

CITROËN

NEW CITROËN
ë-C4 X ELECTRIC

During the 90s Le Tone had a major hit, "Joli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

1974

Citroën launches CX. It's the ultimate mix of technical innovation and advanced design with the engine and gearbox positioned together at the front. Sophisticated hydropneumatic suspension, concave rear screen and a futuristic dashboard help it to succeed amongst more ordinary rivals.

2019

The spectacular design of the 100% electric 19_19 Concept is inspired by aeronautics and pushes comfort to the extreme, with a lounge on-the-move experience created by intelligent suspension. It also provides autonomous driving, a personal assistant and a range of 500 miles.

CITROËN
Origins

CLICK ON THE LOGO
TO FIND OUT MORE

Discover the models that make up Citroën's extraordinary history, from 1919 to the present day.

1934

Citroën revolutionises the automotive landscape with Traction Avant. The famous name relates to its ground breaking front wheel drive engineering.

1939

Citroën launches 'TUB', a supremely practical modern design with a sliding side door: its successor is the famous Type H, above, launched in 1948.

1948

The much-loved 2 CV is created as a "safe and economical vehicle, able to carry 4 people on-board and 50 kg of luggage". More than 5 million are made.

1955

Unveiled to a stunned public at the 1955 Paris Motor Show, DS takes futuristic design to new heights. Its stunning aerodynamic shape, created by Flaminio Bertone, earns it the nickname 'flying saucer'. Under the skin it's just as advanced.

1968

It's a golden age for light and agile vehicles like Ami 6, Dyane and Mehari, a unique design for all roads and multi-purpose use.

1970

The modern looks and neat style of GS will see it remain one of the most aerodynamic and comfortable vehicles on the market for years to come. Equipped with a flat 4-cylinder engine and hydropneumatic suspension, this hatchback will go on to sell around 2.5 million units.

A CITROËN FOR EVERYONE

Around town or across the country, every Citroën provides pure comfort and a welcoming environment. It's always been this way. Today, Citroën gives you the choice between internal combustion engine and electric vehicles.

NEW CITROËN ë-C4 X ELECTRIC

EIGHT KEY FEATURES

ALL-ELECTRIC POWER

Up to 222 miles of range* for journeys which also deliver a blissfully quiet driving experience.

PAGES 10-11

THE ELEGANCE OF A FASTBACK WITH THE ATTITUDE OF AN SUV

An all-new concept: the aerodynamic roof line and raised wheel arches combine fastback and SUV styling.

PAGES 12-19

ADVANCED COMFORT SUSPENSION

For a "magic carpet ride" effect, all New ë-C4 X Electric models are equipped with suspension with progressive hydraulic cushions.

PAGES 22-23

ADVANCED COMFORT SEATS IN THE FRONT AND REAR

The welcoming seats are exclusive to Citroën, with a 15 mm layer of foam on the surface and high-density foam at the core. They provide a unique combination of visual, postural and dynamic comfort.

PAGES 24-25

SPACIOUS 510-LITRE BOOT

New ë-C4 X Electric has a very generous, extra-wide boot compartment which is easy to access thanks to its wide opening.

PAGES 28-29

SMART PAD SUPPORT FOR YOUR TABLET

This sturdy, secure, functional and retractable system is fully integrated into the dashboard.

PAGES 32-33

DIGITAL ASSISTANT WITH VOICE RECOGNITION

Simply say "Hello Citroën" to activate the new and intuitive My Citroën Drive Plus interface. It will answer your questions and do as you ask!

PAGES 34-35

COLOUR HEAD-UP DISPLAY, JUST ONE OF THE DRIVING ASSISTANCE TECHNOLOGIES

In addition to the colour head-up display system projected into the driver's field of vision, New ë-C4 X Electric is kitted out with a range of advanced technology to enhance safety and comfort.

ALL ELECTRIC POWER

New ë-C4 X's electric motor has 100 kW (136 hp) of power and 260 Nm of immediately available torque, taking it from 0 to 62 mph in 10 seconds in Sport mode. The traction battery, which has a capacity of 50 kWh has a warranty for 8 years or 100,000 miles for 70% of its charging capacity. In addition to its range (up to 222 miles based on the WLTP cycle), New ë-C4 X Electric has a Brake Mode which amplifies deceleration and recovers energy without you pressing the brake pedal. In town, New ë-C4 X allows you to access low emission zones, in addition to delivering the pleasure of all-electric driving, with no tailpipe CO₂ emissions and real savings on running costs.

STYLE

Unique and refined design

New ë-C4 X Electric joins the latest generation of the Citroën car family, providing a distinctive and elegant alternative to conventional medium-sized hatchbacks and SUVs. At 4.6 metres long, its distinctive profile gives the impression of leaping forwards. At the rear, elegant LED lights complement those at the front. Positioned on either side of the boot, they carry through into the corners and form an arrow shape on the sides of the car to emphasise its dynamic design.

ELEGANT AND AERODYNAMIC

New ë-C4 X Electric combines a resolutely innovative SUV design with fastback styling. The roof line flows seamlessly from the top of the windscreen through to the top of the boot. This body styling delivers a drag coefficient of 0.29. The front end stands out with a high and horizontal bonnet and chrome chevrons which stretch across the width of the body. The double-height front lamps use Citroën LED Vision lighting technology to provide maximum visibility. The air intake grilles use a "macro chevron" pattern which emphasises the vehicle's refinement. At the rear, gloss black inserts add further depth and elegance.

MODERN SUV ATTITUDE

Thanks to the large 690 mm wheels, New ë-C4 X Electric gives you an SUV-inspired driving position, which is higher than a conventional hatchback. The matt black wheel arch protectors and Airbump® panels with coloured inserts on the body sills enhance the feeling of robustness. At the rear, under the opening of the generous boot, is a sculpted bumper. Looking further up, an integrated spoiler sits at the top of the boot.

Hover over to see the ambiances

INTERIOR AMBIENCES

You will be attracted both by the modern attitude of New ë-C4 X Electric and by the well-being experienced on board. The interior ambiances make New ë-C4 X a calm and comfortable environment, no matter how long the journey.

The **Urban Grey** ambience combines the comfort and subtlety of padded, grey chevron cloth with black leather-effect fabric and a grey cloth band with a graphic screen-printed chevron pattern.

The **Alcantara® Grey** ambience exudes elegance through the combination of the Wind Grey Alcantara® and black leather-effect cloth.

The **Hype Black** ambience provides the universal distinction of padded, black grained leather, combined with black leather-effect fabric and a grey cloth band with a graphic screen-printed chevron pattern.

WELL-BEING

FOR UNRIVALLED ULTIMATE COMFORT

Contemporary and welcoming, New Citroën ë-C4 X's interior has been designed to ensure serenity reigns supreme. The CITROËN ADVANCED COMFORT® programme delivers innovative, technological and intelligent solutions to create well-being for drivers and passengers alike, and confirms Citroën's driving-comfort credentials. Four main themes are at the heart of this comfort engineering: the cocoon effect, practicality, fluidity and peace of mind.

FOR FURTHER INFORMATION

ADVANCED COMFORT SUSPENSION

New ë-C4 X Electric treats you to well-being on board and an exceptional driving experience thanks to its suspension with progressive hydraulic cushions, which gives you a real "magic carpet ride" effect for light compressions and decompressions and irons out any jolts when driving on uneven road surfaces. This Citroën innovation delivers a whole new experience of comfort.

ADVANCED COMFORT SEATS

Another exclusive Citroën innovation, the Advanced Comfort Seats on New ë-C4 X Electric provide you with several types of comfort. There is visual comfort with their clearly visible padding, welcoming comfort with immediate softness and support, and dynamic comfort thanks to the high-density foam at the core of the seats, which avoids any sagging over time. Finally, there is postural comfort by way of height adjustment for the front seats, not to mention the wide side and central armrests in both the front and the rear. In addition to the heating function, there is also the option of a massage function for the front seats, for even greater well-being.

EXCEPTIONAL INTERIOR SPACE

Inside New ë-C4 X Electric, you'll find an unrivalled feeling of inner peace and space. The rear passengers are particularly well treated, with very generous knee room of 198 mm. The vehicle width allows three people to sit in the rear in optimal comfort. In addition, intelligent and practical storage compartments have been fitted in every nook and cranny, with 16 open and closed spaces, giving a total storage volume of 33 litres.

SPACIOUS 510-LITRE BOOT

Inside the boot, a flat floor gives you a width of 1,010mm between the wheel arches and a maximum length of 1,079mm. Lifting large suitcases and other luggage in and out of the boot is easy thanks to an unobstructed loading sill. The boot aperture is also very wide. An extra storage space under the boot floor enables you to transport additional objects and neatly house the charging cable or cables for New ë-C4 X Electric.

REAL COMFORT ON BOARD

The ambience and brightness in New ë-C4 X Electric have been enhanced to ensure that every journey is a perfect experience. The minimal noise from the motor is complemented by high-quality acoustics, and the materials are warm and welcoming. Also, in addition to the substantial door and window glass area, there is the option of a wide, glazed electric sunroof. This bathes the whole passenger compartment in light. It is also fitted with a retractable sunblind for optimum control. A comprehensive set of equipment guarantees that everyone on board can travel at their ideal

temperature. In particular, this includes an automatic dual-zone air conditioning system with dedicated controls located on the central control panel for easier use, as well as heated front seats and a heated steering wheel (dependent on version). Passengers in the rear seats are also able to control the flow of air using air vents located at the rear of the centre console. The all-electric powertrain also provides ë-Comfort class transport, with a total absence of vibration, no noise or hesitations, plus immediately available torque.

INNER PEACE

Cutting-edge technology
for a peaceful experience

New ë-C4 X Electric has a complete connectivity package via Citroën's new-generation infotainment interface: intuitive navigation, connected services for greater comfort and safety, and high-performance systems.

The front passenger also benefits from the Citroën Smart Pad Support™, a clever retractable support system which is built into the dashboard, enabling you to secure a tablet device in complete safety.

Everything has been brought together to make every moment on board perfect.

PRACTICAL CONNECTIVITY EVERY DAY

The new intuitive My Citroën Drive Plus interface uses a 10-inch HD touchscreen. Designed to perform like a tablet, it can be personalised using a system of widgets. Your favourite content is automatically displayed on the instrument panel and on this new screen. You can change all of the content at any time, according to your needs. This interface also includes easy-to-use natural voice recognition, like a real personal assistant who understands what you're saying, answers your questions and does as you ask. To activate My Citroën Drive Plus using your voice, just say "Hello Citroën". You then have access to the weather forecast, navigation, music and your smartphone. Also, with the Colour Head-Up Display, the driver can keep their eyes on the road as the key driving information is displayed in your field of vision.

STAY CONNECTED

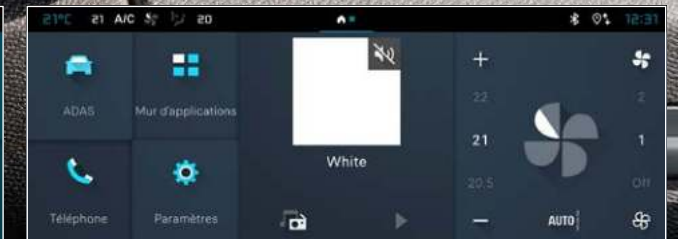

For greater comfort and safety, a package of Citroën Connect services is available to complement the My Citroën Drive Plus interface on New ë-C4 X Electric.

MY CITROËN PLAY

This system allows you to use your favourite smartphone apps without taking unnecessary risks. The service offers wireless connectivity and is compatible with Apple CarPlay® (including Siri voice control) and Android Auto™. Connecting via Wi-Fi, compatible apps are displayed directly on the central interface screen. In addition, New ë-C4 X Electric can be equipped with up to four USB ports and wireless smartphone induction charging.

MY CITROËN ASSIST

This geolocated emergency and assistance call service is free of charge, does not require a subscription and is available 24 hours a day, 7 days a week. It sends the appropriate help either automatically or by pressing the emergency or assistance button.

CHARGE WITH EASE

HOVER OVER
THE IMAGES TO SEE THE
DIFFERENT MODES

New ë-C4 X Electric has been designed to make your life easier, just like all the technology that you use every day. Using the touchscreen or the MyCitroën app, charging can be programmed or deferred, for example to take advantage of off-peak rates. The charging flap is colour-coded so that you can monitor the charging process, which can also be consulted remotely on the MyCitroën smartphone app. The connection is also very easy thanks to the ergonomic charging port. As for the charging cables, they can be stored under the boot floor.

3 TYPES OF CHARGING

Whether you are in town, on the motorway or at home, there are various solutions for charging New Citroën ë-C4 X Electric. The choice is yours, based on your needs.

STANDARD SOCKET

Using a domestic standard socket, for ad-hoc charging, a full battery charge takes 24 hours via a 3-pin charging cable (available as an accessory).

WALL BOX OR PUBLIC CHARGING POINT

A wall box socket can be installed at your home. This charges the battery from 0% to 100% in 7.5 hours with a single-phase power supply, and even in just 5 hours with a three-phase supply using the optional 11-kW charger. You can also benefit from public charging points using the included Type 2 cable.

RAPID CHARGING POINT

At a public rapid charging point offering 100 kW charging, the battery can be charged from 0% to 80% in just 30 minutes, i.e. at the rate of 6 miles per minute.

INTUITIVE ELECTRIC INTERFACE

Several interfaces are available to oversee the status of your New ë-C4 X Electric. They are intuitive and easy to both read and use. The dedicated display mode on the digital instrument panel allows you to view the gauge or the range and gives you access to three key pieces of information: the power indicator, the energy flow or the temperature settings.

The specific pages on the 10-inch touchscreen located in the centre of the dashboard display the operating status of the system, the settings for deferred charging of the battery and those for the cabin temperature preconditioning. When the car is charging, the screen displays, for example, the remaining time required to obtain a full charge; the range recovered, expressed in miles, or the percentage of battery charge recovered.

Customisable interface: to display your favourite content.

Statistics: to view your electrical consumption and optimise your driving.

Energy flow: to view how the electrical technology is working.

YOUR PERSONAL SPACE ON THE MY CITROËN APP

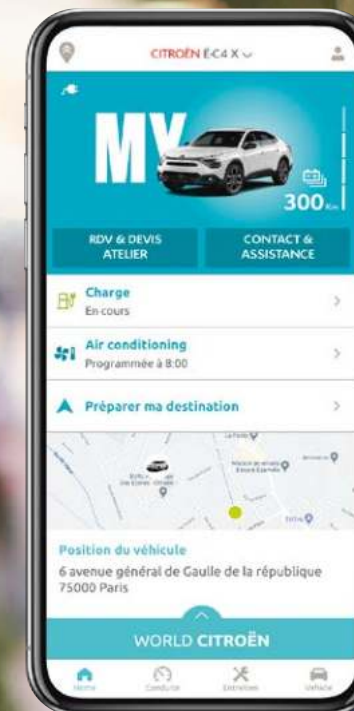

Stay connected at all times using the MyCitröen app, which you can download on your smartphone. It puts all of the important information about your vehicle at your fingertips, to help you get the most from the Citroën ownership experience.

In this way, you can:

- Locate your vehicle.
- Make an appointment at an authorised repairer.
- Consult the vehicle handbook.
- Consult the Maintenance and Warranty Guide.
- Contact Citroën Assistance.
- Access the key information on the battery charge status, the charging time and the remaining vehicle range.
- Obtain advice on charging.
- Programme a deferred charge.
- Start the cabin temperature preconditioning.

myCitröen

HIGHWAY DRIVER ASSIST

This semi-autonomous driving system combines the Adaptive Cruise Control with Stop & Go function and a system which keeps the vehicle in its lane. Since the speed and the trajectory are factored in by the system, the driver can partially delegate the driving, while maintaining their concentration on the road with their hands on the steering wheel. They can take back full driving control at any time.

SAFETY AND WELL-BEING ON BOARD

360 VISION

This function makes manoeuvres easier by displaying a view from above the car and of its 360° surroundings on the touchscreen. This technology offers three different views and selects the most suitable one for the manoeuvre in progress. The desired view can also be chosen manually.

BLIND SPOT MONITORING SYSTEM

Very useful on roads with more than one lane, this monitoring system indicates to the driver that there is a vehicle in the blind spots, using an orange LED located in the corner of the door mirrors.

REVERSING CAMERA WITH TOP REAR VISION

When reverse gear is engaged, the camera provides the view behind the vehicle on the touchscreen, enhanced with coloured lines, as well as a reconstructed 180° image of its rear surroundings. When approaching an obstacle, the camera zooms in automatically.

PROXIMITY KEYLESS ENTRY AND START

This system allows you to lock, unlock and start your vehicle while keeping the key on your person. The vehicle recognises its driver as they approach.

ACTIVE SAFETY BRAKE

This emergency braking system reduces the risk of collisions. It works from speeds of 3 mph with fixed or moving objects and with pedestrians. If a risk of collision is detected, an alert is given to the driver. If the driver does not react, the system applies the brakes automatically.

ACTIVE LANE DEPARTURE WARNING SYSTEM

This system works using a camera which recognises solid and broken lines. If the line is approached without the driver activating the indicators, the steering will gradually counter-steer to keep the vehicle in its initial lane. This technology helps to combat a lack of alertness on the part of the driver.

INTELLIGENT BEAM HEADLIGHTS

This function controls the switching between main and dipped beams, depending on the traffic, when vehicles are detected approaching from the opposite direction or overtaking. This system provides optimum lighting when driving at night.

EXTENDED TRAFFIC SIGN RECOGNITION AND SPEED RECOMMENDATION

This system informs you of the speed limit to observe. When a speed limit sign is detected by the camera, the driver can accept the speed recommendation and set this as their cruise or limit speed. "Stop", "No Entry" and "No Overtaking" signs are also detected.

With the added reassurance of a warranty, routine servicing and maintenance, as well as 24-hour roadside assistance, you are protected.

• CITROËN WARRANTY

Every new Citroën car has the benefit of a 3 year* warranty package, plus a 12 year anti-perforation** warranty and a 3 year paint warranty.

• CITROËN ASSISTANCE

Citroën Assistance brings rapid expert roadside assistance to you in an emergency in response to a telephone call. It comes free of charge for a full year and operates 24 hours a day in all parts of the UK and Europe. Services include nationwide recovery for both car and passengers, a home call service, replacement vehicle, hotel accommodation and vehicle storage if required. Please note, Citroën Assistance only applies to incidents covered by the new vehicle warranty, and excludes non-vehicle faults, such as running out of fuel, misfuelling, loss of keys, lock-ins, road traffic accidents and punctures/wheel changes. For more details, please contact Citroën at <https://www.citroen.co.uk/owner-services/emergency-assistance>

* 2 years' unlimited warranty. No-fee customer option of 1 year's Retailer provided warranty, only on cars sourced from Citroën UK Limited. Note: Retailer provided warranty is limited to 60,000 miles for cars.

** Against all internal to external perforation to bodywork or underbody.

• CITROËN MAINTENANCE

From roadside assistance to replacing wear and tear parts or regular servicing, with Citroën Maintenance you have total peace of mind. For a one-off fee or low monthly payment, our experienced engineers will take care of your Citroën, whatever happens. To find out more, contact your Citroën retailer or Citroën Authorised Repairer.

• CITROËN SERVICING

Available up to 1 year from your vehicle's registration date, but before its first chargeable service, a Citroën Servicing Package enables you to pay in advance for your vehicle's servicing needs for 3 years/35,000 miles. For further information, please contact your Citroën retailer.

• CITROËN MOT TEST

Once your vehicle is three years old, it requires an annual MOT Test. This is a legal requirement to check that it meets road safety and environmental standards. Our nationwide network of Citroën Authorised Repairers know your Citroën best, so if your vehicle's MOT Test is due, why not contact your local Citroën retailer? You can be confident that your vehicle will be looked after by one of our expert trained Citroën Technicians, nominated by DVSA as accredited MOT Testers. Plus, whilst your vehicle is with us, we'll carry out a free manufacturer diagnostic test, check for any new technical updates and carry them out for free - that's the advantage of getting your test done by the people who really know your Citroën.
