CONCEPT

Premium Urban Sports Gear.
The NX injects fresh expressions of individuality,
exhilaration and utility into urban living.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

The NX was developed around the core concept of 'Premium Urban Sport Gear', a next-generation Lexus that applies an urban focus to luxury SUVs. 'Premium Urban' aims to create refined solutions to the mobility demands of city living, offering advanced technologies, excellent environmental performance and refined Lexus features that provide outstanding quality and driving pleasure. 'Sport' expresses a dynamic and active attitude that shapes the aggressive and very individual styling, and injects a sporting edge into driving, with sport-honed acceleration, control and handling. It is intrinsically linked with 'Gear', a meticulous focus

on refining every detail to offer the advanced functionality and effortless utility associated with the very best sport equipment, together with the eye-catching design and embrace of advanced technologies that set iconic 'Sport Gear' apart. The result is a game-changing, urban-focused SUV, with the acceleration, agility and handling to effortlessly negotiate city traffic, the utility to meet the ever-changing needs of an active and dynamic lifestyle, fuel efficiency that embodies environment-aware values, and the sophisticated features and refined detail that is a Lexus hallmark.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

DESIGN

Fusing superb agility and dynamic individuality with spacious functionality creates a fresh sporting spirit.

Disclaimer: Image used is for illustration purposes only.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

EXTERIOR

The fusion of condensed dynamism with edgy solid surfaces powerfully expresses the superb agility and dynamic individuality of this fresh sporting spirit.

INTERIOR

The blend of functional and structural beauty and attention to detail in the sporty interior further boosts your driving pleasure.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

PERFORMANCE

Out on the streets, the NX's poise, responsiveness and exhilaration spark a relish for city driving.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Chassis

The foundation of the NX's responsive sporty handling is a lightweight, high rigidity body structure made from hot-stamp, high-tensile steel and aluminium, with strategically positioned reinforcements. The use of innovative production technologies including laser screw welding and body adhesives, together with extensive spot welding, enhances the rigidity of panel joints, and contributes to the excellent handling, refined comfort and quiet ride.

Pre-loaded differential

This innovative differential pre-loads torque under light loads or low rotational speed, contributing to highly-precise steering for excellent straight-line stability and acceleration performance.

Aerodynamics

The NX's superb aerodynamics contribute to fuel-efficient performance and quiet comfort in the cabin, even during high-speed driving. Careful attention paid to reducing drag, including an integrated rear spoiler, spats for all four wheels, and the engine, floor, lower arm and rear underbody covers, contributes to a smooth airflow.

S-VSC (Steering-assisted Vehicle Stability Control)
 VSC operates in conjunction with the EPS, ABS and TRC to limit and distribute drive power and assist steering torque to help stabilise vehicle behavior and direction, to provide excellent stability and control in various driving conditions.*

Drive mode select
 Drive mode select provides integrated control of multiple systems to let you tune performance to suit your driving style.

* VSC: Vehicle Stability Control. EPS: Electric Power Steering. ABS: Anti-lock Brake System. TRC: Traction Control System.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

2.0-litre direct injection turbocharged engine

This newly-developed engine delivers a sophisticated fusion of exhilarating driving performance and excellent fuel efficiency.

The compact high-efficiency twin scroll turbocharger is combined with an Atkinson Cycle engine with Dual VVT-i (Intake side: VVT-iW).

To realise optimum combustion, the innovative D-4ST features both direct and port injectors.

This advanced Lexus engineering helps generate high torque from low through to high rpm ranges, high level responsiveness, as well as enhancing fuel economy.*¹

6-speed Super ECT

The newly-developed, super intelligent 6-speed automatic transmission features advanced drive-force-on-demand control logic that calculates the required engine torque to realise a high level of vehicle control in line with accelerator operation, together with a sophisticated acceleration feeling. Multi-mode Automatic Transmission and G AI-SHIFT control further contribute to driving pleasure.*²

Active Cornering Assist (ACA)

Your safety is priority with an assist that suppresses understeer when you take a corner.

Dynamic Torque Control AWD

The electronically-controlled system continually varies distribution of drive power to the rear wheels, switching from front-wheel drive to AWD to realise handling stability to suit the driving conditions, together with excellent fuel economy.*³

Front and rear suspension

The compact and highly-rigid MacPherson strut front suspension and double wishbone rear suspension were optimised to deliver agile handling and luxurious ride comfort. A close focus on individual components included refining the coil springs, stabilisers, shock absorbers, and suspension bushings.

*¹ VVT-i: Variable Valve Timing-intelligent. VVT-iW: Variable Valve Timing-intelligent Wide.

D-4ST: Direct injection 4 stroke gasoline engine Superior version with Turbo.

*² ECT: Electronic Controlled Transmission. AI: Artificial Intelligence.

*³ AWD: All Wheel Drive.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

FEATURES

The NX enhances your quality of life with its confident blend of assertive beauty, intuitive function, and refined operation.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Multimedia coordination function

This function coordinates the display of information from the multimedia systems on the 8-inch Lexus Display Audio in the centre of the instrument panel and the 4.2-inch color TFT (Thin Film Transistor) multi-information display in the meter cluster. For convenience, audio system information and incoming mobile calls can also be displayed on the multi-information display, and controlled using switches on the steering wheel.

Meters

The 4-dial meter combines a three-dimensional analogue speedometer and tachometer with a digital multi-information display that changes between blue and red illumination to highlight the drive mode selected.

Remote Touch Interface

Simple touchpad operation lets users interact intuitively with the navigation and audio systems on the display, providing easy control of the systems.

USB ports/mini-jack/power outlets

Two USB ports and a mini-jack support plug-and-play use of music players. Conveniently positioned power outlets in the centre console box and luggage space enable the charging of various devices and portable gear.

Cupholders

The cupholders for the front seats can hold two drink bottles or a handled mug. The grip of the cupholder mats makes it easier to open a bottle lid with one hand.

Sunglass holder

The sunglasses holder is conveniently located under the palm rest. The removable magnetic lid stores away in the centre console box. A flocked surface inside the holder protects sunglasses against scratching.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

Luggage space

Contrasting the athletic individuality of the stylish exterior, the ample capacity of the luggage space highlights the practical convenience of the packaging and smart design of the cabin. The back door opens wide to provide easy access to a flexible space that can accommodate three full-set golf bags, or different sizes and combinations of suitcases, while accommodating passengers in the rear seats.

Power folding rear seats

Enhancing versatility and convenience, the rear seats can be reclined at the touch of a button integrated into each rear seat. They can also be folded flat or upright using switches in the rear seats, luggage space and the driver's-side instrument panel.

(Available for NX 300 Premium variant only.)

Power back door with handsfree function

Convenient controls for the power back door are set in the instrument panel and Electronic Key, as well as a closing switch in the bottom of the door. When your hands are occupied, just perform a kicking motion below your boot to conveniently open the power back door up.

(Available for NX 300 Premium variant only.)

The 3-Beam LED headlamps that symbolise sharp sporty performance, together with wide L-shaped LED rear combination lamps that seem to stand out from the back door, express an individuality that can't be hidden, even from a distance. In the cockpit, switches are laid out for easy operation to enable the driver to focus on driving.

The spacious interior is designed for relaxation in all seats, enveloping the driver and passengers in comfort. An exhilarating driving experience awaits as soon as you've loaded your bags into a roomy luggage space that accommodates various uses.

Ultra Compact 3-Beam LED headlamps

The ultra-small 3-Beam LED headlamps combine advanced design with excellent light distribution. LEDs in the sequential turn signal lamps illuminate sequentially in a flow from the inner side to the outside of the vehicle.

LED rear combination lamps

The distinctive Lexus L-shaped lamps look like a brilliant crystal, even in daytime. The wide LED sequential turn signal lamps illuminate from the inner to the outer side of the lamp to intuitively convey the turn direction.

Door mirrors

Combining form with function, the sculptured door mirrors embody the strength and luxury of the exterior design, reduce wind noise through excellent aerodynamics, and provide an excellent field of view.

SAFETY

Anticipating the unexpected, the NX cocoons occupants with active and passive safety measures.

Note: Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

LEXUS SAFETY SYSTEM+

Lane Tracing Assist (LTA)

When Lane Tracing Assist is activated, it alerts the driver of possible lane or road deviations and helps assist steering to avoid them. In addition, while driving on highways and automobile-only roads with Dynamic Radar Cruise Control (DRCC) with Stop & Go Function activated, it helps assist steering to keep the vehicle in the lane.

Dynamic Radar Cruise Control (DRCC) with Stop & Go Function

In addition to maintaining a constant speed, Dynamic Radar Cruise Control (DRCC) with Stop & Go Function uses the millimeter-wave radar and camera sensors to detect a vehicle driving ahead and maintain an appropriate distance between vehicles. Whether at highway speeds or in stop-and-go traffic, DRCC helps to detect if you get too close and automatically slow your vehicle - even to a complete stop.

Pre-Collision System (PCS)

When the millimeter-wave radar and monocular camera sensors detect a vehicle ahead*¹ and determine that a collision is likely, Pre-Collision System alerts the driver and activates pre-collision brake assist when the driver depresses the brake pedal. If the driver cannot depress the brake pedal, it activates the pre-collision brake to help avoid a collision or mitigate the impact force.

Adaptive High-beam System (AHS)

The system detects the headlamps of oncoming vehicles, tail lamps of preceding vehicles, and brightness of the surrounding area. When it detects a vehicle within the area illuminated by the high beams, it disables/enables 11 LEDs on each side to minutely adjust the lit and unlit areas, optimising light distribution. By partially blocking light from the high-beam headlamps so that they don't directly project onto a preceding or oncoming vehicle, the system helps contribute to safe driving at night.

Blind Spot Monitor System

When the quasi-millimetre-wave radars in the rear bumper detect vehicles in adjacent lanes that aren't visible in the door mirrors, the system activates a warning indicator in the relevant door mirror the moment a vehicle enters this blind spot.

(Available for NX Premium variant only.)

Rear Cross Traffic Alert (RCTA)

To assist safe reversing, RCTA uses quasi-millimetre-wave radars in the rear bumper to detect approaching vehicles in difficult-to-see areas behind the vehicle.

When an approaching vehicle is detected, RCTA alerts the driver using a buzzer and indicator in the relevant door mirror.

(Available for NX Premium variant only.)

Wide-angle cornering lamps

Wide-angle cornering lamps provide additional illumination in the direction of travel, to the side and above, enhancing pedestrian visibility when turning at intersections.

SRS airbags

The NX features dual-stage SRS airbags (Front seats), SRS knee airbag (Driver's seat), SRS cushion airbag (Front passenger's seat) that supports seatbelt restraint by lifting the front edge of the seat cushion during a frontal collision, SRS side airbags (Front seats), and SRS curtain shield airbags (Front and rear door windows).^{*2}

^{*1} The system may not operate properly depending on the weather, road and vehicle conditions or other factors. Be sure to read the Owner's Manual carefully.

^{*2} The SRS (Supplemental Restraint System) airbags are supplemental devices to be used with the seatbelts. The driver and all passengers in the vehicle must wear their seatbelts properly at all times. Never install a rear-facing CRS (Child Restraint System) on the front passenger's seat. For a forward-facing CRS, it is recommended you use it in the rear seats. Please do not use accessories for the seats which cover the parts where the SRS side airbags should inflate. Such accessories may prevent the SRS side airbags from activating correctly, causing serious injury (Lexus genuine seat covers are specifically designed for models equipped with the SRS side airbags. To find out about availability in your area, please inquire at your local dealer). The photo shows all the SRS airbags activated for display purposes only (the SRS side and curtain shield airbags only inflate on the side of the collision in an actual accident). For details on these and other important safety features, be sure to read the Owner's Manual carefully.

Vehicles pictured and specifications detailed in this catalogue may vary from models and equipment available in your area. Please inquire at your local dealer for details on the availability of features.

SPECIFICATIONS

ENGINE		NX300 Urban	NX300 Premium
Type		In-line 4, 16-valve, Twin-scroll Turbocharged	
Variable Valve Timing		VVT-iW (Intake) / VVT-i (Exhaust)

OWNING A LEXUS IS A JOURNEY IN ITSELF, ONE THAT IS JUDGED NOT BY MILEAGE BUT BY THE COUNTLESS PRICELESS MOMENTS.

BEGIN YOUR JOURNEY THE RIGHT WAY WITH QUALITY SERVICES DESIGNED TO ENHANCE YOUR LEXUS EXPERIENCE.

CAPITAL SERVICES

LEXUS believes that perfection lies in the details. When you purchase a LEXUS, you will experience service like no other. LEXUS CAPITAL offers you flexible financial services that enable you to be in full control of your finances, as always. Applying for financing can be handled quickly and conveniently at all LEXUS showrooms.

ASSIST

LEXUS ASSIST is a 24-hour roadside assistance service provided by LEXUS. You're assured of reliable assistance via this exclusive programme aimed at creating a hassle-free driving experience.

INSURANCE

LEXUS INSURANCE is a comprehensive motor insurance packaged by LEXUS to provide LEXUS owners with tailored insurance coverage for damages to the owner's vehicle as well as any liabilities incurred by the third party.

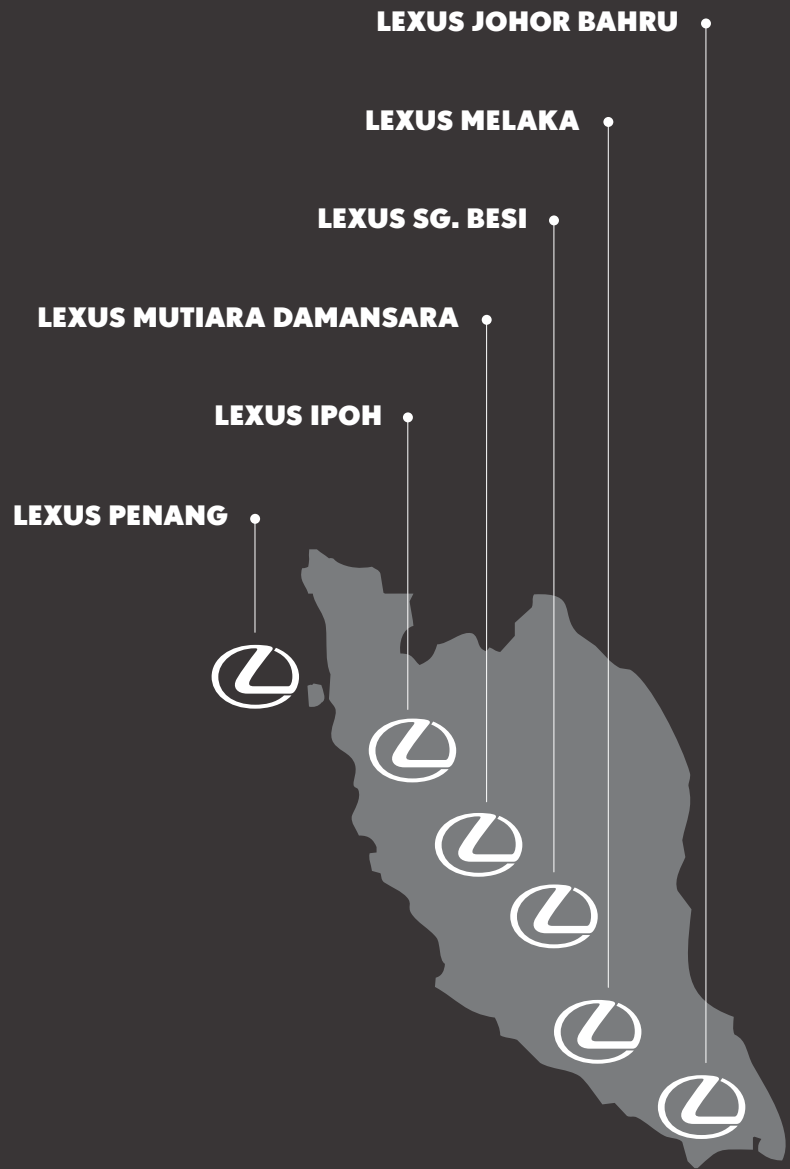

ACCESS

LEXUS ACCESS is a comprehensive vehicle leasing programme designed to bring you even closer to driving a LEXUS. Complementing our Flexi Plan and Islamic Financing Plan, LEXUS ACCESS offers you yet another option to experience the perfection embodied by a LEXUS.
