

GT-R

A LEGEND is not built on a lap time. Or a 0-60 number. it's built on obsessive attention to detail and a radical belief that a true supercar delivers performance in real-world conditions for anyone, anywhere, anytime. Perfectly refined yet brilliantly capable, in the right hands it can turn the automotive world on its head. The new Nissan GT-R: The ULTIMATE EVERYDAY SUPERCAR.

ANYTIME, ANYWHERE

The GT-R combines massive performance with the refinement of a true Grand Touring machine. The suspension filters out bumps and noise while still telling you everything you need to know. Steering effort is reduced at lower speeds for easier in-town manoeuvring, while still delivering the precision you want. It all adds up to giving you the feeling of absolute confidence as you charge out of a corner with 555 PS and supreme control at your fingertips.

The Nissan GT-R's ground-hugging aerodynamics and powerful brakes allow it to carry speed much later into a corner. But the real key to its speed is the all-wheel drive ability to put the power down much sooner in a corner. Many powerful rear-wheel drive cars usually require the driver to wait until they exit the corner before applying the power to avoid upsetting the balance of the car. In contrast, the GT-R can power out of the corner sooner and faster.

DYNAMIC BALANCE

Some consider a static 50/50 weight distribution to be perfect for Handling. However, Nissan engineers have discovered that a 54front/46 rear static ratio is ideal. When under hard acceleration, the weight distribution shifts rearward and becomes an approximate 50/50 balance. This translates into enhanced tyre contact for better acceleration, quicker corner and the sublime handling feel that the GT-R is renowned for.

SCULPT THE WIND WITH THIS LEGENDARY SUPERCAR.

CHANGE GEAR IN JUST 0.15 SECONDS

The longer a gear change takes, the less time power is being put onto the road. So for maximum acceleration, the GT-R's paddle-shift six-speed sequential dual-clutch transmission performs gear changes in just 0.15 seconds when in R-Mode - almost as fast as a blink of an eye.

Two clutches. No clutch pedal. A lightning-quick shift. Inside Nissan GT-R's six-speed dual-clutch transmission, the clutches work together. When the car is in an odd-numbered gear (1st, 3rd, 5th), the even-numbered gear (2nd, 4th, 6th) is pre-selected and ready to make the shift immediately. The transmission is so smart, it even blips the throttle on downshifts to for smoother gear changes.

Power at your fingertips: Re-designed steering wheel mounted paddle shifters help ensure that a rapid-fire gear change is easily within reach, regardless of steering wheel position.

0.15 SECONDS

COMPLETELY CAPTIVATING EVEN AT REST

SURROUNDED BY STYLE

There is mastery in every detail in the GT-R. Everything you see and touch is crafted with the highest level of care and attention, whether it is an air vent designed to operate flawlessly for years, or a switch that is subtly etched to enhance its feel. In the new GT-R, luxury and performance go hand-in-hand. The redesigned front seats are lighter than their predecessors as well as being refined for more comfort and support.

HIGH RESOLUTION 8" TOUCH SCREEN

Completely redesigned for the new GT-R, the new 8" touchscreen puts all the information you need in a single location, including audio, navigation and the driver-configurable Multi-Function Display system.

THREE-MODE SETUP SYSTEM

For road, track and almost anything in between: GT-R's three-mode system features three switches to allow on-the-move adjustment of the transmission, suspension and Vehicle Dynamic Control. Supercar performance with amazing flexibility - at the flick of a switch.

ROTARY CONTROL

The rotary control on the centre console lets you control key functions through the 8" touchscreen. Just rotate the dial or push it to the left or right to scroll through all the menus and easily select the option you require.

ERASING THE LINE WHERE THE DRIVER ENDS AND THE GT-R BEGINS

Special attention to detail makes the Nissan GT-R feel instantly familiar. The number of switches on the dashboard has been reduced from twenty seven to eleven, simplifying the layout. The controls are easy to access, simple to use and intuitively designed to maximise the pure enjoyment of driving.

NISSAN Customer Promise

NISSAN Customer Promises, we always care.

1. Transparency and trustworthy. All expenses shall be estimated and ask for your approval before providing a service to you.

2. Confidence with a 1-year or 20,000 km of repair service and part warranty.

3. Convenience with a free courtesy car*.

4. Peace of mind. Our call center and roadside assistance are available 24/7 for free**.

Remarks: *Only for product quality issue that taking time longer than 24 hrs. to repair (excluding service center holidays and normal parts delivery periods with a maximum delivery time of 3 days) or in case there is no necessary part required to make vehicles can be used in Nissan's parts warehouse and the Company does not confirm the purchase order within 24 hrs. of receipt. For both cases, the vehicle must be within the 3-year/100,000 km new-vehicle warranty period only, not extending to any other warranty extensions purchased or received, and any accident case is excluded. **Available for new vehicles within the 3-year/ 100,000 km warranty period or Free 6 months of roadside assistance is available for vehicles of which new-vehicle warranty period is expired but the vehicle continues to receive periodic maintenance service at our service center and uses authentic Nissan parts but not including Nissan's authentic alternative parts. I Subject to the terms and conditions specified by the Company.

Nissan Intelligent Mobility moves you one step ahead. In cars that feel like an extension of you, helping you see more and sense more, reacting with you, and sometimes even for you. Nissan Intelligent Mobility is about a better future – moving us to a world that’s safer, more sustainable, and exciting.
