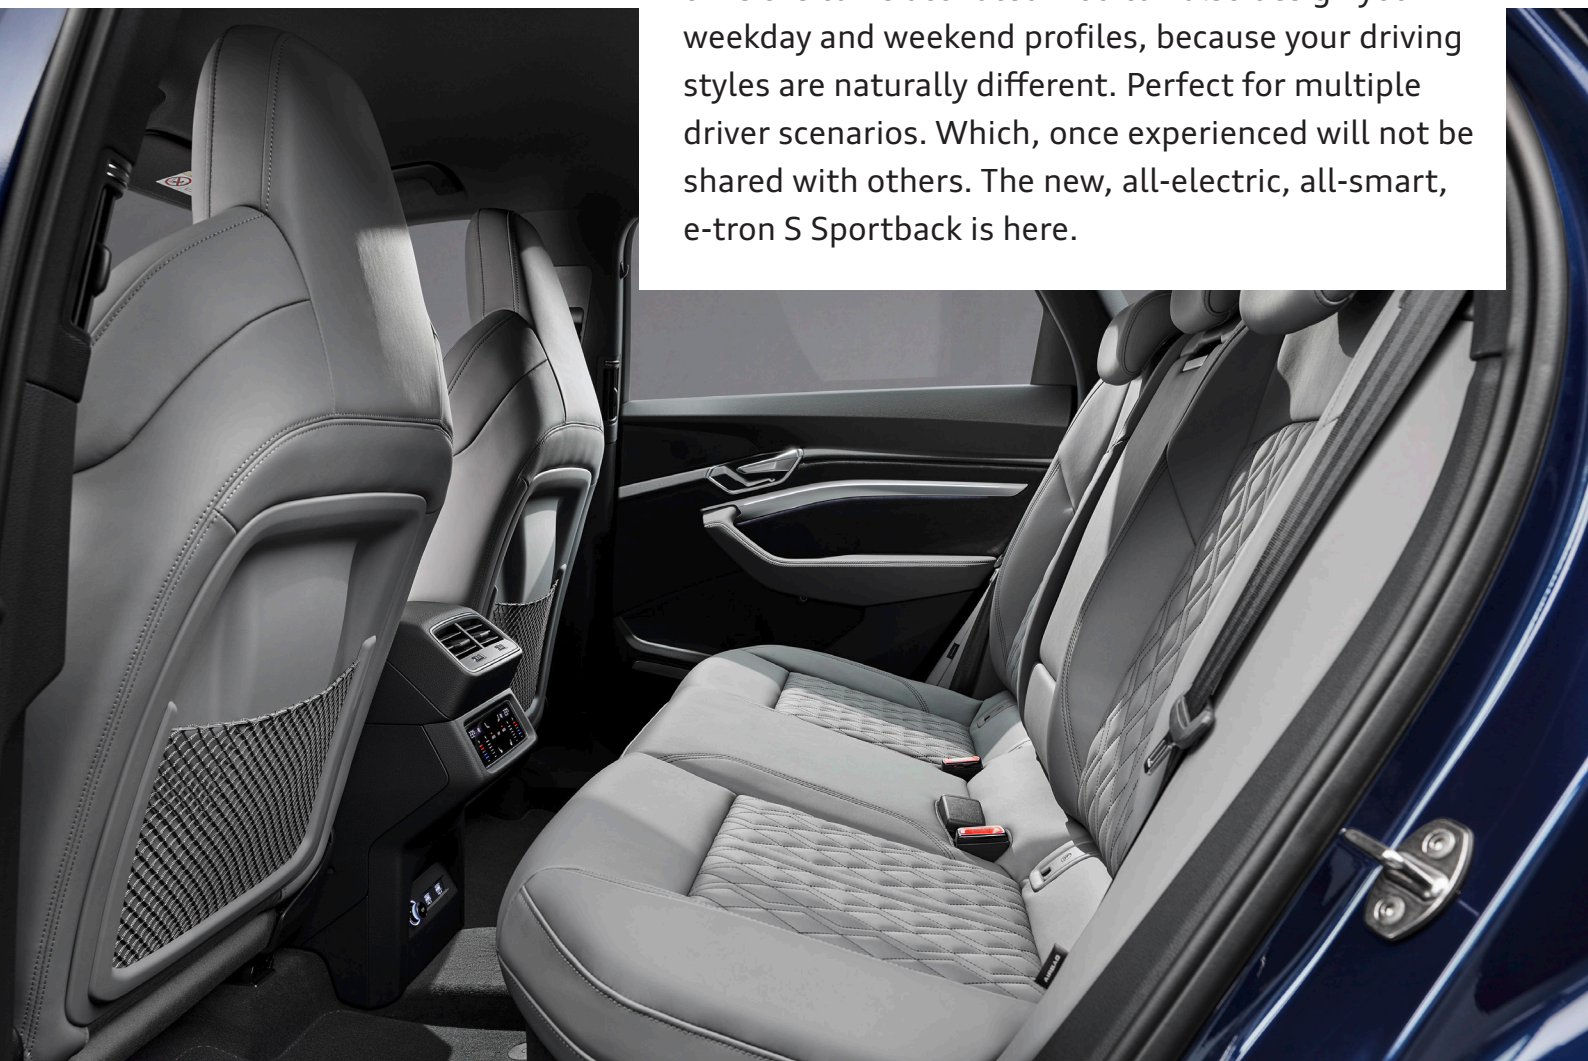

With three electric motors, a world first for production models, 40 years of quattro know-how and an energy recuperation system which can add up to 30% to its overall range, the new, all-electric, Audi e-tron S Sportback is not just exquisitely sophisticated on the outside.

S stands for Smart

With up to 400 individual parameters ranging from seat position to A/C settings, the Audi MMI system recognizes and welcomes its user by name every time the car is activated. You can also design your weekday and weekend profiles, because your driving styles are naturally different. Perfect for multiple driver scenarios. Which, once experienced will not be shared with others. The new, all-electric, all-smart, e-tron S Sportback is here.
