Charles Morgan

As the oldest privately owned car business in the world, we retain the values which have always been at the heart of the company.  
Private ownership and a small management team allow us to innovate in ways no other car company can match.

We use the latest design, engineering and production methods in our vehicle development to deliver the unique morgan driving experience.  
Our emphasis is on only using technology where it counts, resulting in lightweight high performance cars.

100 years of bespoke manufacture using traditional coach building techniques with modern engineering has resulted in a sports car beyond comparison.  
Most of our craftsmen started as apprentices, our 155 staff have over 2000 years of combined experience between them.

Our morgan cars are crafted from renewable or sustainable raw materials and are powered by modern, economical engines.  
Unique lightweight body construction means all our cars can deliver low CO2 emissions.
