

The new Sorento

Movement that inspires

Loaded with natural intelligence.
The new Sorento.

The new Sorento arrives with bold, dynamic contours, and provides you with a more engaging and thoughtful way to move through the world.

Even tougher underneath.

The striking design cues carry through to the rear. Vertically oriented tail lamps at each side give the Sorento a more formidable presence, especially in the dark. Its practical and agile demeanor is punctuated by black cladding and wide skid-plate.

A more personal space.

Sleek horizontal lines. Integrated displays. New instrument graphics. Intuitive controls are optimally placed for easy reach to minimize distractions. It's an open space with clean, flowing forms for you to stretch and collect your thoughts.

It's all about perspective.

Technology sometimes does more for us when we're barely aware of it. The Sorento's horizontally oriented driver interface organizes more functions in a tastefully contained, easy-to-understand way. The look is simple, but the brainpower runs deep.

Panoramic Curved Display

The integrated curved display is not only beautiful but offers a truly immersive driver experience. Its wide and expansive design provides clear, unobstructed visibility.

Digital Center Mirror

Images from the rear-spoiler camera provide a clearer view of a much wider area, day or night, rain or shine. Switch to optical mode with the flick of a lever at the base of the mirror.

Infotainment / Climate Switchable Controller

Switch the functions of the same set of controls between the climate and infotainment systems with a simple press of a button.

Fingerprint Module

Enjoy improved convenience and security by loading your personalized settings and even start the engine when you've forgotten your keys.

We all need some space.

With comfortable and supportive seating for up to seven, the Sorento sets a new standard for people-friendly use of space. Roominess, brightness, and practicality enrich every journey.

Wireless Charging Pad

The rubber-lined, wireless charging pad in the center console can quickly charge compatible smartphones.

From the texture and finish of its materials to the well-positioned and durable seats and fixtures, the Sorento elevates the experience of travel. Beauty is not just outside those big windows. It's all around you.

1st Row Relaxation Comfort Seats

While in Park mode, the driver and front passenger Relaxation Comfort Seats recline to offer a zero-gravity experience, complete with leg support.

More accommodating than ever before.

The Sorento is ready for you even before you get inside. Seats move for easier ingress, and the tailgate automatically open as you get closer. It's all about making life simpler and more efficient.

Smart Power Tailgate (including Auto Close)

Simply stand behind the vehicle for three seconds with the smart key in your possession, and the tailgate will open automatically. You can even set the opening height to fit your preference.

Ergo Motion Driver's Seat

A system of air pockets means substantial support and comfort in a slim profile. The air pressure adjusts to match the driver's individual posture, with extra side support when in Sport drive mode.

Passenger Walk-in Device

With the press of a button on the inner side of the front passenger seat, the driver can temporarily move the seat forward and fold the seatback to let rear passengers in and out more easily.

Powerful. Agile. Efficient.

With proven powerplants and precisely matched transmissions, the Sorento rises to the challenges of the road. Braking is controlled and firm, and new bushings and frequency-sensitive dampers make for a silky-smooth ride. Now more than ever, performance is about not only fulfilling your intentions, but exceeding your expectations.

Prepared for any situation.

From the moment you start out to the time you park, the Sorento is watching over you. Sensors and Advanced Driver Assistance System (ADAS) technology are working to anticipate and avoid risks and threats with masterful dynamic support — on the open road or as you ease into a parking spot.

Terrain Mode

The available terrain mode provides optimum drivetrain performance for safer driving in low grip conditions like snow, mud or sand.

10-inch Head-up Display

Vital driving information is projected onto the lower part of the windshield so you can stay safely focused on the road.

Lane Following Assist (LFA) helps you center the vehicle in the lane while driving by using the front view camera to help guide the steering based on lane markings or the car ahead.

In a state of constant vigilance.

Observing, sensing, and waiting to step in to help you avoid trouble, the latest ADAS technologies help keep you alert, safe and in control. This means keeping you at a safe distance from other vehicles and pedestrians, and even responding to unexpected situations in real time.

Smart Cruise Control (SCC, depicted above) helps you maintain a safe distance from the vehicle ahead at the speed you set. If the vehicle ahead stops abruptly, the Sorento automatically stops and then resumes acceleration.

Blind-Spot Collision-Avoidance Assist (BCA) warns you if there is a risk of collision with a rear side vehicle in the blind-spot while changing lanes. When forward exiting a parallel-parking spot, it automatically assists with emergency braking if a risk of collision with a vehicle approaching from behind is detected.

Reverse Parking Collision-Avoidance Assist (PCA) provides a warning if there is a risk of collision with a rear object while reversing. It automatically assists with emergency braking if the risk of collision increases after the warning.

Forward Collision-Avoidance Assist (FCA 2) monitors your surroundings and warns you if it detects a risk of collision with a vehicle, pedestrian or cyclist ahead. If the risk persists, it automatically assists with emergency braking. FCA 2 also assists with emergency braking if it senses a risk of collision with oncoming vehicles while turning left at an intersection, or with vehicles approaching from left or right. When changing lanes, automatic avoidance steering assistance is engaged if there is a risk of collision with an oncoming vehicle in the next lane, a cyclist or pedestrian in the intended path, or an approaching rear-side vehicle.

Surround View Monitor (SVM) displays a variety of views of the situation around the vehicle for safe parking.

Features

Wheels

17-inch alloy wheel

18-inch alloy wheel

19-inch alloy wheel

See things through new eyes. The new Sorento.

More than just a striking new presence on the road, the Sorento offers a new way of appreciating the beauty of the world passing by. A driving experience that keeps you more engaged, relaxed, and in harmony with everyone and everything around you.

Movement that inspires

At Kia, we believe movement inspires ideas. Great ideas come to you when you're on the move. Whether you're walking, traveling on a train or driving. It's why we create the spaces and the time you need to bring ideas to life.
