IMPRESSIVE FLEXIBILITY

Whether you're following the daily routine or loading up for a weekend outing in the countryside, the all-new KORANDO demonstrates an amazing ability to adapt to the needs of the moment thanks to 551 litres of luggage space. The wide tailgate and two-level magic tray combine the strengths of a sedan and SUV to make life a lot easier.

EXCITING DRIVING DYNAMICS

From the moment you settle into the driver's seat, press the start button and shift into gear, you instantly sense the all-new KORANDO's responsiveness and impressive power. Press down on the throttle and its outstanding driving dynamics come to life. The all-new KORANDO delivers a comfortable ride with superb stability and remains impressively quiet even at high speeds. Experience the joy of dynamic driving that only the all-new KORANDO can provide.

CLASS-LEADING PERFORMANCE

1.5 GDI-Turbo engine with improved low-speed torque performance and superior start/overtaking acceleration in the maximum torque classification, for a more exciting driving experience. The downsized, eco-friendly 1.6 diesel engine delivers best-in-class performance under any driving condition.

AWD SYSTEM

AWD optimizes power distribution between the front and rear axles to suit road and weather conditions thus ensuring optimal traction, directional stability and peak dynamic performance.

1.6 DIESEL ENGINE

Drive Mode System

Selectable drive modes (Normal/Sport/Winter) optimize traction distribution and the gear shift schedule to suit driver preferences and road conditions.

DEEPCONTROL

DEEP CONTROL technologies bring the goal of perfect safety closer than ever. Whether driving around town or taking long-haul cross-country trips, DEEP CONTROL promotes peace of mind and elevates driving confidence to a whole new level.

INTELLIGENT ADAPTIVE CRUISE CONTROL (IACC)

IACC employs radar and cameras to maintain a safe speed and distance from the vehicle ahead. IACC works in tandem with the Lane Center Following Assist which can be used not only on highways but also on city streets and also for when the brake pedal is released.

HIGH BEAM ASSIST (HBA)

By monitoring the headlights of oncoming vehicles and the rear combination lamps of the vehicles ahead, HBA analyzes ambient light levels to automatically switch between high and low beams.

AUTONOMOUS EMERGENCY BRAKING SYSTEM (AEBS)

On detecting a pedestrian or another vehicle within the intended path, AEBS will automatically deactivate the throttle and will apply the brakes to reduce the risk of a serious collision.

LANE KEEPING ASSIST SYSTEM (LKAS)

LKAS uses a front camera to monitor the painted lane markers. On detecting an attempt to change lanes without prior signaling, it automatically corrects the electrical power steering system to keep the vehicle within the intended lane.

DRIVER ATTENTION ALERT (DAA)

Driving patterns are continuously monitored and as soon as a pattern of drowsy driving is detected, DAA sounds an alert and advises the driver to take a break.

74% High Tensile- Strength Steel

To ensure uncompromising rigidity and safety, premium grade-HTSS accounts for 74% of the all-new KORANDO structure - more than any other vehicle in its class. The all-new KORANDO also features some of the most advanced N.V.H. (Noise Vibration Harshness) technologies to realise a whisper-quiet ride.

7 Airbag System

PERFECT SAFETY

ELECTRONIC STABILITY PROGRAM (ESP)

ESP employs a combination of throttle intervention and braking of individual wheels to help maintain directional stability over all types of road surfaces and in adverse weather conditions.

ANTI-ROLLOVER PROTECTION (ARP)

ARP adjusts the amount of engine output and braking power delivered to each individual wheel while driving around sharp turns

BRAKE ASSIST SYSTEM (BAS)

On detecting a panic braking situation, BAS boosts braking pressure to its maximum thus reducing the braking distance

EMERGENCY STOP SIGNAL (ESS)

During hard braking, ESS automatically activates the emergency flashers thus warning the vehicles behind.

HILL DESCENT CONTROL (HDC)

On extremely steep hills, activating the HDC function will automatically shift the vehicle into low gear and begin pumping the brakes to maintain a safe and slow descent.

HILL START ASSIST (HSA)

When the driver lifts his foot off the brake while starting on a steep hill, HSA will momentarily maintain braking pressure until the throttle is applied so that the car does not roll backwards.
