LUXURY TAKES NO SHORTCUTS

To create the limited edition Lexus ES, we turned to a material that we already knew could best express the future of luxury: bamboo.

Between handpicking the perfect bamboo trees from Kochi prefecture in Southern Japan, drying the wood for precise moisture content, to sanding down, shaping, and finally polishing the wood (all by craftsmen's hands), it's fair to say that it is a challenging and very human-intensive process.

LEAVE AN IMPRESSION NOT AN IMPACT

Bamboo can grow by up to 100 centimetres a day. Lexus-grade bamboo takes between three and four years to mature, still more than 10 times quicker than the 40 to 50 years taken by conventional woods. This perfectly allows us to both indulge in luxury while being environmentally responsible.

FROM OUR HANDS TO YOURS

The most engaging part of the human-car interface is the steering wheel, and here is where you will experience first-hand the benefits of the new bamboo trim as sculpted by our craftsmen. Its dense and stable nature allows us to create an impressively comfortable grip that is perfectly weighted for maximum driving pleasure.

Indeed, when it comes to luxury, there is no limit to where Lexus will go. It is just one of the ways we make cars to reward those with discerning tastes.
