CONCEPT

The LM was conceived as a new genre of 'Luxury Mover', a refined expression of Lexus innovation, 'omotenashi' hospitality and exquisite craftsmanship, created to provide freedom of body and mind in the midst of busy lifestyles.

» INTELLIGENCE

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

The LM evolves the concept of the luxury chauffeur car through the single-minded pursuit of rear seat comfort to create a car that seamlessly supports modern executive lifestyles, placing a premium on precious personal time by providing the ultimate relaxing space.

Drawing on the rich heritage and skills of craftsmanship in Japan, Lexus imbued the LM with qualities that are both cutting-edge and time-honoured, to enrich individual experiences and quality of life. It embraces aesthetic values that embody the Japanese concept of 'omotenashi', authentic hospitality that thoughtfully anticipates individual needs and subtly

provides them to engender an intuitive feeling of wellbeing. It realises these qualities by fusing Lexus innovation, cutting-edge technology and Takumi craftsmanship in a fresh expression of modern luxury that offers outstanding comfort, sophisticated beauty, and exceptional functionality.

It is realised in a high quality space with a private feel, in which the cabin becomes a personal space with the comfort of a luxury study to revitalise the body and mind, optimising precious time to restore energy and inspire the spirit while on the move.

## DESIGN

Lexus originality shapes a new era in luxury chauffeur cars, inspiring a dynamic three-dimensional form accentuated by Lexus signature design cues that exude style, power and presence, with a luxurious cabin that creates the ultimate space for traveling.

» INTELLIGENCE

### EXTERIOR

The exterior design embodies ambitious dynamism, expressing the confidence and motivation to aim ever higher. The bold, wide and low stance and large spindle grille exude a powerful presence with an aura of prestige that stands out from its surroundings.

### INTERIOR

The exquisitely crafted interior provides a refined welcome imbued with 'omotenashi' sensibility, fusing traditional craftsmanship, innovative features and discreetly integrated technology in an elegant, open space with the inviting comfort of a private study.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## FEATURES

The distinctive spirit of Lexus hospitality and attention to detail informed the design and refining of key features. They provide exceptional comfort, privacy, and functionality to support a wide variety of activities from business to relaxation, freeing the body and mind every time you enter this personal space.

» INTELLIGENCE

The fresh approach of the LM 4-seater to the luxury chauffeur car with its focus on rear seat comfort and privacy is realised in the refined features of this elegantly serene space. From the innovative cushioning of the seats to the Gin-Sui-Boku of the privacy partition, the attention to detail that embodies 'omotenashi' hospitality left no stone unturned in the pursuit of enhancing the quality and value of time spent in the LM.

**Ceiling Colour Illumination**

The cabin lighting subtly recessed around the moonroof in the ceiling can be illuminated in 16 colours and four brightness levels, enabling occupants to personalise the ambience of their private space to support their needs and match their mood, from working to a power nap, at the touch of a switch.

**Privacy Partition**

Infusing privacy with elegance, Lexus 'omotenashi' informed the design of the partition to protect privacy without impacting on the open feeling of the cabin. The silver ink Gin-Sui-Boku ornamentation was inspired by traditional ink wash painting, and realised by Takumi craftsmanship. The glass for the top of the partition can be elevated and dimmed to provide greater privacy when required, by selecting from three privacy modes: open, privacy and full privacy.

**Refrigerator**

Anticipating the desire for a cooling drink, the opportunity to relax and even to celebrate, the 14-litre refrigerator in the centre of the lower partition keeps a selection of drinks chilled and close at hand.

**Magazine Rack**

Integrated into the front of the rear console, the tilt door on the magazine rack can be easily opened from the comfort of the rear seats to access and store A4-size magazines, newspapers and folders.

**Partition Trim Lower Storage Spaces**

Convenient storage integrated on both the left and right sides of the lower partition makes it easy to store and secure attaché cases and handbags, keeping important items in sight and conveniently close.

**Second Row Seats**

The functionality of the rear seats epitomises the meticulous pursuit of comfort, supporting a supremely relaxing environment regardless of the temperature or the occupant's physical condition. The maximum recline angle was carefully calculated to provide the optimum angle for relaxation. Switches to recline the seats are integrated into the side of the seats to enable easy control of the seats when they are fully reclined. The rear refresh seats feature air bladders in the seat cushion and seatback that inflate to apply pressure to the occupant's thighs, back and shoulders, controlled by seven programs covering the full or particular areas of the body.\*

**Power Ottoman**

The power ottoman on the second row seats provides generous support to the lower legs so the occupant can relax in refined comfort. The ottoman control automatically extends it fully when it is being raised, and retracts it to stow it away.

**Air-conditioning System**

The auto air-conditioning system features triple-zone independent temperature controls which enable the driver, front seat passenger and rear seat passengers to independently control their climate zone. Controls for the front zones are integrated in the heater control panel and EMV display, and in a control panel in the ceiling and the rear centre console for the rear seat zone.

**Rear Personal Lamps/Reading Lamps**

The ambience of being in a private study is reinforced by the individual lighting. Rear personal lamps provide illumination in a variety of situations including ingress and egress at night, using devices and checking items in the cabin. They are supplemented by reading lamps which provide gentle, directed illumination around the hands.

**Vanity Mirrors**

Vanity mirrors with LED lighting for rear seat passengers are integrated into the ceiling. The angle of the mirrors can be adjusted to enable passengers to check and adjust their clothes. In the front seats, the mirrors are integrated into the sun visors.

**Rear Heater Vents**

Heater vents integrated in each side of the second row seats complement vents in the ceiling and lower partition to provide nuanced control of individual comfort.

**Ventilated Seats/Seat Heaters**

In the 4-seater model, the second row Ventilated Seats use a suction system to draw cabin air cooled by the air-conditioning system through the seat surface, effectively reducing heat and moisture to provide a direct refreshing feel. In cold weather, integrated seat heaters quickly warm the body.

\* For your safety, only use the recline function when the vehicle is stopped. Please read the Owner's Manual for details on adjusting the recline angle while the vehicle is moving.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Befitting the ultimate private space, the rear seat entertainment system's advanced technology enhances your time spent in the LM, whether you are relaxing or engaged in work. The large, high-resolution, 26" screen in the privacy partition, advanced audio system, and a range of input ports create a superb environment for enjoying your favourite music, videos and more.

**Mark Levinson Premium Surround Sound System**

The Mark Levinson Premium Surround Sound System features 19 speakers and Quantum Logic Surround (QLS) technology. The partition enables a home theater-style speaker layout, with side speakers at the same height as the ears, creating a dynamic, full-bodied sound stage with exceptional audio clarity and definition.

**Rear Seat Controls**

A multi-operation panel in the rear centre console controls the seat position, refresh function, air-conditioning, and rear entertainment system in the rear private space.

**Blu-ray Player**

A Blu-ray player built into the bottom left side of the partition plays Blu-ray Discs, DVDs and CDs.

**Rear Centre Console Box**

An HDMI port and two USB ports inside the rear console box enable connection of various electronic devices, including PCs. A tray inside the box provides handy storage for small items and for holding a smartphone while it is connected to the USB port.

**Side Pocket**

A convenient pocket in the side of the rear console accommodates small items such as a remote control that can be easily accessed even when the seats are reclined. It is lined with felt to help prevent scratching the items stored in it.

**Power Sliding Doors**

Controls for the power sliding doors integrated in the overhead console enable the driver to open and close the sliding doors and back door, providing a warm welcome as important passengers approach. In the same way, when carrying the Electronic Key, the LM welcomes you by unlocking and opening the power sliding door on the side you are approaching with one touch of the key or the door handle, and closing the door with another touch. A jam protection system helps prevent obstacles getting pinched in the doors.

**Assist Grips**

The assist grips are ideally placed to assist poised and flowing ingress and egress from the cabin. The grip space, angle, and curvature of the handles were fine-tuned to enhance grip comfort, with a soft padding layer under the upholstery providing a soft and refined feel.

**Side Steps**

The focus on hospitality and attention to detail contributed to the thoughtful design of the wide, low-set side step with integrated Lexus logo, which together with the assist grip and wide-opening door contributes to easy and graceful ingress and egress into the main cabin.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

**Moonroofs**

The front moonroof and rear moonroof with jam protection system contribute to the bright open feeling in the cabin. The front moonroof tilts up and down manually and the rear moonroof slides open at the touch of a switch. Integrated shades ensure good illumination while providing thermal insulation.

**Acoustic Glass**

Acoustic glass in the front door and sliding door windows contributes to the exceptional quietness and a feeling of privacy in the cabin.

**Window Sunshades**

Manual sunshades on the sliding door and rear quarter windows provide simple control for blocking out direct sunshine, enhancing comfort and privacy in the rear seats.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

**Ultra Compact 3-beam LED Projector Headlamps**

The bold Ultra Compact 3-beam LED Projector Headlamps project a powerful presence. They integrate high and low beams projector units, distinctive Lexus L-shaped Daytime Running Lights (DRL) and triple-layered turn signal lamps that illuminate sequentially, expressing a bold face to the world. In addition, LED cornering lamps help contribute to confident driving when turning left or right at night by distributing more light in the direction of forward travel and to the sides.

**Rear Combination Lamps**

Iconic L-signature shaped rear combination lamps reinforce the LM's strong and sophisticated presence, and are instantly recognisable as a Lexus. The left and right lamps are connected by a single continuous line of LED lights across the rear, accentuating the wide stance. The rear turn signal lamps illuminate sequentially from the inner side to the outside to emphasize the turning direction.

**Rear Bumper**

An integral element of the strong rear presence, the horizontal lines of the rear bumper are reinforced by chrome ornamentation on the bottom, contributing a luxury touch and highlighting the wide stance and low centre of gravity.

**Power Back Door**

When carrying the Electronic Key you can open and close the back door automatically at the touch of a switch. An additional switch is located in the overhead console, and a closing switch is integrated into the back door. The door features a jam protection system.

**Luggage Space**

Complementing the spacious cabin, the ample luggage space can accommodate a range of luggage to meet the occupants' changing needs, including golf bags and suitcases. Large underfloor storage spaces enable the securing of valuables out of sight.

**Meters**

The design of the Optitron meters fuses the simple functionality of 4-dial analog meters with an advanced digital display to provide excellent visibility of key information. The large analog speedometer and tachometer have three-dimensional meter faces for excellent visibility.

**Multi-information Display (MID)**

The 4.2" colour TFT multi-information display integrated in the Optitron meter provides a range of information in an easy-to-read colour display, including operation status, cabin illumination, navigation, climate and audio system information. A 4-way switch in the steering wheel enables fingertip control of the information displayed.

**Multimedia Coordination Function**

The LM's seamless integration of advanced technologies supports the coordinated display of information from the multimedia systems on the 12.3" Electro Multi-Vision (EMV) display in the centre of the instrument panel and the 4.2" colour Thin Film Transistor (TFT) multi-information display in the meter cluster.

**Overhead Console**

Providing the refined hospitality of a chauffeur driven car, the overhead console in the ceiling above the front seats includes finger-touch controls of the sliding and back doors, and rear moonroof. In addition, it integrates storage for small items, map and down lights, with each switch incorporating a subtly illuminated icon for easy recognition and operation, day and night.

**Position Memory Switches**

Enhancing hospitality and comfort, 2 position patterns for the second row seats can be saved in memory, and set with one touch of the selected switch. In addition, 3 positions for the driver's seat and door mirror angles can be saved in memory.

**Wireless Charger**

This thoughtful charging tray in the centre console box enables wireless charging of batteries in many Qi-compatible smartphones and electronic devices simply by placing them on the charger tray.

**Remote Touch Interface**

An interface designed for simple, smartphone-style operation lets users interact intuitively with the navigation and audio systems on the EMV display. Integrated into the centre console, it provides easy control of the systems without disturbing the driving posture and line of sight.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## SAFETY

The LM's exceptional hospitality and ability to offer a deeply relaxing space are based on creating an environment that provides peace-of-mind. It is realised through a comprehensive approach to safety with the adoption of advanced active safety systems to help assist safe driving, and passive measures to provide protection.

# 4

» INTELLIGENCE

## LEXUS SAFETY SYSTEM +

### Lane Tracing Assist (LTA)

When Lane Tracing Assist is activated, it alerts the driver of possible lane or road deviations and helps assist steering to avoid them. In addition, while driving on highways and automobile-only roads with Dynamic Radar Cruise Control (DRCC) with Stop & Go Function activated, it helps assist steering to keep the vehicle in the lane.

### Dynamic Radar Cruise Control (DRCC) with Stop & Go Function

In addition to maintaining a constant speed, Dynamic Radar Cruise Control (DRCC) with Stop & Go Function uses the millimetre-wave radar and camera sensors to detect a vehicle driving ahead and maintain an appropriate distance between vehicles.

### Pre-Collision System (PCS)

When the millimetre-wave radar and monocular camera sensors detect a vehicle ahead and determine that a collision is likely, it alerts the driver and activates pre-collision brake assist when the driver depresses the brake pedal. If the driver cannot depress the brake pedal, it activates the pre-collision brake to help avoid a collision or mitigate the impact force.

### Adaptive High-beam System (AHS)

The system detects the headlamps of oncoming vehicles, tail lamps of preceding vehicles, and brightness of the surrounding area. When it detects a vehicle within the area illuminated by the high beams, it disables/enables multiple LEDs on each side to minutely adjust the lit and unlit areas, optimising light distribution. By partially blocking light from the high-beam headlamps so that they don't directly project onto a preceding or oncoming vehicle, the system helps contribute to safe driving at night.

### Blind Spot Monitor System (BSM)

When the quasi-millimetre-wave radars in the rear bumper detect vehicles in adjacent lanes that aren't visible in the door mirrors, the system activates an LED warning indicator in the relevant door mirror the moment a vehicle enters this blind spot.

### Parking Support Brake (PKSB)

PKSB detects stationary objects such as walls in the direction of travel, as well as vehicles approaching from behind while reversing\*, and alerts the driver on the display and with a buzzer. In addition, in the event that the system determines a collision is likely, it applies drive force and brake force control to help avoid minor collisions and mitigate damage.

### Supplemental Restraint System (SRS) Airbags

The LM features SRS airbags (front seats), SRS knee airbag (driver's seat), SRS side airbags (front seats), and SRS curtain shield airbags (front door, sliding door and rear quarter windows).\*

### Digital Rear-view Mirror

The Digital Rear-view Mirror can be switched from optical to Digital Rear-view Mirror mode at a touch of a switch in the bottom of the mirror. In Digital Rear-view Mirror mode, the mirror helps assist safe driving by showing high-resolution, real-time images from a camera mounted on the back door that provides a wider field of view than optical mode, unobstructed by headrests, luggage or passengers' heads. It also helps protect the privacy of passengers in the rear seats.\*

### Panoramic View Monitor (PVM)

To help check areas surrounding the vehicle that are difficult to see from the driver's seat, the system shows a bird's-eye view of the vehicle in real time on the EMV display, using a composite image taken by cameras mounted on the front, sides, and rear of the vehicle.\*

\*1 Detection of vehicles approaching from behind while reversing is not available in some markets. Please inquire at your local dealer for details.

\*2 Always adjust the area the mirror displays before you drive the vehicle for the first time or when the driver changes, while stopped in a safe place. Never adjust the display while driving. Failure to adjust the display area may cause a double image. If the display is difficult to see due to reflection from external light when driving models equipped with twin moonroofs, close the sunshade. It may take time to focus on the display depending on your age and physical condition. In addition, foreign matter such as water drops, snow, or mud may prevent images from being displayed clearly. In this case, switch the mirror to optical mode before driving. In areas where the surrounds are dark, digital signal processing enhances the brightness to boost visibility. It may also cause the digital display monitor to flicker.

\*3 The area the cameras can show is limited. Be sure to visually check your surroundings before you proceed.

\*4 The SRS airbags are supplemental devices to be used with the seatbelts. The driver and all passengers in the vehicle must wear their seatbelts properly at all times. Never install a rear-facing Child Restraint System (CRS) on the front passenger's seat. For a forward-facing CRS, it is recommended you use it in the rear seats. Please do not use accessories for the seats which cover the parts where the SRS side airbags should inflate. Such accessories may prevent the SRS side airbags from activating correctly, causing serious injury (Lexus genuine seat covers are specifically designed for models equipped with the SRS side airbags. To find out about availability in your area, please inquire at your local dealer). The photo shows all the SRS airbags activated for display purposes only (the SRS side and curtain shield airbags only inflate on the side of the collision in an actual accident). For details on these and other important safety features, be sure to read the Owner's Manual carefully.

Note: The systems functions may not operate properly depending on the weather, road and vehicle conditions or other factors. Be sure to read the Owner's Manual carefully. Do not overly rely on these systems, as there is a limit to the performance they can provide. The driver is always responsible for paying attention to the vehicle's surroundings and driving safely.

Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## PERFORMANCE

The pursuit of providing the ultimate in comfort drove a focus on enhancing every element of performance, from the layout and rigidity of the body, to innovative seating materials, to highly-responsive acceleration, cornering and braking characteristics. It not only realises an exceptionally smooth and quiet ride, but also the exhilarating driving embedded in every Lexus.

» INTELLIGENCE

**Platform**

Creating a Luxury Mover worthy of Lexus required refining the individual elements that make up the platform, and harmonising them in a comprehensive package. Careful attention to optimising the rigid frame and positioning of the suspension and engine complements the packaging of the cabin with excellent legroom for second row passengers, together with 260mm of slide adjustment on the driver's seat.

**AdaptiPedic by Woodbridge Low Resilience Urethane Foam**

The second row seats feature AdaptiPedic rate-sensitive response foam, an innovative seating foam developed for the LM to provide outstanding ride comfort, especially on long trips. AdaptiPedic conforms to each passenger's physique, promoting correct lumbar posture and a snug fit while mitigating pressure points to provide exceptional comfort and support. It also has excellent vibration absorption characteristics.

**Multi Material Body**

The LM's superb comfort and quietness, and exceptionally stable and smooth ride are the product of an intensive focus on the design and material used in the body and frame. It was realised by combining a lightweight, high rigidity structure made from hot-stamp, high-tensile steel, with strategically positioned reinforcements including around the door openings and rear wheel houses, and the use of high-tensile and structural adhesives. The extensive use of spot welds enhances yaw response and helps to reduce scuttle shake. Directly installing the partition and armrests onto the body further contributes to this rigidity. The extensive use of high-tensile steel for the exterior panels and resin for the steps further reduce body weight.

**Underfloor Structure**

The straight front-to-back ladder frame with connected side members creates the base for the excellent torsional rigidity of the floor. The addition of braces around the rear suspension to further suppress cabin deformation, and the high-rigidity of the suspension units help realise excellent driving stability and ride comfort.

**Front Suspension**

To realise the exhilarating performance synonymous with Lexus, the suspension geometry and alignment of the L-arm type MacPherson strut front suspension were optimised to deliver both excellent handling stability and ride comfort. It also helps suppress small posture changes and vibrations on start-off and during high-speed driving.

**3.5-litre V6 Engine**

The heart of the LM's exhilarating performance is a V6 Atkinson Cycle engine with Dual VVT-i (Intake side: VVT-iW) which generates outstanding output with the strong linear rpm characteristics of a V6 engine, balanced by excellent fuel efficiency and compliance with the strictest global emission standards. An innovative D-4S fuel injection system features both direct and port injectors, to realise excellent output, torque and fuel efficiency.\*

**Brakes**

Ventilated disc brakes on both the front and rear contribute to confident driving and stopping control, and the peace-of-mind and comfort of both driver and passengers. Hybrid models feature Electronically Controlled Brake System (ECB) which enables highly-efficient energy regeneration while braking, contributing to the excellent fuel economy.

**Rear Suspension**

The trailing arm double-wishbone rear suspension was refined with curved upper arms and a low mounting position for the shock absorbers to create a compact suspension, contributing to the spacious cabin and luggage space. The suspension geometry and alignment were optimised to deliver excellent handling stability and ride comfort.

**Swing Valve Shock Absorbers**

Highlighting the focus on supple ride comfort at different speeds and varying conditions, the adoption of swing valve shock absorbers on both the front and rear suspension dampens even minimal body movement. It helps realise a flat vehicle posture, contributing to excellent steering response and stability, and also suppresses shaking of occupants' heads, providing excellent ride comfort.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

\* VVT-i: Variable Valve Timing-intelligent. VVT-iW: Variable Valve Timing-intelligent Wide. D-4S: Direct injection 4 stroke gasoline engine Superior version.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

## TAKUMI

Our Takumi craftsmen strive for perfection in every aspect of their work, actively seeking enhancements by applying constant care and dedication to their craftsmanship, blending their craftsmen's skills with the power of technology to better anticipate the future.
