

THE ALL NEW
MG ZS EV

ALL ELECTRIC,
FULLY LOADED!

SAY HELLO TO

THE ALL NEW
MG ZS EV

The SUV that gives you more and now takes you even further.

The New ZS EV is here to give you a thrilling new perspective on electric mobility. With the latest design elements and the best of luxury and support features, this is the most technologically advanced MG ever.

The New ZS EV includes an extended range up to 429 kilometers on a single charge*, fast charging, a 360 degree camera and a whole lot more.

*From a single charge on the WLTP combined cycle: Combined Range: 320 km; City Range: 429 km. Actual figures may differ under real world driving conditions and will vary depending on factors including (but not limited to) driving style, vehicle's equipment and road, traffic and weather conditions.

MORE CONTROL

MORE SAFETY

EUR

BOLD URBAN DESIGN

In the ZS EV, electric efficiency goes hand-in-hand with head-turning modern styling. The streamlined, grille-less front exudes confidence, and the new front lights combine 21 LED units for a strong contemporary look.

Follow the sleek lines down to the rear and you'll see the newly-designed LED tail lamps that give the car a bold, distinctive expression.

With enhanced exterior style comes added practicality. The updated charging port, found behind the grille area, has been redesigned for easier access, with a spring-loaded cover that opens sideways and creates a better seal.

CONFIDENCE ON THE INSIDE

Slip inside ZS EV and you'll see that every inch of the stylish, spacious interior has been meticulously designed to ensure that the driver and passengers enjoy the best of comfort and accessibility.

FEEL RE-ENERGISED

Sit back and enjoy the immersive 3D sound of the 6-speaker sound system, while your smartphone sits in the wireless phone charger. And with three USB ports, everyone on board can easily charge their devices at the same time.

FEEL RELAXED

Surrounded by modern stitched leather style upholstery and with an opening panoramic sky roof above – you can recharge in comfort. Meanwhile, the redesigned automatic air conditioning features a high class air purification system to create and maintain the perfect atmosphere.

FEEL IN CONTROL

The highly advanced features of the ZS EV are simple to control via a redesigned 10.1" floating touchscreen control panel that's easy to read, even in strong sunlight. Just reach out and tap Apple CarPlay, Android Auto, satellite navigation and more.

ELECTRIFYING FREEDOM

The ZS EV is designed to make the most efficient use of energy and time. At the heart of its electric powertrain is a lithium-ion battery, water-cooled to optimize charging and range in all weathers.

Plug it into a 7kW domestic charger overnight and you can wake up to a full charge. Or, if you're on the go, just head to a public charging point and the ZS EV can be rapid charged from 10% to 80%.

On the road, you'll also benefit from three levels of regenerative braking – designed to extend your driving range, by enhancing efficiency and energy conservation.

REFINED PERFORMANCE

In the ZS EV, you can just sit back and enjoy the smooth, effortless drive - delivered by a simple-to-use automatic transmission, controlled by a rotary gear selector in the center console. There are also three driving modes: Eco, Normal and Sport, allowing the car to fully adapt to your everyday driving needs, whether over long distances or stop/start city traffic.

CARE FREE CHARGING

The ZS EV comes with a Portable Charger providing you the freedom to charge anytime anywhere. Further, a **7kW AC** charger can be acquired for home or office, to charge the vehicle at a faster rate.

WHAT IS V2L CHARGING?

V2L (Vehicle to Load) means an electric vehicle can become a wheeled power source via a simple adaptor that plugs directly into the charger socket. So instead of power going in to charge the battery, charge is sent outwards, via the adaptor, to whatever you have plugged in.

CHARGE & DISCHARGE MANAGEMENT

FEATURE:

- Convenient charging port design
- DC Fast Charging
- AC Charging
- V2L 2.5kW

ADVANTAGE:

- New charging port is more convenient to operate
- Increase the charging efficiency and decrease the charging time
- Meet the power demand of appliances

BENEFIT:

- Easier to operate
- Faster and more efficiently charging
- Enjoy a variety of outdoor leisure experiences, such as BBQ, outdoor parties, charging outdoor scooters, mobile phones and other mobile devices

MG PILOT

The MG Pilot suite is a high-tech driver assistance technology that gives you added confidence on the road. A selection of warning and alert features assist the driver, maintaining safety and simplifying everyday driving.

ADAPTIVE CRUISE CONTROL (ACC)

Adaptive Cruise Control monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by releasing the accelerator or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

INTELLIGENT SPEED LIMIT ASSIST (ISA)

The car will actively detect speed limit signs and alert the driver of the current speed limit by way of a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.

BLIND SPOT DETECTION (BSD)

This system keeps a lookout to help you change lanes safely. A radar sensor serves as BSD's electronic eye, registering objects in hard-to-see areas. Whenever there is a vehicle in the driver's blind spot, a visual signal will show next to the door mirror.

INTELLIGENT HIGH BEAM ASSIST (IHA)

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximize the use of high beam, making night-time driving safer, without the risk of dazzling oncoming traffic.

ACTIVE EMERGENCY BRAKING (AEB)

At speeds below 20 km/h, the car will automatically apply its brakes to avoid a collision with a vehicle, bicycle, or pedestrian. At speeds above 20 km/h, AEB will reduce the likelihood or mitigate the severity of an accident.

LANE KEEP ASSIST (LKA)

Lane Keep Assist uses a camera to detect lane markings ahead and monitors the vehicle's position in its lane. When the function detects the vehicle is about to unintentionally move out of its lane, it warns the driver by means of a visual, audible, and steering wheel vibration. The car will also control the steering to keep within its lane.

TRAFFIC JAM ASSIST (TJA)

When Adaptive Cruise Control is turned on, Traffic Jam Assist continuously analyses the speed of the surrounding vehicles and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 55 km/h, the driver can activate TJA. The car will automatically follow the vehicle in front, controlling its acceleration, braking, and steering within the same lane.

ANALOGUE TO **ELECTRIC**

KERS 3 LEVELS

Smart and Powerful – the ZS EV is equipped with three levels of regenerative braking, which extends your driving range, improves the braking efficiency and energy conservation

3 DRIVING MODES

SPORT

Accelerated driving mode for an exhilarated driving experience

NORMAL

Driving mode with balanced range and driving performance

ECO

Efficient driving mode to maximize range
