

A BREED AHEAD

NEW TOYOTA CAMRY HYBRID

Disclaimer: Toyota Motor Philippines Corporation reserves the right to change the vehicle specifications without prior notice. Vehicle featured is the Camry 2.5V HEV.

AHEAD IN TECHNOLOGY

The Toyota Camry Hybrid stays ahead of the game with its hybrid technology and greener innovations.

AHEAD IN POWER: HYBRID ELECTRIC VEHICLE SYSTEM

Top performance and fuel efficiency in one powerful engine - a sustainable hybrid that switches on gas and electric power.

- 2.5L Hybrid Engine
- Hybrid Powertrain
- Driving Modes - Eco, Normal, Sport
- EV Mode

HYBRID

Toyota gives you the full benefit of advance Hybrid Technology: seamlessly combining an efficient gasoline engine and a high-output electric motor that self-charges for maximum fuel mileage.

No plug-in needed

IDLE/LOW SPEEDS

When sufficiently charged, the battery powers the vehicle to save fuel.

ACCELERATION

Both the engine and battery supply power for optimum performance.

REGENERATIVE BRAKING

The motor generator recovers the kinetic energy from braking which recharges the hybrid battery.

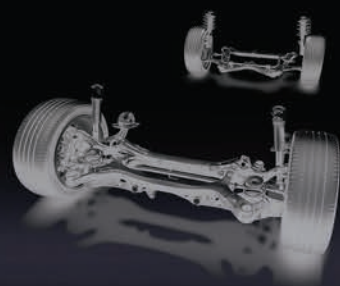

Years of research and hard work have allowed us to create a standard that we will never stop surpassing – continuously redefining driving performance, style, and comfort.

AGILITY

Crisp and responsive handling make sure you're always in control.

- Front MacPherson Strut Suspension
- Rear Double Wishbone Suspension
- Low center of gravity

STABILITY

Stay steady cruising at high speeds or winding roads.

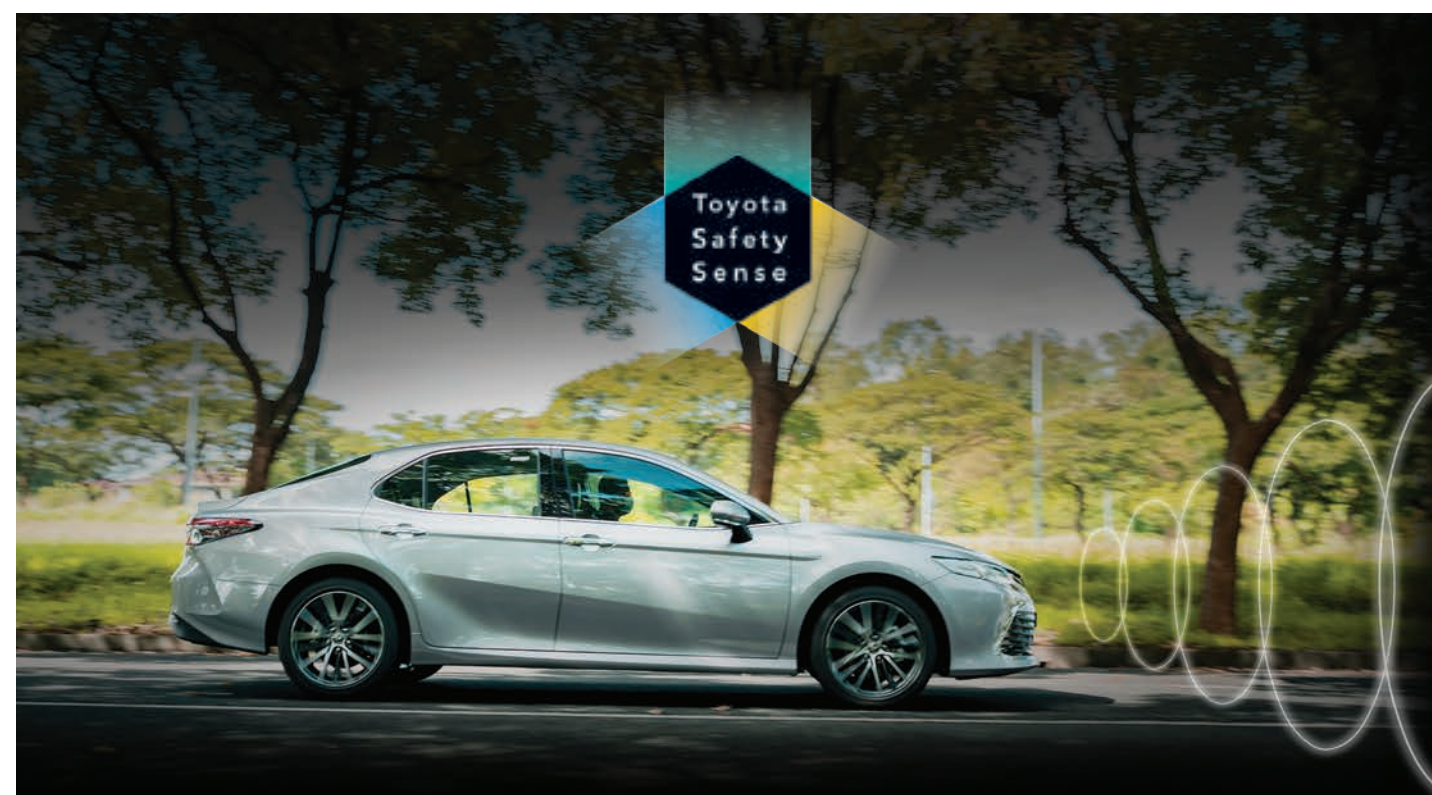

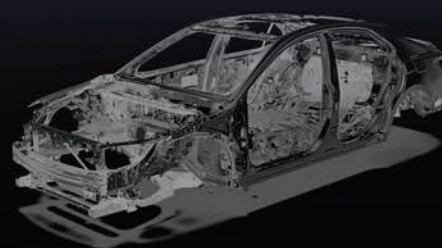

- Strengthened ring structure around door openings
- Strengthened ring structure behind back seat

VISIBILITY

Wider, easier than ever keeping your eyes on the road.

- Reduced cowl height
- Thinner instrument panel and front pillars
- Taller windows

PRE-COLLISION SYSTEM (PCS)

When your car senses an imminent collision from a sudden stop of the car you're following or from delayed braking on your part, the Pre-Collision System activates instantly to give you a visual and audible warning while arming your brakes in advance, to enable you to stop the car quickly and effectively.

DYNAMIC RADAR CRUISE CONTROL (DRCC)

When activated, sensors continuously monitor the distance of the vehicle ahead of you and automatically adjusts your cruising speed to maintain a consistently safe distance between you and the vehicle in the front.

AUTOMATIC HIGH BEAM (AHB)

The Automatic High Beam feature senses oncoming vehicles and automatically toggles your headlights' high and low beams appropriately.

LANE TRACING ASSIST (LTA)

You may not always be aware when a distraction or the effects of fatigue can cause you to swerve off lane. Lane Tracing Assist and Dynamic Radar Cruise Control aids in keeping you on the right lane. When you're about to swerve off lane, LTA will gently but firmly nudge you back to safety.

LANE DEPARTURE ALERT (LDA)

With a highly-audible beep and an instantly-perceptible warning light, the Lane Departure Alert quickly activates when it senses that you're gradually veering away from your proper lane, preventing any potential mishaps.

AHEAD IN STYLE

Toyota prestige at first glance. Every ride looks good and feels good with premium touches and spacious interiors..

LED HEADLAMPS + FOG LAMPS
