Way of Life!

Jimny Sierra shown throughout with optional fog lamps.

From the small car experts

As world leaders in small car design our idea was to build a 4x4 that was tough enough for serious off-roading, but also perfectly suited to everyday life in the city. In 1970 the LJ10 was launched to world acclaim. Then in the eighties the trend-setting SJ Series became a big hit with Kiwi adventurers. Later it became known as the Samurai and a decade later we gave it the name that had been used in Japan since day one – Jimny. After 42 years the idea remains the same. Affordable, fun, easy to drive, on or off-road adventure – and one of the cleanest, most economical SUVs in the world. It's an idea that's still years ahead of its time. From Suzuki, The Small Car Experts.

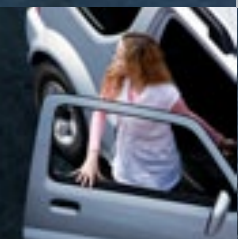

Jimny Sierra shown throughout with optional fog lamps.

Take your fun to the limit

No matter how much you enjoy the day to day, sometimes you need to push the limits and just see where life takes you. That's when you need a reliable mate who won't let you down. A faithful companion who goes wherever you choose and, when the journey ends, always gets you home safely. Jimny was made to roam. In the city, in the country, up and down mountain trails and out the back of beyond. Powerful yet compact and economical, practical yet so much fun. A real 4X4 for those who love life.

Every day is a new adventure

While Jimny loves to roam, it's also right at home in the city. The daily commute takes on a whole new sense of fun when you get behind the wheel of your Jimny. A striking presence and a great sense of style is just the beginning: Jimny is easy to manage, even in heavy traffic and tight spaces. The driving position keeps you heads above the crowd and alert to whatever the busy city tosses your way. Inside you'll be comfortable and secure in the knowledge that this off-roader is tough enough for the big outdoors, so it's sure to take good care of you in town.

The real deal all the way

At the heart of your Jimny is class-leading 4WD technology and a sturdy, ladder-type, three-section frame that stabilises the ride and absorbs shock from the roughest terrain. The rigid frame is complemented by eight body mounts and comprehensive noise reduction measures to ensure Jimny runs smoothly and quietly. High performance, three-link coil suspension handles both highway curves and rocky slopes with assurance.

Large diameter front disc brakes are

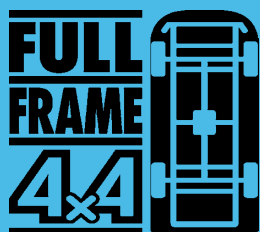

servo assisted, so less effort is needed on the pedal. Generous approach and departure angles give you extra confidence for climbing hills.

An economical 4-cylinder 1,328 cm³ DOHC engine provides all the lean muscle you need for dynamic performance, with plenty of torque to handle the toughest conditions like dirt roads and snow.

Jimny is equipped with your choice of a four-speed automatic or five-speed

manual transmission. A lock-up function on the automatic transmission boosts fuel economy at highway speeds.

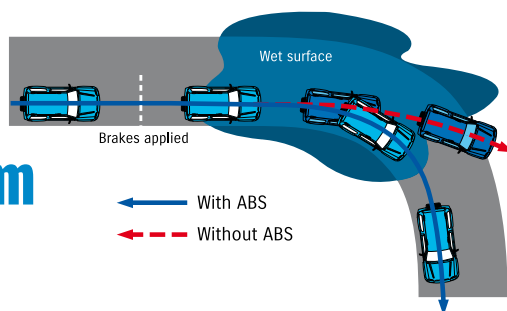

The engine puts its power through a Drive Action 4X4 system with air locking hubs, that allows on-the-fly shifting between 4WD and 2WD modes, so you can respond to changing conditions in an instant. In 4WD mode, you can select high ratio for slippery conditions or low ratio for off road slopes and extra traction.

A full, ladder type frame is at the heart of Jimny's tough off-road ability.

Travel easy, travel safe

In new Jimny, comfort and safety are just as important as style. Contoured seats are designed to cradle your body, strategically positioned compartments fall easily to hand, and all essential instruments and controls are right where you need them. It's all designed to keep you feeling fresh and in control no matter what the driving conditions.

You'll also find a surprising amount of luggage space, with multi-folding front

and rear seats to provide easy access and room to store larger items. Seats are upholstered with quality, hard-wearing fabrics, and there are also power door locks, electric windows and air conditioning standard on the Jimny Sierra.

Active safety is a core part of Suzuki's comprehensive approach to driver and passenger protection. Excellent visibility, handling, braking and acceleration are always your first line of defence in an

emergency, but just in case, the Sierra is equipped with anti-lock braking (ABS) to improve control. For passive safety, every Jimny is fitted with dual SRS airbags, a rigid body structure with built-in crumple zones, and side impact beams in the doors. Front and rear seats have three-point seat belts with pretensioners in the front positions.

Clever storage makes the most of Jimny's interior space, with split folding seats that optimise luggage space for those weekend trips and back country adventures.
