Forward Collision Warning

- ESP
- ABS
- TBA
- EBD

ESP System

ESP (Electronic Stability Program) is a safety system that helps prevent a car from losing control during a turn. It works by monitoring the car's position and adjusting the brakes and engine power to keep it stable. ESP is often combined with ABS and TBA for enhanced safety.

RESEARCH DESIGN
 The research design is a critical component of any study, as it determines the validity and reliability of the results. In this study, a mixed-methods approach was used, combining quantitative data from a survey and qualitative data from interviews. The survey was designed to measure the prevalence of the behavior, while the interviews provided insight into the reasons behind the behavior. The data collection process was rigorous, with a high response rate and a diverse sample of participants. The analysis of the data was thorough, using both statistical methods and thematic analysis to identify key findings. The results of the study are presented in the following sections, highlighting the main findings and their implications for practice and policy.

CITROËN
STARCHIPOTIN
COMPTON

Il est possible de concevoir un véhicule qui soit à la fois agréable à conduire et respectueux de l'environnement. C'est ce que Citroën a réussi à faire avec le Starchipotin Compton. Ce concept car est une véritable révolution, car il est capable de se transformer en un véritable véhicule urbain. Il est équipé d'un moteur électrique et d'une batterie rechargeable qui permet de parcourir jusqu'à 100 km sans avoir besoin de faire le plein. De plus, il est doté d'un système de navigation qui permet de trouver le meilleur itinéraire pour éviter les embouteillages. Enfin, il est très agréable à conduire, grâce à son confort et à sa maniabilité. Le Starchipotin Compton est donc le véhicule idéal pour les villes.
