MOTOR SHOW
BEST IN CLASS
PERFORMANCE
INTERIOR & TECHNOLOGY

The midsize without compromise. Who says when you reach a certain age you have to settle for a certain car? With the Passat, you gain everything without losing anything. A midsize that outsizes other midsizes, inside and out. Remember, it's only a family car when the family is in it. That's the Power of German Engineering.

Quality. When something is built solidly, you can feel it. Or, in this case, hear it. It all starts with laser seam welding that provides a premium build quality you can see and that solid door "thunk" you can hear every time you close the door. Add the "Vienna" leather seats, leather-wrapped steering wheel, and shift knob, and you'll understand how the Passat makes its quality apparent with all the premium materials to prove it.

Interior. In a world that keeps getting smaller, the interior of the Passat makes it a point to stay nice and roomy. The cabin seats five adults comfortably with superior rear legroom that inspires envy in other midsize sedans. It also has cargo space that can handle enough luggage for a family vacation, or all the stuff you'd need for that business meeting. Roomy enough for you, your work, and your family's needs.

Technology. We all like having the latest technologies. That's why we gave the Passat features like an all-new Discover Pro touchscreen system with navigation, ergoComfort seats with memory and a rear-view camera. With all of the new technologies on the Passat, the best seats in the house can now be found in your driveway.

Well-equipped.

Performance. When we set out to redefine the midsize sedan, power was a strong place to start. And the Passat has that in spades. From turbocharged engines to increased horsepower and impressive driving dynamics, you'll feel German engineered performance every time you get behind the wheel. It's the kind of driving experience that might make you go in search of curvier roads or at least consider taking the long way home.

2.0 TSI engine. We took a fun, zippy engine with impressive gas mileage and turbocharged it. Which means it gives you the boost of power you need while remaining incredibly efficient. Imagine that.

6-Speed DSG. With our ground-breaking DSG dual-clutch gear-box you have two clutches, resulting in fast, smooth gearshifts and uninterrupted driving. And if you want to take control, the gear lever's tiptronic function lets you change to sportier, manual mode.

Adaptive Chassis Control (DCC) with Drive Profile Selection. Make it possible to adjust the running gear to a normal, sporty or comfortable tuning. Driver Profile Selection allows driver to choose different driving modes: Sporty, Comfort, and Normal.

ErgoComfort leather seats with 12-way front seats and driver seat memory. With the ergoComfort seat you can take advantage of spinal-optimal sitting postures during your trips. Adjust the seat to the configuration that best suits you for a healthy ride which has been awarded by official spinal health associations.

Discover Pro with Navigation System. A premium navigation and entertainment system, the Discover Pro gives the discerning driver a single device to control and deliver everything from navigation, to driver aids such as proximity sensors, MP3, WMA and AAC music playback to film playback, eco-trainer and intuitive control and operation, designed along the lines of current Smartphone logic.

Tech Specs

Engine	2.0 TSI DSG Highline	2.0 TSI DSG Business Edition
Engine Type	4-cylinder, In-line, Turbo Fuel-injected Gasoline Engine	
Displacement	1,984 cc (2.0L)	
Max. Output, kW (Ps) at rpm	162kW (220 Ps) at 4,500-6,200 rpm	
Max. Torque, lb-ft (Nm) at rpm	258 lb-ft (350 Nm) at 1,500-4,400 rpm	
0-100 km/h	6.2 secs

State of the art safety systems.

Safety. Installed active safety measures reduce the likelihood of an accident for those days and moments when a little extra caution is necessary. And in those instances multiple passive safety systems protect you and your passengers.

Airbags. In the case of a potential accident, seatbelts will automatically tighten and windows will automatically close to assure maximum functionality of the airbag system. Front, side and curtain airbags are there to protect the passengers wherever the impact may be.

Rear View Camera.* The camera shows the area behind your car on the radio/navigation display, offering you a clear reversing image with easy-to-follow graphic lines guiding you through fuss-free, smooth parking.

LED Headlights. LED headlights with projection technology look sensational and include signature dual "U-Shaped" LED daytime running lights, Dynamic Headlight Range Adjustment and Dynamic Cornering Lights.

Active Info Display.* This turns the cockpit into an interactive experience, providing you with various kinds of driving information simultaneously within the digital display. You can control the Active Info Display by using the multi functional steering wheel where you can switch between the different info profiles.

Driver Alert System. Gives an early warning when the system detects you need to take a break on long and tiring journeys, making motorway driving safer.

* in selected models

1- Panoramic Sunroof
2- Interior in Titanium Black
3- Dashboard
Opposite- Interior in St. Tropez
