ALL M.

The first M models in their segment – self-confident and powerful iconic double Kidney grille and powerful air intakes /// athletic proportions and broad stance /// 21" M light alloy V-spoke style 765 M wheels, Bicolour Black with mixed tyres. **M-specific design for an interior with racing characteristics and highest control** M leather steering wheel with M1/M2 buttons /// optional Carbon Fibre interior trim /// M seats in Merino leather and illuminated M logo. **Impressive performance values** newly developed M TwinPower Turbo engine with 510hp (375kW) /// 0-62mph in 4.1 seconds /// M-specific xDrive /// M Sport differential /// Adaptive M suspension /// M Sport exhaust system. **Daily routine out. Adrenalin in. The new BMW X3 M and X4 M Competition.**

■ Standard equipment □ Optional equipment

■ The X3 M Competition offers an increase in driving dynamics and a powerful, particularly emotional engine sound thanks to increased engine performance and M Sport exhaust system with Black twin tailpipes. Distinctive exterior details in Black, the exclusive 21" M light alloy wheels and M seats in Merino leather underline the sporty character.

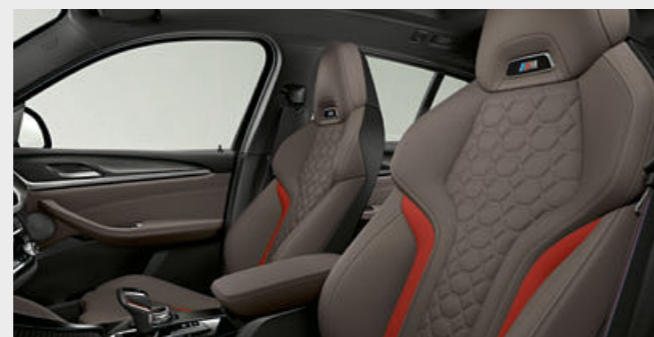

■ The M-specific suspension highlights the vehicle's great dynamic potential. In addition to the three driving modes COMFORT, SPORT and SPORT+, the driver can also choose between three different Dynamic Stability Control (DSC) settings in order to adapt the level of stabilising support to suit their preferred style of driving.

■ The high-performance M TwinPower Turbo six-cylinder in-line petrol engine features superior power delivery and silky-smooth running coupled with a sporty engine sound. With Double-VANOS, Valvetronic, High-precision injection and two turbochargers, it generates 510hp (375kW).

■ The specific model designation of the new BMW X3 M and X4 M Competition is located below the climate control unit and in a visual extension of the M-specific gear selector.

■ Finished in the highest-quality fine-grain Merino leather, shown above in Adelaide Grey, and featuring lumbar support and electric adjustment as standard, this is the sportiest yet most comfortable seat configuration for the X3 M and X4 M Competition.

■ The M Sport exhaust system delivers a particularly sporty sound and features tailpipe finishers in High-gloss Black.

■ Above the right full-LED rear light, the M model designation with Competition badge sets an unmistakable sign for dynamism and pure power.

■ The door sill finishers with the "X3 M Competition" designation can be seen on inserts in High-gloss Black in the front on the left and right.

□ The High-gloss Black Shadowline roof rails add a premium-quality touch. Lying flat on the roof, they form the basis for a multi-functional BMW roof rack unit that carries a roof box, bicycles, surf boards etc. easily and securely. (Standard for X3 M Competition).

■ 21" M light alloy V-spoke style 765 M wheels, Bicolour Black, front 9.5 J x 21, 255/40 R21, rear 10 J x 21, 265/40 R21 tyres.

■ Standard equipment □ Optional equipment

■ The BMW Icon Adaptive LED headlights with low and high-beam headlights include LED front indicators. The equipment also features BMW Selective Beam, cornering lights, daytime running lights and Adaptive headlights with variable light control for excellent illumination of the road ahead and better visibility in the dark.

■ Thanks to the use of various materials, M compound brakes achieve outstanding deceleration values and are extremely stable and highly durable. They also weigh less, which has a positive impact on agility, dynamics and acceleration. The Blue metallic brake calipers with the M designation are the hallmark of these high-performance M-specific brakes.

■ The Start/Stop button allows the engine to be started without using the key once the vehicle has been unlocked. It can also be used to stop the engine. The vehicle key is recognised automatically, without having to insert it.

■ The M leather steering wheel including multi-function buttons, the M badge, Chrome detailing and an integrated driver-side airbag has the Double-spoke design. Featuring a steering wheel rim in Black leather with colour contrast stitching and contoured thumb rests, it feels great in the hand. The driver can also use the M Drive buttons to select the desired settings whilst driving.

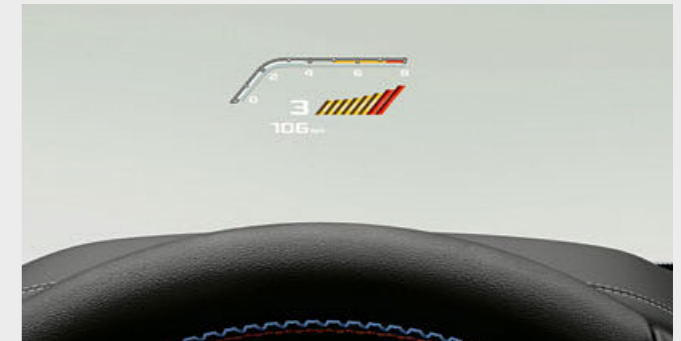

■ The outstanding harman/kardon surround sound system features a 600W digital amplifier, nine channels and 16 speakers. Its sophisticated sound perfectly fills the interior space. Vehicle-specific, speed-dependent equalising precisely compensates for any background driving noise.

□ Enhanced Bluetooth with wireless charging enables a Bluetooth connectivity and the technical capacity for a WiFi hotspot. The universal, wireless smartphone charging dock only functions with compatible smartphones. For smartphones without an inductive charging function, special charging cases are available to purchase via BMW Parts and Accessories for selected devices.^{1,2}

■ The M gear selector switch features an M-specific switch pattern. In manual "S" mode, the driver can shift gears manually using the selector lever or the rocker switch on the steering wheel. In "D" mode, shifting occurs automatically. Whereas the Drivelogic switch for the three shifting programs is on the upper side, the P button for the parking lock is placed under the M logo.

■ The BMW Head-up Display, including M-specific display, projects information relevant to the journey into the driver's field of vision on the windshield.³

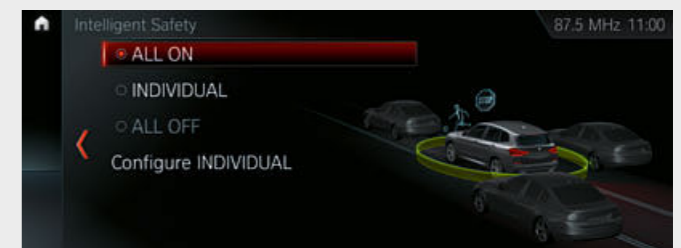

■ The M-specific exterior mirrors are a significant part of the sporty and dynamic M design. Attached to the body by an indicated double-bridge design, they convey a sense of precision engineering down to the last detail. The additional LED indicators are fitted perfectly into a long, narrow groove.

■ The M-specific roof spoiler with its prominent shape ensures more contact pressure on the rear axle at higher speeds. At the same time, it lends the three-quarter rear view characteristic sportiness and promises highly dynamic driving experiences.

■ The BMW Professional Multimedia navigation system is the latest generation of high-end multi-media interfaces. Operation is by a choice of direct-selection short cut keys, eight programmable favourite buttons, Touch control, Voice control or iDrive.

□ Driving Assistant Plus offers greater comfort and security during monotonous or complex driving situations. These can include traffic jams, stop-and-go traffic or long journeys through the city, on country roads or motorways, along with navigating junctions and lane changes.⁴

¹ The universal, wireless smartphone charging dock only functions with compatible smartphones. For smartphones without an inductive charging function, special charging cases are available to purchase via BMW Parts and Accessories for selected devices.

² The WiFi hotspot fulfils all in-vehicle requirements for use of the internet with the maximum LTE standard. Usage is subject to cost.

³ The contents shown by the BMW Head-up Display depend on equipment. The information in the BMW Head-up Display is not fully visible when viewed through polarised sunglasses.

⁴ Function may be limited in darkness, fog or bright glare.
