

**Move up to a Colt**

## The Mitsubishi Tradition of Excellence

The first model A was born in Japan. It was the first ever mass-produced automobile there, and Mitsubishi produced it, beginning — in 1917 — our tradition of total transportation.

Today, Mitsubishi is Japan's most progressive automobile manufacturer, turning out a full range of vehicles from fine passenger cars to rugged heavy-duty trucks and buses. The advanced technology of Mitsubishi engineering — and our tradition of excellence — is reflected in the glory of winning *time and time again* in the merciless competition of the world's most grueling rally circuits from Australia to Africa.

Japan's most progressive automobile manufacturer has what it takes to win, and that same winning excellence is built into every Mitsubishi Colt vehicle.

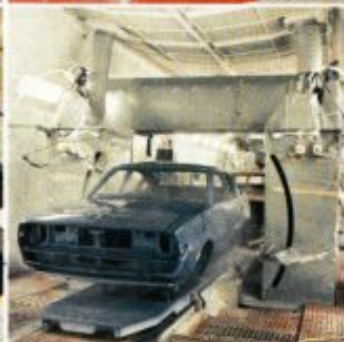

## Mitsubishi Surprises The Automotive World By Consistently Winning World-Famous Rallies — Quiet Engine Highlights Advanced Mitsubishi Technology

To win the rugged, internationally famous Australian Southern Cross Rally, or the prestigious East African Safari Rally is quite remarkable. But Mitsubishi has astounded the world by winning the Southern Cross Rally *five times in a row* and by winning the Safari Rally in *two of the last three years!* The Mitsubishi reputation for outstanding performance is proven year after year with more and more wins. What better proof is there of Mitsubishi quality, reliability, and engineering excellence!

The Mitsubishi "80" engine — a 4-cylinder engine as smooth as a V-8 — is economical, lightweight, and quiet. Two 'silent' shafts on either side of the crankshaft and turning at twice engine speed effectively cancel vibration to produce a remarkably quiet, but extremely powerful engine.

## Mitsubishi Meets Worldwide Demand For High Quality

Our factories produce fine Mitsubishi vehicles needed to satisfy ever-growing worldwide demand for Mitsubishi quality.

Nearly 75% of assembly work in our newly constructed Okazaki plant is automated for even better quality control. And, although we employ the most advanced technology, we know that quality ultimately depends on our people. So we make it pleasant for them to make quality cars for you. Therefore, our factory has an environment that promotes good workmanship. The before-and-after part of Mitsubishi quality control is our testing centre. There our vehicles are tested under every imaginable condition. All this assures you of the very best quality — always — from Mitsubishi.

Lancer Puts You In The Winner's Circle

# LANCER

The Lancer is a straightforward transportation machine. The toughest rally circuits have challenged Lancer again and again - and Lancer keeps winning and winning.

Of course Lancer is tough, but the attention we give creature comforts makes Lancer a comfortable travelling companion, too.

We designed everything with you in mind : the driver's seat is fully adjustable and the tilt adjustable steering column puts all controls at your command. The agile steering, front disc brakes, economical yet powerful engine mean Lancer is ready to take you where you want to go. Tough Mitsubishi Colt Lancer makes *you* the winner.
