

ALL-NEW MAZDA3

MAZDA VISION COUPE

Classic proportions further elevated via the delicate art of creating light and shadow by human hand. Mazda redefines the image of elegance through a sculpted minimalist form that comes alive with a sense of warmth and seductiveness.

MAZDA RX-VISION

A mature expression of dynamic vitality through simplicity. The Evolved Kodo Design language adopts the 'less is more' Japanese aesthetic. Doing away with excessive character lines allows the movement of reflections to make the form come to life.

We believe in the power of human potential; creativity, imagination and the amazing things we're all capable of when we're inspired.

We believe in taking the unconventional road and going the extra mile to do work that inspires.

We believe in artisans, designers, engineers and ambassadors who pour human energy into their work.

We believe in the power of cars to move human emotions. To awaken senses, heighten reflexes, make pulses race.

We believe the joy of being alive comes from what we discover on our journey, and the inspiration we find in every mile.

Mazda makes you feel alive.

SEDUCTIVE AND SPORTY

Despite sharing the same nameplate, the Mazda3 Sportback and Sedan exude different personalities. A powerful and solid presence, the Sportback is a dynamic expression of seductive and lasting appeal.

Mazda3 Sportback: design that liberates the spirit. With sensuous, free-flowing curved surfaces that reflect your ever-changing surroundings, evoking powerful emotions of freedom and self-expression. Opening up a world beyond conventions, where only you set the limits to your imagination and what you can achieve. It's design elevated to a provoking work of art.

ELEGANCE AND REFINEMENT

The Sedan's flowing, graceful profile lends itself a sophisticated presence with a calm, refined air. A mature audience will certainly appreciate its exterior's smooth surface movements and elegant beauty.

MOTION INSPIRED BY YOU

SKYACTIV-VEHICLE ARCHITECTURE

From the time we learn to walk, we learn to control our center of gravity – and thus our balance – entirely without conscious thought. It becomes as natural as breathing. And it is the inspiration for Mazda’s Skyactiv-Vehicle Architecture, aimed at enabling you to fully maintain your balance even inside the vehicle.

G-VECTORING CONTROL PLUS (GVC PLUS)

GVC Plus is one more way Mazda's human-centric engineering makes vehicle movement more responsive, more confidence-inspiring and just more comfortable. As you enter a bend, GVC Plus momentarily lowers engine torque to transfer weight to the front wheels and enhance grip. Then as you go through the curve, engine torque is restored to shift weight rearwards for greater stability. Finally, as you exit the bend brake force is slightly applied to the outer wheels to help recover straight-line running.

CLEANER, MORE EFFICIENT ENERGY

SKYACTIV-G

Conventional internal combustion engines only harness around 30% of the potential energy in the fuel they consume: the rest is wasted. So Mazda developed Skyactiv-G, a high-efficiency engine that compresses the air-fuel mixture to a much higher degree than in conventional powerplants, squeezing far more energy from every drop of fuel. This high compression ratio, unparalleled among mass production engines, delivers both sheer driving pleasure and outstanding fuel economy.

The all-new Mazda3 is available with the following engines:

2.0L Skyactiv-G • 154 PS, 200 Nm

1.5L Skyactiv-G • 111 PS, 146 Nm

THE SENSIBILITY OF SOUND

MAZDA HARMONIC ACOUSTICS

Assured control of sound in the cabin — whether noise or music — is another key element of driving pleasure, superbly achieved by Mazda Harmonic Acoustics. This far-reaching audio initiative was developed to create a quiet cabin that insulates you from unwanted and distracting outside noise, while still allowing for the subtle sounds from the road and engine that add to the driving experience. It also drove the design of the audio system to deliver the same rich sound at both low and high volumes. Particular attention was paid to speaker placement to give deep, satisfying bass and clear, well-localized mid- and high-frequencies. The result is detailed, natural reproduction of music with astonishing depth and clarity at any volume.

REASSURING SAFETY, DRIVING ENJOYMENT

MAZDA i-ACTIVSENSE

Mazda expanded the concept of safety, taking it beyond the conventional thinking on advanced safety technologies to also include the driving position, information layout, visibility, and driving dynamics. It's an ongoing effort to provide a safe and reassuring experience for everybody, including passengers in the rear seats, with the ultimate aim of making accidents a thing of the past. Mazda engineers developed i-Activsense, a suite of advanced safety technologies that includes Driver Monitoring, Front Cross Traffic Alert (FCTA), Smart City Brake Support (SCBS),

and Cruising & Traffic Support (CTS) to further enhance the driver's awareness of potential hazards. This evolving and all-inclusive approach to safety takes Mazda closer to its final goal of eliminating traffic accidents and enhanced driving pleasure.

DRIVE NATURALLY AND SAFELY

Experience confidence-inspiring ease of operation. The all-new Mazda3 provides the pleasure of a natural, comfortable, relaxing and safe drive.
