Rear

Front

Blacked-out pillars

Aggressive front grille and bumper grille

LED signature illumination

Rear

Retaining representative characteristic

Implementing a daring transformation while retaining the symbolic characteristic of the Swift led to evolution into a completely new car.

1. Strong shoulders with sense of European vehicle solidity
2. Blacked-out A-pillars for wrap-around windows
3. Dynamic side-window treatment
4. Distinctive vertically arranged lamps

Emotional character that bespeaks evolution

Short, low and wide-proportions that tell of a low centre of gravity and a muscular form embody the Swift's powerful presence.

1. An aggressive front grille with a wide opening and bumper grille that supports it express strength.
2. The muscular character line of the fenders highlights the emotional impact.
3. Blacked-out pillars create the look of a floating roof, underlining a low centre gravity nimbleness.
4. Pillar-mounted rear door handles add both style and sporty flair.
5. The signature LED illumination of the headlamps and rear combination lamps give a high-tech impression.

Headlamps

Rear combination lamps

Fog lamps

Wheel and tyres

GLX

Features LED Projector Type Headlamps with LED position Lamp that conveys high-tech impression. (GLX)

GLX

Horizontally arranged rear combination lamp utilizing energy saving LEDs with U-Shaped signature line (GLX)

Front fog lamps help maintain forward vision in dense fog.

16-inch alloy wheel

16" polished surface alloy wheels with 185/55 R16 tires. (GLX)

Interior

Innovative Styling

D-shaped steering wheel

A round horn pad that projects solidity and D-shaped steering wheel, which is often seen in race cars, highlight a sense of speed.

Child seat anchorages

ISOFIX-compatible lower anchorages for easily securing child seats and top tether anchorages are standard on rear seats.

Rear seats

The rear seats feature easy-to-fold, single action back seat, equipped with head restraint.

Meter Cluster

Minute scaling tachometer and speedometer with strong chrome accents, equipped with 3.5" monochrome LCD that show information display. (GLX)

Automatic Air Conditioner

The automatic air conditioner features a control panel with three-in-a-row controls for ease of use and a display that uses high-contrast LED lighting for easy recognition.

8-inch Infotainment System

Driving Performance

Variable gear ratio steering that provides a direct-response and quick steering feel

A variable gear ratio steering system increases responsiveness when beginning to turn the steering wheel, achieving direct response and quick handling.

Exceptional aerodynamic performance

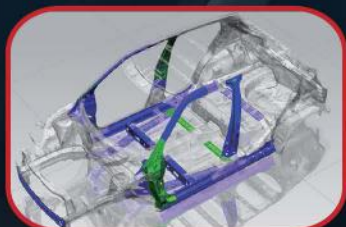

Fully employing CAE (Computer Aided Engineering) from the design development led to the achievement of exceptional aerodynamic performance.

A suspension for excellent driving stability and riding comfort

Used along with new generation platform is a newly designed, light and highly rigid suspension that retains the Swift's characteristic of direct-response steering and at the same time provides a supple and comfortable ride.

Light and highly rigid body

Brake that contribute to solid footwork

Ventilated Disc Brake on front and solid disc on rear. (GLX)
The reduced weight of the brake make an addition to reduced unsprung weight to contribute to solid footwork.

New Generation Platform

The Swift rests on a new generation platform that delivers enhanced fundamental vehicle performance due to being light and highly rigid. The new frame is characterized by a smooth, curving form that efficiently disperses energy, enhancing collision safety.

A minimum turning radius of 4.8m

Improving its manoeuvrability, The new Swift has a minimum turning radius of 4.8 m smaller than the previous model. (In comparison from previous Swift 1.4 with same 185/55R16 tyres).

Noise and vibration countermeasures that thoroughly addressed issues at the source

Much attention also went into addressing NVH (noise, vibration and harshness) issues. CAE played a role in increasing body stiffness and controlling vibrations. Furthermore, the optimization of noise insulation performance has resulted in a three percent improvement in quietness at 100 km/h, compared to the current Swift.

1.2 petrol engine (k12M)

Now made more compact, The 1.2 gasoline engine with direct action intake delivers fuel economy due to its improved combustion chamber, higher compression ratio, reduced friction and lighter weight.

Engine specifications

Number of cylinders	cc	4
Displacement		1,197
Compression ratio		11.0
Maximum Output	hp/rpm	82 / 6,000
Maximum Torque	N.m/rpm	113 / 4,200
Valvetrain		DOHC w/ Intake VVT Direct Action

Continuously Variable Transmission (CVT)

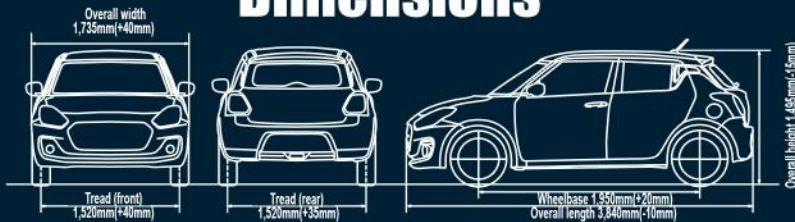

The CVT on the new Swift comes with an auxiliary transmission that has large gear ratio width, enabling better acceleration at low speed and improved fuel economy at high speed. (Also available in 5 speed MT in GL variant)

Smart Packaging

Dimensions

	New Swift (2WD)	Current Swift (2WD)	Difference
Overall length	3,840mm	3,850mm	-10mm
Overall width	1,735mm	1,695mm	+40mm
Overall height	1,495mm	1,510mm	-15mm
Wheelbase	2,450mm	2,430mm	+20mm
Tread*	Front	1,520mm	+40mm
	Rear	1,520mm	+35mm

In contrast to the trend of competitors to increase in size, the new Swift is shorter, making it easy to handle and highlight its agile and solid character. At the same time, to create more room, the new Swift has a wheelbase that is 20mm longer than the previous model. Vehicle height that is 15mm lower and vehicle width that is 40mm wider accentuate the new Swift's low and wide form.

Improved interior comfort

Even though overall vehicle height has been lowered, lowering the seating positions has ensured sufficient head clearance - the same as the current Swift for the front seats and 23mm more vertical space and lateral space for the rear seats. The front seats have been shifted 10mm to the outside creating more space between front-seat occupants.

Plentiful storage space for small items

Note: Standard on GLX and GL

Luggage space with expanded capacity

The new Swift has 265 litres* of luggage space, or 54 litres more than the current Swift. The luggage space is 50mm longer, and optimisation of its shape in every detail allowed expanded storage capacity without sacrificing exterior styling.

*Measured using VDA method.

Advanced Safety Features

Light, impact -absorbing

The new Swift's body design centres on Suzuki's TECT concept, resulting in a structure that efficiently absorbs and disperses the energy in the event of a collision.

**SRS
AIR
BAG**

Pedestrian injury mitigating body

The structure of the new Swift's bonnet, front windscreen wiper area, front bumper and other parts absorb impact with the aim of mitigating head and leg injuries in the event of collision with pedestrian.

1. Impact-absorbing cowl top
2. Impact-absorbing wiper system
3. Impact-absorbing bonnet hinges
4. Impact-absorbing bonnet
5. Impact-absorbing bumper

Available Colors

Metallic Star Silver 4 (ZTS)

Pearl Pure White 3 (ZYG)

Metallic Speedy Blue 3 (ZYH)

Metallic Mineral Gray 2 (ZTU)

Pearl Super Black 2 (ZTT)

Pearl Ablaze Red 3 (ZTW)
