LISTEN

Fredo Viola, singer/songwriter and multi-media artist, with multiple depths to his music.

Ultimately, his music and visuals are just a means for him to release his emotional state. It's like sculpting. Sound design shapes his experiences, just like Cube shapes city driving.

Cube is different. It's got many sides. Its asymmetric design brings a whole new look and feel to the streets. But ultimately, it is just an ingenious way to get more out of urban travel.

Welcome to a new creative space in the city.

Words and sound by Fredo Viola.

CHALLENGE IS WHAT WE DO AT NISSAN

We say we make cars with the belief that travelling is more than a journey from A to B. We claim our cars are made to add to your confidence, to make you feel ready to go anywhere at any time and for any unforeseen challenge you might encounter.

You challenge us to « prove it ».

PROVE IT. NOW

RAIN | Nissan designs cars to weather every storm. The Shower Test recreates all the wet conditions they're ever likely to face, from an overnight drizzle to a full downpour, and identifies any leaks, areas of corrosion or component failure. So you're always home and dry – wherever you are.

WIND | Nissan builds cars with renewable energy. In 2005, Nissan UK installed a wind-farm and reduced CO₂ emissions by over 3000 tons a year. With six 660kW wind turbines generating enough electricity to supply 1800 homes, 1 out of 10 Qashqais are now produced by the wind.

HEAT | Nissan creates cars for quality over time. Seat fabrics are tested in up to 150000 cycles, 3 separate times against wear and tear caused by heat and humidity, using 33 different tests. Leather seams are tested against abrasion in up to 20000 cycles. That way, you can relax in long-lasting comfort.

CUBE GUARANTEES YOU ENJOY YOUR DRIVE FOR LONGER WITH A:

- 3-YEAR WARRANTY
- 6 YEAR ANTI-CORROSION WARRANTY
- 18,000 MILE SERVICE INTERVAL.

Maximizing your mobility with minimum impact on the environment, the Nissan Green Programme reclaims, recycles and renews its resources and is on target for zero emissions by 2012.

ELECTRIC VEHICLES ARE THE FUTURE OF URBAN MOBILITY:

A technology leader for 100% CO₂-free EVs, Nissan is proving it with concept cars Pivo, Mixim and Cube. Nothing is cleaner.

We see **SHIFT_** as an invitation. To challenge whatever feels too familiar. To open your mind to the unfamiliar. To ask the questions no one else is asking. And to find answers no one else can. At Nissan, we do this every day. And it shapes everything we do. The result is a line-up of vehicles that represents a pure, uncompromising shift from the ordinary.
