During the 90s Le Tone had a major hit, "Ioli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

FOR EVEN MORE
INTUITIVE TECHNOLOGY

Through the clear, smart phone inspired 7 inch touchscreen interface you can instantly access all the information offered by Citroën Connect Nav.* With a comprehensive range of real time navigation details, the system includes route planning, traffic information, potential hazards, weather conditions, fuel prices and even parking availability. Citroën Connect Nav can also read your emails and text messages audibly, so you never have to take your eyes off the road to read them. The Mirror Screen function allows you to use compatible applications from your smartphone on the 7 inch touchscreen (works with Apple CarPlay™, MirrorLink® and Android Auto).

In addition to the 7 inch touchscreen, there is also a 12 inch panoramic HD display, which brings you all the vital driving information. It also allows you to see 3D navigation maps in perfect HD in large format for easy reading. This impressive screen can be easily personalised to feature driving aids, multimedia or trip computer information. Wherever you go, you'll be very well connected*.

* Standard on Feel and Flair. Additional terms and conditions apply to connected services, including customer acceptance of location sharing prior to activation.

15 SAFETY AND DRIVING AIDS

SPEED LIMIT RECOGNITION SYSTEM

This technology recognises and conveys speed limits as you drive, displaying them clearly in the instrument cluster. All recorded limits can then easily be set in the cruise control or speed limiter.

360° PARK ASSIST

A prime example of technology making life easier, 360° Park Assist uses four cameras discreetly positioned around the car to make every manoeuvre stress free. You can choose the 360-degree view that gives you a bird's eye picture of any hidden obstacle around you, rear view for accurate reversing, or front panoramic views for both the left and right sides. When it comes to narrow gaps and tricky moves, nothing stands in your way.

REVERSING CAMERA

The moment you engage reverse gear, this system brings you a clear picture of what's going on behind you, complete with visual guides to assist accurate placement. The reversing camera uses the 12 inch panoramic HD screen where this is fitted, or the 7 inch touchscreen interface.

INTELLIGENT BEAM HEADLIGHTS

A great safety feature, your lights switch from main beam to dipped automatically when oncoming traffic is detected.

CORNERING FUNCTION

This extra light beam increases visibility and safety around tight bends and at junctions.

PARK ASSIST

All you need to do is find a parking space, then let Park Assist do the rest. It automatically manoeuvres the car perfectly into place while you simply look after acceleration and braking.

AUTOMATIC ELECTRONIC PARKING BRAKE

This system automatically applies the parking brake when the engine is switched off and releases when you move off. It is also possible to apply and release manually.

COFFEE BREAK ALERT

This system reminds the driver to take a break on long journeys, for example after 2 hours at average speeds over 40mph.

DRIVER ATTENTION ALERT

This ingenious driving aid assesses driver attention level by monitoring changes in vehicle distance from road markings. This function is particularly suitable for roads over 40mph.

ACTIVE BLIND SPOT MONITORING SYSTEM

This system gives you an instant visual warning if there's a vehicle in your side mirror's blind spot, and it's active from 10mph. If a driver doesn't react to the flashing warning and moves into the path of a hidden vehicle, Active Blind Spot Monitoring guides the steering back in the direction of safety.

ADAPTIVE CRUISE CONTROL WITH STOP FUNCTION*

Using its sensor, Adaptive Cruise Control detects the vehicle in front and automatically maintains a safe distance, selected by the driver in advance. The system will bring the car to a stop if necessary.

**This feature is available with BlueHDi 160 EAT8 and other engines without the Stop function.*

DRIVER ATTENTION ALERT SYSTEM

An advanced safety feature, Driver Attention Alert System can sense if a driver is becoming drowsy and send clear visual and audible signals – it knows when you need a break.

ACTIVE SAFETY BRAKE

Here's a reassuring emergency system that helps you to avoid low speed collisions. It detects obstacles such as vehicles that have stopped in front of you and provides a warning of possible impact. If the driver fails to react, the system will apply the brakes automatically.

EMERGENCY COLLISION ALERT SYSTEM

Using a front mounted sensor, the Emergency Collision Alert System alerts you to the risk of a collision and operates from 20mph.

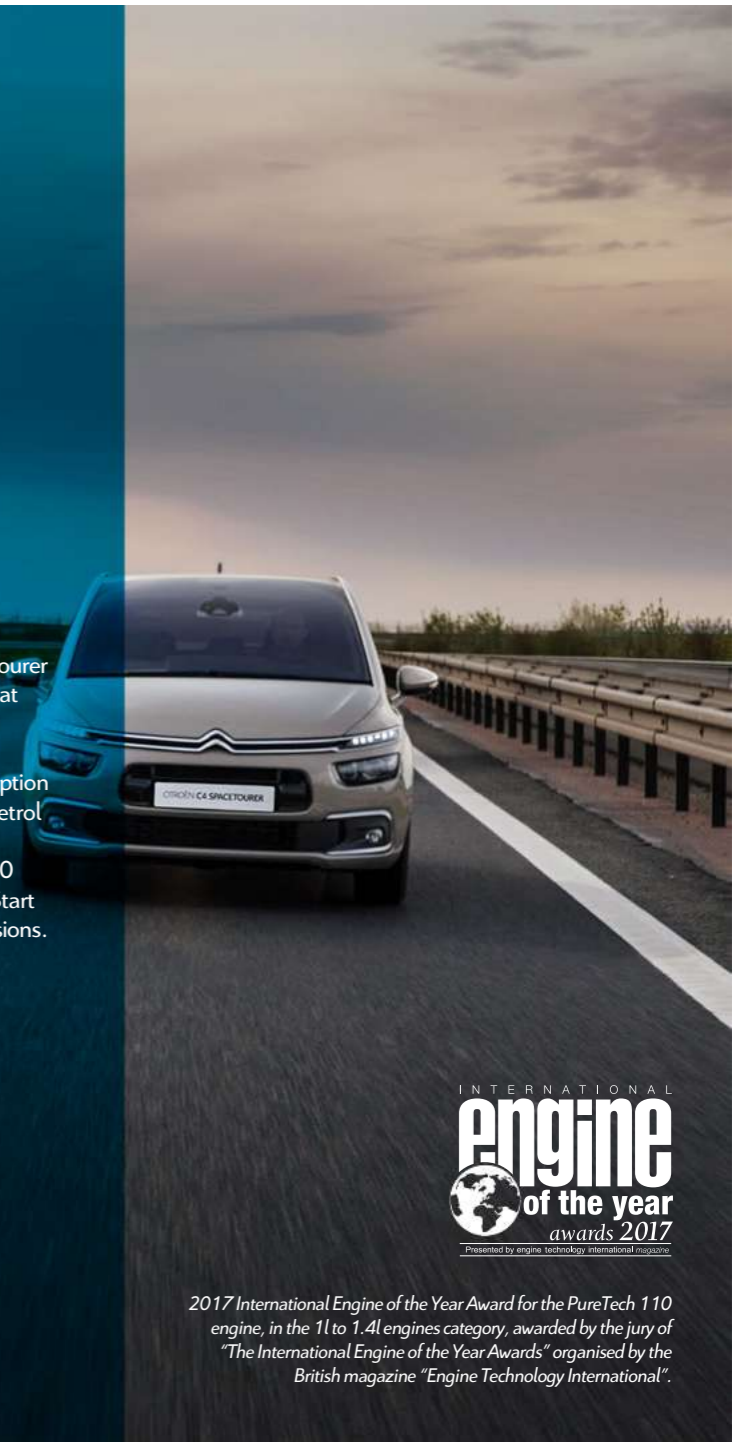

HILL START ASSIST

Hill Start Assist holds the car for 2 seconds when you pull away on steep inclines of over 3%, allowing you to make safe, smooth progress.

CLASS LEADING ENGINES

Citroën C4 SpaceTourer and Grand C4 SpaceTourer feature a range of diesel and petrol engines that simply don't compromise. Strong, flexible performers, they produce benchmark CO₂ emissions and achieve favourable fuel consumption figures. There are two refined and advanced petrol engines, the PureTech 130 and the PureTech 180, plus two diesel options, the BlueHDi 130 and 160. Each one is equipped with Stop & Start technology to minimise consumption and emissions.

2017 International Engine of the Year Award for the PureTech 110 engine, in the 1l to 1.4l engines category, awarded by the jury of "The International Engine of the Year Awards" organised by the British magazine "Engine Technology International".

EFFICIENCY WITHOUT COMPROMISE

Citroën C4 SpaceTourer and Grand C4 SpaceTourer are now available with the EAT8 automatic gearbox which also drives down CO₂ and maximises fuel efficiency, by managing engine speed smoothly and precisely during gear changes.

With a high pressure direct injection and a new generation Turbo of high efficiency (running to 240,000 rpm), the innovative and lively 3-cylinder turbo charged PureTech 130 S&S EAT8 engine provides very comfortable driving at low rpm. It displays the best low-end torque/performance of the market: 95% peak torque is available from 1,500 to 3,500 rpm for an optimal use in all situations.
