

# NOTE

## e-POWER

### The urban hatchback that breaks the mould

Turn heads and set yourself apart from the norm with the bold, all-new Nissan Note e-POWER. Powered by Nissan's second-generation, award-winning<sup>1</sup> e-POWER system, it offers a simple yet powerfully modern design, a trend-setting interior and thrilling acceleration.

<sup>1</sup> Named 2019 and 2021 "Technology of the Year" by the Automotive Researchers' and Journalists' Conference of Japan (RJC); and "Best Innovation" at Torque Honours 2020.

Actual specifications and features may vary from image(s) shown.

The all-new Nissan Note e-POWER has arrived

The Note e-POWER showcases Nissan's latest design concept, Timeless Japanese Futurism. The simple, yet powerfully modern and distinctive Japanese approach sets it apart from other hatchbacks. It also features the second generation of Nissan's acclaimed e-POWER electric powertrain. Extensively redesigned and redeveloped, the system produces more torque, a higher-quality driving experience and improved efficiency.

The Note e-POWER's advanced safety technology offers 360 degrees of coverage to give drivers added assistance and peace of mind on the road. A first for Nissan, 1,470 MPa ultra-high tensile steel has been adopted in the vehicle chassis, contributing to both weight reduction and improved passive safety performance. Nissan Intelligent Driving technologies are available on the Note e-POWER, giving drivers more confidence through enhanced safety, control and comfort.

Revolutionary award-winning technology

## Experience a fun and improved driving experience

By incorporating the strength, smoothness and quietness of Nissan's second-generation e-POWER system, the all-new Nissan Note e-POWER boasts an excellent driving experience, with everything you need to power your drive.

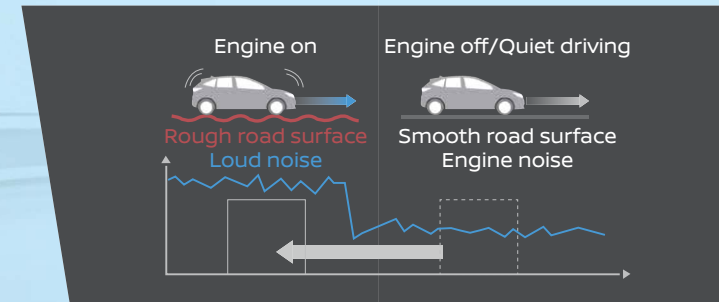

Actual specifications and features may vary from images shown.

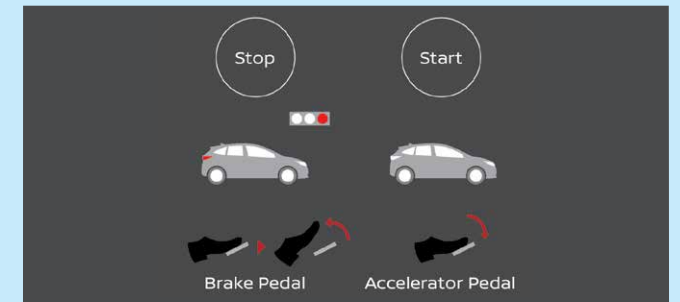

**One-Pedal Drive**  
This feature allows the driver to start, accelerate and decelerate using only the accelerator pedal. Lift off the accelerator pedal and One-Pedal Drive mimics stepping on the brake pedal, allowing the vehicle to slow down.

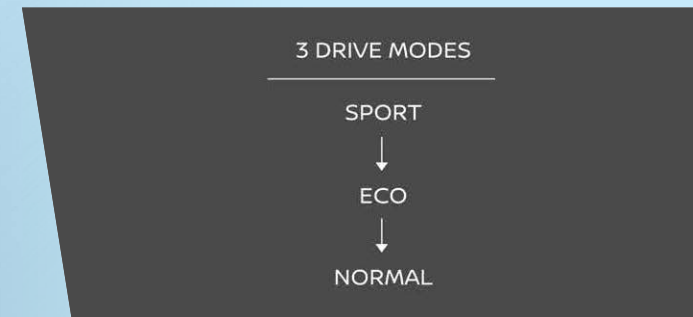

Improved electric motor output and torque  
Instantaneous torque with 100% electric drive that allows driver and passengers to better enjoy every ride.

**Good cabin quietness**  
A 100% electric motor drive and improved sound insulation create a tranquil interior for uninterrupted conversations with your loved ones.

**Electronic Parking Brake with Auto Hold\***  
The braking force is automatically maintained when the driver takes his foot off the brake pedal, providing added convenience while idling at a traffic junction.

**Discover enhanced driving**  
With the SPORT mode, drivers can experience more powerful acceleration. In addition, both SPORT and ECO modes feature One-Pedal Drive. One-Pedal Drive greatly reduces the need to shift from one pedal to the other, making driving simpler and more engaging.

\*On slopes, drivers need to step firmly on the brake pedal until it is activated. Do not use it on steep slopes or slippery roads, even if the function is working, as it may cause the vehicle to start moving. Turn off the feature during a car wash and when being towed.

## Noteworthy design

There's nothing better than getting to your destination in comfort and style. The Nissan Note e-POWER allows just that with cutting-edge technology within its interior, designed for maximum convenience, comfort and connectivity wherever you go.

*Actual specifications and features may vary from images shown.*

### Exterior

Sleek automatic LED headlamps, featuring four in-line projector lights, and fog lamps

Character lines extend from the front, carving the side profile and transitioning through the slim, horizontally-continuous rear combination lamps

### Interior

D-shaped steering wheel with multi-function controls (settings, audio, hands-free phone)

A wide opening to a spacious 340-litre boot, making loading and unloading an easier experience.

USB power socket (type A-1) for smartphone connectivity and charging.

Elegant and stylish black upholstery

# Safety built all around you

The Note e-POWER's advanced safety technologies offer 360 degrees of coverage to give you added assistance and peace of mind on the road.

## Front

Intelligent Emergency Braking with Pedestrian Detection

Intelligent Forward Collision Warning

High Beam Assist

## Rear

Intelligent Rearview Mirror

## Side

Lane Departure Warning

Intelligent Lane Intervention

Intelligent Driver Alertness

Stay safe against the unexpected

## Intelligent Forward Collision Warning

This safety technology detects changes in the situation ahead that cannot be seen from the vehicle and supports the prevention of forward collisions.

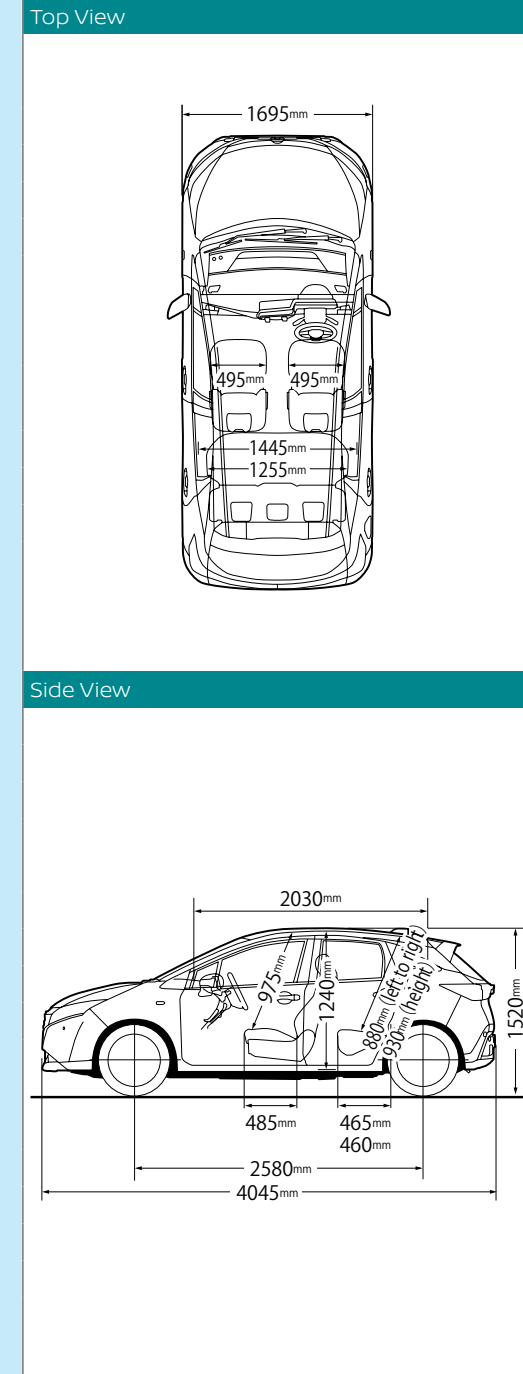

## High Beam Assist

This system automatically switches the headlamps setting to low beam from high beam when it detects a vehicle or pedestrian ahead, supporting safer driving.
